SUMMARY: In accordance with the requirements of the Privacy Act, the Public Health Service (PHS) is publishing notice of a proposal to alter system of records 09-25-0074, "Clinical Research: Veterans Administration Bladder and Prostate Cancer Clinical Trials, HHS/NIH/NCI."

The purpose of the alteration is to modify an existing system of records into an umbrella system by broadening both the categories of individuals under this system and the purposes for which the system is used. The name of the system of records is also being changed to reflect the alteration. The new name is "Clinical Research: Division of Cancer Biology and Diagnosis Patient Trials, HHS/NIH/NCI."

PHS invites interested persons to submit comments on the proposed alteration on or before July 11 1983.

DATE: PHS has sent a report of Altered System to the Congress and to the Office of Management and Budget on June 1, 1983. The alteration of this system of records will be effective 60 days from the date submitted to OMB unless PHS receives comments on the alteration which would result in a contrary determination.

ADDRESS: Comments should be addressed to the NIH Privacy Act Coordinator at the address listed below. Comments received will be available for inspection during office hours in Room 3B03, Building 31, at that address.

FOR FURTHER INFORMATION CONTACT: Dr. Kenneth Thibodeau, NIH Privacy Act Coordinator, Building 31, Room 3B07, 9000 Rockville Pike, Bethesda, MD 20205 or call 301-496-4606. This is not a toll-free number.

SUPPLEMENTARY INFORMATION: At present, this system covers patient studies undertaken by the National Cancer Institute (NCI), Division of Cancer Biology and Diagnosis (DCBD) in connection with the Veterans Administration. The proposed alteration will broaden the categories of individuals, which has been limited to those in bladder and prostate cancer studies, to include participants in other patient studies of DCBD. DCBD intends to expand and diversify the scope of its patient studies to include patients with other types of cancer, individuals being tested for possible cancer, and normal controls, and to include research on biological markers to detect cancer and to monitor treatment. This expansion is consistent with the mission of DCBD to plan and direct NCI research activities relating to cancer biology and diagnosis. Rather than create a separate system of records to describe records maintained in individual research projects, DCBD is modifying an existing system of records, 09-25-0074, so that it may cover the records of any patient studies undertaken by the Division, when these records fall under the definition of system of records in the Privacy Act.

NCI has modified the description of categories of individuals in the system notice to include the full range of persons studied by DCBD. To reflect the expanded coverage, NCI has changed the name of the system from "Clinical Research: Veterans Administration Bladder and Prostate Cancer Clinical Trials, HHS/NIH/NCI" to "Clinical Research: Divisionof Cancer Biology and Diagnosis Patient Trials, HHS/NIH/NCI." The "System Location" and "Safeguards" sections of the notice have been changed to reflect the expansion of the system. In addition, the "Purpose section has been clarified to describe the various types of research that may be undertaken by DCBD.

The research supported by this system may involve both scientists on the staff of NCI and other scientists working under contracts awarded competitively by NCI or under agreement with other Federal agencies, such as the Veterans Administration, NCI may award research contracts to hospitals and clinics, to educational and research institutions, to State or local government agencies, or to commercial enterprises.

NCI will organize and maintain the records collected under this system according to the particular study in which they are collected. Records will not be entered into a general or comprehensive data base, nor will there be any general index identifying all persons who are subjects of records in the separate studies covered by this system. However, NCI is treating the separate sets of records as a single system under the Privacy Act (1) because all of the sets of records serve the same biomedical research purposes and contain similar types of data, (2) in order to apply consistent policies and practices in the maintenance of such records, and (3) to make it easier for subject individuals to obtain notification of, or access to, their records.

No changes are being proposed in the routine uses established for this system.

This system notice was last published in the **Federal Register** on October 13, 1982 (47 FR 45812-13). We are republishing the system notice in its entirety below to incorporate the proposed alteration.

Dated: June 3, 1983.

Wilford J. Forbush,

Deputy Assistant Secretary for Health Operations and Director, Office of Management.

09-25-0074

SYSTEM NAME:

Clinical Research: Division of Cancer Biology and Diagnosis Patient Trials, HHS/NIH/NCI.

SECURITY CLASSIFICATION:

None.

SYSTEM LOCATION:

Building 12, NIH
9000 Rockville Pike
Bethesda, MD 20205

and at hospitals and clinics, educational and research institutions, Federal, State or local government agencies, and

private facilities under contract to the National Cancer Institute (NCI), National Institutes of Health (NIH). Write to system manager for a list of current locations.

CATEGORIES OF INDIVIDUALS COVERED BY THE SYSTEM:

Cancer patients, individuals undergoing biopsies, and normal controls in clinical studies of the Division of Cancer Biology and Diagnosis (DCBD).

CATEGORIES OF RECORDS IN THE SYSTEM:

Medical and treatment history.

AUTHORITY FOR MAINTENANCE OF THE SYSTEM:

Authority is provided by Sections 301, Research and Investigation, and Title IV, Part A, National Cancer Institute, of the Public Health Service Act (42 U.S.C. 241, 281–286).

PURPOSE(S):

This system is used to support research:

(1) To compare cancer diagnostic tests;

(2) To develop statistical methodology;

(3) To trace the natural history of the cancer under study, and

(4) To develop, evaluate and verify biological markers for early cancer detection and for monitoring treatment success.

ROUTINE USES OF RECORDS MAINTAINED IN THE SYSTEM, INCLUDING CATEGORIES OF USERS AND THE PURPOSES OF SUCH USES:

Disclosure may be made to HHS contractors, grantees and collaborating researchers and their staff in order to accomplish the research purpose for which the records are collected. The recipients are required to comply with the Privacy Act with respect to these records.

Disclosure may be made to a congressional office from the record of an individual in repsonse to an inquiry from the congressional office made at the request of that individual.

Disclosure may be made to a contractor when the Department contemplates that it will contract with a private firm for the purpose of collating, analyzing, aggregating or otherwise refining records in this system. Relevant records will be disclosed to such a contractor. The contractor shall be required to comply with the Privacy Act with respect to such records.

In the event of litigation where the defendant is (a) the Department, any component of the Department, or any employee of the Department in his or her official capacity; (b) the United States where the Department determines that the claim, if successful, is likely to directly affect the operations of the Department or any of its components; or (c) any Department employee in his or her individual capacity where the Justice Department has agreed to represent such employee, for example in defending against a claim based upon an individual's mental or physical condition and alleged to have arisen because of activities of the Public Health Service in connection with such individual, the Department may disclose such records as it deems desirable or necessary to the Department of Justice to enable that agency to present an effective defense, provided that such disclosure is compatible with the purpose for which the records were collected.

POLICIES AND PRACTICES FOR STORING, RETRIEVING, ACCESSING, RETAINING AND DISPOSING OF RECORDS IN THE SYSTEM:

STORAGE:

Records are stored in files and on computer tapes and discs.

RETRIEVABILITY:

Records are retrieved by coded identification number.

SAFEGUARDS:

Measures to prevent unauthorized disclosures are implemented as approriate for each location and for the particular records maintained in each project. Each site implements administrative, physical and procedural safeguards such as the following:

Authorized Users: employees who maintain records in this system are instructed to grant regular access only to physicians, scientists and support staff of the National Cancer Institute and its contractors whose duties require the use of such information. One-time and special access by other employees is granted on a need-to-know basis as specifically authorized by the system manager.

Physical Safeguards Records are kept and computer terminals are kept in limited-access areas, where access is strictly controlled as described immediately above.

Offices are locked during off-duty hours. Input data for computer files is coded to avoid individual identification.

Procedural Safeguards: Access to computer files is controlled through security codes known only to authorized users. Access codes are changed frequently.

Contractors who maintain records in this system are instructed to make no further disclosure of the records except as authorized by the system manager.

Privacy Act requirements are specifically included in contracts. NCI contract officers and project officers oversee compliance with these requirements.

The particular safeguards implemented at each site are developed in accordance with chapter 45–13, "Safeguarding Records Contained in Systems of Records," of the HHS General Administration Manual, supplementary chapter PHS.hf: 45–13, and part 6, "ADP Systems Security," of the HHS ADP Systems Manual.

RETENTION AND DISPOSAL:

Records are retained in accordance with NIH Records Control Schedule, item 3000–G–3. The records control schedule may be obtained by writing to the system manager at the address below.

SYSTEM MANAGER(S) AND ADDRESS:

Computer Systems Manager, DCBD, Landow Building, Room 5C08, NIH, 7910 Woodmont Avenue, Bethesda, MD 20205

NOTIFICATION PROCEDURE:

Write to System Manager to determine if a record exists. The requester must also verify his or her identity by providing either a notarization of the request or a written certification that the requester is who he or she claims to be and understands that the knowing and willful request for acquisition of a record pertaining to an individual under false pretenses is a criminal offense under the Act, subject to a five thousand dollar fine.

An individual who requests notification of or access to a medical/dental record shall, at the time the request is made, designate in writing a responsible representative who will be willing to review the record and inform the subject individual of its contents at the representative's discretion.

RECORD ACCESS PROCEDURES:

Same as notification procedures. Requesters should also reasonably specify the record contents being sought.

CONTESTING RECORD PROCEDURES:

Contact the official under notification procedures above, and reasonably identify the record and specify the information to be contested, and state the corrective action sought, and your reasons for requesting the correction, with supporting evidence to justify it.

RECORD SOURCE CATEGORIES:

Hospitals, medical schools, universities, research institutions, commercial institutions, state agencies,

other U.S. Government agencies, patients and normal volunteers, physicians, research investigators, and other collaborating personnel.

SYSTEMS EXEMPTED FROM CERTAIN PROVISIONS OF THE ACT:

None.

[FR Doc. 83-15500 Filed 6-8-83; 8:45 am]
BILLING CODE 4140-01-M

Privacy Act of 1974; Proposed Major Alteration to Existing System of Records

AGENCY: Public Health Service, Health and Human Services Department.

ACTION: Notification of Proposed Major Alteration to an Existing System of Records: 09-30-0041, "Participants in Drug Abuse Research Studies Supporting New Drug Applications," HHS/ADAMHA/NIDA.

SUMMARY: In accordance with the requirements of the Privacy Act, the Public Health Service (PHS) is publishing a notice of a proposed altered system of records, to be renamed "Participants in Drug Abuse Research Studies Supporting New Drug Applications," HHS/ADAMHA/NIDA, in the Alcohol, Drug Abuse, and Mental Health Administration (ADAMHA), National Institute on Drug Abuse (NIDA). The system is currently entitled "Subject-Participants in a Drug Abuse Research Study on Naltrexone." We propose to alter the existing system to incorporate a second study with a narcotic agonist, LAAM (levo-alpha-acetylmethadol), thus creating an umbrella system. PHS invites interested parties to submit comments on the proposed alteration on or before July 11, 1983.

We are not proposing changes to the nature of the routine use for this system of records but are rewording it to accommodate the LAAM study. This technical revision, in and of itself, does not require a public comment period. Additional technical changes to accommodate the LAAM study also appear elsewhere in the system notice.

DATES: PHS has sent a Report of An Altered System to the Congress and the Office of Management and Budget (OMB) on June 1, 1983. The altered system of records will be effective 60 days from the date submitted to OMB, unless PHS receives comments on the revisions which would result in a contrary determination.

ADDRESS: Please address comments to: Privacy Act Officer, Office of Extramural Policy and Project Review, National Institute on Drug Abuse, Alcohol, Drug Abuse, and Mental Health Administration, 5600 Fishers Lane, Room 10-42, Rockville, Maryland 20857.

Comments received will be available for inspection at the same address, from 8:00 a.m. to 4:00 p.m., Monday through Friday.

FOR FURTHER INFORMATION CONTACT: Harold M. Ginzburg, M.D., M.P.H., Project Officer, National Institute on Drug Abuse, Alcohol, Drug Abuse, and Mental Health Administration, 5600 Fishers Lane, Room 10-A-38, Rockville, Maryland 20857, Telephone: (301) 443-6697. This is not a toll-free number.

SUPPLEMENTARY INFORMATION: One purpose of the system is to compile and maintain information (data base) required by the Food and Drug Administration (FDA) in the development and approval of new drug applications for naltrexone, a narcotic antagonist, and under the proposed alteration, LAAM (levo-alpha-acetylmethadol), a narcotic agonist. (A narcotic antagonist is a substance which negates the effect of opiates. A narcotic agonist is a psychoactive substance that acts like a natural narcotic. A new drug application is a notice to FDA that a pharmaceutical company believes they have enough data to demonstrate the safety and efficacy of a substance to satisfy FDA requirements for marketing the substance.) NIDA will also analyze the aggregate data to determine the effectiveness of naltrexone and LAAM in various treatment environments and modalities.

Altering the existing system is more practical and appropriate than creating a separate system because of the similar nature of the contents and uses of the two sets of records. Both sets of records provide data that are and will be used in determining the effectiveness of therapeutic uses of drugs of abuse through examination of the pattern of life events of drug abusers during the period of time they were enrolled with the participating drug abuse treatment programs. The records in the system were collected under, and are subject to, the protective restrictions of the Confidentiality of Alcohol and Drug Abuse Records Regulation (42 CFR Part 2).

NIDA will maintain the records in the LAAM study in the secure manner described in the system notice until FDA makes a determination on the new drug application. The contractor maintains records in the naltrexone study as described in the system notice. In both cases NIDA uses individually identified information only to identify and match data to the correct subject-participant in the event that FDA should require review of that record. Personal identifiers are deleted before any release of the information by NIDA.

One routine use is approved for the system which reads as follows: "Endo Laboratories, an ADAMHA contractor, uses the records in the system in order to accomplish the research purposes for which the records were collected. In the event of a followup study or continuation study because the contract has been terminated for convenience by the Government, the contractor may disclose records in this system to a subsequent ADAMHA contractor. The new contractor would be required to maintain Privacy Act safeguards with respect to such records and to comply with the confidentiality restrictions of 42 CFR Part 2."

We are altering the wording of the routine use to accommodate the LAAM study. The new wording reads as follows:

"ADAMHA contractors use the records in the system in order to accomplish the research purposes for which the records were collected. In the event of a followup study or continuation study, the responsible System Manager may disclose the records in this system at the direction of the responsible Project Officer to a subsequent ADAMHA contractor(s). Any new contractor(s) would be required to maintain Privacy Act safeguards with respect to such records and to comply with the confidentiality restrictions of 42 CFR Part 2."

Four other, related, alterations to the system are: (1) A new system location has been added; (2) the period of time in which the completed LAAM study occurred has been added; (3) the categories of individuals have been expanded to include the clients who sought to use LAAM as part of their treatment; and (4) retention time of the records has been increased to 15 years.

The system notice was published most recently in the **Federal Register** October 13, 1982 (47 FR 45466-45467). We are republishing the notice in its entirety below to incorporate the proposed alterations.

Dated: June 3, 1983.

Wilford J. Forbush,

Deputy Assistant Secretary for Health Operations and Director, Office of Management.

09-30-0041

SYSTEM NAME:

Subject-Participants in Drug Abuse Research Studies Supporting New Drug Applications, HHS/ADAMAHA/NIDA

SECURITY CLASSIFICATION:

None.

SYSTEM LOCATION:

DuPont Enterprises, 1000 Stewart Avenue, Garden City, New York 11530. Division of Clinical Research, National Institute on Drug Abuse, 5600 Fishers Lane, Room 10–A–38, Rockville, Maryland 20857.

CATEGORIES OF INDIVIDUALS COVERED BY THE SYSTEM:

Voluntary adult clients of federally-funded and other drug abuse treatment programs who have requested to receive naltrexone or levo-alpha acetylmethadol (LAAM) as part of their treatment. Data collection for LAAM began in 1975 and continued through September 1979; and, for naltrexone began in 1977 and will continue through 1983.

CATEGORIES OF RECORDS IN THE SYSTEM:

Demographic data, treatment outcome data, treatment process data, client locator information, and personal identifiers (name and assigned numerical identifier).

AUTHORITY FOR MAINTENANCE OF THE SYSTEM:

Drug Abuse Prevention, Treatment and Rehabilitation Act, Section 503 (21 U.S.C. 1193); Public Health Service Act, Sections 301(a) and 303(a) (42 U.S.C. 241(a) and 242a(a)).

PURPOSE(S):

1. To maintain information on the effectiveness of drugs of abuse in various treatment environments and modalities and changes in the behavior and characteristics of drug abusers who received these substances as part of their treatment regimen.

2. To provide data required by the Food and Drug Administration (FDA) to support new drug applications for various drugs of abuse. A new drug application is a notice to FDA that a pharmaceutical company believes they have enough data to demonstrate the safety and efficacy of a substance to satisfy FDA for marketing the substance. FDA may also use the records in a form which does not identify individuals in routine inspections FDA conducts in accordance with its responsibilities to develop standards on the composition, quality, safety, and efficacy of drugs administered to humans, and to monitor experimental usage of drugs.

ROUTINE USES OF RECORDS MAINTAINED IN THE SYSTEM, INCLUDING CATEGORIES OF USERS AND THE PURPOSES OF SUCH USES:

ADAMHA contractor(s) use the records in the system in order to accomplish the research purposes for which the records were collected. In the event of a followup study or continuation study the responsible Project Officer may disclose records in this system to a subsequent ADAMHA contractor(s). Any new contractor(s) would be required to maintain Privacy Act safeguards with respect to such records and to comply with the confidentiality restrictions of 42 CFR Part 2.

POLICIES AND PRACTICES FOR STORING, RETRIEVING, ACCESSING, RETAINING AND DISPOSING OF RECORDS IN THE SYSTEM:

STORAGE:

Interview forms, magnetic tapes, disks and microfiche in boxes in closed cabinets in a locked room with limited accesibility.

RETRIEVABILITY:

The records are indexed and retrieved by subject-particiant's name and unique numerical identifier. In order to relate the data collected to specific individuals, however, one must use the link file discussed under Safeguards.

SAFEGUARDS:

The safeguards which follow are in accordance with the DHHS Chaper 45–13 and supplementary Chapter PHS.hf: 45–13 in the HHS General Administration Manual and Part 6, "ADP System Security" in the HHS ADP Systems Security Manual.

Physical Security: For the naltrexone records, the contractor stores individually indentified forms in a locked room with controlled entry; i.e., only on the written authority of the professional staff member in charge of data handling and processing operations. The contractor staff enter the collected information onto computer tape or disks as soon after contact with the subject-participant as possible and store the computerized records in a secured area with access limited as above.

For the LAAM records, NIDA stores the individually indentified forms in a lockable cabinet in a secure room. Only authorized NIDA personnel; i.e., Division of Clinical Research Director or System Manager and their professional staff (research psychologist or research psychiatrist) and their support staff (program assistant, clerk-typist, or secretary) have access to the room with controlled entry. The room is in a building which has a 24-hour guard service and has controlled entry (picture identification sign in/out procedure) before and after normal working hours.

Another safeguard for both studies is that the forms containing subject identification information do not include any reference to the purpose of the study. The identification information is separate from any information that would suggest that the respondent is or has been in a drug abuse treatment program. In addition, the computer center being utilized for the naltrexone study has developed an extensive security system to protect computer account codes and data.

Technical Security: Access to the computerized records of the naltrexone study is protected by a computerized password routine which is changed periodically. In addition, the project staff complies with the contractor's DuPont enterprises standard procedures for safeguarding data. The link file system that identifies individuals with personal data has three components: (1) identification information (2) data base information, and (3) the link file, which contains identifying number pairs which match data with individuals. The advantage of this system is that one may use the baseline data directly for report generation, etc., without using the subroutines or accessing the personal information or link files.

Administrative Security: For the naltrexone study, the data management task leader, the project leader, or the project director provide technical supervision of all data collection and processing activities. Only authorized contract staff have access to the records (computerized and hard copy files) in the system. The contractor provides only aggregate data in reports to NIDA, FDA, or the public. Only the NIDA personnel mentioned previously and selected authorized contract staff have access to the stored LAAM records.

A Certificate of Confidentiality has been issued to researchers conducting the naltrexone study under 42 CFR Part 2a, Protection of Identity-Research Subjects. This authorization enables persons engaged in research on mental health, including research on the use and effect of psychoactive drugs, to protect the privacy of research subjects by withholding the names or other identifying characteristics from all persons not connected with the conduct of the research. Persons so authorized may not be compelled in any Federal, State, or local civil, criminal, administrative, legislative, or other proceedings to identify such individuals. The LAAM study was not conducted under a certificate of confidentiality. These regulations do not prohibit voluntary disclosure by the researcher.

However, records of both studies also are subject to 42 CFR Part 2, the confidentiality of alcohol and Drug Abuse Patient Records Regulations (42 CFR 2.56), which state: "Where the content of patient records has been disclosed pursuant to [these regulations] for the purpose of conducting scientific research * * * information contained therein which would directly or indirectly identify any patient may not be disclosed by the recipient thereof either voluntarily or in response to any legal process whether Federal or State."

The contractor's Institutional Review Board has reviewed and approved the safeguards described above in accordance with 45 CFR Part 46 on the protection of human subjects for the naltrexone study.

RETENTION AND DISPOSAL

The naltrexone contractor staff destroys interview forms by shredding or burning immediately after they complete direct entry on magnetic tape or disk storage and verify the information. NIDA will destroy individual identification data and match-up information by shredding and burning 15 years after FDA completes the review and approves the new drug applications.

NIDA will retain the aggregate data tapes from both studies for research purposes. These tapes will not have any individually identifiable information. In accordance with the ADAMHA Records Control Schedule, the aggregate tapes will be retained for five years after the completion of the project. At that time, the tapes will be retired to the Federal Records Center and destroyed when they are 10 years old or when they are no longer needed for research purposes.

SYSTEM MANAGER(S) AND ADDRESS:

Project Officer, Naltrexone/LAAM Study, Division of Clinical Research, National Institute on Drug Abuse, Alcohol, Drug Abuse, and Mental Health Administration, 5600 Fishers Lane, Room 10-A-38, Rockville, Maryland 20857.

NOTIFICATION PROCEDURE:

An individual may determine if a record exists about himself or herself upon written request, with notarized signature if request is made by mail, or with suitable identification if request is made in person, to the System Manager at the address above. The following information should be included, if known: subject-participant's full name and a letter of request with notarized signature of the subject-participant of the record, any alias used, subject-participant's identification number, name of the researcher, name of substance, and approximate date of study participation.

An individual who requests notification of a medical record shall, at the time the request is made, must designate in writing a responsible representative who will be willing to review the record and inform the subject individual of its contents at the representative's discretion.

RECORD ACCESS PROCEDURES:

Same as Notification Procedures. Requesters should also reasonably specify the record contents being sought.

CONTESTING RECORD PROCEDURES:

Contact the official at the address specified under Notification Procedures above and reasonably identify the record, specify the information being contested, and state the corrective action sought, with supporting justification.

RECORD SOURCE CATEGORIES:

Research subject-participants, staff in the participating drug abuse treatment programs, written clinical evaluations, private physicians, counselors, psychiatrists, psychotherapists, family members, research assistants, and hospital records.

SYSTEMS EXEMPTED FROM CERTAIN PROVISIONS OF THE ACT:

None.

BILLING CODE 4140-01-M

DEPARTMENT OF HOUSING AND URBAN DEVELOPMENT

Office of the Assistant Secretary for Fair Housing and Equal Opportunity

[Docket No. N-83-1246]

Availability of Funding Under the Fair Housing Assistance Program; Noncompetitive Solicitation

Correction

In FR Doc. 83-14592 beginning on page 24468 in the issue of Wednesday, June 1, 1983, make the following corection.

On page 24468, second column, sixth line of the "**SUPPLEMENTARY INFORMATION**" section, "July 1, 1983" should read "June 1, 1983".

BILLING CODE 1505-01-M

Office of the Secretary

[Docket No. D-83-699]

Redelegation of Authority to Regional Private Market Financing Specialist (Financial Analyst, Series 1160), Region I

AGENCY: Office of Regional Housing, Region I (Boston), HUD.

ACTION: Redelegation of authority relating to financing and refinancing of housing under the United States Housing Act of 1937.

SUMMARY: The authority of the Secretary relating to financing and refinancing of housing assisted under the United States Housing Act of 1937, as amended, is currently redelegated from the Assistant Secretary for Housing to Regional Administrators, Deputy Regional Administrators, and Directors of the Offices of Regional Housing. The redelegation included the authority to further redelegate. Pursuant to that redelegation, the authority of the Director of the Office of Regional Housing, Region I, is further redelegated to the Regional Private Market Financing Specialist (Financial Analyst, Series 1160), Region I.

EFFECTIVE DATE: February 7, 1983.

FOR FURTHER INFORMATION CONTACT: Marvin H. Lerman, Regional Counsel, Department of Housing and Urban Development, JFK Federal Building, Room 801, Government Center, Boston, MA 02203, (617) 223-4321. This is not a toll-free number.

Accordingly: 1. The regional Private Market Financing Specialist (Financial Analyst, Series 1160), Region I is authorized to exercise the private market financing authority redelegated in Paragraph 1 of Redelegation of Authority, published at 48 FR 6593 (1983).

2. Authority: Paragraph 2 of Redelegation of Authority, published at 48 FR 6593 (1983).

Dated: February 7, 1983.

Nick Nibi,

Director, Office of Regional Housing, Region I.

BILLING CODE 4210-01-M

[Docket No. N-83-1248]

Notice of Submission of Proposed Information Collection to OMB

AGENCY: Office of Administration, HUD.

ACTION: Notice.

SUMMARY: The proposed information collection requirement described below has been submitted to the Office of Management and Budget (OMB) for review, as required by the Paperwork Reduction Act. The Department is soliciting public comments on the subject proposal.

ADDRESS: Interested persons are invited to submit comments regarding this proposal. Comments should refer to the proposal by name and should be sent to: Robert Neal, OMB Desk Officer, Office of Management and Budget, New Executive Office Building, Washington, D.C. 20503.

FOR FURTHER INFORMATION CONTACT: David S. Cristy, Acting Reports Management Officer, Department of Housing and Urban Development, 451 7th Street, S.W., Washington, D.C. 20410, telephone (202) 755–5310. This is not a toll-free number.

SUPPLEMENTARY INFORMATION: The Department has submitted the proposal described below for the collection of information to OMB for review, as required by the Paperwork Reduction Act (44 U.S.C. Chapter 35).

The Notice lists the following information: (1) The title of the information collection proposal; (2) the office of the agency to collect the information; (3) the agency form number, if applicable; (4) how frequently information submissions will be required; (5) what members of the public will be affected by the proposal; (6) an estimate of the total number of hours needed to prepare the information submission; (7) whether the proposal is new or an extension of reinstatement of an information collection requirement; and (8) the names and telephone numbers of an agency official familiar with the proposal and of the OMB Desk Officer for the Department.

Copies of the proposed forms and other available documents submitted to OMB may be obtained from David S. Cristy, Acting Reports Management Officer for the Department. His address and telephone number are listed above. Comments regarding the proposal should be sent to the OMB Desk Officer at the address listed above.

The proposed information collection requirement is described as follows:

Notice of Submission of Proposed Information Collection to OMB

Proposal: Single Family Default Monitoring System
Office: Housing
Form No.: HUD–92068A, 92068B and 92068C
Frequency of submission: Monthly/Quarterly
Affected public: Businesses or Other Institutions (except farms)
Estimated burden hours: 58,000
Status: Extension
Contact: Richard B. Buchheit, HUD, (202) 755–6672, Robert Neal, OMB, (202) 395–7316.

Authority: Sec. 3507 of the Paperwork Reduction Act, 44 U.S.C. 3507; Sec. 7(d) of the Department of Housing and Urban Development Act, 42 U.S.C. 3535(d).

Dated: April 11, 1983.

Judith L. Tardy,

Assistant Secretary for Administration.

[FR Doc. 83–15406 Filed 6–8–83; 8:45 am]

BILLING CODE 4210–01–M

[Docket No. N–83–1249]

Notice of Submission of Proposed Information Collection to OMB

AGENCY: Office of Administration, HUD.

ACTION: Notice.

SUMMARY: The proposed information collection requirement described below has been submitted to the Office of Management and Budget (OMB) for review, as required by the Paperwork Reduction Act. The Department is soliciting public comments on the subject proposal.

ADDRESS: Interested persons are invited to submit comments regarding this proposal. Comments should refer to the proposal by name and should be sent to: Robert Neal, OMB Desk Officer, Office of Management and Budget, New Executive Office Building, Washington, D.C. 20503.

FOR FURTHER INFORMATION CONTACT: David S. Cristy, Acting Reports Management Officer, Department of Housing and Urban Development, 451 7th Street, S.W., Washington, D.C. 20410, telephone (202) 755–5310. This is not a toll-free number.

SUPPLEMENTARY INFORMATION: The Department has submitted the proposal described below for the collection of information to OMB for review, as required by the Paperwork Reduction Act (44 U.S.C. Chapter 35).

The Notice lists the following information: (1) The title of the information collection proposal; (2) the office of the agency to collect the information; (3) the agency form number, if applicable; (4) how frequently information submissions will be required; (5) what members of the public will be affected by the proposal; (6) an estimate of the total number of hours needed to prepare the information submission; (7) whether the proposal is new or an extension or reinstatement of an information collection requirement; and (8) the names and telephone numbers of an agency official familiar with the proposal and of the OMB Desk Officer for the Department.

Copies of the proposed forms and other available documents submitted to OMB may be obtained from David S. Cristy, Acting Reports Management Officer for the Department. His address and telephone number are listed above. Comments regarding the proposal should be sent to the OMB Desk Officer at the address listed above.

The proposed information collection requirement is described as follows:

Notice of Submission of Proposed Information Collection to OMB

Proposal: Computation of Payments in Lieu of Taxes
Ofice: Housing
Form No.: HUD–52267
Frequency of submission: On occasion
Affected public: State or Local Governments
Estimated burden hours: 1,400
Status: New

DEPARTMENT OF THE INTERIOR

Bureau of Land Management

California Desert District; Annual Special Recreation Use Permits

AGENCY: Bureau of Land Management, Interior.

ACTION: Open period for accepting applications for annual Special Recreation Use Permits.

SUMMARY: Beginning June 1, 1983, The California Desert Conservation Area's District Manager will be accepting Special Recreation Permit applications for competitive and commercial off-road vehicle events in designated areas of the California Desert Conservation Area until July 31, 1983 for the 1984 calendar year. Applications will not be accepted after July 31, 1983. Applications for noncompetitive and non-commercial events must be filed 120 days before the event.

This notice is given under the authority of the Federal Land Policy and Management Act (Pub. L. 94–579), Executive Order 11644, as amended by Executive Order 11989, and Bureau of Land Management Code and Regulations 43 CFR 8372.

Send applications to District Manager, California Desert Conservation Area District Office, 1695 Spruce Street, Riverside, California 92507, or District Manager.

Dated: June 3, 1983.

Gerald E. Hillier

District Manager, California Desert District.

BILLING CODE 4310–84–M

[M–57645]

Montana; Notice of Realty Action—Sale of Public Land in Garfield County, Montana

AGENCY: Bureau of Land Management, Miles City District Office, Interior.

ACTION: Notice of Realty Action M–57645, Modified Competitive Sale of Public Land in Garfield County.

SUMMARY: The following described lands have been examined and identified as suitable for disposal by sale pursuant to Section 203 of the Federal Land Policy and Management Act of 1976, 43 U.S.C. 1713 (1976), at no less than the fair market value ($23,800.00).

Principal Montana Meridian

T. 20 N., R. 32 E.,
Sec. 7: SW¼SE¼;
Sec. 10: NW¼SE¼;
Sec. 22: E½E½, SW¼SE¼;
Sec. 23: N½NW¼.
Aggregating 360.00 acres.

The land will be offered for sale by sealed bid using modified competitive bidding procedures designating Mike Pierson of Brusett, Montana, as having the right to meet any high bid. The sale will be held on August 24, 1983.

The subject land is located approximately 50 miles west of Jordan, Montana, in the Missouri River Breaks. These lands are of moderately rough terrain with Ponderosa Pine and native grasses as the dominant vegetation. There is no water and no improvements present. Physical access is possible over ranch trails. There is legal access to the NW¼SE¼, Section 10; the remaining 320 acres is without legal access.

Private lands completely surround these lands. All of these lands are isolated, scattered parcels of 40 acres, 40 acres and 280 acres respectively.

The proposed sale is consistent with the Bureau's planning system, and Garfield County government officials have been notified.

Terms and Conditions

1. All minerals and the right to explore for, mine and remove will be reserved to the United States.
2. A right-of-way for ditches or canals will be reserved to the United States.
3. This sale is subject to any valid existing rights of record.

DATES: For a period of 45 days from the date of this notice, interested parties may submit comments to the District Manager, Bureau of Land Management, P.O. Box 940, Miles City, Montana 59301. Any comments will be evaluated by the Montana State Director, who may vacate or modify this realty action and issue a final determination. In the absence of any action by the State Director, this Notice of Realty Action will become the final determination of the Department of Interior.

FOR FURTHER INFORMATION: Information relating to this sale, including the land report/environmental assessment, is available at the Miles City District Office, west of Miles City, Montana.

SUPPLEMENTARY INFORMATION:

Bidder Qualifications: The bidder must be a U.S. citizen or, in the case of a corporation, subject to the laws of any state or the U.S. A state, state instrumentality or political subdivision submitting a bid must be authorized to hold property. Any other entity submitting a bid must be legally capable of holding and conveying lands under the laws of the State of Montana. Bids must be made by the principal or authorized agent.

Bid Standards: No bid will be accepted for less than the appraised fair market value $23,800.00. All bids must be for all of the land identified in this notice.

Method of Bidding: The land will be sold by sealed bid. Each bid must be accompanied by a certified check, postal money order, bank draft or cashier's check, made payable to the Bureau of Land Management for not less than one-fifty of the bid amount.

The sealed bid envelope must be marked in the lower left hand corner as follows: Public Land Sale M–57645, August 24, 183.

The sealed bid must be received at the following address prior to August 24, 1983. Bureau of Land Management, Montana State Office, P.O. Box 30157, Billings, Montana 59107.

If two or more envelopes containing valid bids of the same amount are received, the highest bid shall be determined by drawing. The drawing, if required, shall be held immediately following the opening of the sealed bids. The highest qualifying bid shall then be publicly declared.

Modified Bidding: For a period of 30 days following the date of sale, Mike Pierson of Brusett, Montana, the designated bidder, will be offered the right to meet the highest qualifying bid. The designated bidder must submit a bid of at least the fair market value prior to the sale date in order to be considered under the modified bidding provisions. If he meets the highest bid, the land will be sold to him, and the other bid will be returned. His refusal to meet the highest bid or to submit any bid at all prior to the sale date shall constitute a waiver of such bidding provisions.

Final Details: Once a high bid is accepted, the successful bidder shall submit the remainder of the full bid price within 30 days. Failure to submit the required amount within the allotted time will result in forfeiture of the deposit, and the lands will be offered to the next qualifying bidder. If the public lands are not sold on the sale date, they may remain available for sale on a continuing basis until sold.

Dated: June 3, 1983.

Robert A. Teegarden,

Acting District Manager.

BILLING CODE 4310–84–M

[M–56542]

Montana; Notice of Realty Action—Modified Competitive sale of Public Land in Garfield County, Montana

AGENCY: Bureau of Land Management, Miles City District Office, Interior.

ACTION: Notice of Realty Action M–56542, Modified Competitive Sale of Public Land in Garfield County.

SUMMARY: The following described lands have been examined and identified as suitable for disposal by sale pursuant to Section 203 of the Federal Land Policy and Management Act of 1976, 43 U.S.C. 1713 (1976), at no less than the fair market value ($6,000.00):

Principal Montana Meridian

T. 19 N., R. 35 E.,
Sec. 3: E½SE¼
80.00 acres.

The land will be offered for sale by sealed bid utilizing modified competitive bidding procedures on August 24, 1983.

The subject land is located approximately 20 miles west of Jordan, Montana. The lands are isolated from other public lands, difficult and

uneconomical to manage and are not suitable for management by another federal agency. The subject lands have been thoroughly examined and there are no public values which would be lost due to disposal. This sale is consistent with the Bureau's planning efforts, and local county government officials have been contacted. This 80 acres is adjacent to a county road and has physical and legal access. The terrain is flat, and vegetation is sagebrush/grassland mix without any trees or brush present. There is no water on these lands. Mr. Clark Murnion has an authorized permit for a fence on these lands. The transfer of this tract into private ownership will benefit the public interest and provide for better land management.

Terms and Conditions

The terms and conditions applicable to this sale are:

1. All minerals will be reserved to the United States, together with the right to explore, prospect for, mine and remove same under applicable law and regulations;
2. A right-of-way for ditches or canals will be reserved to the United States in accordance with 43 U.S.C. 945;
3. The sale of these lands will be subject to all valid existing rights and reservations of record;
4. If Clark Murnion is not the successful bidder, the successful bidder must compensate Mr. Murnion for the fence he has an authorized permit for, as per 43 CFR 4120.6–6(c).

DATE: For a period of 45 days from the date of this notice, interested parties may submit comments to the District Manager, Bureau of Land Managment, at the address shown below. Any adverse comments will be evaluated by the BLM Montana State Director, who may vacate or modify this realty action and issue a final determination. In the absence of any action by the State Director, this realty action will become the final determination of the Department of Interior.

FOR FURTHER INFORMATION CONTACT: Information relating to the sale, including planning documents, environmental assessment and land report, is available for review at the Miles City District Office, west of Miles City, Miles City, Montana.

SUPPLEMENTARY INFORMATION:

Bidder Qualifications: The bidder must be a U.S. citizen or, in the case of a corporation, subject to the laws of any state or the U.S. A state, state instrumentality or political subdivision submitting a bid must be authorized to hold property. Any other entity submitting a bid must be legally capable of holding and conveying land or interests therein under the laws of the State of Montana. Bids must be made by the principal or his agent.

Bid Standards: No bid will be accepted for less than the appraised fair market value of $6,000.00 and bids must include all of the land identified in this notice.

Method of Bidding: The land will be sold by sealed bid. Each bid must be accompanied by a certified check, postal money order, bank draft or cashier's check, made payable to the Bureau of Land Management for not less than one-fifth of the amount bid.

The sealed bid envelope must be marked in the lower left hand corner as follows:

Public Sale M–56542
August 24, 1983

The sealed bid must be received at the following address prior to August 24, 1983. Bureau of Land Management, Montana State Office, P.O. Box 30157, Billings, Montana 59107.

If two or more envelopes containing valid bids of the same amount are received, the determination of which is to be considered the highest bid shall be by drawing. The drawing, if required, shall be held immediately following the opening of the sealed bids. The highest qualifying sealed bid shall then be publicly declared.

Modified Bidding: For a period of 30 days following the date of the sale, Clark Murnion of Jordan, Montana, the designated bidder, will be offered the right to meet the highest qualifying bid. The designated bidder must submit a bid of at least the fair market value prior to the sale date in order to be considered under the modified bidding provisions. If he meets the highest bid the land will be sold to him, and the other bid will be returned. His refusal to meet the highest bid or to submit any bid at all prior to the sale date shall constitute a waiver of such bidding provisions.

Final Details: Once a bid is accepted, the successful bidder shall submit the remainder of the full bid price within 30 days. Failure to submit the required amount within the 30-day time period will result in forfeiture of the deposit, and the lands will be offered to the next qualifying bidder. If the public lands are not sold on the sale date, they may remain available for sale on a continuing basis until sold.

Dated: June 3, 1983.

Robert A. Teegarden,

Acting District Manager.

BILLING CODE 4310–84–M

[Exchange CA 13381]

Realty Action; Public Lands in Humboldt County, Calif.; Correction

In FR Doc. 82–23314, pages 37709 and 37710 of the Thursday, August 26, 1982 issue, the following tract of public land was indentified for disposal by exchange case Serial No. CA 12776:

T. 2 S., R. 1 W., Humboldt Meridian,
Sec. 11, SW¼SE¼;
Sec. 13, N½NW¼, SE¼NW¼;
Sec. 14, N½NE¼, NE¼NW¼.
Containing 280.0 acres, more or less.

This parcel will not be a part of Exchange CA 12776. It has been determined that that parcel remains suitable for disposal and will become a part of Exchange Serial No. CA 13881 under the provision fo Pub. L. 91–476, an Act to provide for the establishment of the King Range National Conservation Area (84 Stat. 1067) and Section 206 of the Federal Land Policy and Management Act of 1976 (90 Stat. 2756).

The Pacific Lumber Company, Scotia, California 95565 has filed notice to acquire the above described land in exchange for the following described privately owned lands.

Humboldt Meridian

Lots 1, 2, 3, 4, 8 and 9 in Block 115; and Lot 11 in Block 151 of Tract No. 42, Shelter Cover Subdivision as per Map recorded in Book 14, Pages 73 to 138 inclusive of Maps, in the office of the County Recorder of said County, as Amended by Amending Map recorded in Book 15, Pages 64 to 116 inclusive of Maps, in the office of the County Recorder of said County.

Excepting Therefrom all the water and water rights in, under, or flowing over said property or appurtenant thereto and 50% of all oil, gas and other mineral and hydrocarbon substances below a plan of 500 feet beneath the surface thereof, but without the right of surface entry, all as reserved by The Bank of California, National Association, a national banking association, in Deed recorded June 24, 1980, under Recorder's Serial No. 12185, in Book 1615, Page 19, of Official Records, in the office of the County Recorder of said County.

Containing 2 acres, more or less.

A mineral investigation has been made on the public land and no minerals were found. There will be reserved to the United States in the applied for lands, a right-of-way thereon for ditches and canals constructed by the authority of the United States (43 U.S.C. 945).

The publication of this notice in the **Federal Register** shall segregate the applied for public land from all other forms of appropriation under the public land laws, including the mining laws, for a period of two years. This exchange is expected to be consumated before the end of that period.

Detailed information concerning the exchange, including the environmental analysis and the record of non-federal participation, is available for review at the Eureka Resource Area Office, BLM, 1585 J Street, P.O. Box II, Arcata, California 95521.

Dated: June 2, 1983.

Edwin G. Kallas,

Associate District Manager.

BILLING CODE 4310-81-M

Utah; Grazing Management Program for Tooele Planning Area

AGENCY: Bureau of Land Management, Interior.

ACTION: Notice of Availability of Draft Environmental Impact Statement.

SUMMARY: Pursuant to Section 102(2)(c) of the National Environmental Policy Act of 1969 and a 1975 Federal Court ruling, the Bureau of Land Management (BLM) has prepared a Draft Environmental Impact Statement (EIS) for the Tooele grazing management program in Tooele and small portions of Juab, Box Elder, Utah, and Salt Lake Counties.

The Draft EIS examines four alternative management programs: (1) Proposed Action—No Action, (2) Emphasize Wildlife Habitat, (3) Emphasize Livestock Forage, and (4) Preferred Alternative—Balanced Use. The objective of the alternatives is to provide land use management on the basis of multiple use long-term sustained yield of the natural resources on 1.5 million acres of public land.

The alternatives examine proposed levels of grazing use ranging from 87,327 to 119,835 animal unit months (AUMs) for livestock and from 31,683 to 36,491 AUMs for big game. Rangeland improvements would accompany the proposed levels of forage use in alternatives 2, 3 and 4.

Copies of the Draft EIS will be available on or after June 3, 1983 from the Salt Lake District BLM Office at 2370 South 2300 West, Salt Lake City, Utah 84119. Public reading copies of the Draft EIS will be available for review at the following locations:

Office of Public Affairs, Bureau of Land Management, Interior Building, 18th and C Street N.W., Washington, D.C.

Utah State Office, Bureau of Land Management, University Club Building, 136 East South Temple, Salt Lake City, Utah.

In order to be considered in the Final EIS, comments on the Draft EIS should be submitted by August 2, 1983 to the Salt Lake District Manager, Bureau of Land Management, 2370 South 2300 West, Salt Lake City, Utah 84119. Oral and/or written comments will be accepted at a public hearing to be held July 14, 1983 at 7:00 p.m. at the Tooele County Courthouse. Persons who wish to comment at the public hearing should contact the Salt Lake District Manager.

Dated: May 26, 1983.

Roland G. Robison,

Utah State Director.

BILLING CODE 4310-84-M

Bureau of Reclamation

Santa Margarita Project, Calif.; Intent To Prepare a Supplemental Environmental Statement

Pursuant to Section 102(2)(C) of the National Environmental Policy Act of 1969, the Department of the Interior plans to prepare a Supplemental Environmental Statement (SES) on the proposed Santa Margarita Project near Fallbrook, California. A 3-year study will be conducted to supplement an existing Final Environmental Impact Statement (FES 76-32) and a Planning Report completed in 1971.

The purpose of the proposed project is to supply (11,540 acre-feet per year) supplemental municipal and industrial water to the Fallbrook Public Utility District and the United States Marine Corps Base at Camp Pendleton, supplemental irrigation water to the Fallbrook Public Utility District, and provide flood control to the Marine Base. In addition, the project would provide recreation, fish and wildlife enhancement, and regulation of imported water. The project would consist of two dams (Fallbrook and De Luz) on the Santa Margarita River and conveyance lines to deliver the stored water. Fallbrook Dam would be a concrete dam 185 feet high and would form a 36,150 acre-foot reservoir. De Luz Dam would be an earth or concrete dam 204 feet high and would form a 100,000 acre-foot reservoir (plus 40,000 acre-feet of flood surcharge).

Alternatives considered in previous studies include: (1) two dams consisting of a 36,500 acre-foot Fallbrook Reservoir and a 175,000 acre-foot De Luz Reservoir; (2) one dam consisting of a 175,000 acre-foot De Luz Reservoir; and (3) no action. These alternatives will also be reevaluated and discussed in the SES.

A public involvement program is being conducted to inform the interested public and to obtain their input. The first public meeting served as a scoping session to identify any new environmental issues that should be studied or addressed in the SES. The meeting was held on February 25, 1982, at Potter Junior High School in Fallbrook, California, at 7:30 p.m.

For additional information, please contact: Gary L. Bryant, LC-760, Lower Colorado Region, Bureau of Reclamation, P.O. Box 427, Boulder City, Nevada 89005, Telephone: (702) 293-8522.

Dated: June 3, 1983.

R. N. Broadbent,

Commissioner.

BILLING CODE 4310-09-M

INTERSTATE COMMERCE COMMISSION

Motor Carriers; Decision Notice; Finance Applications

As indicated by the findings below, the Commission has approved the following applications filed under 49 U.S.C. 10924, 10926, 10931 and 10932.

We find:

Each transaction is exempt from section 11343 of the Interstate Commerce Act, and complies with the appropriate transfer rules.

This decision is neither a major Federal action significantly affecting the quality of the human environment nor a major regulatory action under the Energy Policy and Conservation Act of 1975.

Petitions seeking reconsideration must be filed within 20 days from the date of this publication. Replies must be filed within 20 days after the final date for filing petitions for reconsideration; any interested person may file and serve a reply upon the parties to the proceeding. Petitions which do not comply with the relevant transfer rules at 49 CFR 1181.4 may be rejected.

If petitions for reconsideration are not timely filed, and applicants satisfy the conditions, if any, which have been imposed, the application is granted and they will receive an effective notice. The notice will recite the compliance requirements which must be met before the transferee may commence operations.

Applicants must comply with any conditions set forth in the following

decision-notices within 20 days after publication, or within any approved extension period. Otherwise, the decision-notice shall have no further effect.

It is ordered:

The following applications are approved, subject to the conditions stated in the publication, and further subject to the administrative requirements stated in the effective notice to be issued hereafter.

By the Commission, Review Board Members Parker, Joyce and Fortier.

Agatha L. Mergenovich,

Secretary.

Please direct status inquiries to Team 4 at (202) 275–7669.

Volume OP4–FC–343

MC–FC–81436, filed May 12, 1983. By decision of June 1, 1983 issued under 49 U.S.C. 10926 and the transfer rules at 49 CFR Part 1181, the Review Board approved the transfer to ALPHA TOURS, INC., of Camden, NJ, of Certificate No. MC–136596 (Sub-No. 1), issued December 11, 1973, (Sub-No. 4), issued November 7, 1980, and (Sub-No. 5), issued July 14, 1982, to APACHE TOURS, INC., of Willingboro, NJ, authorizing the transportation of *passengers and their baggage*, (A) in special and charter operations, (1) beginning and ending in the Townships of Bristol, Middletown, Falls, and Newton (Bucks County), PA, and extending to points in Delaware, Maryland, New Jersey, New York, Virginia, and DC, (2) beginning and ending at Willingboro, NJ and extending to points in AR, CT, DE, FL, GA, IL, IN, KS, ME, MD, MA, MI, MN, MO, NH, NJ, NY, NC, OH, PA, RI, SC, TN, VT, VA, WV, and DC, and (3) beginning and ending in the Townships of Bristol, Middletown, Falls, and Newton (Bucks County), PA, and extending to points in AR, CT, FL, GA, IL, IN, KS, ME, MA, MI, MN, NH, MO, NC, OH, PA, RI, SC, TN, VT, WV, and WI, and (B) in charter operations, beginning and ending at points in Bucks and Philadelphia Counties, PA, and extending to those points in the United States in and east of MN, KS, MO, AR, and LA. A temporary authority application has been filed. Representative: Diane Fitzpatrick, 1494 Federal St., Camden, NJ 08105.

BILLING CODE 7035–01–M

Motor Carriers; Permanent Authority Decisions; Decision-Notice

Motor Common and Contract Carriers of Property (fitness-only); Motor Common Carriers of Passengers (fitness-only); Motor Contract Carriers of Passengers; Property Brokers (other than household goods). The following applications for motor common or contract carriage of property and for a broker of property (other than household goods) are governed by Subpart A of Part 1160 of the Commission's General Rules of Practice. See 49 CFR Part 1160, Subpart A, published in the **Federal Register** on November 1, 1982, at 47 FR 49583, which redesignated the regulations at 49 CFR 1100.251, published in the **Federal Register** on December 31, 1980. For compliance procedures, see 49 CFR 1160.19. Persons wishing to oppose an application must follow the rules Under 49 CFR Part 1160, Subpart B.

The following applications for motor common or contract carriage of passengers filed on or after November 19, 1982, are governed by Subpart D of the Commission's Rules of Practice. See 49 CFR Part 1160, Subpart D, published in the **Federal Register** on November 24, 1982, at 49 FR 53271. For compliance procedures, see 49 CFR 1160.86. Persons wishing to oppose an application must follow the rules under 49 CFR Part 1160, Subpart E.

These applications may be protested only on the grounds that applicant is not fit, willing, and able to provide the transportation service or to comply with the appropriate statutes and Commission regulations.

Applicant's representative is required to mail a copy of an application, including all supporting evidence, within three days of a request and upon payment to applicant's representative of $10.00.

Amendments to the request for authority are not allowed. Some of the applications may have been modified prior to publication to conform to the Commission's policy of simplifying grants of operating authority.

Findings

With the exception of those applications involving duly noted problems (e.g., unresolved common control, fitness, or jurisdictional questions) we find, preliminarily, that each applicant has demonstrated that it is fit, willing, and able to perform the service proposed, and to conform to the requirements of Title 49, Subtitle IV, United States Code, and the Commission's regulations. This presumption shall not be deemed to exist where the application is opposed. Except where noted, this decision is neither a major Federal action significantly affecting the quality of the human environment nor a major regulatory action under the Energy Policy and conservation Act of 1975

In the absence of legally sufficient opposition in the form of verified statements filed on or before 45 days from date of publication, (or, if the application later becomes unopposed) appropriate authorizing documents will be issued to applicants with regulated operations (except those with duly noted problems) and will remain in full effect only as long as the applicant maintains appropriate compliance. The unopposed applications involving new entrants will be subject to the issuance of an effective notice setting forth the compliance requirements which must be satisfied before the authority will be issued. Once this compliance is met, the authority will be issued.

Within 60 days after publication an applicant may file a verified statement in rebuttal to any statement in opposition.

To the extent that any of the authority granted may duplicate an applicant's other authority, the duplication shall be construed as conferring only a single operating right.

Agatha L. Mergenovich,

Secretary.

Note. All applications are for authority to operate as a motor common carrier in interstate or foreign commerce, over irregular routes unless noted otherwise. Applications for motor contract carrier authority are those where service is for a named shipper "under contract."

[FR Doc. 83–15415 Filed 6–8–83; 8:45 am]
BILLING CODE 7035–01–M

Motor Carriers; Permanent Authority Decisions; Decision-Notice

Motor Common and Contract Carriers of Property (except fitness-only); Motor Common Carriers of Passengers (public interest); Freight Forwarders; Water Carriers; Household Goods Brokers. The following applications for motor common or contract carriers of property, water carriage, freight forwarders, and household goods brokers are governed by Subpart A of Part 1160 of the Commission's General Rules of Practice. See 49 CFR Part 1160, Subpart A, published in the **Federal Register** on November 1, 1982, at 47 FR 49583, which redesignated the regulations at 49 CFR 1100.251, published in the **Federal Register** December 31, 1980. For compliance procedures, see 49 CFR 1160.19. Persons wishing to oppose an application must follow the rules under 49 CFR Part 1160, Subpart B.

The following applications for motor common carriage of passengers, filed on or after November 19, 1982, are governed by Subpart D of 49 CFR Part 1160, published in the **Federal Register** on November 24, 1982 at 47 FR 53271. For compliance procedures, see 49 CFR 1160.86. Carriers operating pursuant to an intrastate certificate also must comply with 49 U.S.C. 10922(c)(2)(E). Persons wishing to oppose an application must follow the rules under 49 CFR Part 1160, Subpart E. In addition to fitness grounds, these applications may be opposed on the grounds that the transportation to be authorized is not consistent with the public interest.

Applicant's representative is required to mail a copy of an application, including all supporting evidence, within three days of a request and upon payment to applicant's representative of $10.00.

Amendments to the request for authority are not allowed. Some of the applications may have been modified prior to publication to conform to the Commission's policy of simplifying grants of operating authority.

Findings

With the exception of those applications involving duly noted

problems (e.g., unresolved common control, fitness, water carrier dual operations, or jurisdictional questions) we find, preliminarily, that each applicant has demonstrated that it is fit, willing, and able to perform the service proposed, and to conform to the requirements of Title 49, Subtitle IV, United States Code, and the Commission's regulations.

We make an additional preliminary finding with respect to each of the following types of applications as indicated: common carrier of property—that the service proposed will serve a useful public purpose, responsive to a public demand or need; water common carrier—that the transportation to be provided under the certificate is or will be required by the public convenience and necessity; water contract carrier, motor contract carrier of property, freight forwarder, and household goods broker—that the transportation will be consistent with the public interest and the transportation policy of section 10101 of chapter 101 of Title 49 of the United States Code.

These presumptions shall not be deemed to exist where the application is opposed. Except where noted, this decision is neither a major Federal action significantly affecting the quality of the human environment nor a major regulatory action under the Energy Policy and Conservation Act of 1975.

In the absence of legally sufficient opposition in the form of verified statements filed on or before 45 days from date of publication (or, if the application later becomes unopposed), appropriate authorizding documents will be issued to applicants with regulated operations (except those with duly noted problems) and will remain in full effect only as long as the applicant maintains appropriate compliance. The unopposed applications involving new entrants will be subject to the issuance of an effective notice setting forth the compliance requirements which must be satisfied before the authority will be issued. Once this compliance is met, the authority will be issued.

Within 60 days after publication an applicant may file a verified statement in rebuttal to any statement in opposition.

To the extent that any of the authority granted may duplicate an applicant's other authority, the duplication shall be construed as conferring only a single operating right.

Agatha L. Mergenovich,

Secretary.

Note.—All applications are for authority to operate as a motor common carrier in interstate or foreign commerce over irregular routes, unless noted otherwise. Applications for motor contract carrier authority are those where service is for a named shipper "under contract." Applications filed under 49 U.S.C. 10922(c)(2)(B) to operate in intrastate commerce over regular routes as a motor common carrier of passengers are duly.

Please direct status inquiries to Team Two at (202) 275–7293.

Volume No. OP2–252

Decided: June 1, 1983.

By the Commission, Review Board Members Joyce, Fortier, and Krock.

MC 96612 (Sub-15), filed April 26, 1983. Applicant: SEA-LAND FREIGHT SERVICE, INC., 100 West Harrison St., Seattle, WA 98106. Representative: B. Carlton Bailey, Jr., P.O. Box 800, Iselin, NJ 08830, 201–632–2229. Transporting *general commodities* (except classes A and B explosives and household goods), (1) between points in WA, on the one hand, and, on the other, points in AK, (2) between points in WA, and (3) between points in AK, under continuing contract(s) with (a) Budget Building Supply & Lumber, Inc., Knik Building Supply, Sohio Alaska Petroleum Company, and Union Oil Company, all of Anchorage, AK, (b) Dresser Industries, Inc., and IMCO Services, both of Houston, TX, (c) Alaska Distributors Co., of Seattle, WA, (d) Safeway Stores, Inc., of Bellevue, WA, (e) Toyota Motor Sales, U.S.A., Inc., of California, of Torrance, CA, and (f) Chevron U.S.A., Inc., of San Francisco, CA.

Decided: June 3, 1983.

By the Commission, Review Board Members Krock, Dowell, and Carleton.

MC 146807 (Sub-43), filed May 23, 1983. Applicant: S n W ENTERPRISES, INC., P.O. Box 1131, Wilkes Barre, PA 18701. Representative: Peter Wolff, 722 Pittston Ave. Scranton, PA 18505, (717) 342–7595. Transporting *plastic and rubber products*, between points in the U.S. (except AK and HI), under continuing contract(s) with Exxon Chemical Americas of Pottsville, PA.

MC 150556 (Sub-1), filed May 23, 1983. Applicant: KLOTH TRUCK & EQUIPMENT CO., P.O. Box 234, Sparta, IL 62286. Representative: Robert T. Lawley, 300 Reisch Bldg., Springfield, IL 62701. Transporting *petroleum products*, between points in Lyon County, KY, on the one hand, and, on the other, those points in IL on and south of Interstate Highway 70.

MC 167626 (Sub-1), filed May 23, 1983. Applicant: INTEGRATED DISTRIBUTION, INCORPORATED, One Century Dr., Parsippany, NJ 07054. Representative: Raymond L. Pucci, (same address as applicant), (201) 540–7963. Transporting *general commodities* (except classes A and B explosives, household goods and commodities in bulk), between points in the U.S. (except AK and HI), under continuing contract(s) with United Forwarding, Inc. of Omaha, NE.

MC 167626 (Sub-2), filed May 23, 1983. Applicant: INTEGRATED DISTRIBUTION, INCORPORATED, One Century Dr., Parsippany, NJ 07054. Representative: Raymond L. Pucci, (same address as applicant), (201) 540–7963. Transporting *general commodities* (except classes A and B explosives, household goods and commodities in bulk), between points in the U.S. (except AK and HI), under continuing contract(s) with Triangle PWC, Inc. of New Brunswick, NJ, and it subsidiaries.

MC 168187, filed May 20, 1983. Applicant: JOHN PENNINGTON, d.b.a. PENNINGTON TRUCKING, P.O. Box 505, Chandler, TX 75758. Representative: William Sheridan, P.O. Drawer 5049, Irving, TX 75062, (214) 255–6279. Transporting *general commodities* (except classes A and B explosives, household goods and commodities in

bulk), between points in AL, AZ, AR, CA, CO, IL, IN, KS, LA, MS, MO, NV, NM, OH, OK, OR, TN, TX, UT, WA, and WY, on the one hand, and on the other, points in the U.S. (except AK and HI).

BILLING CODE 7035-01-M

[Ex Parte No. 387; Sub-No. 945]

Rail Carriers; Burlington Northern Railroad Co.; Exemption for Contract Tariff, ICC-BN-C-0001 (FWD Series) (Wheat Flour)

AGENCY: Interstate Commerce Commission.

ACTION: Notice of Provisional Exemption.

SUMMARY: A provisional exemption is granted under 49 U.S.C. 10505 from the notice requirements of 49 U.S.C. 10713(e), and the above-noted contract tariff may become effective on one day's notice.[1] This exemption may be revoked if protests are filed.

DATE: Protests are due within 15 days of publication in the Federal Register.

ADDRESS: An original and 6 copies should be mailed to: Office of the Secretary, Interstate Commerce Commission, Washington, DC 20423.

FOR FURTHER INFORMATION CONTACT: Douglas Galloway, (202) 275-7278.

SUPPLEMENTARY INFORMATION: The 30-day notice requirement is not necessary in this instance to carry out the transportation policy of 49 U.S.C. 10101a or to protect shippers from abuse of market power; moreover, the transaction is of limited scope. Therefore, we find that the exemption request meets the requirements of 49 U.S.C. 10505(a) and is granted subject to the following conditions:

This grant neither shall be construed to mean that the Commission has approved the contract for purposes of 49 U.S.C. 10713(e) nor that the Commission is deprived of jurisdiction to institute a proceeding on its own initiative or on complaint, to review this contract and to determine its lawfulness.

This action will not significantly affect the quality of the human environment or conservation of energy resources.

(49 U.S.C. 10505)

Decided: June 3, 1983.

By the Commission, the Review Board, members Parker, Joyce, and Dowell.

Agatha L. Mergenovich,

Secretary.

[FR Doc. 83-15417 Filed 6-8-83; 8:45 am]

BILLING CODE 7035-01-M

---

[1] Note: Tariff supplements advancing contract's effective date shall refer to this decision for authority.

NATIONAL TRANSPORTATION SAFETY BOARD

Accident Reports; Safety Recommendations and Responses; Availability

Reports Issued:

Aircraft Accident Report—Pan American World Airways, Inc., Clipper 759, Boeing 727-235, N4737, New Orleans International Airport, Kenner, Louisiana, July 9, 1982 (NTSB/AAR-83/02) (NTIS Order No. PB83-910402).

Marine Accident Reports—Summary Format Issue Number 5—Reports Adopted August 1982 through December 1982 (NTSB-MAB-82-4) (NTIS Order No. PB82-916921).

Railroad Accident Reports—Brief Format Issue Number 3—1981 (NTSB/RAB-83/02) (NTIS Order No. PB83-917202).

Note.—Reports may be ordered from the National Technical Information Service (NTIS), 5285 Port Royal Road, Springfield, Virginia 22161, for a fee covering the cost of printing, mailing, handling, and maintenance. For information on reports call 703-487-4650 and to order subscriptions to reports call 703-487-4630.

Recommendations to:

Aviation—

Federal Aviation Administration: Mar. 25: A-83-13: Review all Low Level Wind Shear Alert System installations to identify possible deficiencies in coverage similar to the one resulting from the inoperable west sensor at New Orleans International Airport and correct such deficiencies without delay. *A-83-14:* Make appropriate distribution to the aviation community of information regarding (1) the location and designation of remote sensors of the Low Level Wind Shear Alert System (LLWSAS) at equipped airports, (2) the capabilities and limitations of the LLWSAS, and (3) the availability of current LLWSAS remote sensor information if requested from tower controllers. *A-83-15:* Record output data from all installed Low Level Wind Shear Alert System sensors and retain such data for an appropriate period for use in reconstructing pertinent wind shear events and as a basis for studies to effect system improvements. *A-83-16:* Emphasize to pilots on a continuing basis the importance of making prompt reports of wind shear in accordance with prescribed reporting guidelines and assure that Air Traffic Control personnel transmit such reports to pilots promptly. *A-83-17:* Require that Automatic Terminal Information Service advisories be amended promptly to provide current wind shear information and other information pertinent to hazardous meteorological conditions in the terminal area as provided by Center Weather Service Unit meteorologists, and that all aircraft operating in the terminal area be advised by blind broadcast when a new Automatic Terminal Information Service advisory has been issued. *A-83-18:* Evaluate methods and procedures for the use of current weather information from sources such as radar, Low Level Wind Shear Alert Systems, and pilot reports as criteria for delaying approach and departure operations which would expose the flight to low altitude penetration of severe convective weather. *A-83-19:* Study the feasibility of establishing aircraft operational limitations based on the data available from the Low Level Wind Shear Alert System. *A-83-20:* Make the necessary changes to display Low Level Wind Shear Alert System wind output data as longitudinal and lateral components to the runway centerline. *A-83-21:* Use the data obtained from the Joint Airport Weather Studies (JAWS) Project and other relevant data as a basis to (1) quantify the low-level wind shear hazard in terms of effect on airplane performance, (2) evaluate the effectiveness of the Low Level Wind Shear Alert System and improvements which are needed to enhance performance as a wind shear detection and warning system, and (3) evaluate the aerodynamic penalties of precipitation on airplane performance. *A-83-22:* As the data obtained from the Joint Airport Weather Studies (JAWS) Project become available (1) develop training aids for pilots and controllers to emphasize the hazards to flight from convective weather activity, (2) develop realistic microburst wind models for incorporation into pilot flight simulator training programs, and (3) promote the development of airborne wind shear detection devices. *A-83-23:* Expedite the development, testing, and installation of advanced Doppler weather radar to detect hazardous wind shears in airport terminal areas and expedite the installation of more immediately available equipment such as add-on Doppler to provide for detection and quantification of wind shear in high risk airport terminal areas. *A-83-24:* Encourage industry to expedite the development of flight director systems such as MFD-delta-A and head-up type displays which provide enhanced pitch guidance logic which responds to inertial speed/airspeed changes and ground proximity and encourage operators to install these systems. *A-83-25:* Recommend to air carriers that they modify pilot training on simulators capable of reproducing wind shear models so as to include microburst penetration demonstrations during takeoff, approach, and other critical phases of flight. *A-83-26:* Advise air carriers to increase the emphasis in their training programs on the effective use of all available sources of weather information, such as preflight meteorological briefings, ATIS broadcasts, control-provided information, PIREPS, airborne weather radar, and visual observations, and provide added guidance to pilots regarding operational (i.e., "go/no go") decisions involving takeoff and landing operations which could expose a flight to weather conditions which could be hazardous. *Apr. 21: A-83-33:* Issue an airworthiness directive (AD) making mandatory an inspection (as soon as

practical depending on availability of spare units and the capability to replace the defective units) for incorrect sockets specified in Sundstrand Data Control Service Bulletin No. 23 (Document No. 012-0118-123), dated August 2, 1982, titled "Indicating/Recording Systems—Digital Flight Data Recorder (DFDR) Model 573A—Connector Check/Replacement," and require replacement of incorrect connectors at the earliest possible date. *May 9: A-83-34:* Issue an airworthiness directive to make compliance with Cessna Service Letter SE69-16 compulsory. *May 19: A-83-35:* Standardize and disseminate immediately as an interim measure basic guidelines and methodology for controller stress and fatigue detection and management, similar to those currently in use by some flight surgeons and facility supervisors and those developed by the Federal Aviation Administration's Office of Aviation Medicine personnel, to the air traffic control supervisors to assist them to detect and alleviate stress and fatigue among controllers. *A-83-36:* Expedite the development and implementation of the Air Traffic Controller Performance Assessment Program currently being developed by the Federal Aviation Administration's Office of Aviation Medicine to assist air traffic control facility supervisors and managers to objectively and subjectively evaluate controller performance and to detect and alleviate stress and fatigue among controllers. *A-83-37:* Expedite the development and implementation of computer programming procedures at all appropriately equipped en route and terminal radar facilities by which less-than-standard aircraft separation occurrences are automatically detected and flagged for investigation and analysis of possible controller errors or pilot deviations. *A-83-38:* Institute air traffic control directives and procedures to require, when the assigned first-line supervisor is occupied working a control position, that there is appropriate and adequate direct supervision to ensure the detection and reporting of all controller errors or deviations, the detection and monitoring of fatigue and/or stress, and the control of each controller's workload. *A-83-39:* Revise immediately air traffic control directives to reduce or eliminate, possibly by means of an immunity program, the punitive nature of controller operational error/deviation investigations in order to encourage reporting of all incidents, with the view toward instituting prevention-oriented quality control measures and training and procedural improvements. *A-83-40:* Take action to improve compliance with existing directives and guidance to air traffic controllers and staff on the use of the Federal Aviation Administration sponsored National Aeronautics and Space Administration's Aviation Safety Reporting System program to supplement existing incident reporting programs, with the view toward instituting quality control measures and improvements in the air traffic control system. *A-83-41:* Take immediate action to assign adequate staff and to improve equipment capabilities at Flight Service Stations to provide more timely and adequate service to aviation users. *A-83-42:* Revise the criteria for lifting restrictions on air traffic control services to postpone planned increases in air traffic volume and services at facilities until sufficient controllers are trained and qualified and have gained sufficient experience to allow supervisors and key staff members to resume direct first-line supervision and oversight of operations. *A-83-43:* Take immediate action at all air traffic control facilities equipped with radar data recording equipment to staff the data systems specialist positions on an interim basis with persons who are sufficiently qualified to handle the computer equipment, so that continuous recording and data retrieval capability is reestablished.

Highway—

Arkansas Highway and Transportation Department: Apr. 27: H-83-7: Eliminate or reduce the illusional effects of a straighter road and the "wash-out" effects of headlight glare on State Highway 214 at the curved approach to its intersection with State Highway 18. *H-83-8:* Further improve the traffic control features on State Highway 214 at the curved approach to its intersection with State Highway 18. *H-83-9:* Identify similar locations with sharply curved approaches to intersections in Arkansas, determine the need for further traffic control improvements, and improve these locations as necessary.

Bureau of Motor Carrier Safety: May 9: H-83-21: Upon completion of the testing of the Tractor-Trailer Driver Training Standards, the Sample Model Curriculum, and final examination criteria, amend Part 391, "Qualifications of Drivers," of the Federal Motor Carrier Safety Regulations to include criteria and standards for the training of tractor-trailer drivers.

Research and Special Programs Administration: May 10: H-83-29: Revise 49 CFR Section 178.340-6, "Supports and Anchoring," and 49 CFR Section 178.340-7, "Circumferential Reinforcements," of 49 CFR Section 178.340, "General Design and Construction Requirements * * *" to prohibit appurtenance design configurations that create air cavities adjacent to external cargo tank sheet material and to eliminate exceptions based on provisions for venting or draining. *H-83-30:* Revise 49 CFR Section 177.824, "Retesting and Inspection of Cargo Tanks," to: (1) Require that all hazardous materials cargo tanks of mild and high strength, low alloy steel be subjected to several periodic external visual inspections annually, (2) Require that the thickness of cargo tank sheet material be inspected once each year using ultrasonic or equivalent techniques, (3) Require measurement of the thickness of appurtenances once each year that form air cavities adjacent to the cargo tank sheet material. If the thickness of the appurtenance material has corroded to a predetermined percentage of its manufactured thickness, require that access to the tank sheet material within the air cavity be made and that the thickness of the tank sheet material be measured, (4) Require that cargo tanks be placed out of service when the thickness of the tank sheet material has corroded to a specific predetermined percentage (consistent with stress levels that will insure operational safety) of its manufactured thickness.

Federal Highway Administration: May 10: H-83-25: Require an immediate inspection of a significant sample (at least 25 percent) of all hazardous material cargo tanks manufactured prior to June 1979 and which were fabricated with either mild or high strength, low alloy steels, to determine if tank sheet material thicknesses have deteriorated to limits likely to compromise the structural integrity of the cargo tank. When inspecting, using ultrasonic or equivalent techniques where possible, particular emphasis should be directed to the bottom of the cargo tank at locations where the tank sheet material is not accessible to visual inspection because of appurtenance attachment configurations that either form air cavities or otherwise negate tank sheet accessibility. where ultrasonic or equivalent techniques cannot be used, the thickness of the appurtenance material should be ascertained, and, if it has corroded to a predetermined percentage of its manufactured thickness, access to the tank sheet material should be made and the thickness of the tank sheet material should be determined. *H-83-26:* Require that hazardous material cargo tanks be placed out of service when the thickness of tank sheet material has been reduced to a predetermined percentage (consistent with stress levels that will insure operational safety) of its manufactured thickness. *H-83-27:* Develop and prescribe continuing motor carrier operational inspection requirements for hazardous material cargo tank sheet material thickness consistent with the results of the ultrasonic, or equivalent, inspection sampling program recommended by the Safety Board. *H-83-28:* Issue an On-Guard bulletin to alert motor carriers operating hazardous material cargo tanks of the findings in this incident and the Safety Board's recommendation for an ultrasonic or equivalent inspection sampling program. Urge operators to conduct frequent visual tank inspections directing special attention to areas adjacent to air cavities for evidence of corrosion and making certain that drain holes are not plugged. *May 17: H-83-23:* Expand the performance testing of the New Jersey barrier on curved roadway sections to include crash testing of heavier vehicles with higher centers of gravity such as 80,000-pound tractor-semitrailers and gasoline tank trucks. *H-83-24:* Include the testing of heavier vehicles with higher centers of gravity in current high-performance barrier research and development. In particular, encourage the design and development of barriers that can safely contain or redirect small passenger vehicles and heavier vehicles with higher centers of gravity, such as 80,000-pound tractor-semitrailers and gasoline tank trucks.

Board of Commissioners, Allegheny County, Pennsylvania: May 17: H-83-22: Conduct a traffic engineering investigation of the approaches to the Fleming Park Bridge to determine the safe speed for the approaches, and post signing as appropriate before the bridge is reopened to full traffic capacity.

California Department of Transportation: May 25: H-83-10: Evaluate and revise, where necessary, equipment requirements and

emergency procedures at the Caldecott Tunnel to provide early warning of an emergency to motorists in the event of a life-threatening emergency. *H–83–11:* Develop a state-wide emergency response plan and train tunnel employees in all phases of emergency operations, including smoke and toxic fumes management and immediate emergency response notification, and periodically conduct drills to determine employees' ability to perform the above operations under stress. *H–83–12:* Provide easily identifiable exit markings for adits in the Caldecott Tunnel. *H–83–13:* Prohibit passing and lane changes in vehicular tunnels in California. *H–83–14:* In cooperation with appropriate local authorities, survey all vehicular tunnels, and upgrade, where necessary, tunnel traffic controls, communication systems, firefighting equipment, and towing capabilities. *H–83–15:* Ban the movement of hazardous materials through vehicular tunnels where the relative risks of the tunnel route are higher than alternate routes.

Secretary, U.S. Department of Transportation: May 25: H–83–16: Review the Federal Highway Administration and the Urban Mass Transportation Administration programs that encourage joint use of rights-of-way and determine if construction of rapid rail systems in highway rights-of-way presents an unnecessary risk to the public from hazardous materials truck movements on adjacent roadways; if so, modify the safety criteria appropriately.

Alameda/Contra Costa (California) Transit District: May 25: H–83–17: Closely monitor the health of drivers with known medical problems, and when their health may adversely affect their ability to safely transport passengers, remove them from duty.

American Trucking Associations, Inc.: May 25: H–83–18: Inform its members of the circumstances of the accident that occurred on April 7, 1982, in the Caldecott Tunnel near Oakland, California, and stress the use by drivers of trucks transporting hazardous materials of alternate routes which avoid tunnels.

American Public Transit Association: May 25: H–83–19: Establish guidelines to assist public transit operators to better provide safe transportation for their passengers by ensuring that their drivers are physically qualified at all times to perform their jobs.

Armour Oil Company, San Diego, California: May 25: H–83–20: Review the delivery routes traveled by its hazardous materials transporters and make changes as necessary to insure compliance with Federal Motor Carrier Safety Regulations, and give top priority to the safe driving environment.

Railroad—

Baltimore and Ohio Railroad Company: Apr. 29: R–83–35: Increase the level of periodic supervisory road checks on the commuter passenger route between Brunswick, Maryland, and Washington, D.C. *R–83–36:* Expand its educational program for operating traincrews to instruct them about the effects of alcohol on performance of duties.

Washington (D.C.) Terminal Company: Apr. 29: R–83–37: Immediately institute supervisory checks of traincrews reporting for duty.

United Transportation Union: Apr. 29: R–83–38: Actively support the development and implementation of more meaningful alcohol abuse rules and procedures to curb use of alcohol by railroad operating employees during a specific period before they report for duty and while they are on duty. *R–83–39:* Disseminate to its local unions the facts and circumstances of the incident that occurred at Union Station in Washington, D.C. on February 14, 1983, and emphasize the dangers posed by alcohol abuse and the means suggested by the United Transportation Union for preventing such incidents.

Brotherhood of Locomotive Engineers: Apr. 29: R–83–40: Actively support the development and implementation of more meaningful alcohol abuse rules and procedures to curb use of alcohol by railroad operating employees during a specific period before they report for duty or while they are on duty. *R–83–41:* Disseminate to its local unions the facts and circumstances of the incident that occurred at the Union Station in Washington, D.C. on February 14, 1983, and emphasize the dangers posed by alcohol and drug abuse and the means suggested by the Brotherhood of Locomotive Engineers for preventing such incidents.

State of Maryland: Apr. 29: R–83–42: Require that State contracts with the Baltimore and Ohio Railroad Company specify that adequate supervisory checks be performed by the railroad at those points where commuter traincrews report to duty. *R–83–43:* Increase State railroad inspections of operating practices on Maryland Department of Transportation commuter trains.

States of Pennsylvania, New Jersey, New York, Connecticut, Massachusetts, New Hampshire, California, Illinois, Indiana, Michigan, and Wisconsin: Apr. 29: R–83–44: Require that State contracts with railroads and/or commuter railroad authorities specify that adequate supervisory checks be performed by the railroad at those points where commuter traincrews report to duty. *R–83–45:* Increase State railroad inspections of operating practices on commuter trains.

Seaboard System Railroad: May 24: R–83–46: Revise practices for developing waybills to require use of the hazardous material shipping description provided by shippers unless a change is approved by the person(s) originally selecting the shipping description. *R–83–47:* Revise practices to include emergency response guidance information on the hazard graph for tank cars containing residual quantities of hazardous materials classified as "empty." *R–83–48:* Periodically instruct and test traincrews and supervisory personnel on the procedures for using train documents to identify all cars transporting hazardous materials and the information to be provided to assist emergency response personnel. *R–83–49:* Require supervisory personnel arriving at the scene of an emergency to determine what information has been provided by traincrews to emergency response personnel, to verify the accuracy of the information provided, and to advise the on-scene coordinator of any errors or omissions in the initial information given by the traincrew. *R–83–50:* Revise the engineers' retraining program to require annual attendance at the train dynamics analyzer classes with special emphasis on correcting deficiencies observed by supervisors while evaluating the engineers' performance in service. *R–83–51:* Require engineers who fail to demonstrate proficiency in train handling during mandatory train dynamics analyzer classes to attend the engineers' training school and thereafter require that they demonstrate an ability to properly operate a train before being allowed to return to train service.

Office of Emergency Services, State of Virginia: R–83–52: Assist the Town of Colonial Heights and other jurisdictions, as necessary, in improving their emergency response programs for accidents involving hazardous materials, in better defining the responsibilities of the Emergency Services Coordinator for receiving and analyzing response related information and in developing more effective site security procedures.

Note.—Single copies of these recommendation letters are available on written request to: Public Inquiries Section, National Transportation Safety Board, Washington, D.C. 20594. Please include recommendation number in your request. Copies of recent recommendations are free of charge while supplies last. Recommendations that must be photocopied will be billed at a cost of 20 cents per page ($2 minimum charge).

H. Ray Smith, Jr.,

Federal Register Liasion Officer.

PEACE CORPS

Peace Corps Advisory Council; Meeting

AGENCY: Peace Corps.

ACTION: Peace Corps Advisory Council; Meeting.

SUPPLEMENTARY INFORMATION: In accordance with Section 10(a)(2) of the Federal Advisory Committee Act (5 U.S.C, Appendix I), notice is hereby given that an open meeting of the Peace Corps Advisory Council will be held on June 27 and 28 from 9:00 a.m. to 5:00 p.m. in Room 414 of the Peace Corps, 806 Connecticut Avenue, NW., Washington, D.C.

The purposes of the meeting are to conduct ongoing discussions of Peace Corps programs and meet with Peace Corps staff.

Further information on the meeting may be obtained by calling Phyllis Draper at (202) 254–6898.

Signed this 3rd day of June 1983, in Washington, D.C.

Loret Miller Ruppe,

Director.

BILLING CODE 6051-01-M

DEPARTMENT OF STATE

[Public Notice]

Agency Forms Submitted for OMB Review

AGENCY: Department of State.

ACTION: In accordance with the provisions of the Paperwork Reduction Act of 1980, the Department has submitted a proposed collection of information to the Office of Management and Budget for review.

Purpose: The proposed information collection is to be used by the Passport Office in cases where there is reaon to believe criminal statutes of the United States have been violated and also in connection with determining the nationality of a person born in the United States who has applied for a United States passport.

SUMMARY: The following summarizes the information collection proposal submitted to OMB:

(1) Type of request—reinstatement.

(2) Number of forms submitted—one.

(3) Form number—DSP-16.

(4) Title of information collection–Application for Confidential Verification of Birth.

(5) Frequency—On occasion.

(6) Respondents—Registrars of vital statistics.

(7) Estimated number of respondents–1,500.

(8) Estimated number of hours needed to fill out form–125.

Section 3504(h) of Public Law 96–511 does not apply.

Additional information or comments: Copies of the proposed form and supporting documents may be obtained from Gail J. Cook, Departmental Clearance Officer (202) 632–3602. Comments and questions should be directed to (OMB) Francine Picoult (202) 395–7231.

Dated: May 20, 1983.

Thomas M. Tracy,

Assistant Secretary for Administration.

[FR Doc. 15401– Filed 6-8-83; 8:45 am]

BILLING CODE 4710-24-M

[Public Notice 856]

Magnuson Fishery Conservation and Management Act; Applications for Permits to Fish in the United States Fishery Conservation Zone

The Magnuson Fishery Conservation and Management Act (16 U.S.C. 1801 *et seq.*) requires all foreign vessels fishing in the U.S. fishery conservation zone to have a permit. Section 204 of the Magnuson Act requires the Secretary of State to publish a summary of applications received.

Individual vessel applications for fishing in 1983 have been received from the Governments of Japan, Spain and Portugal.

If additional information regarding any application is desired, it may be obtained from: Fees, Permits, and Regulations Division (F/M12), National Marine Fisheries Service, Department of Commerce, Washington, D.C. 20235, (Telephone: (202) 634–7432).

Dated: May 24, 1983.

James A. Storer,

Director, Office of Fisheries Affairs.

Fishery codes and designation of regional councils which review applications for individual fisheries are as follows:

Code	Fishery	Regional Council
ADS	Atlantic Billfishes and Sharks	New England, Mid-Atlantic, South Atlantic, Gulf of Mexico, Caribbean.
BSA	Bering Sea and Aleutian Islands Trawl, Longline and Herring Gillnet.	North Pacific.
CRB	Crab (Bering Sea)	Do.
GOA	Gulf of Alaska	Do.
NWA	Northwest Atlantic	New England, Mid-Atlantic.
SMT	Seamount Groundfish (Pacific Ocean)	Western Pacific.
SNA	Snails (Bering Sea)	North Pacific.
WOC	Washington, Oregon, California Trawl.	Pacific.
PBS	Pacific Billfish and Sharks	Western Pacific.

Activity codes specify categories of fishing operations applied for are as follows:

Activity Code	Fishing Operations
1	Catching, processing, and other support.
2	Processing and other support only.
3	Other support only.

Nation/vessel name/vessel type	Application No.	Fishery	Activity
Japan:			
Keiyo Maru, Cargo/Transport Vessel	JA-83-0102	BSA, GOA	3
Hamayoshi Maru No. 63, Medium Stern Trawler.	JA-83-1187	BSA	1,2,
Spain:			
Joint Venture			
Kambope, Stern Trawler	SP-83-0056	NWA	2

Marbasa, SA of Spain and James D. O'Malley, Shoreside Company, P.O. Box 1070, Boston, Massachusetts 02205, have applied to engage in a joint venture fishery aimed at producing 1,100 metric tons of Loligo Squid between the months of September 1983 and March 1984.

Portugal:			
VIMEIRO, Stern Trawler	PO-83-0013	NWA	2
SAO Rafael, Large Stern Trawler	PO-83-0002	NWA	2

Armazens Jose Luis do Costa e. Ca. lda, Lisbon, Portugal and Scan Ocean, 42 Rogers Street, Gloucester, Massachusetts 01930, Tel: (617) 283–1004, have applied to engage in a joint venture fishery aimed at producing 5000 metric tons of Illex Squid between the months of May, 1983 and October, 1983. (This Portuguese joint venture, for the above two vessels, was announced in the FEDERAL REGISTER in March, 1983.) At the request of Portugal an amendment has been made to this joint venture application between Portugal and Scan Ocean to include 3,000 metric tons of Loligo.

DEPARTMENT OF TRANSPORTATION

Federal Aviation Administration

Airports District Office at Miami, Florida; Relocation

Notice is hereby given that on July 11, 1983, the Airports District Office at Miami, Florida, will be moved to Orlando, Florida. Services to the aviation public, formerly provided by this office, will be provided by the Airports District Office located in Orlando, Florida. This information will be reflected in the FAA Organization Statement the next time it is reissued.

(Sec. 313(a), 72 Stat. 752; 49 U.S.C. 1354)

Issued in Atlanta, GA, on June 2, 1983.

W. J. McGill,

Division Manager, Airports Division.

[FR Doc. 83-15460 Filed 6-8-83; 8:45 am]

BILLING CODE 4910-13-M

[Summary Notice No. PE-83-13]

Petitions for Exemption; Summary of Petitions Received, Dispositions of Petitions Issued

AGENCY: Federal Aviation Administration (FAA), DOT.

ACTION: Notice of petitions for exemption received and of dispositions of prior petitions.

SUMMARY: Pursuant to FAA's rulemaking provisions governing the application, processing, and disposition of petitions for exemption (14 CFR Part 11), this notice contains a summary of certain petitions seeking relief from specified requirements of the Federal Aviation Regulations (14 CFR Chapter I), dispositions of certain petitions previously received and corrections. The purpose of this notice is to improve the public's awareness of, and participation in, this aspect of FAA's regulatory activities. Neither publication of this notice nor the inclusion or omission of information in the summary is intended to affect the legal status of any petition or its final disposition.

DATE: Comments on petitions received must identify the petition docket number involved and must be received on or before June 29, 1983.

ADDRESS: Send comments on any petition in triplicate to: Federal Aviation Administration, Office of the Chief Counsel, Attn: Rules Docket (AGC-204), Petition Docket No. ——, 800 Independence Avenue SW., Washington, D.C. 20591.

FOR FURTHER INFORMATION: The petition, any comments received and a copy of any final disposition are filed in the assigned regulatory docket and are available for examination in the Rules Docket (AGC-204), Room 916, FAA Headquarters Building (FOB 10A), 800 Independence Avenue, SW., Washington, D.C. 20591; telephone (202) 426-3644.

This notice is published pursuant to paragraphs (c), (e), and (g) of § 11.27 of Part 11 of the Federal Aviation Regulations (14 CFR Part 11).

Issued in Washington, D.C., on June 3, 1983.

Richard C. Baitel,

Acting Assistant Chief Counsel, Regulations and Enforcement Division.

PETITIONS FOR EXEMPTION

Docket No.	Petitioner	Regulations affected	Description of relief sought
21254	Renton Aviation, Inc	14 CFR 135.203	Renewal of Exemption 3204 to allow petitioner to conduct operations at an altitude below 500 feet over water outside of controlled airspace, subject to conditions and limitations.
23613	Imeson Aviation (IMESON)	14 CFR 91.15(c)	To permit petitioner to instruct students in certain primary aerobatic maneuvers without each occupant of the aircraft wearing a parachute.
23644	The Dow Chemical Co	14 CFR 21.181, 91.27(a)(1), 91.29, & 91.165	To permit petitioner to operate its 4 Falcon and 1 King Air aircraft in accordance with a minimum equipment list.
23645	The Buckeye Cellulose Corp	14 CFR Portions of Parts 21 & 91	To permit petitioner to operate a C-500 aircraft with certain inoperable instruments and equipment that are covered under a minimum equipment list.

DISPOSITION OF PETITIONS FOR EXEMPTION

Docket No.	Petitioner	Regulations affected	Description of relief sought—disposition
20048	Chalk Int'l. Airlines	14 CFR 135.175(a)	To renew Exemption 3007A to permit petitioner to operate its Grumman Mallard G-73 aircraft in direct day visual flight rule (VFR) flights in large multiengine aircraft between certain points, without having approved airborne weather radar equipment installed in the aircraft. *Granted 5/23/83.*
11144	American Airlines Flight Academy	14 CFR 121.99 & 121.351(a)	Extend Exemption No. 1332, as amended, to permit American Airlines, Inc., to operate its airplanes between Wilmington, NC, and St. Croix and St. Thomas, VI, via Nassau, without maintaining two-way radio communications between each airplane and the dispatch office along the named routes, subject to certain conditions and limitations. *Granted 5/23/83.*
23521	Singapore Airlines (SIA)	14 CFR Portions of Part 21	To permit petitioner, a foreign air carrier which holds operations specifications under Part 129, to operate and maintain two U.S.-registered Boeing 747-300 aircraft using an FAA-approved minimum equipment list (MEL). *Granted 5/20/83.*
23513	Air Polynesia, Inc., d/b/a DHL Cargo	14 CFR 121.583(a)(8)	To permit petitioner to transport dependents of company employees on flights it operates within the State of Hawaii without the dependents being accompanied by the company employee. *Partial grant 5/19/83.*
23404	1st Lt. Timothy R. Morris, USAF	14 CFR 61.183 (d) and (e), 61.185 (a) and (b), 61.187(a).	To allow petitioner to receive a flight instructor instrument certificate based on training as a flight instructor in the U.S. Air Force. *Denied 5/20/83.*
23466	CAA of United Kingdom On Behalf of Pilatus Britten-Norman.	14 CFR 23.1303(e)(1)	To permit type certification of the Pilatus Britten-Norman Model BN-2T airplane without complying with the requirements of the section, which requires a speed-warning device for turbine-engine powered airplanes. *Granted 5/20/83.*
21350	The Coastal Corp	14 CFR 61.58(c)	An amendment to and an extension of current Exemption 3249 to permit petitioner's flight crews to complete their entire 24-month pilot-in-command check in an FAA-approved simulator, subject to certain conditions and limits. *Granted 5/23/83.*

BILLING CODE 4910-13-M

Federal Highway Administration

Announcement of Study on Quality Assurance

AGENCY: Federal Highway Administration (FHWA), DOT.

ACTION: Notice of study on quality assurance.

SUMMARY: In response to Section 110(c) of the Surface Transportation Assistance Act of 1982 (STAA of 1982), the Federal Highway Administration is conducting a study of current procedures for assuring that maximum return is received for Federal highway engineering and construction funds. A series of papers prepared by FHWA and National Bureau of Standards (NBS) personnel will discuss existing systems for assuring quality in highways and bridges, particularly design and construction quality, materials quality, testing and inspection quality, and quality relative to personnel skills and personnel training. The papers will be presented and critiqued at a conference to be held on August 30 and 31, 1983. The papers, input of participants, and

the conclusions and recommendations of the conference will be incorporated in a report that will be submitted to Congress.

DATES: The conference will be held on August 30 and 31, 1983.

TIME: 9:00 a.m. to 4:30 p.m. ET.

PLACE: National Bureau of Standards, Administration Building in Gathersburg, Maryland.

FOR FURTHER INFORMATION CONTACT: Mr. James H. Pielert, National Bureau of Standards, (301) 921–3481, for information regarding registration for the conference; or Mr. Peter A. Kopac, Federal Highway Administration, (703) 285–2432, for information regarding the section 110(c) study on quality assurance.

SUPPLEMENTARY INFORMATION: The gradual shift of responsibilities from the Federal Government to State and local governments has been viewed by many as a desirable trend provided that there continues to be a coordinated Federal direction and a means for assuring that Federal funds are being properly used. The Congress has recognized this concern and, under section 110(c) of the STAA of 1982, has made provisions to study the situation. Section 110(c) states:

> The Secretary of Transportation is directed to coordinate a study with the National Bureau of Standards, the American Society for Testing and Materials, and other organizations as deemed appropriate, (A) to determine the existing quality of design, construction, products, use, and systems for highway and bridges; (B) to determine the need for uniform standards and criteria for design, processing, products, and applications, including personnel training and implementation of enforcement techniques; and (C) to determine the manpower needs and costs of developing a national system for the evaluation and accreditation of testing and inspection agencies. The Secretary shall submit such study to the Congress not later than one year after the date of enactment of this section.

The FHWA has assumed a lead role in carrying out the section 110(c) study. The FHWA's work plan calls for the preparation of a number of discussion papers, each addressing an area that affects the quality of highways and bridges. The papers are to be reviewed at a conference hosted by NBS, with various interested organizations participating in the discussions. The conference will be conducted from 9:00 a.m. to 4:30 p.m. on August 30 and 31, 1983, at the NBS Administration Building in Gaithersburg, Maryland.

Nine papers have been identified to address the study objectives. The subjects covered by the papers include pavement and bridge design, bidding and contract award, the quality of construction, the quality of specifications, construction inspection, acceptance plans, training and certification of technicians, laboratory evaluation and accreditation, and uniformity in standards. In general, the papers will assess the quality assurance efforts in the particular subject areas and define possible opportunities for improvements. Where appropriate, the papers will also describe procedures followed in the past, those procedures that are now applicable, and considerations to meet future needs.

Issued on: May 26, 1983.

L. P. Lamm,

Deputy Federal Highway Administrator, Federal Highway Administration.

BILLING CODE 4910-22-M

National Highway Traffic Safety Administration

[Docket No. EX83-2; Notice 2]

Middlekauff, Inc.; Petition for Temporary Exemption From Federal Motor Vehicle Safety Standard No. 301

This notice grants the petition by Middlekauff, Inc. of Toledo, Ohio ("Middlekauff" herein) for a temporary exemption of three years for its trucks from Federal Motor Vehicle Safety Standard No. 301, *Fuel System Integrity*, on grounds of substantial economic hardship.

Notice of the petition was published on February 22, 1983 (48 FR 7534) and an opportunity afforded for comments.

Petitioner is a final-stage motor vehicle manufacturer whose production in the year prior to filing its petition was 95 units. In finishing incomplete vehicles furnished to it by AM General Corporation, it extends the filler pipe to the gas tank and relocates the filler cap. It believes that it exercises due care in its operations "to the extent of duplicating the hose and clamps used by the original manufacturer, and in many cases utilizing the original gas cap, it is not always possible to recess the gas cap itself." It estimated that the cost to test to compliance would be $10,000 (the cost of each vehicle) which it termed "prohibitive." In the three fiscal years ending September 30, 1981, it had cumulative net losses of $92,000. Thus, testing for compliance would cause it substantial economic hardship.

Petitioner further argued that an exemption would be in the public interest and consistent with the objectives of the National Traffic and Motor Vehicle Safety Act.

Inasmuch as our method of extending the gas line between the gas tank, supplied by the manufacturer, and the filler cap is to avoid having such gas line or filler cap in any one of the six compartments which comprise the majority of the body, and would, therefore, be subject to leakage or fumes due to the cargo coming in contact, in any way, with the gas system.

No comments were received on the petition.

NHTSA has considered the information submitted by petitioner and has no reason to believe that the company is not performing its alterations in a manner intended to insure conformity with Standard No. 301. It would therefore appear that its compliance problems may be minimal if not nonexistent. The agency finds that the tests involved in Standard No. 301 would cause substantial economic hardship to a company whose cumulative net loss as of September 30, 1981, was $92,000. Petitioner produces less than 100 vehicles a year and its continued existence as a small manufacturer justifies a finding that an exemption would be in the public interest and consistent with the objectives of the National Traffic and Motor Vehicle Safety Act.

Accordingly, Middlekauff, Inc., is herewith granted NHTSA Exemption No. 83–2 from 49 CFR 571.301, Motor Vehicle Safety Standard No. 301, expiring May 1, 1986.

(Sec. 3, Pub. L. 92–548, 86 Stat. 1159 (15 U.S.C. 1410); delegation of authority at 49 CFR 1.50)

Issued on June 1, 1983.

Diane K. Steed,

Acting Administrator.

Applications for Exemptions

AGENCY: Materials Transportation Bureau, DOT

ACTION: List of Applicants for Exemptions.

SUMMARY: In accordance with the procedures governing the application for, and the processing of, exemptions from the Department of Transportation's Hazardous Materials Regulations (49 CFR Part 107, Subpart B), notice is hereby given that the Office of Hazardous Materials Regulation of the Materials Transportation Bureau has received the applications described

herein. Each mode of transportation for which a particular exemption is requested is indicated by a number in the "Nature of Application" portion of the table below as follows: 1—Motor vehicle, 2—Rail freight, 3—Cargo vessel, 4—Cargo-only aircraft, 5—Passenger-carrying aircraft.

DATES: Comment period closes July 13, 1983.

ADDRESS COMMENTS TO: Dockets Branch, Office of Regulatory Planning and Analysis, Materials Transportation Bureau, U.S. Department of Transportation, Washington, DC 20590.

Comments should refer to the application number and be submitted in triplicate.

FOR FURTHER INFORMATION: Copies of the Applications are available for inspection in the Dockets Branch, Room 8426, NASSIF Building, 400 7th Street SW., Washington, D.C.

NEW EXEMPTIONS

Application No.	Applicant	Regulation(s) affected	Nature of exemption thereof
9057–N	Olympic Chemical Co., North Richland Hills, TX.	49 CFR 173.315(j)(13), 173.33(f)(9),173.33(h)(f).	To authorize use of modified angle valves and safety relief valves on MC-331 chlorine cargo tank motor vehicles. (Mode 1).
9058–N	Gearhart Industries, Ft. Worth, TX	49 CFR 173.304(a), 173.34(d), 175.3	To authorize shipment of a flammable compressed gas, n.o.s. contained in non-DOT specification oil well sampling devices comparable to DOT Specification 3E cylinders. (Modes 1,4).
9059–N	Air Products and Chemicals, Inc., Allentown, PA.	49 CFR 172.101, 172.202, 172.302, 173.34(d)	To authorize shipment of a fluorine-helium mixture contained in DOT Specification cylinders prescribed for fluorine. (Modes 1, 2).
9060–N	CVI Inc., Columbus, OH	49 CFR 173.315	To manufacture, mark and sell 11,000 gallon non-DOT specification portable tanks, for shipment of helium, pressurized liquid, classed as a nonflammable gas. (Mode 1).
9061–N	The S. S. I. Group Ltd., Fairdale, KY	49 CFR 172.504, 173.178	To authorize shipment of calcium carbide, labeled flammable solid and dangerous when wet, contained in 1 quart metal cans with water tight lids overpacked in a fiberboard box not to exceed 10 pounds per overpack to be transported without placarding the vehicles. (Mode 1).
9062–N	UOP Process Division, Des Plaines, IL	49 CFR 173.245	To authorize shipment of a corrosive liquid, n.o.s., in DOT specification 57 steel portable tanks. (Modes 1,2).
9063–N	Hoechst Aktiengesellschaft, Frankfurt, West Germany.	49 CFR 173.315	To authorize shipment of hexafluoropropylene, classed as a nonflammable gas in non-DOT specification IMO Type 5 portable tanks. (Modes 1, 2, 3).
9064–N	Corning Glass Works, Corning, NY	49 CFR 173.245	To authorize shipment of various corrosive liquids in a glass containers not to exceed 5¾ gallon capacity, surrounded by vermiculite placed in a cyclindrical steel overpack, packed not exceed 4 to a compartmented wooden box. (Mode 1).
9065–N	Scientrex Limited, Concord Ontario, Canada	49 CFR Parts 100–199	To authorize shipment of cesuim vapour lamps containing not more than 1 milligram of cesium metal, and magnetometer products containing such cesium vapour lamps as essentially non-regulated. (Modes 1, 2, 3, 4, 5).
9066–N	Cayern-Chemie GmbH, Ottobrunn, West Ger- [redacted].	49 CFR 173.154, 175.3	To qualify inflator airbag systems containing a propellant explosive, Class B as a flammable solid classification; packaged in non-DOT specification polystyrene case overpacked in a fiberboard box. (Modes 1, 2, 3, 4).
9067–N	Walco Truck Rigging, Inc., Odessa, TX	49 CFR 173.119, 173.245	To manufacture, mark and sell non-DOT specification steel tanks of up to 8 seperate compartments not to exceed a total capacity of 600 gallons containing various flammable liquids or corrosive material (oil well treating compounds). (Mode 1).
9068–N	Global International Airways, Kansas City, MO	49 CFR 172.101, 175.30	To authorize carriage of various military ammunition Class A explosives which are not permitted for shipment by air. (Mode 4).
9069–N	Ford Aerospace & Communications Corp., Palo Alto, CA.	49 CFR 172.101 Column 6(b), 175.30	To authorize shipment of three rocket motors, Class B, exceeding gross weight limitations, via cargo only aircraft. (Mode 4).
9070–N	Warner Bros. Inc., Sunderland, MA	49 CFR 173.119	To authorize shipment of gasoline, classed as a flammable liquid, in non-DOT specification steel containers of up to 340 gallon capacity. (Mode 1).
9071–N	McCarthy Tank and Steel Co., Bakersfield, CA	49 CFR 173.119, 173.245, 173.346, 178.340–7, 178.342–5, 178.343–5.	To manufacture, mark and sell non-DOT specification cargo tanks complying in general with DOT–MC307/312 except for bottom outlet valve variations, for transportation of waste flammable, corrosive or poison B liquids or semi-solids. (Mode 1).
9072–N	Thiokol Corp., Brigham City, UT	49 CFR 173.92	To authorize shipment of rocket motors, Class B explosive in specially designed outside packagings. (Mode 1).
9073–N	Natico, Inc., Chicago, IL	49 CFR 178.116	To manufacture, mark and sell tight head drums comparable to DOT Specification 17E except they are constructed of 18 gauge steel with corrugated bottom and top head and 7 ply chime construction, for shipment of various flammable, corrosive and poison B liquids. (Modes 1, [redacted].
9074–N	Reuter-Stokes, Inc., Cleveland, OH	49 CFR 173.302(a)	To manufacture, mark and sell gamma ionization chambers constructed of stainless steel, not to exceed 410 psig, for shipment of argon, classed as nonflammable gas. (Modes 1, 2, 4, 5).
9075–N	Trans-Air-Link, Corp., Miami, FL	49 CFR 173.101	To authorize shipment of various Class A, B and C explosives not permitted for air shipment or in quantities greater than those prescribed for shipment by air. (Mode 4).
9076–N	U.S. Department of Energy, Washington, DC	49 CFR 173.392(d)(2)(ii)	To authorize shipment of uranyl nitrate at concentrations not to exceed 32 percent LSA, in DOT Specification MC–311 and 312 cargo tanks. (Mode 1).
9077–N	Central Vermont Railway, Inc., St. Albans, VT	49 CFR Part 100–199	To authorize carriage of railway torpedoes and fuses packed in metal kits, in motor vehicles by railroad maintenance crews as non-regulated rail carrier equipment. (Mode 1).
9078–N	Monsanto Co., St. Lours, MO	49 CFR 173.245	To authorize shipment of up to 293 gallons of waste formic acid/phenol mixture (corrosive/poison) in DOT Specification 57 stainless steel portable tanks. (Mode 1).
9079–N	E. I. du Pont de Nemours & Co., Inc., Wilmington, DE.	49 CFR 173.315	To authorize shipment of a flammable compressed gas mixture in DOT Specification 51 portable tanks. (Modes 1, 3).
9080–N	Henderson's Welding Mfg. Corp., Seminole, TX.	49 CFR 173.119, 173.245	To manufacture, mark and sell non-DOT specification compartmented portable tanks complying with DOT Specification 57 except for capacity and sight glass gage, for shipment of flammable liquid or corrosive materials (oil well treating compounds). (Mode 1).
9081–N	Diamond Shamrock Corp., Irving, TX	49 CFR 173.164(a)(6)	To authorize shipment of chromic acid solid, classed as an oxidizer, in DOT Specification 21C fiber drum lined with plastic other than saran material. (Modes 1, 2).
9082–N	Union Carbide Corp., Danbury, CT	49 CFR 173.365(a)	To authorize shipment of carbamate pesticide, solid, n.o.s., Class B poison, in non-DOT specification woven polypropylene bags not to exceed 2,200 pounds. (Modes 1, 3).

This notice of receipt of applications for new exemptions is published in accordance with Section 107 of the Hazardous Materials Transportation Act (49 U.S.C. 1806; 49 CFR 1.53(e)).

Issued in Washington, DC, on June 2, 1983.

J. R. Grothe, Chief,

Exemptions Branch, Office of Hazardous Materials Regulation, Materials Transportation Bureau.

BILLING CODE 4910-60-M

Applications for Renewal or Modification of Exemptions or Applications To Become a Party to an Exemption

AGENCY: Materials Transportation Bureau, DOT.

ACTION: List of Applications for Renewal or Modification of Exemptions or Application to Become a Party to an Exemption.

SUMMARY: In accordance with the procedures governing the application for, and the processing of, exemptions from the Department of Transportation's Hazardous Materials Regulations (49 CFR Part 107, Subpart B), notice is hereby given that the Office of Hazardous Materials Regulation of the Materials Transportation Bureau has received the applications described herein. This notice is abbreviated to expedite docketing and public notice. Because the sections affected, modes of transportation, and the nature of application have been shown in earlier **Federal Register** publications, they are not repeated here. Except as otherwise noted, renewal applications are for extension of the exemption terms only. Where changes are requested (e.g. to provide for additional hazardous materials, packaging design changes, additional mode of transportation, etc.) they are described in footnotes to the application number. Application numbers with the suffix "X" denote renewal; application numbers with the suffix "P" denote party to. These applications have been separated from the new applications for exemptions to facilitate processing.

DATES: Comment period closes June 28, 1983.

ADDRESS COMMENTS TO: Dockets Branch, Office of Regulatory Planning and Analysis, Materials Transportation Bureau, U.S. Department of Transportation, Washington, DC 20590.

Comments should refer to the application number and be submitted in triplicate.

FOR FURTHER INFORMATION CONTACT: Copies of the applications are available for inspection in the Dockets Branch, Room 8426, Nassif Building, 400 7th Street, SW., Washington, DC.

VETERANS ADMINISTRATION

Agency Form Under OMB Review

AGENCY: Veterans Administration.

ACTION: Notice

The Veterans Administration has submitted to OMB for review the following proposal for the collection of information under the provisions of the Paperwork Reduction Act (44 U.S.C. Chapter 35). This is a new data collection. The entry contains the following information: (1) The department or staff office issuing the form; (2) The title of the form; (3) The agency form number, if applicable; (4) How often the form must be filled out; (5) Who will be required or asked to report; (6) An estimate of the number of responses; (7) An estimate of the total number of hours needed to fill out the form; and (8) An indication of whether section 3504(H) of Pub. L. 96-511 applies.

ADDRESSES: Requests for further information, including copies of the proposed form and supporting documents may be obtained from Patricia Viers, Agency Clearance Officer (004A2), Veterans Administration, 810 Vermont Avenue, NW, Washington, DC 20420 (202) 389-2146. Comments and questions about the items on this list should be directed to the Office of Information and Regulatory Affairs of OMB, Attention: Rich Shepard, Desk Officer for Veterans Administration, 726 Jackson Place, NW, Washington, DC 20503, (202) 395-6880.

DATES: Comments on the form should be directed to the OMB Desk Officer within 60 days of this notice.

Dated: May 23, 1983.

Dominick Onorato,

Associate Deputy Administrator for Information Resources Management.

Category: New

Department: Department of Medicine and Surgery

Title of form: Former Prisoner of War Medical History

Agency form #: 10-0048

How often the form must be filled out: One time, nonrecurring

Estimate of the number of responses: 10,000

Estimate of the total number of hours needed: 5,000 hrs.

Section 3504(H) of Pub. L. 96-511: Not applicable

FEDERAL DEPOSIT INSURANCE CORPORATION

Agency Meeting

Pursuant to the provisions of the "Government in the Sunshine Act" (5 U.S.C. 552b), notice is hereby given that at 2:30 p.m. on Monday, June 13, 1983, the Federal Deposit Insurance Corporation's Board of Directors will meet in closed session, by vote of the Board of Directors, pursuant to sections 552b (c)(2), (c)(4), (c)(6), (c)(8), (c)(9)(A)(ii), (c)(9)(B), and (c)(10) of Title 5, United States Code, to consider the following matters:

Summary Agenda: No substantive discussion of the following items is anticipated. These matters will be resolved with a single vote unless a member of the Board of Directors requests that an item be moved to the discussion agenda.

Recommendations with respect to the initiation, termination, or conduct of administrative enforcement proceedings (cease-and-desist proceedings, termination-of-insurance proceedings, suspension or removal proceedings, or assessment of civil money penalties) against certain insured banks or officers, directors, employees, agents or other persons participating in the conduct of the affairs thereof:

Names of persons and names and locations of banks authorized to be exempt from disclosure pursuant to the provisions of subsections (c)(6), (c)(8), and (c)(9)(A)(ii) of the "Government in the Sunshine Act" (5 U.S.C. 552b (c)(6), (c)(8), and (c)(9)(A)(ii)).

Note.—Some matters falling within this category may be placed on the discussion agenda without further public notice if it becomes likely that substantive discussion of those matters will occur at the meeting.

Discussion Agenda:

Application for Federal deposit insurance:

Lewis County Bank, a proposed new bank to be located at the southeast corner of West Linden Street and North Court Street, Hohenwald, Tennessee.

Application for consent to transfer assets in consideration of the assumption of deposit liabilities:

Monroe Savings Bank, Rochester, New York, a federally-chartered savings bank insured by the Federal Deposit Insurance Corporation, for consent to transfer certain assets to Empire of America, FSA, Southfield, Michigan, a federal savings association not insured by the Federal Deposit Insurance Corporation, in consideration of the assumption of liabilities for deposits made in the Corning,

Dansville and Hornellsville, New York, branches of Monroe Savings Bank.

Application pursuant to section 19 of the Federal Deposit Insurance Act for consent to service of a person convicted of an offense involving dishonesty or a breach of a trust as a director, officer, or employee of an insured bank:

Name of person and of bank authorized to be exempt from disclosure pursuant to provisions of subsections (c)(6), (c)(8), and (c)(9)(A)(ii) of the "Government in the Sunshine Act" (5 U.S.C. 552b (c)(6), (c)(8), and (c)(9)(A)(ii)).

Request for relief from adjustment for violations of Regulation Z:

Name and location of bank authorized to be exempt from disclosure pursuant to the provisions of subsections (c)(8) and (c)(9)(A)(ii) of the "Government in the Sunshine Act" (5 U.S.C 552b (c)(8) and (c)(9)(A)(ii)).

Recommendation regarding the liquidation of a bank's assets acquired by the corporation in its capacity as receiver, liquidator, or liquidating agent of those assets:

Memorandum and Resolution re: The Metro Bank of Huntington, Inc. Huntington, West Virginia

Personnel actions regarding appointments, promotions, administrative pay increases, reassignments, retirements, separations, removals, etc.:

Names of employees authorized to be exempt from disclosure pursuant to provisions of subsections (c)(2) and (c)(6) of the "Government in the Sunshine Act" (5 U.S.C. 552b (c)(2) and (c)(6)).

The meeting will be held in the Board Room on the sixth floor of the FDIC Building located at 550 17th Street, N.W., Washington, D.C.

Requests for further information concerning the meeting may be directed to Mr. Hoyle L. Robinson, Executive Secretary of the Corporation, at (202) 389-4425.

Dated: June 6, 1983.

Federal Deposit Insurance Corporation.

FEDERAL DEPOSIT INSURANCE CORPORATION

Agency Meeting

Pursuant to the provisions of the "Government in the Sunshine Act" (5 U.S.C. 552b), notice is hereby given that the Federal Deposit Insurance Corporation's Board of Directors will meet in open session at 2 p.m. on Monday, June 12, 1983, to consider the following matters:

Summary Agenda: No substantive discussion of the following items is anticipated. These matters will be resolved with a single vote unless a member of the Board of Directors requests that an item be moved to the discussion agenda.

Disposition of minutes of previous meetings.

Application for consent to merge and establish three branches:

Community First Bank, Bakersfield, California, an insured State nonmember bank, for consent to merge, under its charter and title, with Growers and Merchants State Bank, Selma, California, and to establish the three offices of Growers and Merchants State Bank as branches of the resultant bank.

Applications for consent to purchase assets and assume liabilities and establish one branch:

Le Mars Savings Bank, Le Mars, Iowa, an insured State nonmember bank, for consent to purchase the assets of and assume the liability to pay deposits made in Farmers Savings Bank, Struble, Iowa, and to establish the sole office of Farmers Savings Bank as a branch of Le Mars Savings Bank.

Hamilton Bank, Lancaster, Pennsylvania, an insured State nonmember bank, for consent to purchase certain assets of and assume the liability to pay deposits made in the Lebanon Plaza Branch of the Commonwealth National Bank, Harrisburg, Pennsylvania, and to establish that office as a branch of Hamilton Bank.

Recommendations regarding the liquidation of a bank's assets acquired by the Corporation in its capacity as receiver, liquidator, or liquidating agent of those assets:

Case No. 45,691—The Greenwich Savings Bank, New York, New York

Case No. 45,692-SR—The Bank of Woodson, Woodson, Texas

Memorandum and Resolution re: The Farmers State Bank, Protection, Kansas

Reports of committees and officers:

Minutes of actions approved by the standing committees of the Corporation pursuant to authority delegated by the Board of Directors.

Reports of the Division of Bank Supervision with respect to applications, requests, or actions involving administrative enforcement proceedings approved by the Director or Associate Director (Administration and Corporate Applications) of the Division of Bank Supervision and the various Regional Directors pursuant to authority delegated by the Board of Directors.

Report of the Director, Office of Corporate Audits and Internal Investigations:

Audit Report re: Reimbursable Expenses Billed to the FDIC by the Firm of Roth, Kudler, Berner and Company, dated May 12, 1983.

Discussion Agenda:

No matters scheduled.

The meeting will be held in the Board Room on the sixth floor of the FDIC Building located at 550 17th Street, N.W., Washington, D.C.

Requests for further information concerning the meeting may be directed to Mr. Hoyle L. Robinson, Executive Secretary of the Corporation, at (202) 389-4425.

Dated: June 6, 1983.

Federal Deposit Insurance Corporation.

Hoyle L. Robinson,

Executive Secretary.

FEDERAL DEPOSIT INSURANCE CORPORATION

Changes in Subject Matter of Agency Meeting

Pursuant to the provisions of subsection (e)(2) of the "Government in the Sunshine Act" (5 U.S.C. 552b(e)(2), notice is hereby given that at its open meeting held at 2 p.m. on Monday, June 6, 1983, the Corporation's Board of Directors determined, on motion of Chairman William M. Isaac, seconded by Director Irvin H. Sprague (Appointive), concurred in by Mr. H. Joe Selby, acting in the place and stead of Director C. T. Conover (Comptroller of the Currency), that Corporation business required the withdrawal from the agenda for consideration at the meeting, on less than seven days' notice to the public, of the following matter:

Request of Dakota Bank of Wahpeton, a proposed new bank to be located at 1005 Dakota Avenue, Wahpeton, North Dakota, for reconsideration of a previous denial of an application for Federal deposit insurance.

The Board further determined, by the same majority vote, that Corporation business required the addition to the agenda for consideration at the meeting, on less than seven days' notice to the public, of the following matters:

Application of Hoosier State Bank of Indiana, Hammond, Indiana, for consent to establish a branch within the Strack & Vantil Grocery Store, Routes 30 and 41, Schererville, Indiana.

Request of the Philadelphia Savings Fund Society, Horsham Township (P.O. Horsham), Pennsylvania, for a waiver of the time deposit early withdrawal penalty.

By the same majority vote, the Board further determined that no earlier notice

of these changes in the subject matter of the meeting was practicable.

Dated: June 6, 1983.

Federal Deposit Insurance Corporation.

Hoyle L. Robinson

Executive Secretary.

FEDERAL DEPOSIT INSURANCE CORPORATION

Changes in Subject Matter of Agency Meeting

Pursuant to the provisions of subsection (e)(2) of the "Government in the Sunshine Act" (5 U.S.C. 552b(e)(2)), notice is hereby given that at its closed meeting held at 2:30 p.m. on Monday, June 6, 1983, the Corporation's Board of Directors determined, on motion of Chairman William M. Isaac, seconded by Director Irvine H. Sprague (Appointive), concurred in by Mr. H. Joe Selby, acting in the place and stead of Director C. T. Conover (Comptroller of the Currency), that Corporation business required the addition to the agenda for consideration at the meeting, on less than seven days' notice to the public, of the following matters:

Request of Indian Springs State Bank, Kansas City, Kansas, for an extension of time within which to relocate the main office from 4601 State Avenue to 4810 State Avenue, Kansas City, Kansas.

Application pursuant to section 19 of the Federal Deposit Insurance Act for consent to service of a person convicted of an offense involving dishonesty or a breach of a trust as a director, officer, or employee of an insured bank: Name of person and of bank authorized to be exempt from disclosure pursuant to the provisions of subsections (c)(6), (c)(8), and (c)(9)(A)(ii) of the "Government in the Sunshine Act" (5 U.S.C. 552b (c)(6), (c)(8), and (c)(9)(A)(ii)).

Recommendation regarding the liquidation of a bank's assets acquired by the Corporation in its capacity as receiver, liquidator, or liquidating agent of those assets:

Case No. 45,694-L (Addendum)—The Ina State Bank, Ina, Illinois

The Board further determined, by the same majority vote, that no earlier notice of these changes in the subject matter of the meeting was practicable; that the public interest did not require consideration of the matters in a meeting open to public observation; and that the matters could be considered in a closed meeting by authority of subsection (c)(4), (c)(6), (c)(8), (c)(9)(A)(ii), and (c)(9)(B) of the "Government in the Sunshine Act" (5 U.S.C. 552b (c)(4), (c)(6), (c)(8), (c)(9)(A)(ii), and (c)(9)(B)).

Dated: June 6, 1983.

NATIONAL CREDIT UNION ADMINISTRATION

Changes in Date and Subject of Board Meeting

The previously announced closed meeting of the National Credit Union Administration scheduled for 4 p.m., Wednesday, May 11, 1983 was changed to Thursday, May 12, 1983.

The National Credit Union Administration Board also determined that its business required that the previously announced closed meeting on Wednesday, May 11, 1983 changed to Thursday, May 12, 1983 include the following additional item, which was closed to public observation.

Budget Allocation. Closed pursuant to exemption (2).

The Board voted unanimously to add this item to the closed agenda.

Earlier announcement of these changes was not possible.

The previously announced items were:

1. Approval of Minutes of Previous Closed Meetings.

2. Requests from Federally insured credit unions for special assistance to prevent liquidation under Section 208(a)(1) of the Federal Credit Union Act. Closed pursuant to exemptions (8) and (9)(A)(ii).

3. Requests for special assistance under Section 208(a)(2) of the Federal Credit Union Act. Closed pursuant to exemptions (8) and (9)(A)(ii).

4. Requests for emergency mergers under Section 205(h) of the Federal Credit Union Act with special assistance under Section 208(a)(2) of the Federal Credit Union Act. Closed pursuant to exemptions (8) and (9)(A)(ii).

5. Proposed Memorandum of Agreement between NCUA and a Federal Credit Union. Closed pursuant to exemptions (8) and (9)(A)(ii).

6. Personnel Actions. Closed pursuant to exemptions (2) and (6).

The meeting was held at 2:54 p.m., Sheraton Centre Hotel, 811 7th Avenue (7th and 53rd Street), New York, New York 10019.

CONTACT PERSON FOR MORE INFORMATION: Rosemary Brady, Secretary of the Board, telephone (202) 357-1100.

Part II

Environmental Protection Agency

Fuel Economy of Motor Vehicles; Revisions To Improve Fuel Economy Labeling and the Fuel Economy Data Base

ENVIRONMENTAL PROTECTION AGENCY

40 CFR Part 600

[AMS-FRL 2302-7, Docket No. A-80-32]

Fuel Economy of Motor Vehicles; Revisions To Improve Fuel Economy Labeling and the Fuel Economy Data Base

AGENCY: Environmental Protection Agency.

ACTION: Notice of proposed rulemaking.

SUMMARY: This notice proposes to amend the motor vehicle fuel economy regulations for fuel economy labeling and for submitting fuel economy data for calculating Corporate Average Fuel Economy (CAFE) and label values. EPA proposes that these amendments take effect beginning with the 1985 model year.

Accurate and reliable fuel economy information is essential to allow the free market to exert its influence on what vehicles are produced. The primary purpose of this proposal is to increase the credibility and usefulness of EPA's fuel economy information to prospective new-car buyers. We believe this proposal will accomplish this goal without significant regulatory increases.

The major proposals in this rulemaking would: (1) Mathematically adjust laboratory fuel economy label values to correct for the average differences between the fuel economy measured in the laboratory and actual in-use experience, (2) require fuel economy labels to be revised during the model year if label values decrease by 1.0 mpg due to certain design changes and following a mid-year general recalculation, (3) require that the minimum data used in label calculations be more representative of projected sales, (4) require that both city and highway adjusted fuel economy values appear on each fuel economy label, and (5) establish a standard label format to more clearly highlight the fuel economy values and improve the consumer's ability to compare products.

DATE: Public Comment: Comments on the proposed rule must be received by September 1, 1983. The dates of the hearing will be Tuesday, and Wednesday, July 26 and 27, 1983.

ADDRESS: Comments in response to this NPRM should be submitted to the U.S. Environmental Protection Agency, Central Docket Section (A-130), Gallery 1, West Tower Lobby, Waterside Mall, 401 M Street, SW., Washington, D.C. 20460, Attn: Docket No. A-80-32.

A hearing will be held at the Ann Arbor Huron High School in Ann Arbor, Michigan, 2727 Fuller Road. On the first day the hearing will be convened at 9:00 a.m. and will adjourn at 5:00 p.m. If a second day is necessary to complete the business of the hearing, the hearing will reconvene at 9:00 a.m.

FOR FURTHER INFORMATION CONTACT: Clifford D. Tyree, Certification Division, Office of Mobile Sources, Environmental Protection Agency, 2565 Plymouth road, Ann Arbor, MI 48105; (313) 668-4310.

SUPPLEMENTARY INFORMATION:

Participation in the Public Hearing

Any person desiring to make a statement at the hearing or to submit material for the hearing record should contact Judy Faye Carmickle (313-668-4440) to schedule a time at the hearing. These scheduled to testify or those planning to submit material at the hearing should provide written confirmation of their interest, together with at least one copy of the proposed statement or material, for inclusion in the record. All such documents should be submitted to EPA at the address below no later than Tuesday, July 19, 1983. It is strongly requested, but not required, that at least 100 copies accompany any documents which cannot be submitted prior to the start of the hearing.

Participants are advised to adhere to these guidelines if possible. Documents submitted late may not receive full staff consideration prior to the hearing. Further, participants who submit documents on the scheduled day of the appearance, without the requested 100 copies, may be rescheduled for a later time or session of the hearing if duplication of the documents cannot be completed by EPA prior to the scheduled time of appearance.

The record of the hearing will be left open for 30 days following the close of the hearing to allow submission of rebuttal and supplementary information.

Mr. Richard D. Wilson is hereby designated as the Presiding Officer of the hearing. He will be responsible for maintaining order, excluding irrelevant or repetitious material, scheduling presentations, and, to the extent possible, notifying participants of the time at which they may appear. The hearing will be conducted informally. Technical rules of evidence will not apply.

The present national fuel economy testing program performs three functions: (1) It generates general fuel economy values for each model type and makes these values available to the public on individual vehicle fuel economy labels and in the *Gas Mileage Guide (Guide)* pursuant to 15 U.S.C. 2006, (2) it determines manufacturers' compliance with the CAFE requirements established in accordance with 15 U.S.C. 2002, (3) it establishes, in accordance with the National Energy Conservation and Policy Act (NECPA), manufacturers' "Gas Guzzler Tax" liability based on the general fuel economy label calculations.

In recent years, EPA, other government agencies, the U.S. Congress, and consumers have been concerned about apparent differences between the EPA fuel economy estimates and the actual fuel economy performance of vehicles in use. In general, these differences arise from travel environment, owner travel and driving habits, and vehicle maintenance. An EPA report to Congress, entitled "Passenger Car Fuel Economy: EPA and Road," EPA-460/3-80-010, published September 1980, shows that since 1976, fuel economy label and *Guide* figures have been higher, on the average (termed "shortfall"), than actual in-use fuel economy. This discrepancy has caused considerable consumer dissatisfaction and lack of confidence in EPA's fuel economy estimates.

Congress addressed this problem in public hearings of the House Subcommittee on Environment, Energy, and Natural Resources on January 29 through February 1, 1980.[1] The subcommittee concluded that the fuel economy information provided to consumers did not adequately reflect in-use fuel economy and that EPA possesses the authority to make changes in the fuel economy program that will improve the accuracy of the fuel economy data. The subcommittee consequently recommended that EPA devise a new system for labeling new vehicles with fuel economy values that most drivers can reasonably expect to experience. The subcommittee also recommended that EPA tighten its test procedures for determining compliance with Federal CAFE standards in order to eliminate actual or potential loopholes that introduce inaccuracies in EPA's approximation of in-use fleet average fuel economy. EPA has also been assessing its fuel economy testing program to improve the usefulness and accuracy of the fuel economy information it provides to the public and to improve the data base from which fuel economy values are derived.

On September 29, 1980, EPA published an advance notice of proposed

[1] Seventeenth Report by the Committee on Government Operations, Union Calendar No. 582, House Report No. 96-916, May 13, 1980.

rulemaking (ANPRM) for this proposed rule. The ANPRM presented several courses of action that EPA was considering for improvements in the fuel economy program and requested comments on those ideas. EPA received comments from a number of sources that included concerned citizens and consumer groups as well as major automobile manufacturers. This NPRM proposes changes that have resulted from EPA's desire to provide consumers with fair and accurate fuel economy information. Copies of specific comments on the ANPRM are available for public inspection in the EPA public docket presented in the **ADDRESS** section of this notice.

I. History and Background

In order to minimize the length of this notice EPA has not attempted to provide a detailed description of how the current program works or how it evolved. To the extent possible, we have presented the proposals in a manner that will not require extensive fuel economy program knowledge in order to understand them. The public docket for this rulemaking (Public Docket No. A–80–32) contains a report entitled *History and Description of the EPA Motor Vehicle Fuel Economy Program* which briefly describes the history and procedures of the current fuel economy program.

II. Description of the Proposed Modifications

A. In-Use Adjustments for Label Values

Many studies and analyses have been conducted to characterize the differences between EPA fuel economy estimates and in-use performance.[2] Two typical conclusions are that: (1) In-use fuel economy is significantly lower than EPA estimates and (2) because of these differences, consumer confidence in the label values has suffered. While a small portion of the differences could be eliminated by improved data representation and label updating (discussed later in this proposal), there would remain an offset between the advertised fuel economy values and the fuel economy achieved in use because of the different operating conditions between laboratory testing and in use. These laboratory conditions do not reflect changes in climate, road conditions, driving patterns, and other factors that affect in-use fuel economy.

In order to account for differences between EPA laboratory results and actual in-use experience, EPA proposes to calculate fuel economy values according to current procedures and then "discount" these values by an adjustment factor. EPA proposes that the adjustments be made by multiplying the city model type fuel economy value by 0.90 and the highway model type fuel economy by 0.78. The data and the procedures used to arrive at these factors are contained in an internal EPA report dated November 3, 1982, "Adjustments to EPA Fuel Values—Stage II Results." (This document is contained in the docket for this rulemaking.) EPA requests comments on the data and methodology used to derive these factors and may modify the factor as appropriate, based on comments received.

EPA proposes that only the adjusted fuel economy values appear on labels. However, EPA requests comments on alternative methods of presenting this information, pointing out specific advantages. For example, one alternative was suggested by the Office of Management and Budget (OMB) following its review of this proposal.[3] OMB suggested that rather than depicting single fuel conomy values on the label, the fuel economy estimates would be presented in a narrative form that includes a disclaimer for the unadjusted values. Both the unadjusted values and an adjustment factor would be presented. However, EPA believes that a "fine print" disclaimer is not useful since consumers most likely would not read it. Therefore, under this alternative, all lettering in the above fuel economy statement would be of the same size and prominence, including the fuel economy values. For example, under this alternative, the label fuel economy estimate for a given value (city or highway) could read as follows:

The [City, Highway] fuel economy estimate is —— m.p.g.; however, actual [City, Highway] fuel economy will likely average —— percent lower.

EPA is not proposing a set timetable for updating the adjustment factors. However, the Agency will continue to collect in-use data to review the status of the validity of the factors. If it appears appropriate to change the adjustment factors, EPA will publish proposed amendments and provide an appropriate leadtime before they are adopted. EPA requests comments on how to best collect such information and what minimum leadtime is necessary before revised factors can be used.

EPA also requests comments on ways to minimize consumer confusion in the first year of transition to adjusted fuel economy estimates. This confusion could result from consumers not being informed of (or not understanding) the reason for the fuel economy value decreases as compared to similar or identical vehicles of the previous model year. Manufacturers may also have problems highlighting fuel economy improvements for particular models when the adjustments bring the estimates below the previous year's estimates. EPA is open to suggestions as to how to best inform the public and to highlight fuel economy improvements.

B. Minimum Data Requirements for Labeling

The current minimum data requirement to establish a label value is one test per base level.[4] If the manufacturer has met the minimum data requirements by testing an emission test car, no additional testing is required for that base level to establish a label value. (If *no* previous data had been generated for a base level, the manufacturer must submit data from the highest projected sales configuration in the base level.) This can result in a base level represented by very low sales configurations. Because the base level fuel economy is sales-weighted into the model type label value using the *entire* base level sales, this single low sales configuration would have a disproportionate influence on the label value.

EPA has estimated the effect of this problem by projecting the likely fuel economy of untested subconfigurations and recalculating the label values for comparison. The results of this analysis show three percent of all 1980 vehicles were labeled 2 mpg or more too high, implying that the current system causes a portion of vehicles sold to be misrepresented simply because of data requirements and calculation methods. Although the number of labels affected is small, we are concerned that these

[2] The docket to this proposed rulemaking, A–80–32, contains numerous supporting documents and technical analyses. Note that because of revisions to this notice while in draft, EPA documents which are dated prior to July 1982 which describe the "proposed" rulemaking do not necessarily reflect the final proposals of this NPRM.

[3] Executive Order 12291 requires that all proposed regulations be reviewed by the Office of Management and Budget before being published. OMB commented in a letter to the Administrator dated June 2, 1981 (available in the public docket). OMB expressed a concern that label values with only the adjusted fuel economy values would imply more accuracy in the value than warranted. Specifically, the concern is that the public will perceive the adjusted values as predictions of the fuel economy each individual consumer will receive rather than representing an estimate of average performance to aid in comparison shopping as is intended.

[4] A base level is defined as a unique combination of vehicles with the same basic engine, inertia weight class, and transmission class. A complete listing of definitions can be found in 40 CFR 600.002–81.

biased label values can be extensively used, perhaps even emphasized in manufacturers' advertising. Further, without some change in the regulations, the situation could become worse in a future model year as manufacturers try to achieve continual increases in their label values.

EPA considered several alternative solutions to this problem. The first alternative was to test all configurations to establish label values. This was rejected as too burdensome and costly. The second alternative was to require minimum sales representation for test data in the label calculation. This was rejected since it could still greatly increase the manufacturers' testing burdens prior to model introduction and would increase label testing for models that are adequately covered under the current system. The third option was to retain the current testing requirements, but use analytical procedures to estimate test values for all subconfigurations. The analytical values and the actual test values would be used in sales-weighted label calculations, thus reflecting all designs at their proper sales weight. (This alternative is discussed further in Section III.E of this preamble.) EPA rejected this alternative since it would be a complex and controversial solution impacting all label calculations rather than centering only on the expected small number of problem labels.

Since our analysis suggests that this problem may be limited to a small number of model types that are not covered adequately by the current requirements, EPA proposes a simple solution whereby each base level must be represented at least by data from the highest projected sales configuration within the base level. This should affect only a small fraction of base levels. (In the 1982 model year, approximately 7 percent of the base levels were not represented by the high sales configuration for labeling.)

We do not expect that this requirement would cure all problem cases. However, it will correct some of the overstated label values and, more importantly, place limitations on a manufacturer's ability to overstate label values further by testing only vehicles with very low sales. Thus, this requirement would target only potential problem areas at a very small burden for manufacturers. The actual number of tests performed annually should not increase since these vehicles would likely be tested for CAFE purposes. The only increase in burden with this proposal would be due to a shift when these designs are tested, causing a very slight test load increase prior to model introduction.

C. Relabeling

Under the existing fuel economy label regulations, label values, once calculated, are not changed for the entire model year. Design changes can, however, be implemented after the label has been calculated which may significantly change the fuel efficiency of the vehicles. Design changes after production has started are called running changes. Because label values are only calculated once during a model year, any change in the fuel efficiency caused by design changes is currently not reflected in the label values. Furthermore, since the label value represents the sales weighted average fuel economy prediction for the included designs, changes in sales predictions can significantly affect the estimated fuel economy. These deficiencies in the current calculation procedures adversely affect the representativeness of the label values and thus their usefulness to consumers.

Ideally, label values would be kept most up-to-date by requiring them to be recalculated every time a running change is submitted or a sales shift occurs. However, EPA recognizes the practical limits of reflecting these changes on a continuous basis. Therefore, EPA is proposing two updating mechanisms: A continuous check on label values triggered only by certain design changes, and a single mid-year recalculation for all labels. EPA believes this combination can approximate the ideal system with much less burden on the industry.

While this proposal details a particular combination of update requirements, EPA recognizes that there may be other combinations or single update systems that would achieve comparable results. EPA requests comments on other ways to solve the label updating problem.

EPA is proposing that the label values be recalculated: (1) Once per model year (in January) for the complete product line, and (2) any time running changes wer made directionally affecting any of the specific parameters of equivalent test weight, axle ratio, or road-load horsepower for vehicles covered by a label. For the mid-year recalculation, any label value decrease of 1.0 mpg or more would have to be reflected on new labels. (Manufacturers could optionally relabel for fuel economy increases.) For recalculations triggered by the running change, if the newly calculated label value were 1.0 mpg or more below the city or highway value new labels would be required. A brief explanation of each of these types of relabeling follows:

1. *Mid-Year Recalculations.* Recent experience in the fuel economy program indicates that compared to current label values (calculated early in the model year, often before production starts), the label values that would be calculated using end-of-year data were as much as 3 mpg different for the city value and 4 mpg different for the highway value. Further, 20 percent of the city label values for cars were overstated by 1 mpg or more and 30 percent of the highway label values were overstated by 1 mpg or more.

EPA proposes that manufacturers recalculate all label values using total model year projected sales updated as of December 31 of the calendar year preceding the model year. If any recalculated city *or* highway label value is less than the existing label by 1.0 mpg or more, new label values would have to be in place by the following February 1. All manufacturer-calculated label values (and data used in the calculations) would be submitted to EPA at least five days before implementation. For the recalculation, all base levels would be represented by data from at least the highest projected sales configuration, as with the initial labels. EPA would provide comparable vehicle range values for the labels at an appropriate time before February 1. As is currently required, these updated range values would be incorporated on the labels within 15 days of the date EPA made them available.

The date for the mid-year relabeling was chosen so as to have the least impact on industry resources. The current labeling procedures require that the range of fuel economy of comparable vehicles contained on the labels (but not the label values) be updated (around this time) and these new labels be affixed to subsequent production. Because manufacturers are already required to put new labels on much of their product lines at this time, the only new cost involved would be in performing the calculation and updating sales projections. EPA estimates this cost to be approximately $380,000 for the industry. EPA requests information on other possible costs associated with relabeling, such as for updating advertising and brochures.

EPA acknowledges that if all of manufacturers' advertising had to be altered at mid-model year to reflect revised fuel economy estimates, it would amount to significant disruption in advertising, with possibly higher costs. However, it is likely that the current portion of overstated label values would

be significantly less because of the incentive for manufacturers not to make changes during the year that decrease fuel economy. This incentive would be reinforced by the proposal to require labeling for certain design changes (see below) at any time during the model year. Further, manufacturers' advertising typically centers only on the highest fuel economy model type within a car line, which further decreases the likelihood of label value changes that would affect advertising. Thus, EPA believes that the actual impact of relabeling on advertising cost would not be significant, primarily due to the presence of the relabeling requirements themselves. The risk of affecting advertising would discourage unnecessary design changes that decrease fuel economy.

2. Recalculation Resulting Directly from Design Changes. Certification records show that in the 1982 model year, 115 of the over 800 design changes involved changes in axles, equivalent test weight or road-load horsepower. Because design changes involving any one of these three vehicle characteristics may have a significant effect on fuel economy,[5] EPA is proposing that the label values be immediately recalculated and relabeled, if necessary, to reflect these types of design changes if they are in the direction of decreasing fuel economy. These are specific design changes that are closely controlled by the manufacturer's product planning and, therefore, manufacturers should be responsible for reflecting them in fuel economy estimates to the public.

Specifically, this proposal would require that: (1) Anytime an axle ratio is added which is numerically 10 percent larger than the largest axle ratio tested, or (2) a higher equivalent test weight is added, or (3) when the road-load horsepower is increased by 10 percent (either cumulative or a single change), the label values must be recalculated. If the recalculation, using undated projected annual sales, results in any label calculation reduction of a full 1.0 mpg or more of the city or highway calculation, the affected vehicles would have to be relabeled. (Each manufacturer would have the option to relabel for fuel economy increases by 1.0 mpg or more.) The 1.0 mpg city or highway change in fuel economy was selected to ensure that only those design changes which had a significant effect on fuel economy would trigger a relabeling. That is, changes of less than 1.0 mpg may result in label values changing due to round-off. However, labels will not be revised in these cases.

If the manufacturer were required to relabel based on the above criteria, the new labels would have to be installed on the affected model types at the time the running change was implemented. The manufacturer would submit the new label values, along with the data used in the calculations, to EPA at least five working days before implementations. As is the current practice when new labels are calculated during the year, EPA will supply the manufacturer with the latest available comparable vehicle range values to be used on the new labels.

Current fuel economy regulations do not require supplementary data for changes only in road-load horsepower or increase in equivalent test weight. Therefore, EPA is also proposing that manufacturers be required to submit supplementary fuel economy data for running changes that affect these parameters as described above. EPA does not anticipate that this requirement would significantly increase testing since emissions regulations often require test data for such changes.

3. Gas Guzzler Tax Liability. Currently, a manufacturer's liability for Gas Guzzler Tax on a particular vehicle is determined by the model type fuel economy value that EPA assigns to it. Since the proposed labeling program will cause label values to be updated, EPA proposes that the Gas Guzzler Tax liability be reevaluated whenever a label is updated. This would permit a manufacturer to remove a vehicle from the Gas Guzzler category (or decrease the tax liability) by making fuel economy improvements during the year. The converse would also be true as vehicles could fall into the Gas Guzzler category if model type fuel economy estimates decreased during the model year.

D. Modifications to the Label Information

1. Inclusion of City and Highway Estimates. The fuel economy label currently contains a single fuel economy value referred to as the EPA estimated fuel economy. The EPA estimated fuel economy is based on a test procedure which simulates the relative low speed stop-and-go driving typical in a city or urban environment. Since the current label fuel economy value is based on a city-type test, it does not reflect highway fuel economy performance. This lack of label information about highway fuel economy is particularly significant due to the many improved designs available today (such as overdrive transmission gearing) that mainly affect the highway fuel economy, not city fuel economy. In addition, highway estimates are used and emphasized by manufacturers in their advertising even though they do not appear on the label.

EPA propose a two-number label that would present separate city and highway estimates. Manufacturers' comments on the ANPRM have indicated agreement with this system. The advantage of this two-number system is that individual buyers would determine the expected fuel economy under the driving mode or modes of particular interest to them.

EPA had previously included highway fuel economy estimates on labels during the 1975 through 1978 model years. We subsequently dropped the highway estimate from the labels and termed the former "city" estimate simply as the "estimate." This was done as an interim measure while a solution to the in-use fuel economy shortfall problem could be found. If EPA adopts the previously described shortfall adjustments to label values, the separate city and highway estimates will become more valid and useful. The Agency does not intend to adopt this two-mode label system if shortfall adjustments are not adopted.

2. Elimination of Prior Approvals for Label Values. Current regulations require that manufacturers obtain EPA approval of label values before they can be used. This approval process requires significant EPA resources and can cause delays for manufacturers in labeling vehicles in production.

EPA proposes to eliminate the requirement for prior label approvals. Manufacturers would be responsible for calculating label values and could apply them at their discretion provided they had submitted the label value and supporting calculation to EPA. EPA would retain the function of auditing label calculations at its discretion. If EPA audits revealed vehicles mislabeled too high, manufacturers would be required to relabel the vehicles. Manufacturers would have 15 calendar days to change labels on unsold vehicles and begin installing correct labels on all unlabeled vehicles. The relabeling cost and disruption to advertising should be sufficient incentive for manufacturers to maintain good internal quality control of their label calculations. Thus, no additional mislabeling penalty is proposed. As in running change label updates, EPA would provide the latest available comparable range to be used.

3. Unique Labels for Fuel Efficient Vehicles. Currently, each model type classification (as defined by car line name, basic engine, and transmission class) is represented by a single fuel

[5] EPA Report No. 460/3-80-010, "Passenger Car Fuel Economy: EPA and Road," September 1980, available in Public Docket No. A-80-32.

economy general label value (although labels specific to configurations are allowed temporarily until general labels become available). Manufacturers often have specific fuel efficient design packages within model types that are not appropriately represented by the model type general label value. There is currently no formal mechanism that allows manufacturers to separately label and advertise these fuel efficient packages if they fall within a currently defined model type. EPA agrees that the highlighting of specific fuel efficient designs that are available is consistent with the Agency's goal to provide consumers with accurate fuel economy information. Therefore, EPA proposes to allow manufacturers to separately label specific vehicle designs based on fuel economy performance, providing these vehicles bear a unique name for consumer identification, and providing certain minimum testing requirements are met.

Under this proposal, the manufacturer would be allowed to create unique car lines representing model types separated from the original model types. The new car line name must be different form the remaining car line name (although the unique car line name may be a derivative of the original name, such as Omni Miser), and must appear on the label and on each vehicle bearing the label. For label calculation purposes, the vehicles separated from the original model type will be considered separate basic engines. No subconfiguration may be represented in more than one basic engine, and *all* subconfigurations within a unique label calculation must be represented by test data. The label values for the unique model types contained in the new basic engines would be calculated using existing procedures.

The manufacturer may make unique label subconfiguration groupings as large or small as it desires as long as each subconfiguration in the grouping is represented by test data. Further, the lable updating provisions of this proposal would apply as with other model types.

4. *Clarification and Standardization of Label Format.* Under the current regulations, prior approval of labels encompasses the format as well as the information contained on the label. This approval process costs both the manufacturers and EPA time and resources. Format variation also makes it difficult for potential buyers to locate and understand the information and reduces the usefulness of the label for comparative shopping.

We are proposing changes affecting both the information EPA required on the label and the format itself in order to achieve a certain degree of standardization, improved clarity, and a more streamlined administrative process. The proposed changes to the label format are to establish a standard format and to delete the requirement that EPA approve the label format.

EPA has contracted with a media consultant firm to review specific label formats and provide comments and suggestions.[6] The Department of Energy (DOE) has done similar studies.[7] Drawing from this information and from EPA's experience with various formats used by manufacturers, EPA is presenting two alternatives in this proposal. The format adopted in the final rule will be based on the comments received on these alternatives. Examples of the alternative formats are appended to the regulations.

The first alternative (developed by EPA) allows the manufacturer some flexibility in the information that can be included on the label beyond the minimum information required. It has certain minimum dimensional requirements and must leave at least 60 percent of the label area for the fuel economy values which also have minimum dimensional requirements. This alternative format is presented in the text of the regulations for this NPRM since it allows more variation and, therefore, needs a more detailed description. The second alternative is the fixed format developed by DOE which features a depiction of a gas pump and exact label language. For this alternative, no variations may be made to the exact format except that the size (with contents) may be proportionately increased from minimum dimensions.

EPA also proposes to eliminate the requirement for EPA prior approval of label formats even though some format variation may still be allowed. EPA would instead audit label formats as necessary and could require relabeling if violations occur.

EPA requests comments on the proposed labeling format changes, particularly on:

a. The preferred format alternative;

b. Implementation costs and problems;

c. Consumer information needs and understanding;

d. Advertising guidelines for all media; and

e. Any other proposed systems, including their advantages and disadvantages.

E. Proposed Technical Amendments To Cut Costs and Improve the Data Base

1. Elimination of the Preliminary CAFE Calculation. There are two basic uses of the preliminary CAFE in the current program. One is to provide the manufacturer an early estimate of what the final CAFE could be. A second purpose is to establish the subdivisions of a product line which will be the basis for establishing test requirements for the final CAFE data base. The need for the preliminary CAFE is now being questioned by both EPA and the industry.

EPA originally incorporated the preliminary CAFE concept in response to manufacturers' requests.[8] According to manufacturers, this early program of EPA-confirmed corporate fuel economy values would provide a very good indication of what the final CAFE values would be if no significant changes were introduced by the manufacturers and the projected sales remained stable. They also felt EPA-confirmed values would provide their marketing departments latitude in making marketing decisions if preliminary CAFE's were above the standard. Even though EPA offers the preliminary CAFE as an early indicator of the manufacturer's status for CAFE compliance, in recent years manufacturers seem to have stopped relying on the preliminary CAFE for this purpose. Whether the manufacturer needs it or not, EPA and the manufacturer still must devote resources to generate and confirm the value since this is required by the current regulations.

EPA proposes to eliminate the preliminary CAFE calculation from the fuel economy program. In its place, the regulations would require that the final CAFE include test data on vehicle configurations with total production of 90 percent or more of the manufacturer's total production. If this proposal to eliminate the preliminary CAFE is adopted, manufacturers will be free to choose, in most cases, which designs to test as long as the final CAFE data base represents 90 percent or more of vehicle configuration production. (There would be no change in the existing requirement that all data submitted during the label calculation procedures must also be included in the CAFE calculation and this would also apply to data submitted for relabeling purposes.)

[8] 41 FR 38047, September 10, 1976.

Also related to the preliminary CAFE calculation, under the current regulations (40 CFR 600.507–79(a)(1)), manufacturers may request exemptions from the requirement that supplementary fuel economy data be submitted for running changes based upon preliminary CAFE values. If a manufacturer's preliminary CAFE is sufficiently above the model year's CAFE value, the manufacturer may request such an exemption. Since the exemption decision relies on the preliminary CAFE and since the manufacturers will, in most cases, be free to choose which data to include in the final CAFE data base, EPA proposes that the exemption be eliminated in conjunction with eliminating the preliminary CAFE calculation. Also, in some cases the additional running change data will be needed under the relabeling proposal.

2. *Fuel Economy Adjustments for High Mileage Test Vehicles.* Presently, the regulations allow a maximum mileage accumulation of 10,000 miles for fuel economy data vehicles. This is allowed in order to extend the usefulness of fuel economy test vehicles so that each vehicle can be used for more tests, thus saving the cost of new test vehicles. It also allows vehicles which had been used to generate emission certification data under 40 CFR Part 86 to be reconfigured and used as fuel economy data vehicles.

Fuel economy levels usually improve with mileage accumulation because engine wear reduces friction. Test vehicle mileage over 4,000 miles can consequently bias fuel economy test results from the original 4,000-mile base. EPA conducted an analysis (available in the public docket) of fuel economy data from 1976 through 1981 model year test vehicles.* Average fuel economy improvements of approximately 5 percent were calculated between 4,000 and 10,000 miles. Thus, for example, by increasing the mileage accumulated on a test vehicle to 10,000 miles, fuel economy can be increased on the average by about 1.0 mpg on a vehicle which has a 4,000-mile fuel economy of 20 mpg. In the 1976 model year, approximately 8 percent of the fuel economy tests were performed on vehicles which had accumulated over 6,200 miles. By the 1980 model year, 35 percent of the tests were performed on vehicles which had accumulated over 6,200 miles. This increased use of test vehicles which have accumulated high mileage tends to bias the fuel economy data.

EPA is proposing (for labeling only) to apply an adjustment factor to test data from vehicles which exceed 6,200 miles (10,000 kilometers). This would allow manufacturers to continue using existing test vehicles, but the fuel economy bias caused by higher mileage would be eliminated. An adjustment equation is contained in the test of the proposed regulation. This proposal would allow the manufacturer to test vehicles with up to 6,200 miles accumulation without a factor being applied to the fuel economy results. For any tests conducted on vehicles with 6,200 miles or more, and up to 10,000 miles, the test results must be adjusted to 4,000-mile levels. The proposed method would allow manufacturers to choose between the use of the adjustment factors for vehicles over 6,200 miles or testing a new vehicle.

Because the proposal is to adjust the fuel economy of vehicles exceeding 6,200 miles back to a 4,000-mile reference point, we recognize that it would constitute a strong disincentive to accumulate more than 6,200 miles on a test vehicle. That disincentive is intended without going so far as to establish an absolute prohibition. Recent changes to the emission certification regulations (46 FR 50464, October 13, 1981) have created greater flexibility to reconfigure vehicles and to perform the emission certification tests sooner than 4,000 miles. This leaves sufficient latitude to reconfigure these vehicles again and fulfill any necessary fuel economy data requirements without accumulating over 6,200 miles. We believe the tendency to accumulate over 6,200 miles is not driven by a desire to save costs by maximizing vehicle reuse but by the desire to generate the maximum fuel economy possible within the time and resources available to the manufacturer to accumulate mileage. This creates inequity in the comparability of fuel economy values and favors manufacturers who have resources available to accumulate additional mileage.

This proposal to adjust data on vehicles with mileage over 6,200 miles only applies to fuel economy values used for label calculations. Since this rulemaking is not intended to affect CAFE stringency, we are not proposing now to use the adjusted values in the CAFE calculation.

3. *Drivetrain Separation.* a. Presently, the definition of "transmission class" does not explicitly distinguish between front- and rear-wheel drive. Consequently, either front- or rear-wheel drive vehicles, or a combination of both, can generate fuel economy data to represent a base level. Available EPA test data show that, in general, configurations tested with rear-wheel drive achieve better tested fuel economy than the same configurations tested with front-wheel drive. This difference in testing results can compromise the representativeness of particular fuel economy values.

The current fuel economy regulations (40 CFR 600.002–79(a)(22)) allow the Administrator to separate vehicles with front- and rear-wheel drive systems into separate transmission classes based on "other characteristics determined significant by the Administrator," and thus, into separate base levels. EPA began separating front- and rear-wheel drive transmission vehicles into separate transmission classes in the 1981 model year using this provision. EPA proposes in this NPRM to make this separation explicit in the regulations.

b. Some manufacturers are now installing automatic transmissions that have "lockup" torque converters and have also installed transmissions with "overdrive" gear ratios. Both of these features improve the fuel efficiency of the vehicle.

EPA proposes that both overdrive gearing and automatic transmission with lockup be explicitly included in the definition of transmission class. Thus, consumers would be notified of the fuel economy impact (since transmission class determines a model type) and the manufacturer would get fulll credit for these features by having them calculated and listed separately both in the *Guide* and on vehicle labels. Few, if any, additional tests would be required by this change.

4. *Interior Volume.* EPA uses the interior volume of vehicles to classify passenger automobiles to aid the consumer in comparing the fuel efficiency of similar vehicles. The current classification technique was published as a final rule in the September 12, 1977 **Federal Register** (42 FR 45668).

EPA is proposing three changes to the current method for measuring vehicles to account for: (1) The cargo volume of hatchbacks and station wagons, (2) the total front-seat leg room, and (3) adding interior volume measurements to the two-seater vehicle classification. Since these changes will result in new interior volumes for all vehicles, some of the vehicles could be in a new interior volume classification. Therefore, EPA is requesting that manufacturers include in their comments interior volume information on these vehicles that would change classification. This

* EPA Report No. EPA/AA/CPSB/81–03, "Effect of Vehicle Mileage on Tested Fuel Economy," February 1981.

information will be used to determine whether the existing ranges need to be adjusted.

5. *Reduced Reporting Requirements.* EPA proposes to reduce the manufacturers' reporting burdens by eliminating requirements to submit certain information to EPA and to require that information be retained by the manufacturer. This information concerns test vehicle calibrations and maintenance records, and also incudes certain interior volume calculation information. Since EPA does not routinely use this information, it no longer needs to be submitted. However, under this proposal, the manufacturer would have to make these records available to EPA upon request.

III. Other Major Alternatives Considered

In this effort to improve the credibility and usefulness of EPA's fuel economy information, EPA considered many alternatives. The most significant alternatives considered for each of the proposed modifications to the existing regulations are outlined below.

A. Changes in the Test Procedure

A logical option to bring EPA estimates more in line with in-use experience is to make the fuel economy test procedure more closely match actual in-use conditions. However, in order to minimize test costs and maximize the usefulness of the data, test procedures should be the same for the fuel economy labeling program and the manufacturer's CAFE compliance program. Furthermore, when Congress established mandatory CAFE standards, they were based on then-current test procedures. If changes to the basic test cycle would significantly affect the stringency of the CAFE standards, adjusting the standards or test results might be necessary to maintain the same relative stringency. Additionally, a large portion of the fuel economy data are derived from emissions tests since EPA uses the same urban test cycle for both emissions and fuel economy. Changing the test cycle for fuel economy labeling purposes only would double the testing costs to obtain fuel economy data on emission-data vehicles. Finally, major test procedure changes would require costly capital equipment investments and would require at least five years to develop and implement, thus delaying for several years the implementation of an improved fuel economy labeling program.

B. Estimated Fuel Economy Ranges

For each model type, EPA could determine a range of fuel economy based on the estimated percentage of drivers which would achieve fuel economy within the range. EPA could establish a highly inclusive range that would allow, for example, 90 percent of drivers to achieve values within the range but then the range could be so wide as to be meaningless to consumers. Alternatively, EPA could establish a less inclusive fuel economy range that would be more useful for comparisons, but a large number of people would get fuel economy outside of the range. The range approach could make people satisfied that they achieve fuel economy within the limits expected. However, it would not help in comparison shopping since consumers would not know where within the range their fuel economy would most likely be. People might also continue to perceive the range limits as a city value and a highway value, but these range limits may not be the most accurate estimates of expected average in-use city and highway fuel economy.

C. Use of Combined Number Only

EPA considered replacing the existing estimated EPA number with another single number representing a combined city and highway fuel economy value (55 percent city and 45 percent highway weighting). The combined figure would have been a harmonic average of the city and highway values. One of the major problems with this approach is that few drivers actually operate their vehicles with this proportion of driving and while the number might provide for an easy way to comparison shop it would probably not reflect in-use fuel economy. ANPRM commenters did not support this approach.

D. Technology-Specific Adjustment Factors

EPA conducted a thorough analysis of alternatives for developing separate shortfall adjustment factors for different engine/drivetrain designs.[10] Such an approach would probably be more technically correct than applying uniform adjustments across vehicle designs because some design characteristics have been found to exhibit different relationships between laboratory results and on-road results. However, the analysis of how to categorize designs and assign them adjustment factors is very complex and requires an enormous (as well as complete and up-to-date) data base of in-use results. EPA has derived technology-specific adjustment factors based on currently available data, but in-use data are lacking for light-duty trucks and for some of the more recent designs such as light-duty diesels and some front-wheel drive technology. Although EPA considered proposing technologies-specific factors, the potential controversy over the validity and fairness of these factors led EPA to opt for the uniform factors as an initial step. Another disadvantage of technology-specific factors is that we believe technology changes would require frequent update of the factors. Simple uniform factors may also need to be updated, but since their use would not change the competitive ranking order of vehicle label values and since the factors would be based upon the overall average shortfall of all technology types, they should require less frequent updating. This would result in less disruption to manufacturers' planning and marketing practices and less resource expenditures needed by EPA to run a continuous factors updating program. EPA requests comments on the technology-specific analyses and how (or if) EPA should pursue the development of technology-specific factors in the future.

E. Design Factor Label Calculations

EPA considered using design adjustment factors to predict fuel economy mathematically for each untested subconfiguration. This would have reduced significantly the bais in the label fuel economy caused by lack of data on the configurations included within the model type covered by the labels. It can also improve the representation of the label values and possibly reduce testing requirements for both the label calculation requirements and CAFE requirements. (The development and impact analysis of this system is contained in EPA Report No. EPA–AA–CPSB–81–02 entitled, "A Comparison of Current and Proposed Labeling Programs," and is available in the public docket.) Several manufacturers have indicated, however, that in order to "prove out" the adjustment equations they would also have to test vehicles to compare tested to calculated results. This method would also tend to be more complex to set up initially and might cause some concern as to the validity of "calculating" test results.

We have concluded that only a small percentage of labels [11] are overstated by

[10] EPA Report No. EPA/AA/CTAB/FE–82–6, "Analysis of In-Use Fuel Economy Data: Stage I," Dillard Murrell, September, 1982, available in Public Docket No. A–80–83.

[11] For passenger cars only three percent of the city labels and nine percent of the highway values appear overstated by two or more mpg and for light-duty trucks only one percent of the city labels and six percent of the highway labels appear overstated by two or more mpg.

two mpg or more due to lack of data and deficiencies in the current data aggregation system. The implementation of a new system as complex as the design factor approach would seem to be a drastic solution relative to the magnitude of the problem. Hence, we have proposed the simpler approach of requiring the testing of the highest sales volume in each configuration as the minimum data requirement to generate a label. We believe this approach will correct the large majority of overstated labels with the minimum change to the current system. EPA welcomes comments on this approach for labeling as well as comments as to whether EPA should consider the use of design factoring in generating analytical CAFE data (as is currently allowed in the regulations).

F. Labels That Are More Design Specific

EPA indicated in the ANPRM that it was considering label values for subgroups within each model type. The level of detail could have been as detailed as the subconfiguration level. Comments received to this advanced notice indicated that labeling at this level would be very costly. This high cost would result because most manufacturers apparently do not have a mechanism for tracking such unique vehicle designs during the assembly process. Therefore, to set up this tracking mechanism to ensure that each vehicle is properly labeled, complicated and very costly systems would have to be purchased and installed. EPA also considered less detailed levels of labeling (such as by axle ratio) which would have resulted in an improvement for vehicle comparisons. However, these would have required that more vehicles be tested early in the model year or that design factors be used for estimating test results. EPA requests comments on whether such approaches should still be considered to improve the labeling program.

IV. Cost of Implementation

EPA has estimated, based on information from previous model years, the likely cost to maufacturers of the changes proposed in this NPRM. The proposed changes are estimated to cost the entire industry less than $600,000 per year. A detailed analysis of the likely costs of the proposals in this NPRM is contained in a document entitled "Cost Analysis of Proposed Changes to 40 CFR Part 600 to Improve Fuel Economy Labeling and the Fuel Economy Data Base," which can be obtained from Public Docket No. A–80–32. EPA invites comments and additional information to improve the accuracy of the analysis used to develop the final rule.

V. EPCA Constraints

Section 503(d)(1) of EPCA, 15 U.S.C. 2003(b)(1), requires that for purposes of CAFE, fuel economy be measured and calculated by procedures established by the EPA Administrator. It further requires that "Procedures so established with respect to passenger automobiles (other than for purposes of Section 506) shall be procedures utilized by the EPA Administrator for model year 1975 (weighted 55 percent urban cycle and 45 percent highway cycle) or procedures which yield comparable results." The data base improvements EPA is proposing in this notice (see Section II.E of this preamble) are intended to improve the completeness and representativeness of the fuel economy data base so that EPA fuel ecomony estimates do not overstate fuel economy improvements as compared to the 1975 base model year. These options would not change the 1975 testing or CAFE calculation procedures themselves, but would only require that manufacturers use more representative data.

Section 503(d)(3), 15 U.S.C. 2003(d)(3), of EPCA states, "testing and calculation procedures applicable to a model year, and any amendment to such procedures (other than a technical or clerical amendment), shall be promulgated not less than 12 months prior to the model year to which such procedures apply." EPA believes that the changes proposed in this NPRM are technical amendments to procedures under Section 503(d)(3) of EPCA. They would change neither the actual fuel economy testing procedures nor the basic formula used to derive manufacturers' corporate average fuel economy levels and would not entail practical leadtime constraints or compliance burdens for manufacturers.

These proposed rules are technical changes to existing requirements intended to improve the completeness and representativeness of the data base. Changes of this nature, which do not require (as a practical matter) a year's leadtime, are the type of changes Congress had in mind when it created the exception to the leadtime requirements of Section 503(d)(3). Changes to the labeling program are generally not constrained by the leadtime requirements of Section 503(d)(3). However, the Agency invites comments on the question of whether or not the changes proposed here should be treated as technical amendments.

VI. Regulatory Analysis

Under Executive Order 12291, EPA must judge whether a regulation is "major" and therefore subject to the requirement of a regulatory impact analysis. This regulation is not major because it will result in an annual effect on the economy of less than $100 million. Also, this regulation should not result in increased costs or prices for consumers, industries, or others, nor should it have adverse effects on competition, employment, investment, or productivity.

This action was submitted to the Office of Management and Budget for review as required by Executive Order 12291. Any comments from OMB to EPA and any EPA response to those comments are available for public inspection in the docket for this rulemaking; Docket No. A–80–32. The EPA's Central Docket Section (A–130) is located at 401 M Street SW., Washington, D.C. 20460.

VII. Reporting and Recordkeeping Requirements

These amendments would require the manufacturers to maintain additional records on the recalculation of label values and the approved test data used to generate them. However, the reporting of the additional label calculations would be minor compared to existing requirements. When coupled with the decrease in reporting burden due to the elimination of test vehicle calibration specification, label format, and preliminary CAFE approvals, the total program reporting and recordkeeping burden would probably decrease. Furthermore, the proposed flexibility for manufacturers to issue their own labels, rather than wait for EPA to process them, while not reducing reporting or recordkeeping requirements, should reduce manufacturers' operating costs due to their greater control over their own schedules.

Reporting, recordkeeping and labeling requirements in 40 CFR Part 600 have previously been approved by OMB and assigned control number 2000–0390. The modifications proposed in this notice have been submitted for approval to OMB under section 3504(h) of the Paperwork Reduction Act of 1980, U.S.C. 4501 *et seq.* Comments on information collection requirements proposed in this notice should be directed to the Office of Information and Regulatory Affairs, OMB, ATTN: Desk Officer EPA.

VIII. Regulatory Flexibility Act

Under the Regulatory Flexibility Act, 5 U.S.C. 601 *et seq.*, EPA is required to determine whether a regulation will have a significant economic impact on a substantial number of small entities so

as to require a regulatory analysis. The revision of the fuel economy regulation established by this rulemaking should reduce the burden, including costs of compliance with fuel economy requirements for small entities. Therefore, pursuant to 5 U.S.C. 605(b), I hereby certify that this rule will not have a significant economic impact on a substantial number of small entities.

IX. List of Subjects in 40 CFR Part 600

Electric power, Energy conservation, Gasoline, Labeling, Motor vehicles, Reporting and recordkeeping requirements, Administrative practice and procedure, Fuel economy.

Dated: May 24, 1983.

William D. Ruckelshaus,

Administrator.

PART 600—[AMENDED]

For the reasons set forth in the preamble, 40 Part 600 is amended as follows:

1. The authority for Part 600 reads as follows:

Authority: Title III of the Energy Policy and Conservation Act of 1975, Pub. L. 94–163, 89 Stat. 871, Title IV of the National Energy Conservation Policy Act of 1978, Pub. L. 95–619, 92 Stat. 3206.

2. A new § 600.002–85 is added to read as follows:

§ 600.002–85 Definitions.

(a) As used in this subpart, all terms not defined herein shall have the meaning given them in the Act:

(1) "Act" means Part I of Title V of the Motor Vehicle Information and Cost Savings Act (15 U.S.C. 1901 et seq.).

(2) "Administrator" means the Adminstrator of the Environmental Protection Agency or his authorized representative.

(3) "Secretary" means the Secretary of Transportation or his authorized representative.

(4) "Automobile" means any four-wheel vehicle propelled by a combustion engine using onboard fuel or by an electric motor drawing current from rechargeable storage batteries or other portable energy storage devices (rechargeable using energy from a source off the vehicle such as residential electric service) which is manufactured primarily for use on public streets, roads, or highways (except any vehicle operated on a rail or rails) and which is rated at 8,500 pounds gross vehicle weight or less or is a type of vehicle which the Secretary determines is substantially used for the same purposes.

(5) "Passenger Automobile" means any automobile which the Secretary determines is manufactured primarily for use in the transportation of no more than 10 individuals.

(6) "Model Year" means the manufacturer's annual production period (as determined by the Administrator) which includes January 1 of such calendar year. If a manufacturer has no annual production period, the term "model year" means the calendar year.

(7) "Federal Emission Test Procedure" refers to the dynamometer driving schedule, dynamometer procedure, and sampling and analytical procedures described in Part 86 for the respective model year, which are used to derive city fuel economy data for gasoline-fueled or diesel vehicles.

(8) "Federal Highway Fuel Economy Test Procedure" refers to the dynamometer driving schedule, dynamometer procedure, and sampling and analytical procedures described in Subpart B of this part and which are used to derive highway fuel economy data for gasoline-fueled or diesel vehicles.

(9) "Fuel" means: (i) Gasoline and diesel fuel for gasoline- or diesel-powered automobiles or (ii) electrical energy for electrically powered automobiles.

(10) "Fuel Economy" means: (i) The average number of miles traveled by an automobile or group of automobiles per gallon of gasoline or diesel fuel consumed as computed in § 600.113 or § 600.207 or (ii) the equivalent petroleum-based fuel economy for an electrically powered automobile as determined by the Secretary of Energy.

(11) "City Fuel Economy" means the fuel economy determined by operating a vehicle (or vehicles) over the driving schedule in the Federal emission test procedure.

(12) "Highway Fuel Economy" means the fuel economy determined by operating a vehicle (or vehicles) over the driving schedule in the Federal highway fuel economy test procedure.

(13) "Combined Fuel Economy" means the fuel economy value determined for a vehicle (or vehicles) by harmonically averaging the city and highway fuel economy values, weighted 0.55 and 0.45 respectively, for gasoline-fueled and diesel vehicles. For electric vehicles, the term means the equivalent petroleum-based fuel economy value as determined by the calculation procedure promulgated by the Secretary of Energy.

(14) "Average Fuel Economy" means the unique fuel economy value as computed under § 600.510 for a specific class of automobiles produced by a manufacturer that is subject to average fuel economy standards.

(15) "Certification Vehicle" means a vehicle which is selected under § 86.084–24(b)(1) and used to determine compliance under § 86.084–30 for issuance of an original certificate of conformity.

(16) "Fuel Economy Data Vehicle" means a vehicle used for the purpose of determining fuel economy which is not a certification vehicle.

(17) "Label" means a sticker that contains fuel economy information and is affixed to new automobiles in accordance with Subpart D of this part.

(18) "Dealer" means a person who resides or is located in the United States, any territory of the United States, or the District of Columbia and who is engaged in the sale or distribution of new automobiles to the ultimate purchaser.

(19) "Model Type" means a unique combination of car line, basic engine, and transmission class

(20) "Car Line" means a name denoting a group of vehicles within a make or car division which has a degree of commonality in construction (e.g., body, chassis). Car line does not consider any level of decor or opulence and is not generally distinguished by characteristics as roof line, number of doors, seats, or windows except for station wagons or light-duty trucks. Station wagons and light-duty trucks are considered to be different car lines than passenger cars.

(21) "Basic Engine" means a unique combination of manufacturer, engine displacement, number of cylinders, fuel system (as distinguished by number of carburetor barrels or use of fuel injection), catalyst usage, and other engine and emission control system characteristics specified by the Administrator. For electric vehicles, basic engine means a unique combination of manufacturer and electric traction motor, motor controller, battery configuration, electrical charging system, energy storage device, and other components as specified by the Administrator.

(22) "Transmission Class" means a group of transmissions having the following common features: basic transmission type (manual, automatic, or semi-automatic), number of forward gears used in fuel economy testing (e.g., manual four-speed, three-speed automatic, two-speed semi-automatic), drive system (e.g., front-wheel-drive, all-wheel-drive), type of overdrive, if applicable (e.g., final gear ratio less than 1.00, separate overdrive unit), torque converter type, if applicable (e.g., non-lockup, lockup, variable ratio), and other transmission characteristics that may be

determined to be significant by the Administrator.

(23) "Base Level" means a unique combination of basic engine inertia weight class and transmission class.

(24) "Vehicle Configuration" means a unique combination of basic engine, engine code, inertia weight class, transmission configuration, and axle ratio within a base level.

(25) "Engine Code" means, for gaoline-fueled and diesel vehicles, a unique combination, within an engine-system combination (as defined in Part 86 of this chapter), of displacement, carburetor (or fuel injection) calibration, distributor calibration, choke calibration, and auxiliary emission control devices, and other engine and emission control system components specified by the Administrator. For electric vehicles, engine code means a unique combination of manufacturer, electric traction motor, motor configuration, motor controller, and energy storage device.

(26) "Inertia Weight Class" means the class, which is a group of test weights, into which a vehicle is grouped based on its loaded vehicle weight in accordance with the provisions of Part 86.

(27) "Transmission Configuration" means a unique combination, within a transmission class, of the total number of forward gears. If the Administrator determines that sufficient fuel economy differences exist within a transmission configuration the Administrator may further subdivide that configuration by such features as gear ratios, torque converter multiplication ratio, stall speed, shift calibration, or shift speed.

(28) "Axle Ratio" means the number of times the input shaft to the differential (or equivalent) turns for each turn of the drive wheels.

(29) "Auxiliary Emission Control Device (AECD)" means an element of design as defined in Part 86.

(30) "Rounded" means a number shortened to the specific number of decimal places in accordance with the "Round Off Method" specified in ASTM E 29–67.

(31) "Calibration" means the set of specifications, including tolerances, unique to a particular design, version of application of a component, or component assembly capable of functionally describing its operation over its working range.

(32) "Production Volume" means, for a domestic manufacturer, the number of vehicle units domestically produced in a particular model year but not exported, and for a foreign manufacturer, means the number of vehicle units of a particular model imported into the United States.

(33) "Body Style" means a level of commonality in vehicle construction as defined by number of doors and roof treatment (e.g., sedan, convertible, fastback, hatchback) and number of seats (i.e., front, second, or third seat) requiring seat belts pursuant to National Highway Traffic Safety Administration safety regulations. Station wagons and light trucks are identified as car lines.

(34) "Hatchback" means a passenger automobile where the conventional luggage compartment, i.e., trunk, is replaced by a cargo area which is open to the passenger compartment and accessed vertically by a rear door which encompasses the rear window.

(35) "Pickup Truck" means a nonpassenger automobile which has a passenger compartment and an open cargo bed.

(36) "Station Wagon" means a passenger automobile with an extended roof line to increase cargo or passenger capacity, cargo compartment open to the passenger compartment, a tailgate, and one or more rear seats readily removed or folded to facilitate cargo carrying.

(37) "Gross Vehicle Weight Rating" means the manufacturer's gross weight rating for the individual vehicle.

(38) "Ultimate Consumer" means the first person who purchases an automobile for purposes other than resale or leases an automobile.

(39) "Van" means any light truck having an integral enclosure fully enclosing the driver compartment and load-carrying device, and having no body sections protruding more than 30 inches ahead of the leading edge of the windshield.

(40) "Base Vehicle" means the lowest priced version of each body style that makes up a car line.

(41) "Nonpassenger Automobile" means an automobile that is not a passenger automobile, as defined by the Secretary of Transportation at 49 CFR 523.5.

(42) "Four-Wheel-Drive General Utility Vehicle" means a four-wheel-drive, general purpose automobile capable of off-highway operation that has a wheelbase not more than 110 inches and that has a body shape similar to a 1977 Jeep CJ–5 or CJ–7, or the 1977 Toyota Land Cruiser, as defined by the Secretary of Transportation at 49 CFR 553.4.

(43) "Test Weight" means the weight within an inertia weight class which is used in the dynamometer testing of a vehicle, and which is based on its loaded vehicle weight in accordance with the provisions of Part 86.

(44) "Secretary of Energy" means the Secretary of Energy or his authorized representative.

(45) "Electric Traction Motor" means an electrically powered motor which provides tractive energy to the wheels of a vehicle.

(46) "Energy Storage Device" means a rechargeable means of storing tractive energy on board a vehicle such as storage batteries or a flywheel.

(47) "Motor Controller" means an electronic or electromechanical device to convert energy stored in an energy storage device into a form suitable to power the traction motor.

(48) "Electrical Charging System" means a device to convert 60Hz alternating electric current, as commonly available in residential electric service in the United States, to a proper form for recharging the energy storage device.

(49) "Battery Configuration" means the electrochemical type, voltage, capacity (in Watt-hours at the c/3 rate), and physical characteristics of the battery used as the tractive energy storage device.

(50) "Drive System" means the number and location of drive axles (e.g., front-wheel-drive, all-wheel-drive, rear-wheel-drive) and any other feature of the drive system if the Administrator determines that such other feature may result in a fuel economy difference.

(51) "Subconfiguration" means a unique combination within a vehicle configuration of equivalent test weight, road-load horsepower, and any other operational characteristic or parameter which the Administrator determines may significantly affect fuel economy within a vehicle configuration.

3. A new § 600.006–85, is added to read as follows.

§ 600.006–85 Data and information requirements for fuel economy vehicles.

(a) For certification vehicles with less than 10,000 miles, the requirements of this section are considered to have been met except as noted in paragraph (c) of this section.

(b)(1) The manufacturer shall submit the following information for each fuel economy data vehicle:

(i) A description of the vehicle, exhaust emission test results, applicable deterioration factors, and adjusted exhaust emission levels.

(ii) A statement of the origin of the vehicle including total mileage accumulation, and modifications (if any) from the vehicle configuration in which the mileage was accumulated. (For modifications requiring advance approval by the Administrator, the name of the Administrator's representative approving the modification and date of approval are required.) If the vehicle

was previously used for testing for compliance with Part 86 of this chapter or previously accepted by the Administrator as a fuel economy data vehicle in a different configuration, the requirements of this paragraph may be satisfied by reference to the vehicle number and previous configuration.

(iii) A statement that the fuel economy data vehicle, with respect to which data are submitted:

(A) Has been tested in accordance with applicable test procedures,

(B) Is, to the best of the manufacturer's knowledge, representative of the vehicle configuration listed, and

(C) Is in compliance with applicable exhaust emission standards.

(2) The manufacturer shall retain the following information for each fuel economy data vehicle, and make them available to the Administrator upon request:

(i) A description of all maintenance to engine, emission control system, or fuel system components performed within 2,000 miles prior to fuel economy testing.

(ii) In the case of electric vehicles, the manufacturer should provide a description of all maintenance to electric motor, motor controller, battery configuration, or other components performed within 2,000 miles prior to fuel economy testing.

(iii) A copy of calibrations for engine, fuel system, and emission control devices, showing the calibration of the actual components on the test vehicle as well as the design tolerances.

(iv) In the case of electric vehicles, the manufacturer should provide a copy of calibrations for the electric motor, motor controller, battery configuration, or other components on the test vehicle as well as the design tolerances.

(v) If calibrations for components in paragraph (b) of this section were submitted previously as part of the description of another vehicle or configuration, the original submittal may be referenced.

(c) The manufacturer shall submit the following fuel economy data:

(1) For vehicles tested to meet the requirements of Part 86 (other than those chosen in accordance with § 86.084–24 (c) and (h)), the city and highway fuel economy results from all tests on that vehicle, and the test results adjusted in accordance with paragraph (g) of this section.

(2) For each fuel economy data vehicle, all individual test results (excluding results of invalid and zero mile tests) and, if the data are used in fuel economy label calculations, the test results adjusted in accordance with paragraph (g) of this section.

(d) The manufacturer shall submit an indication of the intended purpose of the data (e.g., data required by the general labeling program or voluntarily submitted for specific labeling).

(e) In lieu of submitting actual data from a test vehicle, a manufacturer may provide fuel economy values derived from an analytical expression, e.g., regression analysis. In order for fuel economy values derived from analytical methods to be accepted, the expression (form and coefficients) must have been approved by the Administrator.

(f) If, in conducting tests required or authorized by this part, the manufacturer utilizes procedures, equipment, or facilities not described in the Application for Certification required in § 86.084–21, the manufacturer shall submit to the Administrator a description of such procedures, equipment, and facilities.

(g)(i) The manufacturer shall adjust all test data used for fuel economy label calculations generated by vehicles with engine-system combinations with more than 6,200 miles (10,000 kilometers) using either of the following equations:

Equation A

$$FE_{6{,}400\,km} = FE_T\,[0.989 + 0.523 \times 10^{-6}\,(km)]^{-1}$$

Equation B

$$FE_{4{,}000\,mi} = FE_T\,[0.989 + 0.842 \times 10^{-6}\,(m)]^{-1}$$

Where:

$FE_{6{,}400\,km}$ = Fuel economy data adjusted to 6,400-kilometer test point

$FE_{4{,}000\,mi}$ = Fuel economy data adjusted to 4,000-mile test point

FE_T = Tested fuel economy value

km = Kilometer accumulation at test point

mi = Miles accumulation at test point

(ii) For vehicles with 6,200 miles (10,000 kilometers) or less accumulated, the manufacturer is not required to adjust the data.

4. A new § 600.010–85 is added to read as follows:

§ 600.010–85 Vehicle test requirements and minimum data requirements.

(a) For each certification vehicle defined in this part, and for each vehicle tested according to the emission test procedures in Part 86 for addition of a model after certification (§ 86.079–32) or, approval of running change (§ 86.079–33):

(1) The manufacturer shall generate city fuel economy data by testing according to the applicable procedures.

(2) The manufacturer shall generate highway fuel economy data by:

(i) Testing according to applicable procedures, or

(ii) Use of an analytical technique as described in § 600.006(e).

(3) The data generated in paragraphs (a) (1) and (2) of this section, shall be submitted to the Administrator in combination with other data for the vehicle required to be submitted in Part 86 of this Title.

(b) For each fuel economy data vehicle:

(1) The manufacturer shall generate city fuel economy data and highway fuel economy data by:

(i) Testing according to applicable procedures, or

(ii) Use of analytical technique as described in § 600.006(e), in addition to testing (e.g., city fuel economy data by testing, highway fuel economy data by analytical technique).

(2) The data generated shall be submitted to the Administrator according to the procedures in § 600.006.

(c) *Minimum data requirements for labeling:* (1) In order to establish initial fuel economy label values under § 600.306, or mid-year label updates under § 600.314(c), the manufacturer shall use only test data accepted in accordance with § 600.008(b) and (f) meeting the minimum coverage of:

(i) Data required for emission certification under §§ 86.082–24, 86.079–32, 86.079–33, and 86.082–34.

(ii) Data from the highest projected model year sales subconfiguration within the highest projected model year sales configuration for each base level, or

(iii) For additional model types established under § 600.207(a)(2), data from each subconfiguration included within the model type.

(2) For the purpose of calculating fuel economy label values for running change updates under § 600.314(b), the manufacturer shall submit data required under § 600.507.

(d) *Minimum data requirements for the manufacturer's average fuel economy:* For the purpose of calculating the manufacturer's average fuel economy under § 600.510, the manufacturer shall submit test data representing at least 90 percent of the manufacturer's actual model year production, by configuration, for each category identified for calculation under § 600.510(a).

5. A new § 600.206–85, is added to read as follows:

§ 600.206–85 Calculation and use of fuel economy values for gasoline-fueled, diesel, and electric vehicle configurations.

(a) Fuel economy values determined for each vehicle and as approved in § 600.008 (b) or (f) are used to determine city, highway, and combined fuel economy values for each vehicle configuration (as determined by the

Administrator) for which data are available.

(1) If only one set of city and highway fuel economy values are accepted for a vehicle configuration, these values, rounded to the nearest tenth of a mile per gallon, comprise the city and highway fuel economy values for that configuration.

(2) If more than one city or highway fuel economy value is accepted for a vehicle configuration:

(i) All data shall be grouped according to the subconfiguration at which the data were generated using sales projections supplied in accordance with § 600.207(a)(3).

(ii) Within each group of data, all values are harmonically averaged and rounded to the nearest 0.0001 of a mile per gallon in order to determine city and highway fuel economy values for each subconfiguration at which the vehicle configuration was tested.

(iii) All city fuel economy values and all highway fuel economy values calculated in paragraph (a)(2)(ii) of this section are (separately for city and highway) averaged in proportion to the sales fraction (rounded to the nearest 0.0001) within the vehicle configuration (as provided to the Administrator by the manufacturer) of vehicles of each tested subconfiguration. The resultant values, rounded to the nearest 0.0001 mile per gallon, are the city and highway fuel economy values for the vehicle configuration.

(3) The combined fuel economy value for a vehicle configuration is calculated by harmonically averaging the city and highway fuel economy values as determined in § 600.206(a) (1) or (2), weighted 0.55 and 0.45 respectively, and rounded to the nearest 0.0001 mile per gallon. A sample of this calculation appears in Appendix II to this part.

(b) If only one equivalent petroleum-based fuel economy value exists for an electric configuration, that value, rounded to the nearest tenth of a mile per gallon, will comprise the petroleum-based fuel economy for that configuration.

(c) If more than one equivalent petroleum-based fuel economy value exists for an electric vehicle configuration, all values for that vehicle configuration are harmonically averaged and rounded to the nearest 0.0001 mile per gallon for that configuration.

6. A new § 600.207–85 is added to read as follows:

§ 600.207–85 Calculation of fuel economy values for a model type.

(a) Fuel economy values for a base level are calculated from vehicle configuration fuel economy values as determined in § 600.206(a) for low-altitude tests.

(1) If the Administrator determines that automobiles intended for sale in the State of California are likely to exhibit significant differences in fuel economy from those intended for sale in other states, he will calculate fuel economy values for each base level for vehicles intended for sale in California and for each base level for vehicles intended for sale in the rest of the states.

(2) In order to highlight the fuel efficiency of certain designs otherwise included within a model type, a manufacturer may wish to subdivide a model type into one or more additional model types. This is accomplished by separating subconfigurations from existing base level(s) and placing them into new base level(s). The new base level(s) are identical to the existing base level(s) except that they shall be considered, for the purposes of this paragraph, as containing a new basic engine. The manufacturer will be permitted to determine such new basic engines and base level(s) if:

(i) Each additional model type subsequently divided has a unique car line name and that name appears on the label and on the vehicle bearing that label, and

(ii) The subconfigurations included in the new base levels are not included in any other base level which differs only by basic engine (i.e., they are not included in the calculation of the orginal base level fuel economy values), and

(iii) All subconfigurations within the new base level(s) are represented by test data in accordance with § 600.010(c)(ii).

(3) The manufacturer shall supply total model year sales projections for each car line/vehicle subconfiguration combination.

(i) Sales projections must be supplied separately for each car line/vehicle subconfiguration intended for sale in California and each car line/vehicle subconfiguration intended for sale in the rest of the states if required by the Administrator under paragraph (a)(1) of this section.

(ii) Manufacturers shall update sales projections at the time any model type value is calculated for a label value.

(iii) The requirements of this paragraph may be satisfied by providing an amended application for certification, as described in § 86.084–21 of this chapter.

(4) Vehicle configuration fuel economy values, as determined in § 600.206(a), are grouped according to base level.

(i) If only one vehicle configuration within a base level has been tested, the fuel economy value from that vehicle configuration constitutes the fuel economy for that base level.

(ii) If more than one vehicle configuration within a base level has been tested, the vehicle configuration fuel economy values are harmonically averaged in proportion to the respective sales fraction (rounded to the nearest 0.0001) of each vehicle configuration and the resultant fuel economy value rounded to the nearest 0.0001 mile per gallon.

(5) The procedure specified in § 600.207(a) will be repeated for each base level, thus establishing city, highway, and combined fuel economy values for each base level.

(6) For the purposes of calculating a base level fuel economy value, if the only vehicle configuration(s) within the base level are vehicle configuration(s) which are intended for sale at high altitude, the Administrator may use fuel economy data from tests conducted on these vehicle configuration(s) at high altitude to calculate the fuel economy for the base level.

(b) For each model type, as determined by the Administrator, a city, highway, and combined fuel economy value will be calculated by using the projected sales and fuel economy values for each base level within the model type.

(1) If the Administrator determines that automobiles intended for sale in the State of California are likely to exhibit significant differences in fuel economy from those intended for sale in other states, he will calculate fuel economy values for each model type for vehicles intended for sale in California and for each model type for vehicles intended for sale in the rest of the states.

(2) The sales fraction for each base level is calculated by dividing the projected sales of the base level within the model type by the projected sales of the model type and rounding the quotient to the nearest 0.0001.

(3) The city fuel economy values of the model type (calculated to the nearest 0.0001 mpg) are determined by dividing one by a sum of terms, each of which corresponds to a base level and which is a fraction determined by dividing:

(i) The sales fraction of a base level, by

(ii) The city fuel economy value for the respective base level.

(4) The procedure specified in paragraph (b)(3) of this section is repeated in an analogous manner to determine the highway and combined fuel economy values for the model type.

7. A new § 600.209–85 is added to read as follows.

§ 600.209–85 Calculation of fuel economy values for labeling.

(a) For the purpose of calculating the EPA Fuel Economy Estimates for labeling, the manufacturer shall multiply the city model type fuel economy value determined in § 600.207(b), by 0.90, rounding the product to the nearest whole mpg, and

(b) Multiply the highway model type fuel economy value determined in § 600.207(b) by 0.78, rounding to the nearest whole mpg.

8. Section 600.306.85, is added to read as follows:

§ 600.306–85 Labeling requirements.

(a) Before offering a vehicle for sale, each manufacturer shall affix or cause to be affixed and each dealer shall maintain or cause to be maintained on each automobile:

(1) A general fuel economy label (initial, or updated as required in § 600.314) as described in § 600.307(b)(3) or;

(2) A specific label, as described in § 600.307(b)(4), for those automobiles manufactured or imported before the date that occurs 15 days after general labels are approved for the manufacturer.

(3) For any vehicle for which a specific label is requested which has a fuel economy value at or below the minimum tax-free value, the following statement must appear of the specific label:

[Manufacturer's name] may have to pay IRS a Gas Guzzler Tax on this vehicle because of its how fuel economy unless the combination of mpg data from similar vehicles exceeds the minimum tax-free mpg.

(4)(i) At the time a general fuel economy value is determined for a model type, a manufacturer shall, except as provided in paragraph (a)(4)(ii) of this section, relabel, or cause to be relabeled, vehicles which:

(A) have not been delivered to the ultimate purchaser, and

(B) have a combined model type fuel economy value of 0.1 mpg or more below the lowest fuel economy value at which a Gas Guzzler Tax of $0 is to be assessed.

(ii) The manufacturer has the option of relabeling vehicles during the first five working days after the general label value is known.

(iii) For those vehicle model types which have been issued a specific label and are subsequently found to have tax liability, the manufacturer is responsible for the tax liability regardless of whether the vehicle has been sold or not whether the vehicle has been relabeled or not.

(b) The manufacturer shall include the current range of fuel economy of comparable automobiles (as described in §§ 600.311 and 600.314) in the label of each vehicle manufactured or imported more than 15 calendar days after the current range is made available by the Administrator.

(1) Automobiles manufactured before a date 16 or more calendar days after the initial label range is made available under § 600.311(c) may be labeled without a range of fuel economy of comparable automobiles. In place of the range of fuel economy of comparable automobiles, the label must contain a statement indicating that, as of the date of production or importation of this automobile, no range of fuel economy of comparable automobiles was available.

(2) Automobiles manufactured more than 15 calendar days after the initial or updated label range is made available under § 600.311 (c) or (d) will be labeled with the current range of fuel economy of comparable automobiles as approved for that label.

(c) The fuel economy label must be readily visible from the exterior of the automobile and remain affixed until the time the automobile is delivered to the ultimate consumer.

(1) The fuel economy label must be located on a side window. If the window is not large enough to contain both the Automobile Information Disclosure Act label and the fuel economy label, the manufacturer shall have the fuel economy label affixed on another window and as close as possible to the Automobile Information Disclosure Act label.

(2) The fuel economy label information may be included with the Automobile Information Disclosure Act label if the prominence and legibility of the fuel economy label is maintained. For this purpose, all fuel economy label information must be placed on a separate section in the lower or right hand portion of the label and may not be intermixed with the Automobile Information Disclosure Act label information except vehicle descriptions as noted in § 600.307(b)(5).

(3) The manufacturer shall have the fuel economy label affixed in a manner that appearance and legibility are maintained until after the vehicle is delivered to the ultimate consumer.

9. A new § 600.307–85 is added to read as follows:

§ 600.307–85 Fuel economy label format requirements.

(a) Fuel economy labels must be rectangular in shape, printed in a color which contrasts with the paper color and in a type size that is easily readable, and be large enough to allow inclusion of all required and voluntary information without distracting from readability.

(1) Within the height/width ratio range of 0.618 to 1.618, manufacturers may set their own label dimensions, as needed, keeping within the minimum requirements of:

(i) 95 millimeters (3.7 inches) high,

(ii) 100 millimeters (3.9 inches) wide, and

(iii) An area of 15,000 mm^2 (23.25 $inches^2$).

(2) At leat 60 percent of the total fuel economy label area, either the top or left portion, shall contain only the following information:

(i) The EPA logo in the upper left corner and Department of Energy logo in an adjacent corner.

(ii) The heading "Fuel Economy Estimates," highlighted by size or type face.

(iii) The city and highway fuel economy values, as described in paragraph (b)(1) of this section, of equal size and highlighting. The city value should be to the left or above the highway value.

(3) The fuel economy label shall have a contrasting border line at least 2.5 mm (0.1 inch) wide.

(b) Fuel economy labels, an example of which is illustrated in Appendix IX, shall contain in the format described in this section, at a minimum the following information:

(1) The city and highway fuel economy estimates, labeled accordingly, and calculated in accordance with § 600.209.

(2) The phrase "Compare this vehicle to others in the FREE Gas Mileage Guide, required by law at all dealerships." The word "FREE" shall be highlighted. The phrase shall be the first phrase in the label area not reserved for the fuel economy estimates, as described in paragraph (a)(2) of this section.

(3) The following vehicle descriptors will be used for general labels:

(i) Model year;

(ii) Vehicle car line;

(iii) Engine displacement, in cubic inches, cubic centimeters, or liters whichever is consistent with the customary description of that engine;

(iv) Number of engine cylinders or rotors;

(v) Engine description, if necessary to distinguish otherwise identical model type, as approved by the Administrator;

(vi) Fuel metering system, including number of carburetor barrels, if applicable;

(vii) Transmission class; and

(vii) Catalyst usage, if necessary to distinguish otherwise identical model types.

(viii) California emission control system usage, if applicable and if the Administrator determines that automobiles intended for sale in the State of California are likely to exhibit significant differences in fuel economy from those intended for sale in other states.

(4) The following vehicle descriptors will be used for specific labels:

(i) The descriptors of paragraph (b)(3) of this section;

(ii) Inertia weight class; and

(iii) Axle ratio.

(iv) Other engine or vehicle arameters, if approved by the Administrator.

(5) Where the fuel economy label is incorporated with the Motor Vehicle Information and Cost Savings Act label the vehicle descriptors, as set forth in paragraph (b) of this section, do not have to be repeated if the information is readily found on the Motor Vehicle Information and Cost Savings Act label.

(6) The phrase "Estimated annual fuel cost:" followed by the annual fuel cost. The annual fuel cost estimate for operating the automobile shall be computed by using values for the fuel cost per gallon, average annual mileage (both obtained through the Administrator from the Department of Energy), and the combined city/highway fuel economy determined in accordance with §600.209.

(i) The annual fuel cost estimate for a vehicle is computed by:

(A) Multiplying the estimated fuel cost per gallon for the model year, expressed in dollars to the nearest 0.05 dollar, by

(B) The average annual mileage, expressed in miles per year to the nearest 1,000 miles per year, and

(C) Dividing by the combined city/highway fuel economy value calculated using city and highway fuel economy value adjusted in accordance with § 600.209.

(ii) The product computed in paragraph (b)(6)(i) of this section and rounded to the nearest dollar per year will comprise the annual fuel cost estimate that appears on labels for that vehicle.

(7) The vehicle's classification (determined in accordance with § 600.315), the comparison range of city and highway fuel economy values for the class, and the date of the comparison range.

(i) The fuel economy range required by paragraph (b)(7) of this section is calculated and supplied to the manufacturer by the Administrator in accordance with § 600.311.

(ii) If the Administrator has not supplied the fuel economy range for other vehicles to the manufacturer by the time a vehicle is to be labeled or within the time constraints of § 600.306(b), the statement required by paragraph (b)(7) of this section shall be replaced by the statement: "A range of MPG numbers for other models of similar size was not available when this vehicle was labeled."

(8)(i) For fuel economy labels of passenger automobile model types requiring a tax statement under § 600.513, the phrase "* * * Gas Guzzler Tax: $——— * * *" centered on a separate line within the fuel economy label. The words "Gas Guzzler" shall be highlighted.

(ii) The tax value required by this paragraph shall be based on the combined fuel economy value for the model type calculated in accordance with § 600.207 and rounded to the nearest 0.1 mpg. Adjustment in accordance with § 600.209 will not be used to determine the tax liability.

(c) The fuel economy estimates required by paragraph (b)(1) of this section shall be highlighted by being no less than six times the size of the next largest print on the label (excluding the title and logos) with each digit measuring at least 20 mm × 25 mm (0.75 inch × 1.0 inch) in width and height, respectively. The line width of each digit shall be at least 2.5 mm (0.1 inch). Digits not printed as a single large character shall be made of a matrix of smaller characters. The small characters shall not be separate alphabetic or numeric characters. The small characters shall form a reasonably dark and continuous line, to approximate a single large character.

§ 600.308–85 General labels. [Reserved]

10. Section 600.308–86 is added and reserved.

§ 600.309–85 Specific labels. [Reserved]

11. Section 600.309–85 is added and reserved.

12. A new § 600.311–85 is added to read as follows:

§ 600.311–85 Range of fuel economy for comparable automobiles.

(a) The Administrator will determine the range of city and the range of highway fuel economy values for each class of comparable automobiles.

(b) The range of city fuel economy values within a class is the maximum city and the minimum city fuel economy value for all general labels as determined in § 600.307(b)(3) regardless of manufacturer. The range of highway values is determined in the same manner.

(c) The initial range will be made available on a date specified by the Administrator that closely coincides to the date of the general model introduction for the industry.

(d) The ranges of comparable fuel economy values for a class of automobiles will be updated periodically and will be derived from the latest available label values reported to the Administrator for that class of automobiles.

(e) If the Administrator determines that automobiles intended for sale in California are likely to exhibit significant differences in fuel economy from those intended for sale in other states, he will compute separate ranges of fuel economy values for each class of automobiles for California and for the other states.

(f) For high altitude vehicles determined under § 600.310, both general and specific labels will contain the range of comparable fuel economy computed in this section.

(g) The manufacturer shall include the appropriate range of fuel economy determined by the Administrator in paragraph (c) or (d) of this section, on each label affixed to an automobile within that class except as provided in § 600.306(b)(7)(ii).

13. A new § 600.312–85 is added to read as follows:

§ 600.312–85 Labeling reporting and recordkeeping, Administrator reviews.

(a)(1) The manufacturer shall determine label values using the procedures specified in Subparts C and D of this part and submit the label values, and the data sufficient to calculate the label values, to the Administrator according to the timetable specified in § 600.313.

(2) The label values that the manufacturer calculates and submits under paragraph (a)(1) of this section shall constitute the EPA Fuel Economy Estimates unless the Administrator determines that they are not calculated accordingly to the procedures specified in Subparts C and D of this part.

(3) If at any time during the model year, any label values are determined not to be calculated according to the procedures specified in Subparts C and D of this part, the Administrator shall notify the manufacturer in writing. If the Administrator has sufficient information to enable calculation of the correct label values, this notification shall specify the correct label values which constitute the EPA Fuel Economy Estimates. If additional information is required, the Administrator shall request such additional information and a

recalculation of the label value by the manufacturer.

(4) If the Administrator determines revised label values under paragraph (a)(3) of this section are lower than the label values calculated by the manufacturer, the manufacturer shall affix the revised labels to all affected new vehicles which are unsold beginning no later than 15 calendar days after the date of notification by the Administrator.

(b)(1) The manufacturer is responsible for affixing vehicle labels that meet the format and content requirements of this subpart.

(2) The manufacturer shall retain for examination, at the Administrator's discretion, typical label formats representing all information required on the manufacturer's fuel economy labels. The information shall include the text of all required and voluntary information as well as the size and color of print and paper, spacing, and location of all printed information. Where the fuel economy label is incorporated with the automobile Information Disclosure Act label, the above requirements pertain to those sections of the label concerning fuel economy labeling information.

(3) If the Administrator determines upon examiniation of records that the label format or contents do not meet the requirements of this subpart, the Administrator may require the manufacturer to make specific changesx in subsequent labels. The Administrator may require such changes to be implemented on a reasonable timetable, but no sooner than 15 days from the date of notification to the manfacturer.

14. A new § 600.313–85 is added to read as follows:

§ 600.313–85 Timetable for data and information submittal and review.

(a) A manufacturer shall submit to the Administrator fuel economy label values and sufficient information to determine fuel economy label values within the following time constraints:

(1) For initial general label values, no later than five working days before the date that the model type is initially offered for sale.

(2) For the mid-year label update (as required under § 600.314(c)), the submissions for all model types must be made at least 5 working days before the implementation of new label values.

(3) For model types having label values updated because of running changes (as required under § 600.314(b)), the submission must be made at least five working days before the date of implementation of the running change.

(b) A manufacturer may not proceed with any label calculation until the data from each vehicle used in such calculation satisfies the requirements of § 600.008.

(c) If the Administrator has waived any testing in paragraph (b) of this section and subsequently finds that the decision to waive testing was based on an incorrect data submission or that a fuel economy offset exists (based on subsequent testing of that manufacturer's product line), the Administrator may require confirmation of the data generated by any such waived vehicle.

15. A new § 600.314–85 is added to read as follows:

§ 600.314–85 Updating label values, annual fuel cost, gas guzzler tax, and range of fuel economies for comparable automobiles.

(a) After the manufacturer calculates initial fuel economy values for a model type, those values will remain in effect for that model year unless updated in accordance with paragraph (b) or (c) of this section or unless revised in accordance with Section 312 of this part.

(b) *Continuous change label updates.* (1) Except as specified in paragraph (b)(2) of this section, the manufacturer shall recalculate the model type values for any running change under §§ 86.079–32, 86.079–33, or 86.082–34 that increases the equivalent test weight of any vehicle in the model type, adds an axle ratio which is 10 percent (or more) larger than the largest axle ratio tested in any base level, or increases the road-load horsepower for any vehicle in the model type by more than 10 percent since the most recent label value was determined using test data in accordance with § 600.507.

(2) For those model types created in § 600.207(a)(2), the manufacturer shall recalculate the model type values for any additons or deletions of sub-configurations to the model type. Minimum data requirements specified in § 600.010(C)(1)(ii) shall be met prior to recalculation.

(3) Recalculations shall be performed as specified in paragraph (d) of this section.

(i) The manufacturer shall use updated total model year projected sales for the recalculation in accordance with § 600.207 of this part.

(ii) All current model year data approved by the administrator for that model type shall be included in the recalculation

(c) *Mid-year label updates.* Each manufacturer shall recalculate label values once per year, in addition to any recalculations required under paragraph (b) of this section.

(1) All base levels used in the label calculations shall contain the minimum test data specified in § 600.010(c).

(2) The total model year projected sales shall be updated as of December 31 of the calendar year preceding the applicable model year.

(3) All current model year data approved by the Administrator as of December 31 shall be included in the recalculation.

(4) Recalculations shall be performed as specified in paragraph (d) of this section.

(5) The recalculated label values shall be used for labeling purposes no later than February 1 of the calendar year that is the same as the model year.

(d) *Recalculation Procedure.* (1) The difference between the fuel economy value currently used for labeling and recalculated values shall be determined as follows:

(i) The existing label values, calculated in accordance with § 600.207(b) (3) and (4), shall be rounded to the nearest 0.1 mpg.

(ii) The recalculated value, using the additional data cited in paragraph (b) or (c) of this section, shall be calculated in accordance with § 600.207. The values determined in accordance with § 600.207(b) (3) and (4) shall be rounded to the nearest 0.1 mpg.

(2)(i) If the city value calculated in paragraph (d)(l)(ii) of this section is less than the city value in paragraph (d)(1)(i) of this section by 1.0 mpg or more the manufacturer shall affix labels with the recalculated model type values (rounded to whole mpg's) to all new vehicles of that model type beginning:

(A) For label updates as described in paragraph (b) of this section, on the day of implementation of the running change.

(B) For mid-year label updates as described in paragraph (c) of this section, no later than February 1 of the calendar year that is the same as the model year.

(ii) If the highway value in paragraph (d)(1)(ii) of this section is less than the highway value in paragraph (d)(1)(i) of this section by 1.0 mpg or more the manufacturer shall affix labels with the recalculated model type values to all new vehicles of that model type beginning:

(A) For label updates as described in paragraph (b) of this section, on the day of implementation of the running change.

(B) For mid-year label updates as described in paragraph (c) of this section, no later than February 1 of the calendar year that is the same as the model years.

(3) If the recalculated city value is at least 1.0 mpg or more, or the recalculated highway value is at least 2.0 mpg more than the value currently used for the labeling, then the manufacturer has the option to use the new recalculated values for labeling the entire model type beginning on the day of implementation of the running change.

(e) For fuel economy labels using newly calculated fuel economy values in accordance with paragraphs (b) and (c) of this section, the manufacturer shall concurrently update all other label information (e.g., the annual fuel cost, range of comparable vehicles and the applicability of the Gas Guzzler Tax).

(f) The Administrator shall periodically update the range of fuel economies of comparable automobiles for all previously approved labels.

16. A new § 600.315–85, is added to read as follows:

§ 600.315–85 Classes of comparable automobiles.

(a) The Secretary will classify automobiles as passenger automobiles or light trucks (nonpassenger automobiles) in accordance with 49 CFR Part 523.

(1) The Administrator will classify passenger automoblies by car line into one of the following classes based on interior volume index or seating capacity except for those passenger automobiles which the Administrator determines are most appropriately classed as special purpose vehicles as provided in paragraph (a) (3) of this section:

(i) *Two Seaters.* A car line shall be classed as "Two Seaters" if the majority of the vehicles in that car line have no more than two designated seating positions as such term is defined in the regulations of the National Highway Traffic Safety Administration, Department of Transportation (DOT), 49 CFR 571.3.

(ii) *Minicompact cars.* Interior volume index less than 85 cubic feet.

(iii) *Subcompact cars.* Interior volume index greater than or equal to 85 cubic feet but less than 100 cubic feet.

(iv) *Compact cars.* Interior volume index greater than or equal to 100 cubic feet but less than 110 cubic feet.

(v) *Midsize cars.* Interior volume index greater than or equal to 110 cubic feet but less than 120 cubic feet.

(vi) *Large cars.* Interior volume index greater than or equal to 120 cubic feet.

(vii) *Small station wagons.* Station wagons with interior volume index less than 130 cubic feet.

(viii) *Midsize station wagons.* Station wagons with interior volume index greater than or equal to 130 cubic feet but less than 160 cubic feet.

(ix) *Large station wagons.* Station wagons with interior volume index greater than or equal to 160 cubic feet.

(2) The Administrator will classify nonpassenger automobiles into the following categories: Small pickup trucks, standard pickup trucks, vans, and special purpose vehicles. Pickup trucks will be separated by car line on the basis of gross vehicle weight rating (GVWR). For pickup truck car lines with more than one GVWR, the GVWR of the pickup truck car line is the arithmetic average of all distinct GVWR's less than or equal to 8,500 pounds available for that car line.

(i) *Small pickup trucks.* Pickup trucks with a GVWR less than 4,500 pounds.

(ii) *Standard pickup trucks.* Pickup trucks with a GVWR of 4,500 pounds up to and including 8,500 pounds.

(iii) *Vans.*

(3) All automobiles with GVWR less than or equal to 8,500 pounds which possess special features and which the Administrator determines are more appropriately classified as separate from typical automobiles or which do not meet the requirements of paragraphs (a) (1) and (2) of this section will be classified as *Special purpose vehicles.*

(4) Once a certain car line is classified by the Administrator, the classification will remain in effect for the model year.

(b) Interior volume index—passenger automobiles.

(1) The interior volume index shall be calculated, for each car line, in cubic feet rounded to the nearest 0.1 cubic foot. For car lines with more than one body style, the interior volume index for the car line is the arithmetic average of the interior volume indices of each body style in the car line.

(2) For all body styles, except station wagons and hatchbacks, with more than one seat (e.g., with a second or third seat) equipped with seatbelts as required by DOT safety regulations, interior volume index is the sum, rounded to the nearest whole 0.1 cubic foot, of the front seat volume, the rear seat volume, and the luggage capacity.

(3) For all station wagons and hatchbacks with more than one seat (e.g., with a second or third seat) equipped with seatbelts as required by DOT safety regulations, interior volume index is the sum, rounded to the nearest whole 0.1 cubic foot, of the front seat volume, the rear seat volume, and the cargo volume index.

(c) All interior and cargo dimensions are measured in millimeters (or inches) to the nearest whole millimeters (0.1 inch). All dimensions and volumes shall be determined from the base vehicles of each body style in each car line and do not include optional equipment. The dimensions H61, W3, W5, L34, H63, W4, W6, L51, H197, and volume V1 are to be determined in accordance with the procedures outlined in Motor Vehicle Dimensions SAE HS J1100a (Report of Human Factors Engineering Committee, Society of Automotive Engineers, approved September 1973 and last revised October 1979) except as noted herein:

(1) SAE HS J1100a(2.3) Cargo Dimensions—All dimensions measured with the front seat positioned the same as for the interior dimension measurement and the second seat (if applicable), for station wagons and hatchbacks, in the upright position. All head restraints shall be in the stowed position and considered part of the seat.

(2) SAE HS J1100a(5) Interior Dimensions. *L33-Maximum effective leg room-front passenger.* The dimension measured along a line from the ankle pivot center to the seating reference point (SgRP)—front (dimension "A" in the Appendix VIII figure) plus 254 millimeters (10.0 inches) with the front passenger's right foot placed on the depressed floor covering on the toeboard with the back of heel positioned at a line that bisects the angle formed by the extension of the normal toeboard and floor covering surfaces. Standard floor covering is to be used.

(3) SAE HS J1100a(7) Cargo Dimensions. *H198—Second seatback to load floor height.* The dimension measured vertically from the horizontal tangent to the top of the second seatback to the underpressed floor covering.

(4) SAE HS J1100a(8) Luggage Capacity—Total of volumes of individual pieces of a standard luggage set plus H-boxes stowed in the luggage compartment in accordance with the procedure described in 8.2. For passenger automobiles with no rear seat or with a rear seat with no rear seatbelts, the luggage compartment shall include the area to the rear of the front seat, with the rear seat (if applicable) folded, measured in accordance with paragraph (g)(2) of this section.

(d) The front seat volume is calculated in liters (cubic feet) by dividing 1,000,000 (or 1,728 as applicable) into the product of three terms following and rounding the quotient to the nearest 0.01 liter (0.001 cubic foot):

(1) H61—Effective head room—front (Obtained according to paragraph (c)).

(2)(i) (W3+W5+127)/2 for millimeters or (W3+W5+5)/2 for inches—Average of shoulder and hip

room—front, rounded to whole millimeters (0.1 inches) if hip room is more than 127 millimeters (5 inches) less than shoulder room (W3 and W5 are obtained according to paragraph (c) of this section), or

(ii) W3—Shoulder room—front, if hip room is not more than 127 millimeters (5 inches) less than shoulder room (W3 is obtained according to paragraph (c) of this section), and

(3) The arithmetic average of L34 (Maximum effective leg room—accelerator) and L33 (Maximum effective leg room-front passenger) rounded to whole millimeters (0.1 inches). L34 is obtained according to paragraph (c) of this section. L33 is calculated in accordance with Appendix VIII of this part.

(e) The rear seat volume is calculated in liters (cubic feet) for vehicles with a rear seat equipped with seat belts (as required by the Department of Transportation) by dividing 1,000,000 (or 1.728 as applicable) into the product of three terms listed below and rounding the quotient to the nearest 0.01 liter (0.001 cubic feet):

(1) H63—Effective head room—second. (Obtained according to paragraph (c) of this section.)

(2)(i) (W4+W6+127)/2 for millimeters or (W4+W6+5)/2 for inches—Average of shoulder and hip room—second, rounded to whole millimeters (0.1inches) if hip room is more than 127 millimeters (5 inches) less than shoulder room (W4 and W6 are obtained according to paragraph (c) of this section), or

(ii) W4—Shoulder room—second, if hip room is not more than 127 millimeters (5 inches) less than shoulder room (W4 is obtained according to paragraph (c) of this section), and

(3) L51—Minimum effective leg room—second. (Obtained according to paragraph (c) of this section.)

(f) The luggage capacity is V1, the usable luggage capacity obtained according to paragraph (c) of this section. For passenger automobiles with no rear seat or with a rear seat but no rear seatbelts, the area to the rear of the front seat shall be included in the determination of V1, usable luggage capacity, as outlined in paragraph (c) of this section.

(g) Cargo volume index:

(1) For station wagons, the cargo volume index V2 is the total of the volume of L Boxes (50 liter rectangular blocks measuring 250 x 400 x 500 millimeters) and M boxes (5 liter rectangular blocks measuring 125 x 160 x 250 millimeters) that can be placed in the cargo area in accordance with section 8.2 of HS J–1100a, substituting L and M boxes for the standard luggage set and H boxes, respectfully. The hidden cargo volume determined in accordance with paragraph (g)(3) of this section may also be included in the cargo volume index.

(i) The seat back of the rearmost seat equipped with seatbelts, as required by the Department of Transportation safety regulations, shall be in the upright position and the standard equipped spare tire, tools, or other vehicle parts normally stored in the cargo area shall be in their normal stored positions during the determination. The cargo area access door must close and lock freely without forcing or excessive slamming when all of the boxes used in the volume determination are in place.

(ii) The boxes shall be stacked from the rearmost seat as defined in paragraph (1)(i) of this section to the rear access door and from the cargo floor to the ceiling with soft point measurements (except for the cargo floor) used. No box shall protrude into the passenger compartment, that is, above the rearmost seat and forward of the vertical plane that is tangent to the back of the rearmost seat.

(iii) The M boxes used in the estimation of station wagon cargo volume shall equal no more than 20 percent of the total cargo volume of the vehicle.

(2) For hatchbacks, the luggage capacity procedure defined by the SAE for sedans will be used (SAE HS J–1100a(8)) except that the following additional conditions shall apply:

(i) A luggage piece may protrude above the height of the back of the rearmost seat, as defined in paragraph (1)(c) of this part, provided that the dimensional center of that piece is at least 50 mm (2 inches) below H197—front seat back to lower floor height or H198 second seat back to lower floor height, as applicable.

(ii) Hidden cargo volume determined in accordance with paragraph (g)(3) of this section may be included in the total cargo volume determination.

(iii) For hatchbacks with cargo covers:

(A) If the cargo cover is not removable or capable of storage, the cover is to be treated as part of the cargo compartment lid or access door and must close freely without forcing or excessive slamming with all of the luggage in place in the compartment.

(B) If the cover is removable or capable of storage, then cargo measurements may be made as in paragraph (g)(2)(i) of this section with the cover removed and placed within the cargo area or stored within the cargo area as designed by the manufacturer.

(3) Hidden cargo volume shall be determined by placing one or more M boxes into each hidden cargo area. A hidden cargo area is any space to the rear of the second seat that is distinct from the main open cargo area, designed by the manufacturer to accommodate small parcels, and which may have a door to separate it from the open cargo area. If a hidden cargo area is completely enclosed, the door must be capable of being closed and latched without forcing when all the M boxes used in the volume determination are in place.

(h) The following data for each body style in the car line covered by that label shall be made available to the Administrator upon request.

(1) For all passenger automobiles:

(i) Dimensions H61, W3, W5, L33, and L34 determined in accordance with paragraph (c) of this section.

(ii) Front seat volume determined in accordance with paragraph (d) of this section.

(iii) Dimensions H63, W4, W6, and L51 (if applicable) determined in accordance with paragagph (c) of this section.

(iv) Rear seat volume (if applicable) determined in accordance with paragraph (e) of this section.

(v) The interior volume index determined in accordance with paragraph (b) of this section for:

(A) Each body style, and

(B) The car line.

(vi) The class of the car line as determined in paragraph (a) of this section.

(2) For all passenger automobiles except station wagons and hatchbacks with one or more seats equipped with seatbelts as required by the Department of Transportation safety regulations:

(i) The quantity and letter designation of the pieces of the standard luggage set installed in the vehicle in the determination of usable luggage capacity V1, and

(ii) The usable luggage capacity V1, determined in accordance with paragraph (f) of this section.

(3) For station wagons with one or more seats equipped with seatbelts as required by the Department of Transportation safety regulations:

(i) The quantity and letter designation of the pieces of the set defined in paragraph (g)(1) of this section installed in the vehicle in the determination of cargo volume V2.

(ii) The cargo volume index V2 determined in accordance with paragraph (g)(1) of this section.

(4) For hatchbacks with one or more seats equipped with seatbelts as

required by the Department of Transportation safety regulations:

(i) The dimension H197 or H198, as applicable, determined in accordance with paragraph (c) of this section,

(ii) the quantity and letter designation of the pieces of the standard luggage set installed in the vehicle in the determination of usable luggage capacity V1,

(iii) The usable luggage capcity V1, detemined in accordance with paragraph (g)(2) of this section.

(5) For pickup trucks:

(i) All GVWR's of less than or equal to 8,500 pounds available in the car line.

(ii) The arithmetic average GVWR for the car line.

17. A new § 600.507–85 is added to read as follows:

§ 600.507–85 Running change data requirements.

(a) Except as specified in paragraph (d) of this section the manufacturer shall submit additional running change fuel economy data as specified in paragraph (b) of this section for any running change approved or implemented under §§ 86.079–32, 86.079–33, or 86.082–34 which:

(1) Creates a new base level or,

(2) Affects an existing base level by:

(i) Adding an axle ratio which is 10 percent (or more) larger than the largest axle ratio tested.

(ii) Increasing the road-load horsepower for a subconfiguration by 10 percent or more for the individual running change or when considered cumulatively since original certification (for each cumulative 10 percent increase using the originally certified road-load horsepower as a base).

(iii) Creating a new subconfiguration due to an increase in equivalent test weight within the configuration.

(b)(1) The additional running change fuel economy data requirement in paragraph (a) of this section will be determined based on the sales of the vehicle configurations in the created or affected base level(s) as updated at the time of running change approval.

(2) Within each newly created base level as specified in paragraph (a)(1) of this section, the manufacturer shall submit data from the highest projected total model year sales subconfiguration within the highest projected total model year sales configuration in the base level.

(3) Within each base level affected by a running change as specified in paragraph (a)(2) of this section, fuel economy data shall be submitted for the vehicle configuration created or affected by the running change which has the highest total model year sales. The test vehicle shall be of the subconfiguration created by the running change which has the highest projected total model year sales within the applicable vehicle configuration.

(c) The manufacturer shall submit the fuel economy data required by this section to the Administrator in accordance with § 600.313(a)(3).

(d) For those model types created under § 600.207(a)(2), the manufacturer shall submit data for each subconfiguration added by a running change.

§ 600.508–85 [Reserved]

18. Section 600.580–85 is added and reserved.

19. A new § 600.509–85, is added to read as follows:

§ 600.509–85 Voluntary submission of additional data.

(a) The manufacturer may, at his option, submit data in addition to the data required by the Administrator.

(1) Additional fuel economy data may be submitted by the manufacturer for any vehicle configuration which is to be tested as required in § 600.506 or § 600.507 or for which fuel economy data were previously submitted under paragraph (a)(2) of this section.

(2) Within a base level, additional fuel economy data may be submitted by manufacturer for any vehicle configuration which is not required to be tested by § 600.506 or § 600.507.

(b) The voluntary data submitted under paragraph (a)(2) of this section shall be submitted in rank order such that data is first submitted for all configurations with a higher sales fraction.

20. A new § 600.510–85 is added to read as follows:

§ 600.510–85 Calculation of average fuel economy.

(a) Average fuel economy will be calculated to the nearest 0.1 mpg for the classes of automobiles identified herein, and the results of such calculations will be reported to the Secretary of Transportation for use in determining compliance with the applicable fuel economy standards.

(1) An average fuel economy calculation will be made for the category of passenger automobiles that are domestically manufactured as defined in § 600.511(d)(1).

(2) An average fuel economy calculation will be made for the category of passenger automobiles that are not domestically manufactured as defined in § 600.511(d)(2).

(3) An average fuel economy calculation will be made for the category of light trucks which are defined in § 600.511(e)(1) and have two-wheel drive.

(4) An average fuel economy calculation will be made for the category of light trucks which are defined in § 600.511(e)(1) and have four-wheel drive.

(5) An average economy calculation will be made for the category of light trucks which are defined in § 600.511(e)(2) and have two-wheel drive.

(6) An average fuel economy calculation will be made for the category of light trucks which are defined in § 600.511(e)(2) and have four-wheel drive.

(b) For the purpose of calculating average fuel economy under paragraph (c), of this section:

(1) All fuel economy data submitted in accordance with § 600.008(e) or § 600.512(c) shall be used.

(2) The combined city/highway fuel economy will be calculated for each model type in accordance with § 600.207 of this section except that:

(i) Separate fuel economy values will be calculated for model types and base levels associated with car lines that are:

(A) Domestically produced, and

(B) Nondomestically produced and imported;

(ii) Total model year production data, as required by this subpart, will be used instead of sales projections;

(iii) The fuel economy value of diesel-powered model types will be multiplied by the factor 1.0 to convert gallons of diesel fuel to equivalent gallons of gasoline;

(iv) the fuel economy value will be rounded to the nearest 0.1 mpg;

(v) At the manufacturer's option, those vehicle configurations that are self-compensating to altitude changes may be separated by sales into high-altitude sales categories and low-altitude sales categories. These separate sales categories may then be treated (only for the purpose of this section) as separate configurations in accordance with the procedure of paragraph § 600.207(a)(4)(ii), and

(3) The fuel economy value for each vehicle configuration is the combined fuel economy calculated according to § 600.206 except that:

(i) Separate fuel economy values will be calculated for vehicle configurations associated with car lines that are:

(A) Domestically produced, and

(B) Nondomestically produced and imported;

(ii) Total model year production data, as required by this subpart will be used instead of sales projections; and

(iii) The fuel economy value of diesel-powered model types will be multiplied by the factor 1.0 to convert gallons of diesel fuel to equivalent gallons of gasoline;

(c) Except as permitted in paragraph (d) of this section, the average fuel economy will be calculated individually for each category identified in § 600.510(a), as follows:

(1) Divide the total production volume of that category of automobiles by

(2) A sum of terms, each of which corresponds to a model type within that category of automobiles and is a fraction determined by dividing

(i) The number of automobiles of that model type produced by the manufacturer in the model year by

(ii) The fuel economy calculated for that model type in accordance with paragraph (b)(2) of this section.

(d) The Administrator may approve an alternate calculation method if it is part of an approved credit plan under the provisions of Section 503(b) of 15 U.S.C. 2003(b).

21. A new §600.512–85 is added to read as follows:

§ 600.512–85 Model year report.

(a) For each model year, the manufacturer shall submit to the Administrator a report, known as the model year report, containing all information necessary for the calculation of the manufacturer's average fuel economy.

(b)(1) The model year report shall be in writing, signed by the authorized representative of the manufacturer and shall be submitted no later than 60 days after the report required in § 86.079–37 for the final production quarter.

(2) The Administrator may waive the requirement that the model year report be submitted within 60 days after the final quarterly production report. Based upon a request by the manufacturer, if the Administrator determines that 60 days is insufficient time for the manufacturer to provide all additional data required as determined in either §§ 600.506 or 600.507, the Administrator shall establish a date by which the model year report must be submitted.

(3) Separate reports shall be submitted for passenger automobiles and light trucks (as identified in § 600.510).

(c) The model year report must include the following information:

(1) All fuel economy data used in the labeling calculations and subsequently required by the Administrator in accordance with §§ 600.506 and 600.507.

(2) All fuel economy data for certification vehicles and for vehicles tested for running changes approved under §§ 86.079–32, 86.079–33, and 86–082.34.

(3) Any additional fuel economy data submitted by the manufacturer under § 600.509.

(4) A fuel economy value for each model type of the manufacturer's product line calculated according to § 600.510(b)(2).

(5) the manufacturer's average fuel economy value calculated according to § 600.510(c).

(6) A listing of both domestically and nondomestically produced car lines as determined in § 600.511 and the cost information upon which the determination was made.

(7) Production data, the authenticity and accuracy of which shall be attested to by the corporation, and shall bear the signature of the chief executive officer.

Part III

Department of Health and Human Services

Food and Drug Administration

Proposed New Drug, Antibiotic, and Biologic Drug Product Regulations

DEPARTMENT OF HEALTH AND HUMAN SERVICES

Food and Drug Administration

21 CFR Part 312

[Docket No. 82N-0394]

Proposed New Drug, Antibiotic, and Biologic Drug Product Regulations

AGENCY: Food and Drug Administration.

ACTION: Proposed rule.

SUMMARY: The Food and Drug Administration (FDA) is proposing to revise its regulations governing the review of investigational new drug applications and the monitoring of the progress of investigational drug use. FDA is taking this action to improve the investigational drug development process while maintaining high standards of human subject protection. The improvements are intended to assist sponsors of clinical investigations to prepare and submit high quality applications and to permit FDA to review them efficiently and with minimal delay. This action is one part of a larger effort to review and improve all aspects of FDA's drug regulatory process.

DATE: Comments by August 8, 1983.

ADDRESS: Written comments to the Docket Management Branch (HFA-305), Food and Drug Administration, Rm. 4-62, 5600 Fishers Lane, Rockville, MD 20857.

FOR FURTHER INFORMATION CONTACT: Steven H. Unger, National Center for Drugs and Biologics (HFN-7), Food and Drug Administration, 5600 Fishers Lane, Rockville, MD 20857, 301-443-5220.

SUPPLEMENTARY INFORMATION:

Introduction

This proposal is the second phase of efforts by the Department of Health and Human Services (HHS) and FDA to revise Federal regulations governing the new drug approval process. The first phase was a proposal published in the **Federal Register** of October 19, 1982 (47 FR 46622) to streamline the procedures in 21 CFR Part 314 for FDA review of new drug applications for marketing (NDA Rewrite). The second phase, contained in this document, addresses FDA's procedures in 21 CFR Part 312 for reviewing investigational new drug applications and for monitoring the progress of investigational drug use (IND Rewrite). Collectively, the IND/NDA Rewrite culminates an effort begun several years ago when FDA made concept papers available for public comment (44 FR 58919; October 12, 1979) and held a public meeting to discuss them (November 9, 1979).

The IND portion of the Rewrite reflects the continuing commitment of HHS Secretary Richard S. Schweiker and FDA Commissioner Arthur Hull Hayes, Jr., M.D., to facilitate the development, evaluation, and approval of safe and effective new therapies without compromising the underlying standards of safety and effectiveness upon which the American public has come to depend. Towards this end, the proposals reflect two major policy objectives. First, during the early phase of investigational research, FDA should focus on protecting the safety of human test subjects and give sponsors greater freedom to design, revise, and implement clinical research studies. This change should encourage innovation in drug development without compromising the safety of test subjects. Second, once the preliminary human studies have been completed and the drug appears to have marketing potential, FDA and drug sponsors should consult more closely to help ensure that the design of the major clinical trials are acceptable and will support marketing approval if the test results are favorable. Through better planning and closer consultation, FDA's later review of applications for marketing should proceed more efficiently. These changes will benefit the consumer by enhancing the prompt availability of safe and effective therapies.

Like the NDA portion of the Rewrite, the IND regulations have been reviewed by a special task force appointed by the Secretary, and chaired by the Commissioner, whose specific charge has been to review these regulations in accordance with Executive Order 12291 (46 FR 13193; February 19, 1981), the mandate of the President's Task Force on Regulatory Relief, and the policy objectives outlined above. Many of these issues were also previously reviewed by a separate FDA task force, which the Commissioner also chaired.

FDA's IND Rewrite proposal is designed to complement the October 19, 1982 NDA Rewrite proposal. That document proposed the following: a new streamlined format for marketing applications; the substitution of concise tabulations of essential clinical data in lieu of most case report forms; a new automatic appeals process for the prompt resolution of scientific disputes; a new policy on the acceptance of foreign data; more definite time frames for agency review; fewer supplements to approved applications along with fewer recordkeeping and reporting requirements; safety update reports while a marketing application is under review by the agency; and a strengthened adverse drug effect surveillance system after drugs have been approved for use by consumers.

These IND/NDA Rewrite proposals are part of a larger, overall effort to reform the drug development and review process. For example, FDA has instituted management changes aimed at enhancing accountability, improving utilization of personnel, and promoting timely communications with drug sponsors. The agency has also instituted some organizational changes, including the formation of the National Center for Drugs and Biologics, and the creation of a separate Office of Orphan Product Development within the Office of the Commissioner. Finally, as described in more detail below, FDA plans to issue guidelines on application format and on how to fulfill testing requirements. FDA believes that these initiatives, taken as a whole, should significantly improve the new drug approval process.

Highlights of this IND proposal, related issues, a description of the investigational new drug process, and the agency's economic analysis are summarized in the following introductory sections. The remainder of this preamble is devoted to a section-by-section analysis of the proposed regulatory changes.

Highlights of This Proposal

The major theme of the proposed IND regulations is that different stages of the IND process would be regulated differently. Safety concerns would predominate at the beginning of the process to ensure that research subjects are not exposed to unreasonable risk. In the later phases of drug investigation, FDA would also evaluate the scientific merit of study protocols to ensure that the planned clinical studies are capable of producing valid information on safety and effectiveness necessary to obtain marketing approval. This change in emphasis reflects the reality that only 20 percent of new chemical entities studied under an IND ever reach the NDA stage. Accordingly, FDA requirements and advice geared toward the development of a marketing application should wait until the drug has undergone the initial safety tests in human subjects and has shown some marketing potential. This proposal also clarifies the IND format, simplifies reporting requirements, and seeks to foster open, frank communications between FDA staff and drug sponsors. Finally, the regulations would give formal recognition to the idea of "treatment use" of certain drugs within the investigational context and

would also exempt certain studies on marketed drugs from most IND requirements (except Institutional Review Board review and informed consent). The specific changes are summarized as follows:

1. *Greater freedom during the early phase of human research.* The agency proposes to give drug sponsors greater freedom during the early phase of human research (Phase 1) by permitting such research to proceed unless it presents an unreasonable and significant risk to test subjects. FDA proposes to narrow the scope of its review of Phase 1 studies to focus on the safety of human test subjects. The proposal also articulates the flexibility available to clinical investigators in Phase 1 to modify protocols on the basis of experience gained during the investigation without prior notification to FDA, and further emphasizes to drug sponsors that the amount of toxicology and chemistry information required to be submitted in an IND depends on the nature and extent of the proposed clinical studies. As noted above, these changes to FDA's regulation of early research are intended to encourage innovation in drug development without compromising the safety of test subjects.

2. *Clearer format for IND submission.* The agency proposes to clarify the format for submission of an IND to create better organized applications and thereby facilitate agency review. This new format includes a greatly simplified cover sheet (Form FDA–1571), a brief overview of the investigational plan, and a brief introductory statement about the drug. The proposed format would also focus attention on the proposed human studies so that the supporting toxicology and chemistry information can be reviewed in light of the proposed clinical investigations.

3. *Clarified amendment procedures.* The agency proposes to clarify its amendment procedures by dividing amendments into several distinct categories: (i) Protocol amendments, for new protocols and changes in existing protocols; (ii) information amendments, for additional data as they develop; and (iii) IND safety reports. Each of these categories carries with it appropriate reporting intervals, depending upon the promptness needed for agency review. FDA also proposes to clarfify the scope of the annual reports to provide an overview of the progress to date and future plans for the IND, and to provide FDA with an update of the most significant safety information.

4. *Creation of explicit "clinical hold" procedures.* The agency proposes to codify procedures for instituting a "clinical hold," an order not to commence or continue a clinical study. For Phase 1 studies, FDA proposes to limit clinical holds to situations where there is an unreasonable and significant risk to human subjects. In later phases, the criteria would also include serious defects in study design that would render the study incapable of producing valid evidence of safety and effectiveness. To ensure uniform application of these criteria to similar drugs, all clinical holds would need to be approved by the director of the applicable reviewing division.

5. *Closer consultation between FDA and drug sponsors.* Although FDA has for several years offered "end-of-phase 2" conferences for drugs likely to provide significant and modest therapeutic advances, FDA now proposes to give the sponsor of any IND an opportunity to hold such a conference with the agency. The purpose of this meeting is to obtain concurrence on an overall plan for the conduct of Phase 3 trials and the design of specific studies. Such a "meeting of the minds" should significantly reduce the possibility of disputes later on after submission to FDA of a marketing application. FDA also proposes to place in its regulations the opportunity for a "pre-NDA" conference to discuss appropriate format and data presentation in a marketing application.

6. *Treatment use of investigational drugs.* The agency proposes to codify and state the conditions under which investigational drugs may be used to accomplish a treatment purpose in addition to an investigational purpose. This provision is designed primarily for drugs that have completed Phase 2 testing, when sufficient evidence of safety and effectiveness has already been obtained to justify making available an investigational drug for a treatment use. Such treatment uses would be limited to patients with serious diseases or conditions, for whom alternative therapies do not exist or cannot be used. Under these criteria, orphan drugs would be leading candidates for such treatment use. Accordingly, this provision implements a corresponding section of the recently enacted Orphan Drug Act, as described elsewhere in this preamble. FDA also proposes to simplify the procedures for obtaining investigational drugs for treatment use once these conditions are met.

7. *Exemptions for certain studies on marketed drugs.* Finally, FDA proposes to exempt from most IND requirements contained in Part 312 certain investigations conducted with drugs already approved for marketing for other uses. These would be limited to situations where safety is not an issue (because of a similarity in dose, route of administration, and patient population with the approved labeling) and where the investigations are not being conducted as a "pivotal study" for the purpose of changing the drug's labeling or advertising (e.g., adding a new indication or comparative safety claim). The exemption would apply primarily to researchers in academic or other institutions who are beginning to explore new uses for marketed drugs (i.e., not pivotal studies), or who are using the drug as a research tool. This provision is intended to reduce burdens on researchers and to permit FDA resources to be devoted to clinical investigations requiring FDA oversight and to review new drugs intended for marketing. Though exempt from most IND requirements in Part 312, such investigations would still be subject to other regulations designed to protect the rights and safety of patients, such as review by Institutional Review Boards (21 CFR Part 56) and informed consent (21 CFR Part 50), as these investigations are still subject to section 505 of the Federal Food, Drug, and Cosmetic Act (the act) (21 U.S.C. 355).

Related Issues

1. *Guidelines.* During the middle and late 1970's, the agency, with the help of its standing advisory committees, prepared over 25 guidelines devoted to the design of adequate and well-controlled clinical studies on different classes of drugs. These guidelines have facilitated high quality drug research and have been well received by drug sponsors. Therefore, FDA intends to expand the use of guidelines into other areas.

In the IND context, in addition to these clinical testing guidelines, the most pertinent guidelines are those related to animal toxicology testing and to chemistry and manufacturing controls requirements. As discussed elsewhere in this preamble, FDA intends to limit the scope of toxicology and chemistry submissions to that which is necessary to support the scope and duration of the proposed human testing. The guidelines are intended to help describe the scope of such submissions in the more common and expected circumstances. The new toxicology guidelines will update the current guidelines on this subject. The chemistry guidelines will be entirely new.

FDA recognizes that it is important, in issuing such guidelines, to solicit the views of experts throughout the scientific community, including government, industry, and academia.

Accordingly, FDA plans to hold public workshops about what should be in these guidelines to gain the views of members of the scientific community. The agency will publish the details of these workshops in future issues of the **Federal Register**.

FDA is also developing guidelines on appropriate formats for IND's. These guidelines should aid sponsors in organizing and presenting their submissions in a fashion most suitable for efficient agency review.

FDA believes that the planned revisions to existing guidelines and the creation of new guidelines should materially assist in the implementation of the new regulations. Thus, as noted above, the NDA Rewrite, IND Rewrite, and implementing guidelines are very much interrelated and should be viewed as a whole as increasing the efficiency of the new drug approval process.

2. *Outside review boards.* One option still under consideration by the agency, though not being proposed at this time, is the establishment of a "dual track" system whereby drug sponsors would have the option of submitting initial IND's either to FDA or to third party nongovernmental bodies. These outside groups would fall under the umbrella term of "Outside Review Boards" (ORB's). ORB's would parallel FDA in performing a "scientific review" of proposed human research studies, involving pharmacology, toxicology, chemistry, and clinical issues. The IND's being considered for this dual track system are the initial IND's that cover the first introduction of the drug into man and the early clinical pharmacolgy and effectiveness studies (Phase 1). Even under this dual track system, drug sponsors would still be required to submit their proposed human studies to local Institutional Review Boards (IRB's) for an "ethical review" and to ensure that research subjects give their informed consent.

The specifics of this outside review concept have varied over time. In the **Federal Register** of September 11, 1981 (46 FR 45538), FDA published a request for information, soliciting views as to whether local IRB's could assume the responsibility for reviewing certain IND's instead of FDA. Over 200 comments were received on that notice from hospitals, university medical centers, testing laboratories, IRB's, pharmaceutical manufacturers, academic and professional associations, and others. The concept of an IRB having sole responsibility for review of IND's was not favored by any category of comments. Most comments cited the lack of specialized scientific expertise of IRB's (especially regarding toxicology, chemistry, and pharmacology), the increased expense of expanding IRB's to gain the needed expertise, liability concerns, and the possibility that IRB's could take more time than FDA to review submissions. A number of comments, however, did suggest an optional system whereby a willing and expanded IRB could assume such review responsibility in lieu of an FDA review. Accordingly, FDA has redirected its consideration to this type of optional system which falls under the general umbrella term, ORB's.

Arguments in favor of ORB's are that FDA now tends to "overregulate" the early stages of human testing by delving into areas, such as study design, that should not concern FDA until later in the process when the drug has shown marketing potential. These arguments suggest that outside experts will be more prone to focus only on the central question of patient safety and leave these other matters to the discretion of the drug sponsor. ORB's are also perceived as a means of saving agency resources without compromising patient safety, as many drugs never advance beyond Phase 1 and so would never need to be seen by the agency.

Arguments against the dual track system start with the fact that FDA now reviews IND's promptly, and that in 90 percent of the cases the research may proceed within 30 days of the initial IND submission. Lengthy review times are therefore not often involved. Opponents also express concern about the possibility that "permissive" ORB's will surface, thereby letting drug sponsors "shop around" to find favorable reviewers, and that the "independence" of ORB's might be questioned where the drug sponsor provides large financial grants to the institution establishing the ORB. Finally, any FDA resource savings in IND review personnel may be more than offset by the additional resources necessary to develop standards for, inspect, and regulate ORB's.

FDA's preliminary view, apart from the possible advantages and disadvantages noted above, is that the dual track system may be unnecessary in light of the many other reforms contained in this proposal. As noted above, the agency itself is seeking to streamline the regulation of early research by narrowing the scope of Phase 1 review and by maximizing the flexibility with which drug sponsors may carry out early human investigations. By making these changes at FDA, the agency believes that the major goals of the dual track system can be achieved without the possible disadvantages noted above.

This issue, however, still remains under consideration by the agency. Therefore, FDA is soliciting comments as to whether, in light of the other changes being proposed in this document, the dual track system is worth pursuing, either on a permanent or pilot basis. In commenting on this issue, FDA requests responses to the following questions:

a. What specific benefits are attainable under a dual track system that are not attainable by making internal changes at FDA?

b. How can potential conflicts of interest be avoided? For example, should an individual drug sponsor be permitted to have its studies reviewed by an ORB whose institution receives financial assistance or grants from that drug sponsor?

c. What would be the appropriate degree of FDA oversight over ORB's, in terms of licensing, standard setting, and inspections?

d. Should FDA receive any concurrent notification (and, if so, in how much detail) or IND's submitted to ORB's for review?

e. If the dual track system were to be tried on a pilot basis, how long should the pilot program be tried, and how should the parameters of the pilot program be defined (e.g., by drug class and/or by authorizing a limited number of ORB's to operate)?

In addition, with respect to the possibility of a pilot program, FDA would like commenting institutions and drug sponsors to state whether they would be willing to participate in such an experiment.

FDA will carefully consider comments received on this proposal before reaching any final decision on whether to propose regulations involving Outside Review Boards.

3. *Bioresearch monitoring regulations.* The IND Rewrite proposal is intended to complement the agency's bioresearch monitoring regulations. Those regulations are the protection of human subjects in clinical investigations (21 CFR Part 50), the composition, operation, and responsibility of institutional review boards that review clinical investigations (21 CFR Part 56), and good laboratory practice for conducting non-clinical laboratory studies (21 CFR Part 58). In addition, the agency has also proposed regulations defining the obligations of clinical investigators (proposed 21 CFR Part 54; 43 FR 35210; August 8, 1978) and obligations of sponsors and monitors (proposed 21 CFR Part 52; 42 FR 49612; September 27, 1977).

The IND Rewrite proposal has been prepared on the assumption that clinical investigator and sponsor/monitor regulations will be made final before, or at the same time as, the IND Rewrite regulations. Accordingly, this proposal summarizes only the most essential clinical investigator and sponsor/monitor obligations and is completely silent on other issues (e.g., clinical investigator disqualification) that will be covered by the forthcoming bioresearch monitoring final regulations.

The Investigational New Drug Development Process

Almost all new drugs in the United States are developed by large pharmaceutical firms. These companies discover biologically active new molecules primarily by screening large numbers of synthetic compounds and natural products for various types of pharmacological activity. Those compounds that look promising are then subjected to short-term animal toxicity testing (1 week to 3 months, depending upon the anticipated duration of clinical testing) before being studied in humans. The preclinical testing is conducted to predict whether initial human studies will be acceptably safe and to predict, if possible, the drug's likely therapeutic activity. If the drug looks promising, human clinical studies are proposed in an investigational new drug application (IND).

Once an IND is filed with FDA, the sponsor must wait 30 days before testing the drug in humans. During this period, FDA reviews the submission to make sure the human subjects will not be subjected to unreasonable risks. If the agency is satisfied that the study does not pose such risks, the sponsor may begin testing the drug in humans. However, if FDA is concerned about the safety of the drug, or finds that more information is necessary to assess the safety issue, the agency notifies the drug sponsor not to begin human testing until the problems are resolved.

IND's are also reviewed by local IRB's for ethical acceptability. One goal of this review is to assure that human subjects are provided with sufficient information to be able to give their informed consent, a requirement that is statutorily mandated. IRB's are composed of scientific, medical, and lay personnel and are usually associated with the university, hospital, or clinic where the clinical research is to be undertaken. IRB's are regulated by FDA under regulations in Part 56.

Clinical investigations on new drugs are usually conducted by academic physicians working in university medical centers and by physicians in private practice. These investigations are frequently conducted on behalf of sponsoring drug firms, and the results may be published in the medical literature. Clinical testing proceeds progressively in three phases (called Phases 1, 2, and 3), each phase more extensive than its predecessor. (As noted below, the definitions of these phases are being revised in this proposal to reflect current practice.) As revised, these phases may be summarized as follows:

a. Phase 1 includes the initial introduction of the investigational new drug into humans. Phase 1 studies, which may be conducted in patients or normal volunteeer subjects, are designed to determine the metabolism and other pharmacologic actions of the drug, the side effects associated with increasing doses, and, if possible, to gain early evidence on effectiveness. Phase 1 also includes research studies on drug metabolism, pharmacokinetics, structure-activity relationships, and mechanism of action in humans. Total Phase 1 exposure is quite small, generally in the range of 20 to 80 persons.

b. Phase 2 includes the early controlled clinical studies conducted to evaluate the effectiveness of the drug for a particular indication in patients with the disease and to determine the common short-term side effects and risks associated with the drug. Phase 2 trials are typically well controlled, closely monitored, and conducted in a relatively small number of patients (usually not more than several hundred).

c. Phase 3 studies are the expanded controlled and uncontrolled trials. They are performed after preliminary evidence of effectiveness of the drug has been established, and are intended to gather additional information about effectiveness and safety that is needed to evaluate the overall benefit-risk relationship of the drug and to provide an adequate basis for physician labeling. Phase 3 studies usually include from several hundred to several thousand patients.

Animal testing is also conducted during the human testing phases. As the human studies enlarge in scope and duration, further toxicology studies are needed to support them. Also, use of women of child bearing potential as test subjects must usually be preceded by reproductive performance and teratology studies in animals. Finally, once a drug appears to have marketing potential, long-term (chronic) animal studies, aproximately 1 to 2 years in duration, are usually conducted to predict possible latent human toxicities, including carcinongenicity.

FDA monitors the progress of an IND by reviewing IND amendments and annual reports submitted by the drug sponsor. Prompt reporting is required for significant safety findings, including certain adverse drug experiences in humans and important findings from animal toxicity studies. Such findings may result in the temporary suspension of a particular study or the termination of the entire IND if the safety subjects is placed in doubt. The agency also reviews new protocols submitted to the IND. In addition, when the sponsor so requests, agency officials assist in developing the overall clinical plan and designing specific protocols, most typically during an "End-of-Phase 2" conference with the drug sponsor, to ensure that planned studies are appropriate for the support of a marketing application.

Once the major IND studies are completed and the sponsor believes the data show the drug to be safe and effective under specified conditions, the sponsor submits to FDA an application to obtain the agency's approval for general marketing. Submission of a marketing application, however, usually does not mean that the IND file is closed. Some patients from earlier studies may still be receiving the investigational drug, or new clinical trials may have been commenced to study the drug for new indications. Accordingly, the IND remains active as long as patients are receiving the drug in an investigational context.

The process just described applies to a "commercial IND"—that is, an IND submitted by a pharmaceutical company or research center for the purpose of collecting safety and efficacy data necessary to gain marketing approval. In addition, FDA reviews "sponsor-investigator IND's" and "treatment IND's" which normally do not go through the entire three-phase IND process.

A "sponsor-investigator IND" is submitted by an individual researcher, often associated with an academic institution, in order to conduct exploratory therapeutic research or to use the drug as a research tool. A sponsor-investigator IND may involve either an unapproved drug or an approved drug for an unapproved use. If results from this research suggest marketing potential for the drug, further studies are usually conducted under the auspices of a commercial IND.

The term "treatment IND" applies to a request by a practicing physician to administer an unapproved drug primarily for treatment purposes within the investigational context. Such

treatment use may be appropriate for patients with serious disease conditions who are not responsive to approved therapies, such as in the case with orphan drugs. Ordinarily, a drug may be available for treatment use only after Phase 2 investigations have been completed.

In terms of overall number, FDA receives approximately 1,100 IND's for new drug and biological products each year. Of these, about 25 percent are commercial IND's, 30 percent are treatment IND's, and the remaining 45 percent are sponsor-investigator IND's. Accordingly, although most of the provisions in this proposal relate to commercial IND's, other provisions relate specifically to treatment IND's and certain sponsor-investigator IND's as well.

Economic Analysis

FDA has examined the economic consequences of the proposed changes in accordance with Executive Order 12291 and the Regulatory Flexibility Act (Pub. L. 96–354). The agency concludes that these revisions would have favorable economic impacts on the health care system, drug sponsors, and the agency without compromising the safety of human subjects. Although some of these favorable impacts are quantifiable, others with greater potential for savings can only be characterized in a very generalized, nonquantitative manner at this time.

Quantifiable impacts include an estimated net annual savings of $3.3 million to sponsors, arising from a simplified IND format; reduced and/or staged submission of manfacturing and controls data; a reduction in the number of amendments that are submitted during the first year that an IND is active; savings in start-up expenses associated with studies that would no longer be placed on clinical hold under the revised criteria; and savings of sponsor-investigator resources currently used to prepare IND's that will no longer be accepted. The only projected cost increase is modest by comparison and arises from requirements to improve the quality of annual reports. These revisions would also produce some savings in agency review resources.

A potential for substantially larger savings is presented by the provisions for increased use of guidelines, meetings, advice, and an appeals process to aid commercial IND sponsors in assembling the data for those IND's that lead to the submission of a marketing application. These initiatives, taken together, could result in substantial savings from fewer deficiencies being noted in the NDA review process due to better designed clinical trials, as well as further savings from the elimination of some unnecessary or poorly designed clinical studies.

The agency concludes that these revisions are not a major rule as defined in Executive Order 12291. The agency also certifies that the changes will not have a significant impact on a substantial number of small entities. The net savings, described above, will accrue to all sponsors, regardless of size, and the preponderance of unquantifiable savings will probably accrue to the public and to sponsors of commercial IND's, most of whom are not small entities. A copy of the agency's assessment of economic impact is on file with the Dockets Management Branch (HFA–305), Food and Drug Administration, Rm. 4–62, 5600 Fishers Lane, Rockville, MD 20857.

The revisions to the IND regulations have a significance well beyond the specific cost reductions summarized above. As noted earlier, these regulations are part of a comprehensive review of the new drug approval process designed to accelerate the development and marketing of new drug therapies without compromising the safety and effectiveness of new drugs. Collectively, FDA's new regulations, guidelines, procedures, and policies should have considerable benefits. A quicker, more efficient drug development process means that the American public will have more safe and effective drugs sooner. A less costly drug development process means that the pharmaceutical industry will be able to develop more new drugs with the same number of research dollars, or alternatively to market less costly drugs. Either outcome will be of direct benefit to the American public. Most importantly, the prompt availability of safe and effective drug therapies has enormous potential benefit to patients and in public terms of improving the length and quality of life and in reducing health care and hospital costs. In addition, the provisions governing treatment use should be of special, if unquantifiable, benefit to patients with serious conditions who do not have adequate alternative therapies available to them, consistent with the goals of the recently enacted Orphan Drug Act.

Section-by-Section Analysis

FDA proposes to establish six new subparts in Part 312. Subpart A contains general provisions describing the scope of the regulations and the kinds of investigations that are exempt from IND requirements. It also describes the waiver provisions, labeling requirements, and requirements relating to the promotion and sale of investigational products. Subpart B describes the different kinds of applications and format, content, and reporting requirements for each of them. Subpart C contains regulations governing FDA review and action upon applications submitted under Subpart B, including clinical holds and terminations of IND's. Subpart D contains the general responsibilities of sponsors and clinical investigators during the course of a clinical investigation. Subpart E contains provisions on import and export of investigational drugs and a provision on the acceptability of foreign data in support of investigational and marketing applications. Finally, Subpart F describes requirements concerning the use of drugs in vitro and in animal testing.

Definitions. Under current regulations, "IND" stands for "Notice of Claimed Investigational Exemption for a New Drug." However, "IND" has come to be understood as standing simply for "investigational new drug application" and the proposed definition of "IND" would codify the simpler phrase.

As the IND regulations apply not only to "new drugs" but also to antibiotic drugs and biological products, "investigational new drugs" would be defined to include all members of these three categories of drugs that are either not approved for marketing or, if approved, are used in an investigational context outside of medical practice. Similarly, in identifying the submission needed to obtain approval to market a product, the proposal speaks in generic terms of a "marketing application" rather than specifically identifying the application appropriate to the drug (i.e., a new drug application (NDA) for new drugs, a request to provide for certification of an antibiotic (Form 5) for antibiotics, or a product license application for biological products.

The proposal would also define "clinical investigation" to mean any experiment in which an investigational new drug is administered or dispensed to, or used involving, one or more human subjects. In this context, an experiment is any drug use other than the use of a marketed drug in the practice of medicine.

The proposal would adopt definitions of "sponsor," "sponsor-investigator," "investigator," and "subject" that are like those used in the bioresearch monitoring regulations.

Finally, the proposal would revise the definitions of the phases of a clinical investigation to conform them to the current working understanding of the

distinctions between them. The regulations now consider both "Phase 1" and "Phase 2" to be parts of "clinical pharmacology," "Phase 1" involving studies in normal subjects, and "Phase 2" involving studies in patients. "Phase 3," under the current regulations, includes all clinical trials. The proposed revision would redefine Phase 1 to include clinical pharmacology testing both in normal subjects and in patients with the condition under investigation. What is currently "Phase 3" under the regulations would, under the revision, be divided into a new "Phase 2," representing the first small, rigidly controlled, clinical studies and a new "Phase 3," representing the expanded clinical trials. The proposed redefinitions in the regulations parallel current usage in the agency's clinical guidelines.

IND Format and Content

This section describes the format in which IND's should be submitted and the types of information IND's should contain.

Currently, IND format and content requirements are set forth in the IND Form FDA–1571, the application submitted by the sponsor to FDA. The form identifies in some detail the kinds of information a sponsor must submit in an IND. In general, such submission is required to include information on the drug's chemistry and manufacture, information about the pharmacology and toxicology of the drug derived mainly from animal studies, sufficient information about each clinical investigator to show that he or she is qualified to undertake the proposed investigations, information about any previous human experience with the drug, and protocols for each proposed study. The current form also performs several other functions, such as describing the sponsor's obligations with respect to the conduct of the investigation, describing some of the administrative actions FDA may take with respect to an IND, and defining the phases of an investigation.

FDA believes there are several deficiencies in the current content and format regulations that should be remedied. First, the statement of what is required to be submitted is needlessly complex and confusing and may lead some sponsors to submit more information than is actually required. Second, current applications are frequently submitted without the kinds of "abstracts" or introductory summaries that are of considerable help to the review process. Third, the current regulation fails to make clear that the technical information should be tailored to the nature and scope of the proposed clinical trials. Accordingly, the proposed revisions in IND format and content are intended to clarify IND submission requirements, to encourage the use of introductory and summary statements to facilitate administrative processing and review, and to emphasize that submission requirements vary with the phase and scope of the proposed clinical investigations.

More important than the actual structural changes, however, are the general principles set forth to guide sponsors in submitting IND's and FDA staff in reviewing them. FDA recognizes that many complaints with the IND system reflect not so much the regulations themselves as the superstructure that has grown up around them in practice. For example, although drugs and biologics have long been governed by the same IND regulations, drug IND's are usually at least twice as extensive as biologics IND's. Accordingly, the following principles are enunciated in the proposed regulations themselves in order to aid in the interpretation of the specific provisions.

The first such principle would be the FDA's primary objectives in reviewing an IND would be, in all phases of the investigation, to assure the safety and rights of subjects, and, in Phases 2 and 3, to help assure that the quality of the scientific evaluation of drugs is adequate to permit an evaluation of the drug's effectiveness and safety. Therefore, FDA's review of Phase 1 submissions would focus on assessing the safety of Phase 1 investigations. FDA's review of Phase 2 and Phase 3 submissions, however, would also include an assessment of the scientific quality of the clinical investigation and the likelihood that the investigations will yield data capable of meeting statutory standards for marketing approval. This principle is intended to reflect the agency's underlying policy goals to: (1) Encourage innovation by narrowing the scope of FDA regulation over early human research; and (2) increase the efficiency of the NDA review process through a heightened emphasis on advance FDA/sponsor consultation regarding the design of the major clinical trials.

The second basic principle is that the amount of information on a particular drug that must be submitted in an IND would depend upon the novelty of the drug, the extent to which it has been studied previously, the known or suspected risks, and the developmental phase of the drug and similar factors. This principle is intended to reflect the fact that flexibility in submission requirements is a function not only of the developmental phase of the research, but also of these other aspects of the drug itself.

The third principle is that the central focus of the first IND submission would be on the general investigational plan and the protocols for specific human studies. Subsequent amendments to the IND that contain new or revised protocols would build logically on previous submissions and would be supported by additional information including the results of animal toxicology studies or other human studies as appropriate. Annual reports to the IND would serve as the focus for reporting the status of studies being conducted under the IND and would update the general investigational plan for the coming year. This principle underscores the point that it is the scope and nature of proposed protocols that are of central importance in determining how much information needs to be submitted and in focusing on the degree of safety that needs to be shown.

The new IND format itself would consist of a cover sheet (revised Form FDA–1571), a table of contents, some introductory material intended to provide an overview of the investigation, the protocols for each study, and the technical information to support those specific protocols. This format may be further described, as follows:

1. *Cover sheet (Form FDA–1571).* FDA proposes to transform the IND Form FDA–1571 from a repository of the regulations to simply a cover sheet for the IND. The new Form FDA–1571 would only identify the phase or phases to be conducted and would contain essential "identifier" information about the sponsor and monitor of the investigation. When signed by the sponsor or the sponsor's representative, the application would commit the sponsor to comply with all applicable provisions governing the investigational use of drugs, as described in Part 312 as well as Parts 50, 52, 54, and 56. If the sponsor does not reside in the United States, the sponsor would designate an agent who resides or maintains a place of business in the United States who would also sign the form. This provision regarding foreign sponsors would correspond to a similar provision in the NDA Rewrite proposal.

2. *Introductory sections.* The proposed IND format would begin with a table of contents and a brief introductory statement. The introductory statement, which the agency believes should not usually be more than two or three pages in length, would give a broad overview

of the proposed investigation. It would give the drug's name, its pharmacological class, a short statement of the objectives of the proposed study, and a brief summary of previous human experience with the drug, including any foreign experience. FDA believes that the statement would be of considerable benefit in facilitating review by helping assign IND's to the appropriate reviewing division in an expeditious manner and by quickly orienting reviewers to the contents of the IND. Following the introductory statement, the IND would contain a general plan for the proposed investigation. This document would give a "blueprint" for drug development—that is, the kind and number of studies to be conducted in the following year, the general approach to be followed, and an estimate of the number of subjects to be involved. This "blueprint" is one mechanism for focusing attention on the scope and extent of the proposed human studies, both for sponsor submission and FDA review purposes.

3. *Protocols.* The general investigation plan would be followed by a protocol for each study the sponsor intends to begin at the end of FDA's 30-day review period. Protocols for later studies may be submitted in the initial IND or in protocol amendments as the investigation progresses. The detail of Phase I protocols now submitted by drug sponsors provides one of the best examples of where current practice has superseded the actual letter of the regulations. Although the current regulations require only a "general outline" of Phase 1 studies, in practice most Phase 1 studies have been submitted in the kind of detail more appropriate for Phase 2 or 3 protocols. Accordingly, in drafting revised regulations, FDA has sought to emphasize the difference in requirements between Phase 1 protocols and protocols for Phases 2 and 3.

Although the proposal would require protocols for all phases to contain information on subject selection criteria, on investigator qualification, on proposed procedures for monitoring the clinical effects of the drug, and so on, the proposal would stress that the amount of detail needed on each aspect of the protocol would vary with the phase of the investigation. The revision would reflect FDA's focus in Phase 1 on safety issues and would make clear that FDA expects Phase 1 protocols to be submitted in an outline form that would need to contain sufficient detail to permit a reliable assessment of subject safety, but not more than necessary for an adequate review.

The revision would also stress the flexibility a sponsor has to modify a Phase 1 protocol as experience dictates without having to submit protocol amendments to FDA (provided such modification is described in the next annual report). This flexibility reflects the truly experimental nature of early research and is consistent with the broad policy objective of maximizing sponsor freedom during this stage. Although this flexibility is available under current requirements, it has not been fully appreciated in practice by FDA or investigators and sponsors.

As noted above, FDA's review of Phase 2 and Phase 3 submissions has a broader scope. At this stage FDA is concerned not only with subject safety, but also with an assessment of the scientific quality of studies and the likelihood that the studies will produce the kind of data that can be considered in determining whether to approve a drug for marketing. Therefore, to decrease the chance that such studies will not meet statutory standards for marketing approval, much more detailed information about study design is required for Phase 2 and 3 investigations. FDA has prepared over 25 clinical guidelines for different classes of drugs that describe appropriate ways of designing and conducting these Phase 2 and Phase 3 trials.

One additional minor change should be mentioned. Under current regulations, protocols for early phase studies must identify "any expert committees or panels to be utilized," although protocols for later phases need not. The justification for this difference is no longer evident, and the IND Rewrite would require that each protocol, regardless of phase, identify the name and address of its reviewing institutional review board (IRB). This minor change will provide FDA with immediate access to the identity of a particular IRB, if necessary.

4. *Chemistry, manufacturing, and control information.* This section states the requirements regarding the submission in the application of information about the composition of the drug substance and drug product, their specifications, and their methods of manufacture and control. The section would clarify rather than substantially revise current requirements. FDA is preparing guidelines on the scope and content of chemistry, manufacturing, and control submissions. The language of the proposed regulation is intended to be general in nature so that it may accommodate changes that might be made as a result of the guideline development process.

The proposed revision emphasizes that chemistry, manufacturing, and control information should be tailored to the scope and duration of the proposed clinical investigation. For example, if relatively short-term clinical tests are planned, the stability information required would be limited to that needed to demonstrate that the product would be stable for the short duration of the investigation.

The revision would continue to require the submission of sufficient information about the drug substance and drug product to ensure its identity, potency, quality, and purity and to ensure that there is a sufficient continuity in the product so that information obtained from previous clinical and nonclinical studies can be considered in assessing the safety of future studies. It would also require a description of the method of preparation (or isolation) of the drug substance and a brief general description of the manufacturing and packaging of the drug product.

5. *Pharmacology and toxicology information.* FDA also does not propose to change significantly the substance of the current requirements regarding submission of animal and in vitro test results. The results of such tests serve primarily to support FDA's assessment of the safety of proposed clinical investigations. These studies are directed toward defining the drug's safety, toxicity, and pharmacological action rather than its efficacy. They are meant to predict effects which might be expected when the drug is administered to human subjects.

The proposal would retain the current requirement for "adequate information" on the basis of which the sponsor has concluded that it is reasonably safe to begin the proposed study. The proposal, like the current regulation, would note that the kind, duration, and scope of such tests would depend on the nature of the proposed investigations. The proposal would identify only in a general way the kinds of tests that sponsors would ordinarily submit in an IND. Detailed information on what kinds of tests may be submitted to support specific kinds of clinical investigations is contained in toxicology guidelines. The agency is reviewing its toxicology guidelines, and, as noted earlier, plans to develop new guidelines with the help of scientific experts from both inside and outside of government.

The proposal would also specify an appropriate format for toxicology submissions. The sponsor would be

required to submit an integrated summary of the toxicological effects of the drug in animals and in vitro and, for each study submitted primarily to support the safety of a proposed investigation, a full tabulation of the data. The latter provision reflects the fact that, unlike most other technical data, the usefulness of much toxicology data is largely confined to the investigational stages of drug development. Because such data's utility is greatest at this early stage, it is appropriate that it be submitted in the kind of detail appropriate for careful scrutiny.

6. *Sponsor-investigator IND's.* It should be emphasized that the proposed application section describes the information a commercial sponsor must submit for a previously unstudied new molecular entity. In general, it does not describe the kinds of technical information needed to support a sponsor-investigator research study of a previously studied drug product. FDA expects that in most such cases technical information previously submitted to FDA by the commercial sponsor will be incorporated by reference into the sponsor-investigator's IND, assuming permission is granted by the commercial sponsor. FDA will make available guidelines to assist sponsor-investigators in preparing IND's.

Amendments to the IND

This section describes the types and timing of IND amendments that must be submitted during the time that a drug is under investigational status. These amendments fall into three categories: (1) Protocol amendments, (2) information amendments, and (3) adverse drug experience reports. The proposed revisions are intended to rationalize the flow of information to an active IND file, to clarify when amendments are required, and to establish formatting requirements that will simplify their processing and review.

1. *Protocol amendments.* Current regulations require that a sponsor conducting an investigation adhere to the protocols described in the IND submission. If the sponsor intends to expand the scope of the investigation or to alter its direction, the sponsor is required to amend the IND to reflect the change. The current regulations, however, do not specify when an amendment should be submitted, for what kinds of changes amendments are required, or what the amendment should contain. The lack of specificity in the regulations means all too frequently that amendments are submitted in such a fashion that it is extremely difficult for reviewers to gain an understanding of their significance or their relationship to previous or subsequent submissions, except by reviewing the complete IND file. This difficulty in tracking an IND once an investigation begins may explain in part current emphasis on the initial IND submission.

The proposal would make clear that FDA is interested only in learning contemporaneously about the kinds of changes that bear directly on its review and monitoring responsibilities. Thus, under the protocol amendment procedures, amendments would be required only for new protocols, for protocol changes that significantly relate to the agency's assessment of an investigation's safety, and, for Phase 2 and Phase 3 studies, also for protocol changes that significantly relate to the scope of an investigation or to its scientific quality. Additionally, a protocol amendment would be required to list a new investigator that is added to an already submitted protocol. FDA reviews each new investigator to ensure that the investigator is qualified to conduct the proposed research and to verify that the investigator is eligible to receive investigational new drugs.

The proposal would also clarify the proper timing of submissions. The current IND regulations require the sponsor to notify FDA before beginning a substantially modified protocol or a new protocol, but do not require sponsors to pause before proceeding, so long as local IRB approval has been obtained. The IND Rewrite would explicitly retain this current process. The only change being made here is that protocol amendments which merely list a new investigator to an already submitted protocol would be sent to FDA under the timetable described below for information amendments.

Finally, FDA proposes to create a standard format for protocol amendments that would make them much easier to process and review. The flow of protocol amendments to the IND under current requirements is such that it is frequently difficult to determine the contents of an amendment, the sequence of amendments, or even to determine what specific protocol in an IND a submission is intended to amend. To remedy these deficiencies, the proposed revision would require that all protocol amendments be prominently identified, that they be numbered iin sequence of submission, and that protocol changes plainly indicate what specific protocols they are amending. The proposal would also require that a protocol amendment cite any specific technical data that support the proposed new protocol or protocol change. If, for example, the sponsor proposed to undertake a new long-term trial of 6 months' duration, where all previous trials had not exceeded 1 month, the sponsor would be required to cite the specific animal studies that supported a trial of this length. Such supporting data would either have been previously submitted to the IND or would be concurrently submitted in an information amendment.

2. *Information amendments.* The current regulation provides that the IND may be "amended or supplemented from time to time on the basis of experience gained with the * * * drug." The regulation contains no other guidance on the submission of additional technical information after the initial IND is submitted. The IND Rewrite would add specificity by establishing an "information amendment" as a means for conveying to FDA information on significant changes in the technical content of the IND file. Information amendments would provide specific technical information, including chemistry, toxicology, and pharmacokinetic data. Information amendments would serve primarily two functions: (i) They would provide the technical support (usually essential toxicological or chemistry information) for new or modified clinical protocols; and (ii) they would be a mechanism for keeping current the information contained in the IND file. The format of information amendments would be similar to that of protocol amendments.

Thus, information amendments would be required to bear prominent identification of their contents and to be serially numbered by discipline. Additionally, to facilitate FDA review, information amendments would be required to contain a statement of the nature and purpose of the amendment and to be submitted in a fashion appropriate for scientific review.

The proposal would also establish a new system for timing of information amendment submissions. Currently, the frequency and number of separate amendments and other communications submitted to an IND file places a significant workload on the agency. This results in delaying the routing of documents to the reviewing divisions. The proposal therefore encourages sponsors to group together information amendments and to submit them together at 30-day intervals instead of submitting these amendments individually. The grouping of amendments should ease both the agency's administrative burdens and the organizational and shipping burdens placed on sponsors. Of course, the

agency recognizes that in some cases the progress of an investigation may not permit the grouping of amendments, such as when information amendments are needed to support a protocol amendment that must be submitted more promptly. However, even when submissions are needed more often than every 30 days (so as not to impede the progress of the investigation), FDA encourages sponsors to group submissions as much as possible in order to improve the functioning of FDA document control.

To alleviate the administrative difficulties described above, FDA requests sponsors to group amendments at 30-day intervals (or earlier, if necessary) on an interim basis, pending completion of the notice and comment rulemaking proceeding. FDA believes such implementation is permissible prior to publication of a final rule because the change only affects the timing, not the content, of the submissions.

3. *IND safety reports.* The IND Rewrite contains a separate section on safety reports to highlight the importance of monitoring patient safety throughout the IND process. The proposal retains the current requirement for sponsors to notify FDA and all participating investigators about any information the sponsors receive associated with the use of the drug that may suggest significant hazards, contraindications, side effects, or precautions; the proposal states that, in meeting this requirement, the sponsor is required to review all information relevant to the safety of the drug obtained or otherwise received by the sponsor from any source, foreign or domestic, including information derived from clinical investigations, animal investigations, commercial marketing experience, reports in the scientific literature, and unpublished scientific papers. (Under the proposed rule defining the obligations of clinical investigators, an investigator is responsible for relaying to the reviewing IRB information received from the sponsor about adverse effects.) The proposal defines "information relevant to the safety of the drug" to include information about related drugs. The proposal also defines "associated with the use of the drug" to mean there is a reasonable possibility that the event may have been caused by the drug. To meet this definition, the causal relationship between the drug and the adverse event need not be known with any degree of certainty and, when doubt exists, the regulation should be construed to require submission of an IND safety report.

In addition, the proposal specifies time frames within which a sponsor would be required to relay safety reports to FDA. The current requirement is that an "alarming" finding must be reported "immediately" and that all other findings must be reported "promptly." Under the proposal, a sponsor would be required to notify FDA about fatal or life-threatening clinical experiences not previously reported as soon as practical and in no event later than 3 working days after the sponsor initially receives the information. Other serious adverse events would be required to be relayed to FDA as soon as possible and in no event later than 10 working days after the sponsor initially receives the information.

To ensure that this information is rapidly transmitted to FDA, the proposal would require the sponsor to relay the 3-day and 10-day IND safety reports by telephone at the same time as Written notifications are submitted. Telephone calls are to be made to the FDA division with review responsibility for the IND. written notifications are to be prominently identified to facilitate expedited processing by the agency.

The proposal would also retain the requirement obliging sponsors to investigate thoroughly all safety related information received by them. Although FDA understands that these investigations will not ordinarily be completed within the time limits prescribed for the IND safety reports, the proposal would require sponsors to submit relevant followup information to the 3-day and 10-day reports as expeditiously as practicable in an information amendment. Followup information on incidents not triggering a 3-day or 10-day report would be submitted, as appropriate, in either an information amendment or an annual report.

Annual Reports

This section describes content requirements for annual reports. Current regulations require a sponsor to submit accurate progress reports of the investigation and significant findings together with any significant changes in the investigator brochure at reasonable intervals, not exceeding once a year. FDA has found such reports to be a valuable means of monitoring the progress of investigations and therefore proposes to retain the provision in the rewrite. However, because current regulations provide inadequate guidance on what should be included in a progress report, the quality of such reports has varied considerably. Annual reports have varied from a very brief and conclusory statement about a sponsor's activities to a comprehensive statistical analysis of all data collected. Accordingly, some sponsors submit too much information and others submit too little.

The revision would clarify what FDA regards as the minimum amount of information needed to monitor satisfactorily the progress of drug development. It would require a brief summary of the status of each clinical study in progress, a brief summary of safety information obtained in the previous year, and a description of the general investigational plan for the following year. As part of the summary of safety information from the previous year, the annual report would contain a listing of patients who died or dropped out of clinical studies, because these patients are likely to provide the most important safety information. (The annual update of safety information would necessarily summarize all IND safety reports submitted to FDA throughout the previous year.) This requirement is consistent with a provision in the NDA Rewrite proposal that would require the routine submission of case report forms for those patients meeting these same criteria (i.e., persons who died or dropped out). Finally, as an aid in fostering better communication between FDA and the sponsor, the sponsor could use the annual report to identify any outstanding business about which the sponsor would like to meet with FDA or to have a written reply or comment from the agency.

Use of Investigational Drugs for Treatment

This section codifies a special procedure authorizing the "treatment use" of investigational drugs in an investigational context.

When reports in the medical literature begin to appear that a new investigational drug shows promise for a serious disease, a demand for the drug for the benefit of patients frequently develops. FDA has responded to this demand by permitting physicians to obtain investigational drugs for treatment use either under physician sponsored IND's or under protocols that are part of commercially sponsored IND's. In addition to providing patients with needed drug therapy, such treatment uses are a valuable adjunct to the investigation as well, frequently providing sponsors and FDA with valuable safety data. Although the agency has for many years permitted selected investigational drugs to be distributed primarily for treatment use

under these circumstances, the current IND regulations do not specifically authorize the practice. The proposed revisions would expressly authorize this use of investigational drugs, define the universe of drugs eligible for treatment use, and describe the procedures by which these drugs can be obtained.

Under this proposal, a drug would be obtainable for treatment use either under a treatment protocol submitted by the sponsor of an active commercial IND for that drug or under a separate treatment IND submitted by a licensed medical practitioner. The proposal would make plain that the primary purpose of a treatment protocol or treatment IND is to provide patients with a drug to treat a serious disease condition not treatable satisfactorily with alternative therapies. The criteria for authorizing the use of an investigational drug for treatment would reflect this purpose. Thus, FDA would only authorize use of a drug under a treatment protocol/IND if it found: (1) That the proposed use is intended for a serious disease condition in patients for whom no satisfactory approved drug or other therapy is available; (2) that the potential benefits of the drug's use outweigh the potential risks; and (3) that there is sufficient evidence of the drug's safety and effectiveness to justify its intended treatment use. These criteria would ordinarily mean that a drug would not be a candidate for a treatment use until it had gone through the kind of studies conducted during Phase 2. Thus, investigational drugs would ordinarily only become available for a treatment use at the end of Phase 2 or during Phase 3 of an investigation.

FDA believes that there are several reasons for generally confining the availability of investigational drugs for treatment use to drugs in this time frame. First, the kind of evidence necessary for FDA to be able to make an adequate assessment of the drug's potential benefits is usually not available until this time frame. Second, the agency wants to ensure that the treatment protocol/IND system does not undermine patients' interest in participating in controlled clinical trials. If access to investigational drugs for "treatment" becomes too widespread too early in the process, this could impede the collection of the type of data necessary to obtain marketing approval. Accordingly, FDA believes that the model for treatment protocol/IND use should be a drug in Phase 3 when the major clinical trials are completed or underway and where the evidence to date is favorable toward subsequent approval for marketing. The "Group C" system at the National Cancer Institute has followed these same principles and has achieved considerable success.

FDA anticipates that the proposed criteria for making a drug available under a treatment IND/protocol will be adequate to meet the vast majority of treatment use requests. Where compelling circumstances warrant, however, FDA will consider permitting treatment use earlier in the IND process.

Under the proposed criteria, "orphan drugs" would be leading candidates for treatment use by virtue of their being intended for rare diseases without satisfactory alternative therapy. As stated in the Orphan Drug Act (Pub. L. 97–414; January 4, 1983), sponsors of IND's for orphan drugs should be encouraged to design clinical studies that permit the inclusion of patients who wish to receive the drug for treatment purposes. (See section of Pub. L. 97–414 entitled, "Open Protocols for Investigations of Drugs for Rare Diseases or Conditions.") Accordingly, the treatment use section of the proposed regulations serve to implement the corresponding provisions of the Orphan Drug Act.

FDA has been criticized for not adequately informing the medical commuity about the availability of certain investigational drugs for treatment use. The proposal is intended to improve physician (and patient) access to these investigational drugs in three ways. First, by placing the procedures in the regulations, the necessary steps for obtaining such drugs will be made clear and more generally known. Second, as described below, FDA is encouraging commercial sponsors to develop treatment protocols so that, in most instances, the individual physician should not even have to come to FDA. Third, when separate treatment IND's do need to be submitted to the agency, the necessary paperwork is minimal, designed primarily to ensure patient safety, and the type of information needed to be submitted should be readily accessible to the treating physician. Accordingly, this provision should provide considerable benefits to consumers.

For some of the most promising investigational drugs, requests for the drug for treatment of individual patients can extend into the hundreds. The regulation would encourage drug companies to accommodate such requests under company-developed treatment protocols rather than to act simply as a supplier to many individual physicians, each of whom would otherwise have to submit a separate treatment IND. A company-sponsored treatment protocol has several advantages. Such a protocol can be readily designed to collect important, useful, and easily interpreted data about the drug, especially regarding safety.

It would certainly be in the public interest to utilize that additional premarketing data base. In addition, by channeling a number of physicians' requests for a drug for treatment into a single treatment protocol, scarce agency resources may be saved which can then be devoted to other IND's and marketing applications. In this regard, it should be noted that treatment IND's submitted by individual physicians now account for approximately 30 percent of all IND's received by FDA in a typical year.

Whether the request for use of an investigational drug in treatment were to be submitted in a treatment protocol or in a treatment IND, FDA' requirements would be minimal, consistent with patient safety and proper use. The protocol for each would include an explanation of the rationale for use of the drug, a brief description of the criteria for patient selection, a description of the clinical procedures, laboratory tests, or other measures to be taken to monitor the effects of the drug and to minimize risk, and a description of the proposed dosage and administration. Such protocols might be written by either the drug firm supplying the drug or an individual physician sponsor, with input from FDA as necessary to aid patient safety and proper use.

Because toxicology, chemistry, and other technical information should already be available for FDA review in the commercial sponsor's IND, in general little or no additional supporting information would be required for either a treatment protocol or a treatment IND. In the case of a treatment IND submitted by a individual physician, however, the physician needs permission from the commercial sponsor for FDA to cross-reference such technical information from the commercial sponsor's IND into the physician's treatment IND. In the normal course, if a commercial sponsor chooses to provide the individual physician with the investigational drug, FDA would view that shipment of the drug as authorization by the commercial sponsor to permit FDA to incorporate by reference the technical information in the commercial sponsor's IND into the physician's treatment IND. Such incorporation by reference makes the information available to FDA for review purposes, but does not authorize disclosure to the physician of the information so incorporated.

The obligations of sponsors and investigators on the conduct of investigational uses under treatment protocols/IND's would in general be identical to those imposed on other sponsors and investigators. Thus, the requirements regarding the control of the drug, recordkeeping, and reporting of safety information would apply in the treatment protocol/IND context as well. Although investigators are normally obliged under the IRB regulations in Part 56 to obtain the review and approval of a local IRB, FDA would carefully consider granting waivers from that requirement in a treatment setting, on the grounds that review by an IRB for conformance with ethical principles designed for the research setting is not always necessary in a treatment context. For treatment protocols covering many patients, the IRB review requirement (or waiver therefrom) applies only once to the initial protocol, not to each patient that is added to it. Of course, FDA waiver of an IRB requirement would not preclude a local IRB from requiring physicians to obtain IRB review for all experimental procedures conducted in the institution.

When FDA does waive IRB review requirements, it may require as a condition of such waiver that the sponsor submit adequate assurance that the treatments use is to be conducted in conformity with all applicable requirements regarding the ethical conduct of an investigation. In particular, FDA may require the submission of sample informed consent forms to demonstrate that adequate and informed consent will be obtained. This is especially important when IRB review has been waived because IRB review is the chief means of assuring adequate informed consent of patients.

It should be emphasized that the treatment IND or treatment protocol is suitable only as a mechanism to obtain a drug that is not otherwise obtainable. The mechanism would not be appropriate as a means of obtaining a commercially available approved drug for a treatment use that is not described in the product's package insert. Such uses of marketed products, if within the practice of medicine, are beyond FDA's authority to require submission of an IND. The applicability of IND requirements to the use of marketed drugs is discussed elsewhere in this preamble.

Emergency Procedures

The need for an investigational drug may arise in an emergency situation that does not allow time for compliance with applicable IND submission requirements. The proposal would formally establish the mechanism now used for obtaining a drug in an emergency. The proposal would permit FDA to authorize shipment of a drug for a specified use before submission of an IND. Such requests would usually be made over the telephone. FDA's authorization would typically require the person who obtains the drug on an emergency basis to followup the initial request with a full written IND submission.

Administrative Actions on an IND

FDA proposes to describe in the regulations administrative actions the agency may take in reviewing an initial IND and in monitoring the progress of investigations that are conducted under an effective IND.

As noted in the introductory section of this preamble, under current requirements FDA has 30 days to review an initial IND submission. FDA's reviewers are asked to decide whether the information submitted in the application supports initiation of the proposed clinical investigations. If the reviewers find that some deficiency in the application justifies delaying the commencement of human studies, a "clinical hold" may be imposed instructing the sponsor not to begin the studies. The kinds of deficiencies that would justify a clinical hold are not described in the current regulations. Unless otherwise notified, a sponsor may begin human studies 30 days after FDA receives the IND.

Once clinical investigations begin, the principal mechanisms of further FDA regulation are deficiency letters, which point out specific technical problems in the application; clinical holds, which are orders to stop or limit specifically identified studies under an IND; and terminations, which are orders that prohibit all investigational activity under an IND.

Current regulations impose no obligations on FDA to explain actions taken with respect to an IND, provide no effective procedures for appealing decisions during the IND process, and fail to explain the regulatory significance of agency deficiency letters and other communications sent to the sponsor during the pendency of an IND. Also, current regulations concerning administrative actions do not describe the proper scope of FDA review during the different phases of the IND process. Therefore, FDA believes that a comprehensive revision and restatement of IND procedures and standards for administrative actions should be undertaken.

The proposal would attempt to remedy these omissions, among other ways, by specifying clinical hold and termination procedures that reflect the changing focus of FDA's concerns in reviewing IND's for different phases, by clarifying the regulatory status of FDA's communications to sponsors, and by codifying an appeals mechanism.

The proposal would also retain the 30-day period for review of initial IND submissions. FDA believes that the 30-day period imposes little if any delay on the drug development process while providing FDA with adequate time to fulfill the agency's responsibilities in monitoring and assessing the safety of proposed human studies. At the same time, FDA concludes that it is unnecessary to establish an affirmative approval mechanism for IND's, i.e., a mechanism under which a sponsor could only begin a study after receiving written notification from FDA. FDA believes the current mechanism has worked well and should not be changed.

1. *Deficiency letters.* Under current practice, FDA frequently sends letters to sponsors outlining deficiencies in the IND or requesting additional data or information. These "deficiency letters" may follow FDA review of the initial IND or a subsequent amendment, and the letters ae usually not accompanied by a "clinical hold" order. Accordingly, the regulatory status of such letters has been unclear, and some sponsors have apparently interpreted such letters as imposing regulatory "requirements." Under the proposal, the practice of sending deficiency letters to sponsors would be retained, but the regulatory status of these letters would be clarified. Specifically, the proposal states that such letters would be advisory only and would not require any action by sponsors, unless accompanied by a "clinical hold" order. FDA believes this provision should provide both sponsors and agency staff with clear notice of their rights and responsibilities regarding these communications.

2. *Clinical holds.* The proposal would define the standards for imposing a clinical hold during the different phases of the investigation. Standards for Phase 1 clinical holds would reflect FDA's focus on safety. Thus, a hold in Phase 1 could only be imposed if FDA found one of the following: (1) Human subjects would be exposed to an unreasonable and significant risk of illness or injury (without commensurate benefit to the subject); (2) the clinical investigators were not adequately qualified to conduct the investigation; (3) the investigator's brochure was misleading, erroneous, or materially incomplete; or (4) the IND did not contain enough information to assess the risks to human

subjects. This narrowed scope of review would mean that FDA could not impose a clinical hold on a proposed Phase 1 study on concluding that the study was poorly designed or without a proper scientific rationale, unless those deficiencies had a direct bearing on safety. The purpose of this standard is to give sponsors greater freedom to design, revise, and implement early clinical research, as long as patients are not put at risk. Phase 1 studies are almost never considered pivotol for marketing approval, so FDA's responsibility is met at this stage once safety is established. The agency estimates that these narrowed clinical hold criteria would reduce the number of commercial IND's placed on clinical hold by approximately 30 percent. In contrast, during Phases 2 and 3, FDA would be able to stop or delay a study not only for safety, but also if the agency found that the study was "clearly deficient in design to meet its stated objective." The purpose of this different standard is to eliminate the wasteful expenditure of resources by sponsors in undertaking major clinical studies which, on their face, are simply incapable of producing data to support marketing approval.

The proposal would make clear FDA's authority to impose a clinical hold, not only prior to the beginning of a study, but at any time during the course of a clinical investigation. The proposal would also establish procedures to standardize the imposition of clinical holds. First, a clinical hold could only be imposed following a decision by the director of the division that is responsible for reviewing the IND, and the division director would be required to give the sponsor a written explanation of the basis for the hold within 15 days. Second, the clinical hold order would specify whether the study may be commenced or resumed as soon as stated deficiencies are corrected or whether the study's resumption must await the responsible division director notifying the sponsor that the study may proceed. Finally, as described below, if all investigations under an IND remain under a clinical hold order for 1 year or more, FDA could place the IND on inactive status.

In the clinical hold area, as elsewhere, the proposed regulation stresses the agency's commitment to seek the resolution of problems through informal discussions and meetings before resorting to formal regulatory mechanisms. Thus, the proposal provides that whenever FDA believes that a clinical hold should be imposed, it would attempt within the 30 days to discuss and resolve the matter with the sponsor before imposing the hold.

3. *Termination of an IND.* The proposed revisions of the "terminations" provisions should be viewed as an extension of the proposed revisions regarding "clinical holds." As described above, a clinical hold is an order not to commence or continue a clinical study. The order is viewed as a temporary measure until the problems affecting the specific studies placed on clinical hold can be resolved. In contrast, a termination order is viewed with a greater sense of finality. It is an order that affects all studies being conducted under an IND. In general, an IND would not be terminated if FDA felt there was any real prospect of continuing the investigation. Historically, the termination provision has been used only rarely, but FDA believes it is a necessary sanction to permit FDA to exercise its responsibilities in monitoring adequately the IND process.

The proposal would restate the general grounds for termination of an IND contained in the current regulations, but would tailor the grounds to the specific phases of the investigation. during Phase 1, terminations would be limited to issues involving the safety of subjects or substantial noncompliance with the regulations. In addition to these grounds, the proposal would permit the agency to terminate an IND during Phase 2 and Phase 3 investigations if the plan or protocol were not reasonable as a bona fide scientific plan for determining whether the drug is safe and effective, or if there exists convincing evidence that drug is ineffective for the purpose for which it is being investigated. These latter two criteria (i.e., "not reasonable as a bona fide scientific plan" and "convincing evidence that the drug is ineffective") are expected to apply only in rare cases.

The proposal would retain the current procedures for terminating an IND. Under those procedures, when FDA proposes to terminate an IND, it first notifies the sponsor in writing and gives the sponsor an opportunity to correct any deficiencies or explain why it believes termination of the IND is unwarranted. The sponsor then has 30 days to provide a written response or request a conference with FDA to respond to the agency's proposal. Lacking any response, FDA will terminate the IND. If the sponsor provides a response that the agency finds unacceptable, it will give the sponsor an opportunity for a regulatory hearing under 21 CFR Part 16 of FDA's administrative practice and procedure regulations on the question of whether the IND should be terminated. If FDA's proposed grounds for termination are sustained, the IND is terminated. Following termination, the sponsor is required to discontinue all ongoing studies and properly dispose of supplies of the investigational drug. FDA will, in general, only initiate termination proceedings after first attempting to resolve differences informally or, when appropriate, through the clinical hold procedures described above.

Finally, the proposal would retain the provision in the current regulations that permit FDA to terminate an IND immediately if the agency concludes that continuation of an investigation presents a significant danger to the public or patient health. Although this procedure has only rarely been utilized, FDA believes it represents a valuable procedural complement to the other mechanisms available for ending studies conducted under an IND.

4. *Inactive status.* FDA proposes to establish an inactive status: (1) For IND's for which no subjects have been entered into clinical studies for a period of 2 years or more; or (2) for which all investigations under the IND have been on clinical hold for 1 year or more. Under the proposal, FDA could place an IND on inactive status on the request of the sponsor or on the agency's own initiative. If FDA acts on its own initative, it would first give the sponsor notice of the proposed action and an opportunity to show that clinical investigations under the IND are being conducted and therefore that the IND should remain active. No clinical studies would be permitted under an inactive IND, but neither would the sponsor be required to comply with the annual reporting requirement applicable to IND's. Resumption of clinical studies would require the submission of amendments describing the proposed investigations. Finally, the agency could terminate an IND that remains inactive for 5 years or more.

This change is intended to help FDA keep track of IND's that are no longer considered active and would also benefit drug sponsors who now make nonsubstantive submissions in the form of annual reports to IND's for which no clinical studies are ongoing or planned. Sponsors believe these submissions are necessary to prevent their applications from being considered abandoned, which under current regulations would make all data and information in the IND available for public disclosure unless extraordinary circumstances exist (see current 21 CFR 312.5(b) and 314.14(f)). This proposal would eliminate the need to submit those reports for

inactive IND's. FDA would presume an inactive IND to be in effect for purposes of the public disclosure of data and information in the IND.

The Pharmaceutical Manufacturers Association (PMA) Petitioned FDA to provide for an inactive status for IND's for which sponsors have discontinued clinical investigations. The PMA petition and this proposal are similar in that both would provide for a sponsor to request that an IND be considered inactive, both would eliminate the requirement for annual reports for inactive IND's, and both would protect trade secrets and confidential commercial and financial information from public disclosure.

FDA's proposal differs from the PMA petition, however, in several respects. First, under FDA's proposal, the agency could place an IND on inactive status without the sponsor's consent. The agency believes that this provision is necessary to keep government records current so that agency resources can appropriately be directed to IND's under which clinical investigations are actually being conducted. Second, under the proposal, to resume a study placed on inactive status, a sponsor would have to submit a protocol amendment and wait 30 days for FDA review, paralleling the procedure for initial IND's. FDA believes a 30-day pause before resumption of studies under an inactive IND is necessary because the general accumulation of scientific knowledge during the period of inactivity may affect the risk assessment of studies under the IND. Thus, a reassessment of the potential risks to subjects as well as the potential scientific usefulness of Phase 2 and Phase 3 studies is appropriate after a substantial period of inactivity.

5. *Request for reconsideration or clarification.* FDA recently adopted a new appeals process under which the sponsor of an NDA or IND can appeal a request or opinion from the division monitoring the application. This procedure, which is more fully described in a publicly available FDA Staff Manual Guide (NCDB 4820.5), was first outlined in the agency's proposal to revise its new drug and antibiotic application procedures (see 47 FR 46622, 46633–46634; October 19, 1982). Sponsors can use the procedure to appeal requests by agency employees for specific additional studies or information, requests to modify or delay a study, or unfavorable agency responses to sponsors' requests for waivers or special technical approaches to scientific problems. The procedure is marked by the sponsor's submission of a written request for reconsideration or clarification to the division responsible for reviewing the IND, the division's prompt response to the sponsor, and, if the division's response is not acceptable, automatic review of the issue by management of the National Center for Drugs and Biologics. FDA will attempt to issue a final decision within 60 days of a sponsor's initial request. The IND Rewrite would simply codify the applicability of this procedure to the IND process. This procedure has already been implemented for both NDA's and IND's through the staff manual guide noted above.

Meetings

This section describes the use of meetings to improve communications between FDA and sponsors of clinical investigations and thus to facilitate the drug development and approval process. FDA proposes to expand and codify its current practices with respect to meetings with IND sponsors during the course of clinical investigations and in preparation for submission of a marketing application. Although FDA encourages frank and open communication with sponsors throughout the drug development and approval process, it has found that discussions held at the end of Phase 2 of an investigation ("end-of-Phase 2" meetings) and meetings held before submission of a marketing application ("pre-NDA" meetings) are most helpful in facilitating drug development and marketing.

Under the proposal, any IND sponsor may request and obtain an end-of-Phase 2 meeting with reviewing officials, with a special emphasis on new chemical entities under development. FDA's current practice is to encourage end-of-Phase 2 meetings for new chemical entities offering major or modest therapeutic gains over existing drugs. (Type IA and IB drugs under the agency's classification system). FDA's success with these meetings has led it to conclude that the development of other drugs, especially other new chemical entities, would most likely benefit from such early consultation as well. Although other new chemical entities are classified as providing little or no therapeutic gain over existing drugs (Type IC), these products may still provide improved therapeutic benefits for some patients who do not respond well to available therapy. In addition, increase availability of similar drugs should help increase competition in the marketplace.

The primary objective of the end-of-Phase 2 meeting would be for FDA and the sponsor to reach an agreement on the overall plan for Phase 3 clinical investigations and the objectives and designs of particular studies. Minutes of the meeting would reflect the agreements reached. Unless a significant scientific development requires otherwise, the sponsor would be assured that studies performed in accordance with the agreements would be acceptable to FDA (in design and objectives) for purposes of an application for marketing approval.

FDA believes that the kind of collaborative planning that takes place in such meetings is one of the best means available for facilitating drug development without compromising the safety or effectiveness of marketed drugs. One of the greatest sources of delay in the review of marketing applications is when sponsors submit reports from "pivotal" studies that are found to have significant flaws in design. In this situation, prolonged discussions frequently follow on whether the studies are "adequate and well-controlled" and whether the results are scientifically credible. Sponsors, understandably, are dismayed at the prospect of having to re-do major studies, but FDA cannot approve a drug for marketing that does not meet the statutory standards. FDA's experience is that questions of study design can almost always be worked out and agreed upon—if the discussion takes place before the studies have been conducted. Accordingly, although increased availability of end-of-Phase 2 meetings will create more resource demands on the agency and on sponsors, FDA believes that resources spent increasing the efficiency of the drug development process are well worth spending.

The proposal would specifically provide that both sponsors and the agency may bring outside expert consultants to end-of-Phase 2 conferences. FDA has sought in the past to involve outside experts in end-of-Phase 2 meetings, where practicable, and the agency's experience has been that such expertise is often of considerable benefit in planning the design of Phase 3 studies. FDA, therefore, plans to continue this policy.

FDA also proposes to codify its procedures for "pre-NDA" meetings that are held to discuss new drug and antibiotic applications and biological product license applications. The agency has found these meetings to be useful in ensuring that marketing applications present data in a manner suitable for efficient agency review. "Pre-NDA" meetings are another mechanism

whereby advance planning can facilitate the drug review process.

Applicability of IND Requirements to Marketed Drugs

This section describes the applicability of IND requirements to marketed drugs. Specifically, the proposal: (1) Would clarify that the act does not regulate the "practice of medicine" so that a licensed physician may prescribe an approved drug for an unapproved indication; (2) would also clarify that the act does regulate "clinical investigations" using marketed drugs; but (3) would create a new category of clinical investigations using marketed drugs that would no longer require an IND.

Current regulations are silent on the act's applicability to the use of approved drugs for unapproved uses. This issue has caused considerable confusion both inside and outside the agency. In the **Federal Register** of August 15, 1972 (37 FR 16503), the agency proposed a regulation that would have put forth the legal status of approved labeling; although no final rule has been issued on this subject, the agency has continued to apply the principles set forth in the preamble to the 1972 proposal. In FDA's *Drug Bulletin* of April 1982, the agency sought to clarify and reiterate the position that the act does not regulate the "practice of medicine." Once a drug product has been approved for marketing, a physician may, in treating patients, prescribe the drug for uses not included in the drug's approved labeling. The primary legal constraints in that situation are State laws on medical practice and products liability law. The IND Rewrite proposal would codify the agency's longstanding position that the regulations do not apply to the "practice of medicine," though the proposal does not purport to define with specificity such practice in terms of the act.

A different issue arises when physicians, usually affiliated with academic institutions, seek to conduct "clinical investigations" using marketed drugs, either to look for new uses or to use the drug as a research tool. FDA's position has been, and continues to be, that such investigations are subject to section 505(i) of the act (21 U.S.C. 355(i)). Thus, the agency has received numerous IND's each year covering these types of studies. FDA, however, has reevaluated the utility of reviewing these IND's and has concluded that the agency's review of certain categories of them, as described below, is not necessary to assure patient protection. Accordingly, FDA proposes to exempt from the IND requirements of Part 312 clinical investigations using marketed drugs that meet the following two criteria: (1) The investigation does not involve a route of administration or dosage level or use in a patient population that significantly increases the risk associated with use of the drug product; (2) the investigation is not intended to be reported to FDA as a well-controlled study in support of a new indication for use, nor intended to be used to support any other significant change in the advertising or labeling for the drug.

The first criterion embodies the view that, where a marketed drug is investigated in a way consistent with its approved labeling, FDA review is not needed to protect the safety of research subjects. The agency's approval of a new drug product for marketing is based on a substantial body of scientific information demonstrating the drug's safety in certain doses, routes of administration, and, sometimes, in certain patient populations. That information is conveyed to physicians through detailed professional labeling Administration of the drug under circumstances similar to those described in the approved labeling would not, therefore, be expected normally to produce any significant safety problems necessitating FDA review under the IND process.

FDA recognizes that the safety standard in the proposal contains an element of professional judgment in determining whether the conditions of the investigations "significantly increase" the risk associated with use of the drug. In applying this test, physicians should rely upon the contents of the approved labeling, reports in the medical literature, and their own experience in medical practice. For example, safety concerns necessitating submission of an IND would ordinarily arise where: (1) A drug is to be administered in a dosage many times greater than the labeled amount (new dosage level); (2) a drug approved for use in an oral dosage form is to be used in an intravaneous solution (new dosage form); or (3) an anticancer drug is to be used in patients with nonmalignant disease (new patient population). As an adjunct to these general criteria, FDA would also provide public notice when specific situations are identified that would require an IND.

The second criterion in the proposed regulation is aimed at helping ensure that investigations intended to be submitted to FDA for labeling or advertising changes are adequate in design to serve that purpose. This is the same reason the agency evaluates the design of Phase 2 and Phase 3 studies, and why FDA encourages close consultation with sponsors through participation in "End-of-Phase 2" conferences. As noted earlier, such review by FDA in advance adds considerable efficiency to the drug development process.

Persons conducting exempted studies would still be required to conform to all ethical principles applicable to the conduct of clinical investigations, including the statutory requirement for informed consent. Thus, a study's exemption under the proposal would be conditioned on a sponsor obtaining appropriate informed consent as well as the review and approval of a local IRB. Finally, the sponsor would still be prohibited from commercializing the investigation or promoting the product for its investigated use, except on specific approval by FDA.

The agency considered several alternatives to exempting such studies from IND submission requirements. For example, FDA considered requiring the submission to FDA of an "abbreviated IND" for this subset of uses. Such an IND would simply identify the investigational use the sponsor proposed to study and explain why the study met the criteria for exemption. This notification scheme would arguably permit FDA to play a more active role in regulating these investigations and would allow the agency, if a proposed study failed to meet the criteria for exemption, to stop it prior to its beginning. FDA is concerned, however, that such a system woud actually slow down the process because an abbreviated IND is unlikely to contain sufficient information to verify the criteria. Because reviewers are likely to ask for additional information and delay commencement of the studies, FDA does not consider this to be the best available option. The agency also considered expressly requiring IND's for these studies but, for the reasons stated above, FDA believes agency review is unnecessary to meet FDA's regulatory responsibilities.

The exempted group would include many, if not most, studies conducted by individual investigators in which marketed drugs are used as research tools or in exploratory therapeutic trials. The exemption would also apply to commercially sponsored studies if they fell into the exempted category. The agency would not accept IND's for exempt studies. FDA anticipates that there may be questions raised about the exempt status of certain kinds of investigations. FDA will provide assistance to interested persons who are

uncertain whether a proposed study falls under the terms of this exemption.

FDA believes that the exemption for studies of marketed drugs should significantly reduce administrative burdens placed on research conducted by individual investigators without compromising patient safety. FDA should also benefit because studies that would be exempted under the proposal constitute a significant fraction (over 15 percent) of all IND's received by FDA in a given year. Thus, review time and other staff time that are now spent on these IND's would be saved and redirected toward commercial IND's for new products under development, FDA reviews, and other review functions.

Responsibilities of Sponsors and Investigators

FDA proposes to summarize in the regulations the requirements concerning the responsibilities of sponsors and investigators under an IND. These provisions are intended to supplement more detailed requirements contained in FDA's proposed regulations defining the obligations of sponsor and monitors (42 FR 49612; September 27, 1977; proposed Part 52) and of clinical investigators (43 FR 35210; August 8, 1978; proposed Part 54). As noted earlier in this preamble, the IND proposal has been prepared on the assumption that sponsor/monitor and clinical investigator regulations will be made final either before, or at the same time as, the final IND Rewrite. Responsibilities of sponsors and/or clinical investigators are also contained in current FDA regulations on: (1) Informed consent (21 CFR Part 50), (2) institutional review boards (21 CFR Part 56), and (3) good laboratory practice for conducting nonclinical laboratory studies (21 CFR Part 58). To the extent that apparent inconsistencies may develop between the IND regulations and the bioresearch monitoring regulations, the bioresearch regulations would control and the IND regulations would be appropriately clarified when published in final form.

The IND proposal would retain current requirements for a sponsor to (1) select qualified investigators, (2) provide them with the information they need to conduct an investigation properly, (3) ensure proper monitoring of the investigation, (4) ensure that the investigation is conducted in accordance with the general investigational plan and protocols contained in the IND, (5) maintain an effective IND with respect to the investigation, and (6) ensure that FDA and all participating investigators are promptly informed of significant new safety information with respect to the drug. The proposal would also retain current requirements for an investigator to ensure: (1) That the investigation is conducted according to the investigator's statement that was provided to the sponsor, the investigational plan, and applicable FDA regulations; (2) the rights, safety, and welfare of subjects under the investigator's care are protected; and (3) that the drugs used in the investigation are kept under careful control.

One of the primary responsibilities of sponsors under an IND is to select investigators and a monitor who are qualified by training and experience to investigate the drug and monitor the investigations. In this regard the sponsor is required to obtain from each clinical investigator an investigator's statement containing information about the investigator, the facilities where the study will be conducted, and commitments by the investigator with respect to his or her involvement in the study. The sponsor is also required to obtain a curriculum vitae for each investigator and an outline of the plan of investigation.

Unlike most FDA regulations, the current content requirements for an investigator statement are contained in Form FDA–1572 (for investigators involved in clinical pharmacology) and Form FDA–1573 (for investigators involved in clinical trials). The forms, which are reprinted in the regulations, identify in detail the kinds of information the investigator must provide to the sponsor and contain specific commitments the investigator makes with respect to the investigation. The agency proposes to combine the forms into a single investigator statement Form FDA–1572 and to revise the form to make it simply a checklist of the investigator's submission. The agency would provide guidelines to help investigators compile necessary information and provide it to the sponsor.

As described more fully above, the sponsor would be required, as now, to provide each investigator with an investigator brochure containing the information the investigator needs to conduct the investigation properly. In addition, the sponsor is under a continuing obligation to keep each participating investigator informed about new information about the drug, particularly with respect to safety information and the drug's safe use. The important safety information should be communicated orally to investigators with a written followup.

Under the proposal, a sponsor would continue to monitor an investigation by securing compliance of noncomplying investigators with the investigational plan and ending an investigator's participation if he or she refuses to comply with the plan. In addition, the sponsor must monitor the progress of investigations, evaluate safety and effectiveness information, and make reports to FDA regarding adverse drug experiences. All records of the investigation would of course be available for inspection by authorized Federal employees. If a sponsor determines that an adverse drug effect presents an unreasonable and significant risk to subjects, the sponsor must (1) discontinue the investigation and notify FDA and all investigators, (2) dispose of all stocks of the drug, and (3) provide FDA with a full report of the actions taken. Although current regulations require that the sponsors take this action promptly, the proposal would require a sponsor to discontinue an investigation as soon as possible, but in no event later than 5 working days after determining it should be discontinued.

Miscellaneous Provisions

1. *Sale of investigational drugs.* The proposal would retain, essentially unchanged, the current provisions prohibiting promotion and commercialization of investigational drugs. The proposal would also retain the current policy of not permitting sale of an investigational drug unless a full and satisfactory explanation is given why the sale should not be regarded as commercializing the drug. However, while this policy applies to sale of any investigational drug, the procedure for implementing the policy is different for investigational biological products than it is for investigational new drugs and antibiotics. For biologics, sale is not permitted until the sponsor is notified of FDA's approval of the sale. With respect to new drugs and antibiotics, there is no written current policy, and therefore the issue is subject to differing interpretations and applications, although in practice FDA usually does make affirmative decisions on whether to permit sale. The proposal would extend the procedure for sale of biological products to all investigational drugs so that no sale would be permitted except upon written approval of the Director, National Center for Drugs and Biologics. Centralizing these decisions in one individual would ensure uniform application of the agency's policy in this area.

2. *Imports and exports.* FDA proposes to codify its current policy on imports and exports of investigational new drugs. The Federal Food, Drug, and

Cosmetic (the act) prohibits, under sections 301(d) and 505(a) (21 U.S.C. 331(d) and 355(a)), the introduction or delivery for introduction into interstate commerce of any new drug without an approved application under section 505(b) or an exemption under section 505(i). That prohibition extends to imports and exports of unapproved new drugs under the act's definition of the term "interstate commerce" (section 201(b)) (21 U.S.C. 321(b)). Thus, an unapproved new drug may not be imported into, or exported from, the United States unless it is subject to an exemption provided by FDA for an investigational new drug.

The proposal would simplify the agency's regulations governing imports by requiring an investigational new drug offered for importation into the United States to be subject to an effective IND and require the consignee within the United States to be either the sponsor of the IND or an investigator named in the IND. If the sponsor did not reside in the United States, the sponsor would be required to designate a domestic agent to act on behalf of the sponsor.

The proposal would retain the agency's current policies on exports of an investigational new drug by providing that such drug may be exported from the United States if an IND is in effect for it and each person to whom it is exported is an investigator named in the IND. The proposal would also modify the procedures under which FDA may authorize export of an investigational new drug that is not subject to an IND. Currently, requests for export under these procedures may only be processed through the Department of State.

The proposal would streamline this process by permitting these requests to be submitted directly to FDA by an authorized official of the importing foreign government. As an alternative procedure, the proposal would also permit requests to be submitted by an official of the company that proposes to export the drug. In either case, FDA will authorize shipment only if it is satisfied that the drug is appropriate for investigational use in human subjects, that the drug will be used for investigational purposes only, and that the drug may legally be used by the consignee in the importing country. The amount of information needed to satisfy these criteria will vary depending on the nature of the drug and FDA's prior familiarity with it.

FDA will coordinate export authorization with the appropriate governmental officials of the importing countries. As in the past, FDA will give considerable deference to letters by foreign governments specifically requesting shipment of the drug into their country. Where the request is made by the exporter, FDA will notify the foreign government of any export authorizations that are made.

Finally, the agency emphasizes that these procedures do not permit export of an investigational drug for commercial marketing or for use in routine medical practice.

3. *Foreign clinical studies.* The proposal would retain current policy on FDA's acceptance for IND purposes of foreign clinical studies not conducted under an IND. The regulation itself has been redrafted to provide greater clarity. FDA accepts well-designed and well-conducted investigational studies that are performed by qualified investigators in accordance with ethical principles acceptable to the world community. Studies meeting these criteria may be used to support clinical investigations in the United States as well as subsequent marketing approval. Marketing approval of a new drug or antibiotic drug based solely on foreign clinical data, however, would be governed by the agency's regulations on new drug applications in Part 314 (see the proposal in 47 FR 46622, 46642–46644, and 46655; October 19, 1982).

4. *Public availability of data and information in an IND.* FDA proposes no substantive change in the specific regulations applicable to the availability for public disclosure of data and information in an IND. (Although, as noted above, FDA does propose to treat an IND on inactive status as an active IND for purposes of the public disclosure of data and information.) The proposal would retain the current provisions which (i) prohibit FDA disclosure of the existence of an IND, (ii) apply to IND's the same provisions for public release of data and information in a new drug application (NDA) under Part 314, and (iii) specifically provide for the disclosure to an individual patient who received an investigational new drug of a copy of any adverse reaction report relating to the use of the drug in that individual.

5. *Address for correspondence.* FDA proposes a new section in the regulations to identify the appropriate agency offices to which IND's should be sent. The regulation would also require the outside wrapper of each IND submission to identify the submission (for example, as the original IND submission, protocol amendment, information amendment, adverse drug experience report, or annual report).

6. *Guidelines.* This section simply states that the agency prepares guidelines to help persons comply with the regulations. As stated in § 10.90(b), guidelinnes do not establish legal requirements but a person may be assured that by following an agency guideline his or her submission will be in a form acceptable to the agency. A person may also choose to use alternative procedures or standards even though they are not provided for in a guideline. A person who chooses to use alternative procedures or standards may discuss the matter in advance with FDA to prevent an expenditure of money and effort on work that may later be found unacceptable. The agency also proposes to establish and make publicly available a list of guidelines that apply to the IND regulations.

7. *Use in laboratory research animals or in vitro tests.* Although an IND is not required, the agency proposes to retain, with some editorial changes, its current regulations governing the proper labeling and control of investigational new drugs intended solely for use in laboratory research animals, or for tests in vitro.

Environmental Impact

The agency has determined under 21 CFR 25.24(b)(17) (proposed December 11, 1979; 44 FR 71742) that this proposed action is of a type that does not individually or cumulatively have a significant impact on the human environment. Therefore, neither an environmental assessment nor an environmental impact statement is required.

Paperwork Reduction Act of 1980

This proposed rule contains a number of information collection requirements. As required by section 3504(h) of the Paperwork Reduction Act of 1980, FDA has submitted a copy of this proposed rule to the Office of Management and Budget (OMB) for its review of these information collection requirements. Other organizations and individuals desiring to submit comments on the information collection requirements should direct them to FDA's Dockets Management Branch (address above) and to the Office of Information and Regulatory Affairs, OMB, New Executive Office Building (Rm. 3208), Washington, DC 20503, ATTN: Richard Eisenger.

FDA proposes that the final regulation be effective 60 days after its date of publication in the **Federal Register**.

List of Subjects in 21 CFR Part 312

Drugs, Medical research.

Therefore, under the Federal Food, Drug, and Cosmetic Act (secs. 501, 502, 503, 505, 506, 507, 701, 52 Stat. 1049–1053

as amended, 1055–1056 as amended, 55 Stat. 851, 59 Stat. 463 as amended (21 U.S.C. 351, 352, 353, 355, 356, 357, 371)) and the Public Health Service Act (sec. 351, 58 Stat. 702 as amended (42 U.S.C. 262)) and under 21 CFR 5.11 as revised (see 47 FR 16010; April 14, 1982), it is proposed that Part 312 be revised to read as follows:

PART 312—INVESTIGATIONAL NEW DRUG APPLICATION

Subpart A—General Provisions

Sec.
312.1 Scope.
312.2 Applicability.
312.3 Definitions and interpretations.
312.6 Labeling of an investigational new drug.
312.7 Promotion and sale of investigational drugs.
312.10 Waivers.

Subpart B—Investigational New Drug Application (IND)

312.20 Requirement for an IND.
312.21 Phases of an investigation.
312.22 General principles of the IND submission.
312.23 IND content and format.
312.30 Protocol amendments.
312.31 Information amendments.
312.32 IND safety reports.
312.33 Annual reports.
312.34 Treatment use of an investigational new drug.
312.36 Emergency use of an investigational new drug.
312.38 Withdrawal of an IND.

Subpart C—Administrative Actions

312.40 General requirements for use of an investigational new drug in a clinical investigation.
312.41 Comment and advice on an IND.
312.42 Clinical holds and request for modification.
312.44 Termination.
312.45 Inactive status.
312.47 Meetings.
312.48 Request for reconsideration or clarification of technical requirements or informal opinions.

Subpart D—Responsibilities of Sponsors and Investigators

312.50 General responsibilities of sponsors.
312.53 Selecting investigators and monitors.
312.55 Informing investigators.
312.56 Monitoring investigations.
312.58 Inspection of sponsor's records and reports.
312.60 General responsibilities of investigators.
312.62 Investigator records and reports.

Subpart E—Miscellaneous

312.110 Import and export requirements.
312.120 Foreign clinical studies not conducted under an IND.
312.130 Availability for public disclosure of data and information in an IND.
312.140 Address for correspondence.
312.145 Guidelines.

Subpart F—Drugs for Investigational Use in Laboratory Research Animals or in Vitro Tests

312.160 New drugs for investigational use in laboratory research animals or in vitro tests.

Authority: Secs. 501, 502, 503, 505, 506, 507, 701, 52 Stat. 1049–1053 as amended, 1055–1056 as amended, 55 Stat. 851, 59 Stat. 463 as amended (21 U.S.C. 351, 352, 353, 355, 356, 357, 371); sec. 351, 58 Stat. 702 as amended (42 U.S.C. 262).

Subpart A—General Provisions

§ 312.1 Scope.

(a) This part contains procedures and requirements governing the use of investigational new drugs, including procedures and requirements for the submission to, and review by, the Food and Drug Administration of investigational new drug applications (IND's). An investigational new drug for which an IND is in effect in accordance with this part exempts the drug from the premarketing approval requirements that are otherwise applicable and permits the drug to be shipped lawfully for the purpose of conducting clinical investigations of that drug.

(b) References in this part to regulations in the Code of Federal Regulations are to Chapter I of Title 21, unless otherwise noted.

§ 312.2 Applicability.

(a) Except as provided in this section, this part applies to all clinical investigations of drugs that are subject to section 505 or 507 of the Federal Food, Drug, and Cosmetic Act or to the licensing provisions of the Public Health Service Act (58 Stat. 632, as amended (42 U.S.C. 201 et seq.)).

(b)(1) *Exemptions.* The following categories of drugs are exempt from the requirements of this part:

(i) a lawfully marketed drug product used in a clinical investigation, if all the following apply:

(*a*) The investigation is not intended to be reported to FDA as a well-controlled study in support of a new indication for use nor intended to be used to support any other significant change in the advertising or labeling for the drug:

(*b*) The investigation does not involve a route of administration or dosage level or use in a patient population that significantly increases the risks associated with use of the drug product;

(*c*) The investigation is conducted in compliance with the requirements for institutional review set forth in Part 56 and with the requirements for informed consent set forth in Part 50; and

(*d*) The investigation is conducted in compliance with the requirements of § 312.7.

(ii) A biological drug intended for in vitro diagnostic use if:

(*a*) It is intended to be used in a diagnostic procedure that confirms the diagnosis made by another, medically established, diagnostic product or procedure, and

(*b*) The investigational drug is shipped in compliance with §312.160.

(iii) A drug intended solely for tests in laboratory research animals, if shipped in accordance with § 312.160.

(2) FDA will not accept an application for an investigation that is exempt under the provisions of paragraph (b)(1) of this section.

(c) For the applicability of this part to in vivo bioavailability studies in humans, see § 320.31.

(d) This part does not apply to the use in the practice of medicine for an unlabeled indication of a new drug or antibiotic drug product approved under Part 314 or of a licensed biological product.

(e) FDA may, on its own initiative, issue guidance on the applicability of this part to particular investigational uses of drugs. On request, FDA will advise on the applicability of this part to a planned clinical investigation.

§ 312.3 Definitions and interpretations.

(a) The definitions and interpretations of terms contained in section 201 of the act apply to those terms when used in this part.

(b) The following definitions of terms also apply to this part:

"Act" means the Federal Food, Drug, and Cosmetic Act (sections 201–902, 52 Stat. 1040 et seq., as amended (21 U.S.C. 301–392)).

"Clinical investigation" means any experiment in which an investigational new drug is administered or dispensed to, or used involving, one or more human subjects. For the purposes of this part, an experiment is any use of a drug except for the use of a marketed drug in the course of medical practice.

"FDA" means the Food and Drug Administration.

"IND" means an investigational new drug application.

"Investigational new drug" means a new drug, antibiotic drug, or biological drug (including a biological product that is used in vitro for diaganostic purposes) that: is not marketed under an approved marketing application; or is a marketed drug that is used for any purpose or in any way other than that described in its labeling, except when such use is carried out by a licensed practitioner in

the course of medical practice. The terms "investigational drug" and "investigational new drug" are deemed to be synonymous for purposes of this part.

"Investigator" means an individual who actually conducts a clinical investigation (i.e., under whose immediate direction the drug is administered or dispensed to a subject). In the event an investigation is conducted by a team of individuals, the investigator is the responsible leader of the team.

"Marketing application" means an application for a new drug submitted under section 505(b) of the act, a request to provide for certification of an antibiotic submitted under section 507 of the act, or a product license application for a biological product submitted under the Public Health Service Act.

"Sponsor" means a person who takes responsibility for and initiates a clinical investigation. The sponsor may be an individual or pharmaceutical company, governmental agency, academic institution, private organization or other organization. The sponsor does not actually conduct the investigation unless the sponsor is a sponsor-investigator. A person other than an individual that uses one or more ot its own employees to conduct an investigation that it has initiated is a sponsor, not a sponsor-investigator, and the employees are investigators.

"Sponsor-Investigator" means an individual who both initiates and conducts an investigation, and under whose immediate direction the investigational drug is administered or dispensed. The term does not include any person other than an individual. The requirements applicable to a sponsor-investigator under this part include both those applicable to an investigator and a sponsor.

"Subject" means a human who participates in an investigation, either as a recipient of the investigational new drug or as a control. A subject may be a healthy human or a patient with a disease.

§ 312.6 Labeling of an investigational new drug.

(a) The immediate package of an investigational new drug intended for human use shall bear a label with the statement "Caution: New Drug—Limited by Federal (or United States) law to investigational use."

(b) The label or labeling of an investigational new drug shall not bear any statement that is false or misleading in any particular and shall not represent that the investigational new drug is safe or effective for the purposes for which it is being investigated.

§ 312.7 Promotion and sale of investigational drugs.

(a) *Promotion of an investigational new drug.* A sponsor or investigator, or any person acting on behalf of a sponsor or investigator, shall not represent in a promotional context that an investigational new drug is safe or effective for the purposes for which it is under investigation or otherwise promote the drug. This provision is not intended to restrict the full exchange of scientific information concerning the drug, including dissemination of scientific findings in scientific or lay media: Rather, its intent is to restrict promotional claims of safety or effectiveness of the drug for a use for which it is under investigation and to preclude commercialization of the drug before it is approved for commercial distribution.

(b) *Commercial distribution of an investigational new drug.* A sponsor shall not commercially distribute or test market an investigational new drug.

(c) *Prolonging an investigation.* A sponsor shall not unduly prolong an investigation, but shall submit a marketing application for the drug, with reasonable promptness after finding that the results of the investigation appear to establish sufficient data to support a marketing application, or within 60 days of receipt of a request for such application by FDA. If the sponsor determines that the data obtained will support a marketing application, the sponsor shall promptly discontinue the investigation and withdraw the IND.

(d) *Sale of an investigational drug.* The sale of an ivestigational new drug is not permitted except upon the written approval of the Director of the National Center for Drugs and Biologics. To obtain approval for the sale of a drug, the sponsor shall submit a full written explanation why sale is required and why the sale should not be regarded as the commercialization of an investigational drug. No sale will be permitted except in the context of an acceptable investigation.

§ 312.10 Waivers.

(a) A sponsor may request FDA to waive any applicable requirement under this part. A waive request may be submitted either in an initial IND or in an information amendment to an IND. In an emergency, a request may be made by telephone or other rapid communication means. A waiver request is required to contain at least one of the following:

(1) An explanation why the sponsor's compliance with the requirement is unnecessary or cannot be achieved;

(2) A description of an alternative submission or course of action that satisfies the purpose of the requirement; or

(3) Other information justifying a waiver.

(b) FDA may grant a waiver if it finds that the sponsor's noncompliance would not pose a significant and unreasonable risk to human subjects of the investigation and that one of the following is met:

(1) The sponsor's compliance with the requirement is unnecessary for the agency to evaluate the application, or compliance cannot be achieved;

(2) The sponsor's proposed alternative satisfies the requirement; or

(3) The applicant's submission otherwise justifies a waiver.

Subpart B—Investigational New Drug Application (IND)

§ 312.20 Requirement for an IND.

(a) A sponsor shall submit an IND to FDA if the sponsor intends to conduct a clinical investigation with an investigational new drug that is subject to § 312.2(a).

(b) A sponsor shall not begin a clinical investigation subject to § 312.2(a) until the investigation is subject to an effective IND in accordance with § 312.40.

§ 312.21 Phases of an investigation.

An IND may be submitted for one or more phases of an investigation. The clinical investigation of a previously untested drug is generally divided into three phases. Although in general the phases are conducted sequentially, they may overlap. These three phases of an investigation are as follows:

(a) *Phase 1.* (1) Phase 1 includes the initial introduction of an investigational new drug into humans. Phase 1 studies are typically closely monitored and may be conducted in patients or normal volunteer subjects. These studies are designed to determine the metabolism and pharmacologic actions of the drug in humans, the side effects associated with increasing doses, and, if possible, to gain early evidence on effectiveness. During Phase 1, sufficient information about the drug's pharmacokinetics and pharmacological effects should be obtained to permit the design of well-controlled, scientifically valid, Phase 2 studies. The total number of subjects and patients included in Phase 1 studies varies with the drug, but is generally in the range of 20 to 80.

(2) Phase 1 studies also include studies of drug metabolism, structure-activity relationships, and mechanism of action in humans, as well as studies in which investigational drugs are used as research tools to explore biological phenomena or disease processes.

(b) *Phase 2.* Phase 2 includes the controlled clinical studies conducted to evaluate the effectiveness of the drug for a particular indication or indications in patients with the disease or condition under study and to determine the common short-term side effects and risks associated with the drug. Phase 2 studies are typically well controlled, closely monitored, and conducted in a relatively small number of patients, usually involving no more than several hundred subjects.

(b) *Phase 3.* Phase 3 studies are expanded controlled and uncontrolled trials. They are performed after preliminary evidence of effectiveness of the drug has been established, and are intended to gather the additional information about effectiveness and safety that is needed to evaluate the overall benefit-risk relationship of the drug and to provide an adequate basis for physician labeling. Phase 3 studies usually include from several hundred to several thousand subjects.

§ 312.22 General principal of the IND submission.

(a) FDA's primary objectives in reviewing an IND are, in all phases of the investigation, to assure the safety and rights of subjects, and, in Phase 2 and 3, to help assure that the quality of the scientific evaluation of drugs is adequate to permit an evaluation of the drug's effectiveness and safety. Therefore, although FDA's review of Phase 1 submissions will focus on assessing the safety of Phase 1 investigations, FDA's review of Phases 2 and 3 submissions will also include an assessment of the scientific quality of the clinical investigation and the likelihood that the investigations will yield data capable of meeting statutory standards for marketing approval.

(b) The amount of information on a particular drug that must be submitted in an IND to assure the accomplishment of the objectives described in paragraph (a) of this section depends upon such factors as the novelty of the drug, the extent to which it has been studied previously, the known or suspected risks, and the developmental phase of the drug.

(c) The central focus of the first IND submission should be on the general investigational plan and the protocols for specific human studies. Subsequent amendments to the IND that contain new or revised protocols should build logically on previous submissions and should be supported by additional information including the results of animal toxicology studies or other human studies as appropriate. Annual reports to the IND should serve as the focus for reporting the status of studies being conducted under the IND and should update the general investigational plan for the coming year. To aid communication and minimize paperwork, information and data in IND's should, with some exceptions, be submitted only in summary form.

(d) The IND format set forth in § 312.23 should be followed routinely by sponsors in the interest of fostering an efficient review of applications. Sponsors are expected to exercise considerable discretion, however, regarding the contest of information submitted in each section, depending upon the kind of drug being studied and the nature of the available information. Section 312.23 outlines the information needed for a commercially sponsored IND for a new molecular entity. A sponsor-investigator who uses, as a research tool, an investigational new drug that is already subject to a manufacturer's IND should follow the same general format, but ordinarily may refer to the manufacturer's IND in providing the technical information supporting the proposal clinical investigation. A sponsor-investigator who uses an investigational drug not subject to a manufacturer's IND is ordinarily required to submit all technical information supporting the IND, unless, such information may be referenced from the scientific literature.

§ 312.23 IND content and format.

(a) A sponsor who intends to conduct a clinical investigation subject to this part shall submit an "Investigational New Drug Application" (IND) including, in the following order:

(1) *Cover sheet (Form FDA–1571).* A cover sheet for the application containing the following:

(i) The name, address, and telephone number of the sponsor, the date of the application, and the name of the investigational new drug.

(ii) Identification of the phase or phases of the clinical investigation to be conducted.

(iii) A commitment not to begin clinical investigations until an IND covering the investigations is in effect.

(iv) A commitment that an Institutional Review Board (IRB) that complies with the requirements set forth in Part 56 will be responsible for the initial and continuing review and approval of each of the studies in the proposed clincial investigation, that investigators will report to the IRB all proposed changes in the research activity and all unanticipated problems involving risks to human subjects or others, and that investigators will not make any deviations from the research plan without IRB approval, except where necessary to eliminate apparent immediate hazard to human subjects.

(v) A commitment to conduct the investigation in accordance with all other applicable regulatory requirements.

(vi) The name and title of the person responsible for monitoring the conduct and progress of the clinical investigations.

(vii) If the sponsor is not a sponsor-investigator, the name and title of the individual responsible for evaluating adverse reactions or other evidence of risk when such information is received from the clinical investigators.

(vii) The signature of the sponsor or the sponsor's authorized representative. If the person signing the application does not reside or have a place of business within the United States, the IND is required to contain the name and address of, and be countersigned by, an attorney, agent, or other authorized official who resides or maintains a place of business within the United States.

(2) *A table of contents.*

(3) *Introductory statement.* (i) A brief introductory statement giving the name of the drug and all active ingredients, the drug's pharmacological class, the structural formula of the drug (if known), the formulation of the dosage form(s) to be used, the route of administration, and the broad objectives and planned duration of the proposed clinical investigation(s).

(ii) A brief summary of previous human experience with the drug, with reference to other IND's if pertinent, and to investigational or marketing experience in other countries that may be relevent to the safety of the proposed clinical investigation(s).

(iii) If the drug has been withdrawn from investigation or marketing in any country for any reason related to safety or effectiveness, identification of the country(ies) where the drug was withdrawn and the reasons for the withdrawal.

(4) *General investigational plan.* A brief description of the overall plan for investigating the drug product, including: (i) The rationale for the drug or the research study; (ii) the indication(s) to be studied; (iii) the general approach to be followed in evaluating the drug; (iv) the kinds of clinical trials to be conducted in the first year following the

submission; (v) the estimated number of patients to be given the drug in those studies, and (vi) any special risks anticipated on the basis of the toxicological data in animals or prior studies in humans with the drug or related drugs.

(5) *Investigator's brochure.* If required under § 312.55, a copy of the investigator's brochure, containing the following information.

(i) A brief description of the drug substance and the formulation, including the structural formula, if known.

(ii) A summary of the pharmacological and toxicological effects of the drug in animals and, to the extent know, in humans.

(iii) A summary of the pharmacokinetics and biological disposition of the drug in animals and, if known, in humans.

(iv) A summary of information relating to safety and effectiveness in humans obtained from prior clinical studies. (Reprints of published articles on such studies may be appended when useful.)

(v) A description of possible risks and side effects to be anticipated on the basis of prior experience with the drug under investigation or with related drugs, and of precautions or special monitoring to be done as part of the investigational use of the drug.

(6) *Protocols.* (i) A protocol for each planned study. In general, protocols for Phase 1 studies may be less detailed and more flexible than protocols for Phase 2 and 3 studies. Phase 1 protocols should be directed primarily at providing an outline of the investigation—an estimate of the number of patients to be involved, a description of safety exclusions, and a description of the dosing plan including duration, dose, or method to be used in determining dose—and should specify in detail only those elements of the study that are critical to safety, such as necessary monitoring of vital signs and blood chemistries. Modifications of the experimental design of Phase 1 studies that do not affect critical safety assignments are required to be reported to FDA only in the annual report.

(ii) In Phases 2 and 3, detailed protocols describing all aspects of the study should be submitted. A protocol for a Phase 2 or 3 investigation should be designed in such a way that, if the sponsor anticipates that some deviation from the study design may become necessary as the investigation progresses, alternatives or contingencies to provide for such deviation are built into the protocols at the outset. For example, a protocol for a controlled short-term study might include a plan for an early crossover of nonresponders to an alternative therapy.

(iii) A protocol is required to contain the following, with the specific elements and detail of the protocol reflecting the above distinctions depending on the phase of study:

(*a*) A statement of the objectives and purpose of the study.

(*b*) The name and address and curriculum vitae of each investigator, and the name of each subinvestigator (e.g., research fellow, resident) working under the supervision of the investigators; the name and address of the research facilities to be used; and the name and address of each reviewing Institutional Review Board.

(*c*) The criteria for patient selection and for exclusion of patients and an estimate of the number of patients to be studied.

(*d*) A description of the design of the study, including the kind of control group to be used, if any, and a description of methods to be used to minimize bias on the part of subjects, investigators, and analysts.

(*e*) The method for determining the dose(s) to be administered, the planned maximum dosage, and the duration of individual patient exposure to the drug.

(*f*) A description of the observations and measurements to be made to fulfill the objectives of the study.

(*g*) A description of clinical procedures, laboratory tests, or other measures to be taken to monitor the effects of the drug in human subjects and to minimize risk.

(7) *Chemistry, manufacturing, and control information.* (i) As appropriate for the particular investigations covered by the IND, a section describing the composition, manufacture, and control of the drug substance and the drug product. Although in each phase of the investigation sufficient information is required to be submitted to assure the proper identification, quality, purity, and strength of the investigational drug, the amount of information needed to make that assurance will vary with the phase of the investigation, the proposed duration of the investigation, the dosage form, and the amount of information otherwise available. FDA recognizes that modifications to the method of preparation of the new drug substance and dosage form and changes in the dosage form itself are likely as the investigation progresses. Therefore, the emphasis in an initial Phase 1 submission should generally be placed on the identification and control of the raw materials and the new drug substance. Final specifications for the drug substance and drug product are not expected until the end of the investigational process.

(ii) It should be emphasized that the amount of information to be submitted depends upon the scope of the proposed clinical investigation. For example, although stability data are required in all phases of the IND to demonstrate that the new drug substance and drug product are within acceptable chemical and physical limits for the planned duration of the proposed clinical investigation, if very short-term tests are proposed, the supporting stability data can be correspondingly limited.

(iii) As drug development proceeds and as the scale of production is changed from the pilot-scale production appropriate for the limited initial clinical investigations to the larger-scale production needed for expanded clinical trials, the sponsor should submit information amendments to supplement the initial information submitted on the manufacturing and control processes with information appropriate to the expanded scope of the investigation.

(iv) Reflecting the distinctions described in this paragraph (a)(7), and based on the phase(s) to be studied, the submission is required to contain the following:

(*a*) *Drug substance.* A description of the drug substance, including its physical, chemical, or biological characteristics; the name and address of its manufacturer; the general method of preparation of the drug substance; the acceptable limits and analytical methods used to assure the identity, potency, quality, and purity of the drug substance; and information sufficient to support stability of the drug substance during the toxicological studies and the planned clinical studies. Reference to the current edition of the U.S. Pharmacopeia and the National Formulary may be made to satisfy relevant requirements in this paragraph.

(*b*) *Drug product.* A list of all components, whic may include reasonable alternates for inactive compounds, used in the manufacture of the investigational drug product, including both those components intended to appear in the drug product and those which may not appear but which are used in the manufacturing process, and, where applicable, the quantitative composition of the investigational drug product, including any reasonable variations that may be expected during the investigational stage; the name and address of the drug product manufacturer; a brief general description of the manufacturing and packaging procedure as appropriate for the product; the acceptable limits and analytical methods used to assure the identity, strength, quality, and purity of

the drug product; and information sufficient to assure the product's stability during the planned clinical studies. Reference to the current edition of the U.S. Pharmacopeia and the National Formulary may be made to satisfy relevant requirements in this paragraph.

(c) *Labeling.* A copy of all labels and labeling to be provided to each investigator.

(d) *Environmental impact analysis report.* If requestd by FDA, environmental impact analysis report under § 25.1 analyzing the environmental impact of the manufacturing process and the ultimate use of the drug product.

(8) *Pharmacology and toxicology information.* Adequate information about pharmacological and toxicological studies of the drug involving laboratory animals or in vitro, on the basis of which the sponsor has concluded that it is reasonably safe to conduct the proposed clinical investigations. The kind, duration, and scope of animal and other tests required varies with the duration and nature of the proposed clinical investigations. Guidelines are available from FDA that describe ways in which these requirements may be met. Such information is required to include the identification and qualifications of the individuals who evaluated the results of such studies and concluded that it is reasonably safe to begin the proposed investigations and a statement of where the investigations were conducted and where the records are available for inspection. As drug development proceeds, the sponsor is required to submit informational amendments, as appropriate, with additional information pertinent to safety.

(i) *Pharmacology and drug disposition.* A section describing the pharmacological effects and mechanism(s) of action of the drug in animals, and information on the absorption, distribution, metabolism, and excretion of the drug, if known.

(ii) *Toxicology. (a)* An integrated summary of the toxicological effects of the drug in animals and in vitro. Depending on the nature of the drug and the phase of the investigation, the description is to include the results of acute, subacute, and chronic toxicity tests; tests of the drug's effects on reproduction and the developing fetus; any special toxicity test related to the drug's particular mode of administration or conditions of use (e.g., inhalation, dermal, or ocular toxicology); and any in vitro studies intended to evaluate drug toxicity.

(b) For each toxicology study that is intended primarily to support the safety of the proposed clinical investigation, a full tabulation of data suitable for detailed review.

(iii) For each toxicology study submitted to support the safety of a proposed clinical study that was not conducted in compliance with Part 58 relating to good laboratory practices, a description of each difference between the practices used in the study and those required under Part 58.

(9) *Previous human experience with the investigational drug.* A summary of previous human experience, if any, with the investigational drug. The information is required to include the following:

(i) If the investigational drug has been investigated or marketed previously, either in the United States or other countries, detailed information about such experience that is relevant to the safety of the proposed investigation or to the investigation's rationale. If the drug has been the subject of controlled trials, detailed information on such trials that is relevant to an assessment of the drug's effectiveness for the proposed investigational use(s) should also be provided. Any published material that is relevant to the safety of the proposed investigation or to an assessment of the drug's effectiveness for its proposed investigational use should be provided in full. Published material that is less directly relevant may be supplied by a bibliography.

(ii) If the drug is a combination of drugs previously investigated or marketed, the information required under paragraph (a)(9)(i) of this section should be provided for each component.

(iii) If the drug has been marketed outside the United States, a list of the countries in which the drug has been marketed and a list of the countries in which the drug has been withdrawn from marketing for reasons potentially related to safety or effectiveness.

(10) *Additional information.* In certain applications, as described below, information on special topics may be needed. Such information shall be submitted in this section as follows:

(i) *Drug dependence and abuse potential.* If the drug is a psychotropic substance or otherwise has abuse potential, a section describing relevant clinical studies and experience and studies in test animals.

(ii) *Radioactive drugs.* If the drug is a radioactive drug, sufficient data from animal or human studies to allow a reasonable calculation of radiation-absorbed dose to the whole body and critical organs upon administration to a human subject. Phase 1 studies of radioactive drugs must include studies which will obtain sufficient data for dosimetry calculations.

(iii) *Other information.* A brief statement on any other information that would aid evaluation of the proposed clinical investigations with respect to their safety or their design and potential as controlled clinical trials to support marketing of the drug.

(11) If requested by FDA, any other relevant information needed for review of the application.

(b) *Information previously submitted.* The sponsor ordinarily is not required to resubmit information previously submitted, but may incorporate the information by reference. A reference to information submitted previously must identify the file by name, reference number, volume, and page number where the information can be found. A reference to information submitted to the agency by a person other than the sponsor is required to contain a written statement that authorizes the reference and that is signed by the person who submitted the information.

(c) *Material in a foreign language.* The sponsor shall submit an accurate and complete English translation of each part of the IND that is not in English. The sponsor shall also submit a copy of each original literature publication for which an English translation is submitted.

(d) *Number of copies.* The sponsor shall submit an original and two copies of all submissions to the IND file, including the original submission and all amendments and reports.

§ 312.30 Protocol amendments.

Once an IND is in effect, a sponsor shall amend it as needed to ensure that the clinical investigations are conducted according to protocols included in the application. This section sets forth the provisions under which new protocols may be submitted and changes in previously submitted protocols may be made.

(a) *New protocol.* Whenever a sponsor intends to conduct a study that is not covered by a protocol already contained in the IND, the sponsor shall submit to the IND a protocol amendment containing the protocol for the study. Such study may begin provided two conditions are met: (1) The sponsor has submitted the protocol to FDA for its review; and (2) the protocol has been approved by the institutional review board (IRB) with responsibility for review and approval of the study in accordance with the requirements of Part 56. The sponsor may comply with these two conditions in either order.

(b) *Changes in a protocol.* A sponsor shall submit a protocol amendment describing any change in a Phase 1 protocol that significantly affects the safety of subjects or any change in a Phase 2 or 3 protocol that significantly affects the safety of subjects, the scope of the investigation, or the scientific quality of the study. Such change may be made after the sponsor has submitted the amendment to the IND following completion of review of the change by the IRB that is responsible for review and approval of the study that is the subject of the protocol. Examples of changes requiring an amendment under this paragraph include:

(1) Any increase in drug dosage or duration of exposure of individual subjects to the drug beyond that in the current protocol, or any significant increase in the number of subjects under study.

(2) Any significant change in the design of a protocol (such as the addition or dropping of a control group).

(3) The addition of a new test or procedure that is intended to improve monitoring for, or reduce the risk of, a side effect or adverse event; or the dropping of a test intended to monitor safety.

(c) *New investigator.* A sponsor shall submit a protocol amendment when a new investigator is added to carry out a previously submitted protocol, except that a protocol amendment is not required when a licensed practitioner is added in the case of a treatment protocol under § 312.34. The sponsor shall notify FDA of the new investigator within 30 days of the investigator being added.

(d) *Content and format.* A protocol amendment is required to be prominently identified as such (i.e., "Protocol Amendment: New Protocol", "Protocol Amendment: Change in Protocol", or "Protocol Amendment: New Investigator"), to be serially numbered, and to contain the following:

(1)(i) In the case of a new protocol, a copy of the new protocol and a description of how it differs from previous protocols.

(ii) In the case of a change in protocol, a brief description of the change and reference (date and number) to the submission that contained the protocol.

(iii) In the case of a new investigator, the investigator's name and qualifications to conduct the investigation.

(2) Reference to the specific information in the IND or in a concurrently submitted information amendment to the IND that the sponsor relies on to support the new or amended protocol. If the reference is made to supporting information already in the IND, the sponsor shall identify by name, reference number, volume, and page number the location of the information.

(3) If the sponsor desires FDA to comment on the submission, a request for such comment and the specific questions FDA's response should address.

(e) *When submitted.* A sponsor shall submit a protocol amendment for a new protocol or a change in protocol before its implementation. Protocol amendments to add a new investigator or to provide additional information about investigators may be grouped and submitted at 30-day intervals. When several submissions of new protocols or protocol changes are anticipated during a short period, the sponsor is encouraged, to the extent feasible, to include these all in a single submission.

§ 312.31 Information amendments.

(a) *Requirement for information amendment.* A sponsor shall report in an information amendment essential information on the IND that is not within the scope of a protocol amendment, IND safety reports, or annual report. Examples of information requiring an information amendment include:

(1) New toxicology, chemistry, or other technical information; or

(2) A report regarding the discontinuance of a clinical investigation.

(b) *Content and format of an information amendment.* An information amendment is required to bear prominent identification of its contents (eg., "Information Amendment: Chemistry, Manufacturing, and Control"), to be numbered serially by discipline, and to contain the following:

(1) A statement of the nature and purpose of the amendment.

(2) An organized submission of the data in a format appropriate for scientific review.

(3) If the sponsor desires FDA to comment on an information amendment, a request for such comment.

(c) *When submitted.* Information amendments to the IND should be submitted as necessary but, to the extent feasible, not more often than every 30 days.

§ 312.12 IND safety reports.

(a) *Review of safety information.* The sponsor shall immediately review all information relevant to the safety or the drug obtained or otherwise received by the sponsor from any source, foreign or domestic, including information derived from clinical investigations, animal investigations, commercial marketing experience, reports in the scientific literature, and unpublished scientific papers. For purposes of this paragraph, "information relevant to the safety of the drug" includes information about related drugs.

(b) *IND safety reports.* (1) The sponsor shall notify FDA and all participating investigators in an IND safety report of the following:

(i) Any serious adverse experiences or other information associated with the use of the drug not previously reported (in nature, severity, or incidence) that may suggest significant hazards, contraindications, side effects, or precautions. Such notification shall be made as soon as possible and in no event later than 10 working days after the sponsor's initial receipt of the information;

(ii) Any fatal or life-threatening clinical experiences associated with the use of the drug not previously reported (in nature, severity, or incidence). Such notification shall be made as soon possible and in no event later than 3 working days after the sponsor's initial receipt of the report.

(iii) For purposes of this paragraph, "associated with the use of the drug" means there is a reasonable possibility that the event may have been caused by the drug.

(2) The sponsor shall transmit each IND safety report by telephone within the time frames specified in paragraph (b)(1) of this section and shall concurrently submit a written notification. Each written notification shall bear prominent indentification of its contents, i.e., "10-Day IND Safety Report" or "3-Day IND Safety Report." Each written notification and telephone call to FDA shall be transmitted to the FDA division with responsibility for review of the IND.

(c) *Followup.* The sponsor shall promptly investigate all safety information received by it. Followup information to 3-day and 10-day reports shall be submitted promptly in an information amendment, as soon as the relevant information is available. Results of sponsor's investigation of other safety information shall be submitted, as appropriate, in an information amendment or annual report.

§ 312.33 Annual reports.

A sponsor shall submit, at intervals of 1 year after the date of submission of the IND, a brief report on the progress of the investigation containing the following:

(a) A brief summary of the status of each of the clinical studies in progress,

including the name of the investigator and the approximate number of patients under study.

(b) A brief summary of information obtained during the previous year's clinical and nonclinical investigations that is relevant to assessing the drug's safety, including: (1) A summary of all IND safety reports submitted during the past year in accordance with § 312.32; (2) a list of subjects who died during participation in an investigation, with the cause of death for each subject; and (3) a list of subjects who dropped out of an ongoing investigation.

(c) A description of the general investigational plan for the coming year to replace that submitted 1 year earlier. The general investigational plan shall contain the information required under § 312.23(a)(4).

(d) If the investigator brochure has been revised, a description of the revision and a copy of the new brochure.

(e) A description of any significant Phase 1 protocol modifications made during the previous year and not previously reported to the IND in a protocol amendment.

(f) A brief summary of significant foreign marketing developments with the drug during the past year, such as approval for marketing in any country or withdrawal from marketing in any country.

(g) If desired by the sponsor, a log of any outstanding business with respect to the IND for which the sponsor requests or expects a reply, comment, or meeting.

§ 312.34 Treatment use of an investigational new drug.

(a) *General.* A drug that is not approved for marketing may be under clinical investigation for a serious disease condition in patients for whom no satisfactory alternative drug or other therapy is available. During the clinical investigation of the drug, it may be appropriate to use the drug in the treatment of patients after sufficient evidence of the drug's safety and effectiveness has been obtained to warrant such use. Ordinarily, a drug may be made available for treatment under this section only after Phase 2 investigations have been completed, but FDA may permit such use earlier in the investigational process if compelling circumstances warrant. Administration of an investigational drug under this section serves both to provide treatment and the investigational purpose of gathering additional data on the drug's safety and effectiveness.

(b) *Treatment protocol submitted by IND sponsor.* A sponsor of a clinical investigation of a drug who intends to sponsor a treatment use for the drug under this section shall submit to FDA a treatment protocol. A treatment use under a treatment protocol may begin 30 days after FDA receives the protocol or on earlier notification by FDA that the treatment use described in the protocol may begin.

(1) A treatment protocol is required to contain the following:

(i) The intended use of the drug.

(ii) An explanation of the rationale for use of the drug, including, as appropriate, either a list of what available regimens ordinarily should be tried before using the investigational drug or an explanation of why the use of the investigational drug is preferable to the use of available marketed treatments.

(iii) A brief description of the criteria for patient selection.

(iv) The method of administration of the drug and the dosages to be used.

(v) A description of clinical procedures, laboratory tests, or other measures to be taken to monitor the effects of the drug and to minimize risk.

(2) A treatment protocol is required to be supported by the following information:

(i) A copy of the informational brochure that is to be supplied to each treating physician.

(ii) The technical information that is relevant to determining the safety and effectiveness of the drug for the intended treatment purpose. Information that is already contained in the sponsor's IND may be incorporated by reference.

(iii) If a waiver from IRB review an approval requirements is desired, a request for the waiver. (FDA may on its own initiative waive IRB review under Part 56 if it finds such review unnecessary for the protection of subjects to be treated.)

(c)(1) *Treatment IND submitted by licensed practitioner.* If a sponsor of a clinical investigation of a drug has not established a treatment protocol for the drug under paragraph (b) of this section, but the drug is being investigated by the sponsor under an effective IND, a licensed medical practitioner may seek to obtain the drug from such sponsor and submit a treatment IND to FDA requesting authorization to use the investigational drug for treatment use. A treatment use under a treatment IND may begin 30 days after FDA receives the IND or on earlier notification by FDA that the treatment use under the IND may begin. A treatment IND is required to contain the following:

(i) A cover sheet (Form FDA–1571) meeting the requirements of § 312.23(a)(1).

(ii) Information on the drug's chemistry, manufacturing, and control, and prior clinical and nonclinical experience with the drug submitted in accordance with the requirements of § 312.23. The provision of an investigational drug to a licensed medical practitioner by a sponsor of a separate clinical investigation that is subject to an IND shall be deemed to authorize the incorporation by reference of the technical information contained in the sponsor's IND into the medical practitioner's treatment IND.

(iii) A treatment protocol containing the following:

(*a*) The intended use of the drug.

(*b*) An explanation of the rationale for use of the drug, including, as appropriate, an explanation of the regimens that have perviously been tried or why use of the investigational drug is preferable to the use of available marketed treatments.

(*c*) A brief description of the criteria for patient selection.

(*d*) The method of administration of the drug and the dosages to be used.

(*e*) A description of clinical procedures, laboratory tests, or other measures to be taken to monitor the effects of the drug and minimize risks.

(iv) If a waiver from IRB review and approval requirements is desired, a request for the waiver. (FDA may on its own initiative waive IRB review requirements under Part 56, if it finds such review unnecessary for protection of subjects to be treated.)

(v) A statement of the practitioner's qualifications to use the investigational drug for the intended treatment use.

(vi) A statement that the practitioner has read or is otherwise familiar with information on the drug's safety and effectiveness derived from previous clinical and nonclinical experience with the drug.

(vii) A commitment to report to FDA adverse drug effects in accordance with § 312.56(c).

(2) A licensed practitioner who submits a treatment IND under this section is the sponsor-investigator for such IND and is responsible for meeting all applicable sponsor and investigator responsibilities under this part and Parts 50, 52, 54, and 56.

(d) *Criteria.* FDA may permit an investigational drug to be used for a treatment use under a treatment protocol or treatment IND unless it finds one of the following:

(1) The application does not fall within the terms of this section as it does not involve the treatment use of an investigational new drug intended for a serious disease condition in patients for

whom no satisfactory alternative drug or other therapy is available.

(2) The potential risks outweigh the potential benefits of the drug in the treatment of patients.

(3) There is not sufficient evidence of the drug's safety and effectiveness to justify its intended treatment use.

(e) *Agency assistance.* FDA will provide assistance to persons interested in submitting an application under this section.

§ 312.36 Emergency use of an investigational new drug.

Need for an investigational drug may arise in an emergency situation that does not allow time for submission of an IND in accordance with § 312.23. In such a case, FDA may authorize shipment of the drug for a specified use in advance of submission of an IND. A request for such authorization may be transmitted to FDA by telephone or other rapid communication means. Except in extraordinary circumstances, such authorization will be conditioned on the sponsor making an appropriate IND submission as soon as practicable after receiving the authorization.

§ 312.38 Withdrawal of an IND.

(a) At any time a sponsor may withdraw an effective IND without prejudice.

(b) If an IND is withdrawn, FDA shall be so notified, all clinical investigations conducted under the IND shall be ended, all current investigators notified, and all stocks of the drug returned or otherwise disposed of in accordance with the requirements of Part 52.

(c) If an IND is withdrawn because of a safety reason, the sponsor shall promptly so inform FDA, all participating investigators, and all reviewing Institutional Review Boards, together with the reasons for such withdrawal.

Subpart C—Administrative Actions

§ 312.40 General requirements for use of an investigational new drug in a clinical investigation.

(a) An investigational new drug may be used in a clinical investigation if the following conditions are met:

(1) The sponsor of the investigation submits an IND for the drug to FDA; the IND is in effect under paragraph (b) of this section; and the sponsor complies with all applicable requirements in this part and Parts 50, 52, 54, and 56 with respect to the conduct of the clinical investigations, and

(2) Each participating investigator conducts his or her investigation in compliance with the requirements of this part and Parts 50, 54, and 56.

(b) An IND goes into effect

(1) 30 days after FDA receives the IND, unless FDA notifies the sponsor that the investigations described in the IND are subject to a clinical hold under § 312.42, or

(2) on earlier notification by FDA that the clinical investigations in the IND may begin. FDA will notify the sponsor in writing of the date it receives the IND.

(c) A sponsor may ship an investigational new drug to investigators named in the IND:

(1) 30 days after FDA receives the IND; or

(2) on earlier FDA authorization to ship the drug.

Investigators may not, however, administer the investigational new drug to human subjects until the IND goes into effect under paragraph (b) of this section.

§ 312.41 Comment and advice on an IND.

(a) FDA may at any time during the course of the investigation communicate with the sponsor orally or in writing about deficiencies in the IND or about FDA's need for more data or information.

(b) On the sponsor's request, FDA will provide advice on specific matters relating to an IND. Such advice may include, for example, advice on the adequacy of technical data to support an investigational plan, on the design of a clinical trial, or on whether proposed investigations are likely to produce the data and information that is needed to meet requirements for a marketing application.

(c) FDA communications with a sponsor under this section are solely advisory and do not require any modification in the planned or ongoing clinical investigations or response to the agency, unless the communication is accompanied by a clinical hold order under § 312.42.

§ 312.42 Clinical holds and requests for modification.

(a) *General.* A clinical hold is an order issued by FDA to the sponsor to delay a proposed clinical investigation or to suspend an ongoing investigation. The clinical hold order may apply to one or more of the investigations covered by an IND. When a proposed study is placed on clinical hold, subjects may not be given the investigational drug by the clinical investigator conducting the study. When an ongoing study is placed on clinical hold, no new subjects may be recruited to the study and placed on the investigational drug; patients already in the study should be taken off therapy under the protocol unless specifically permitted by FDA in the interest of patient safety.

(b) *Grounds for imposition of clinical hold.*—(1) *Clinical hold of a Phase 1 study under an IND.* FDA may place a proposed or ongoing Phase 1 investigation on clinical hold if it finds that:

(i) Human subjects are or would be exposed to an unreasonable and significant risk of illness or injury;

(ii) The clinical investigators named in the IND are not qualified by reason of their scientific training and experience to conduct the investigation described in the IND;

(iii) The investigator brochure is misleading, erroneous, or materially incomplete; or

(iv) The IND does not contain sufficient information required under § 312.23 to assess the risks to subjects of the proposed studies.

(2) *Clinical hold of a Phase 2 or 3 study under an IND.* FDA may place a proposed or onging Phase 2 or 3 investigation on clinical hold if it finds that:

(i) Any of the conditions in paragraph (b)(1)(i) through (iv) of this section apply, or;

(ii) The plan or protocol for the investigation is clearly deficient in design to meet its stated objectives.

(c) *Discussion of deficiency.* Whenever FDA concludes that a deficiency exists in a clinical investigation that may be grounds for the imposition of a clinical hold, FDA will, before issuing the clinical hold order, attempt to discuss and satisfactorily resolve the matter with the sponsor.

(d) *Imposition of clinical hold.* The initial clinical hold order may be made by telephone or other means of rapid communication or in writing. The clinical hold order shall be made by or on behalf of the Division Director with responsibility for review of the IND. Within 15 days of the imposition of the clinical hold, the Division Director will provide the sponsor a written explanation of the basis for the hold.

(e) *Resumption of clinical investigations.* If, by the terms of the clinical hold order, resumption of the affected investigation is permitted without prior notification by FDA once a stated correction or modification is made, the investigation may proceed as soon as the correction or modification is made. In all other cases, an investigation may only resume after the Division Director with responsibility for review of the IND has notified the sponsor that the investigation may proceed. In these cases the Division

Director will authorize resumption of the affected investigation(s) when the sponsor corrects the deficiency(ies) previously cited by the Division Director or otherwise satisfies the Division Director that the investigation(s) can proceed.

(f) *Appeal.* If the sponsor disagrees with the reasons cited for the clinical hold, the sponsor may request reconsideration of the decision in accordance with § 312.48.

(g) *Conversion of IND on clinical hold to inactive status.* If all investigations covered by an IND remain on clinical hold for 1 year or more, the IND may be placed on inactive status by FDA under § 312.45.

§ 312.44 Termination.

(a) *General.* This section describes the procedures under which FDA may terminate an IND. If an IND is terminated, the sponsor shall end all clinical investigations conducted under the IND and recall or otherwise provide for the disposition of all unused supplies of the drug. A termination action may be based on deficiencies in the IND or in the conduct of an investigation under an IND. Except as provided in paragraph (d) of this section, a termination shall be preceded by a proposal to terminate by FDA and an opportunity for the sponsor to respond. FDA will, in general, only initiate an action under this section after first attempting to resolve differences informally or, when appropriate, through the clinical hold procedures described in § 312.42.

(b) *Grounds for termination.*—(1) *Phase 1.* FDA may propose to terminate a Phase 1 IND if it finds that:

. (i) Human subjects would be exposed to an unreasonable and significant risk of illness or injury.

(ii) The IND does not contain sufficient information required under § 312.23 to assess the safety to subjects of the clinical investigations.

(iii) The methods, facilities, and controls used for the manufacturing, processing, and packing of the investigational drug are inadequate to establish and maintain appropriate standards of identity, strength, quality and purity as needed for subject safety.

(iv) The clinical investigations are not being conducted in accordance with the plan or protocols submitted in the IND.

(v) The drug is being promoted or distributed for commercial purposes not justified by the requirements of the investigation or permitted by § 312.7.

(vi) The IND, or any amendment or report to the IND, contains an untrue statement of a material fact or omits material information required by this part.

(vii) The sponsor fails promptly to investigate and inform the Food and Drug Administration and all investigators of newly found serious or potentially serious hazards, contraindications, side effects, and precautions pertinent to the safety of the new drug or fails to make any other report required under this part.

(viii) The sponsor fails to submit an accurate annual report of the investigations in acordance with § 312.33.

(ix) The sponsor fails to comply with any other applicable requirement of this part or Part 50, 52, 54, or 56.

(x) The IND has remained on inactive status for 5 years or more.

(2) *Phase 2 or 3.* FDA may propose to terminate an IND during Phase 2 or Phase 3 if FDA finds that:

(i) Any of the conditions in paragraph (b)(1)(i) thorugh (x) of this section apply; or

(ii) The investigational plan or protocol(s) is not reasonable as a bona fide scientific plan to determine whether or not the drug is safe and effective for use; or

(iii) There is convincing evidence that the drug is effective for the purpose for which it is being investigated.

(c) *Opportunity for sponsor response.* (1) If FDA proposes to terminate an IND, FDA will notify the sponsor in writing, and invite correction or explanation within a period of 30 days.

(2) On such notification, the sponsor may provide a written explanation or correction or may request a conference with FDA to provide the requested explanation or correction. If the sponsor does not respond to the notification within the allocated time, the IND shall be terminated.

(3) If the sponsor responds but FDA does not accept the explanation or correction submitted, FDA shall inform the sponsor in writing of the reason for the nonacceptance and provide the sponsor with an opportunity for a regulatory hearing before FDA Under Part 16 on the question of whether the IND should be terminated. The sponsor's request for a regulatory hearing must be made within 10 days of the sponsor's receipt of FDA's notification of nonacceptance.

(d) *Immediate termination of IND.* Notwithstanding paragraphs (a) through (c) of this section, if at any time FDA concludes that continuation of the investigation presents a significant danger to the public health, the agency shall immediately, by written notice to the sponsor from the Director of the National Center for Drugs and Biologics, terminate the IND. An IND so terminated is subject to reinstatement by the Director on the basis of additional submissions that eliminate such danger. If an IND is terminated under this paragraph, the agency will afford the sponsor an opportunity for a regulatory hearing under Part 16 on the question of whether the IND should be reinstated.

§ 312.45 Inactive status.

(a) If no subjects are entered into clinical studies for a period of 2 years or more under an IND, or if all investigations under an IND remain on clinical hold for 1 year or more, the IND may be placed by FDA on inactive status. This action may be taken by FDA either on request of the sponsor or on FDA's own initiative. If FDA seeks to act on its own initiative under this section, it shall first notify the sponsor in writing of the proposed inactive status. Upon receipt of such notification, the sponsor shall have 30 days to respond as to why the IND should continue to remain active.

(b) If an IND is placed on inactive status, all investigators shall be so notified and all stocks of the drug shall be returned or otherwise disposed of as described in Part 52.

(c) A sponsor is not required to submit annual reports to an IND on inactive status. An inactive IND is, however, still in effect for purposes of the public disclosure of data and information under § 312.130.

(d) A sponsor who intends to resume clinical investigation under an IND placed on inactive status shall submit a protocol amendment under § 312.30 containing the proposed general investigational plan for the coming year and appropriate protocols. If the protocol amendment relies on information previously submitted, the plan shall reference such information. Additional information supporting the proposed investigation, if any, shall be submitted in an information amendment Notwithstanding the provisions of § 312.30, clinical investigations under an IND on inactive status may only resume (1) 30 days after FDA receives the protocol amendment, unless FDA notifies the sponsor that the investigations described in the amendment are subject to a clinical hold under § 312.42, or (2) on earlier notification by FDA that the clinical investigations described in the protocol amendment may begin.

(e) An IND that remains on inactive status for 5 years or more may be terminated under § 312.44.

§ 312.47 Meetings.

(a) *General.* Meetings between a sponsor and the agency are frequently useful in resolving questions and issues raised during the course of a clinical investigation. FDA encourages such meetings to the extent that they aid evaluation of the drug and the solution of scientific problems concerning the drug and to the extent that FDA's resources permit. The general principle underlying the conduct of such meetings is that there should be free, full, and open communication about any scientific or medical question that may arise during the clinical investigation. These meetings shall be conducted and documented in accordance with Part 10.

(b) *"End-of-Phase 2" meetings and meetings held before submission of a marketing application.* At specific times during the drug investigation process, meetings between FDA and a sponsor can be especially helpful in minimizing wasteful expenditures of time and money and thus in speeding the drug development and evaluation process. In particular, FDA has found that meetings at the end of Phase 2 of an investigation (end-of-Phase 2 meetings) are of considerable assistance in planning later studies and that meetings held near completion of Phase 3 and before submission of a marketing application ("pre-NDA" meetings) are helpful in developing methods of presentation and submission of data in the marketing application that facilitate review and allow timely FDA response.

(1) *End-of-Phase 2 meetings.*—(i) *Purpose.* The purpose of an end-of-Phase 2 meeting is to determine the safety of proceeding to Phase 3, to evaluate the Phase 3 plan and protocols, and to identify any additional information necessary to support a marketing application for the uses under investigation.

(ii) *Eligibility for meeting.* The end-of-Phase 2 meeting is designed primarily for IND's involving new molecular entities or major new uses of marketed drugs. However, a sponsor of any IND may request and obtain an end-of-Phase 2 meeting.

(iii) *Timing.* To be most useful to the sponsor, end-of-Phase 2 meetings should be held before major commitments of effort and resources to specific Phase 3 tests are made. The scheduling of an end-of-Phase 2 meeting is not, however, intended to delay the transition of an investigation from Phase 2 to Phase 3.

(iv) *Advance information.* At least 1 month in advance of an end-of-Phase 2 meeting, the sponsor should submit background information on the sponsor's plan for Phase 3, including summaries of the Phase 1 and 2 investigations, the specific protocols for Phase 3 clinical studies, plans for any additional nonclinical studies, and, if available, tentative labeling for the drug. The recommended contents of such a submission are described more fully in an FDA Staff Manual Guide (NCDB 4850.6) that is publicly available under FDA's public information regulations in Part 20.

(v) *Conduct of meeting.* Arrangements for an end-of-Phase 2 meeting are to be made with the division responsible for review on the IND. The meeting will be scheduled by FDA at a time convenient to both FDA and the sponsor. Both the sponsor and FDA may bring consultants to the meeting. The meeting should be directed primarily at establishing agreement between FDA and the sponsor of the overall plan for Phase 3 and the objectives and design of particular studies. The adequacy of technical information to support Phase 3 studies and/or a marketing application may also be discussed. Agreements reached at the meeting on these matters will be recorded in minutes of the conference that will be taken by FDA in accordance with § 10.65 and provided to the sponsor. The minutes along with any other written material provided to the sponsor will serve as a permanent record of any agreements reached. Barring a significant scientific development that requires otherwise, studies conducted in accordance with the agreement shall be presumed to be sufficient in objective and design for the purpose of obtaining marketing approval for the drug.

(2) *"Pre-NDA" meetings.* FDA has found that delays associated with the initial review of a marketing application may be reduced by exchanges of information about a proposed marketing application. The primary purpose of this kind of exchange is to acquaint FDA reviewers with the general information to be submitted in the marketing application, to uncover any major unresolved problems, to identify those studies that the sponsor is relying on as adequate and well-controlled to establish the drug's effectiveness, to discuss appropriate methods for statistical analysis of the data, and to discuss the best approach to the presentation and formatting of data in the marketing application. Arrangements for such a meeting are to be made by the sponsor with the division responsible for review of the IND. To permit FDA to provide the sponsor with the most useful advice on preparing a marketing application, the sponsor should submit to FDA's reviewing division at least 1 month in advance of the meeting the following information:

(i) A brief summary of the clinical studies to be submitted in the application.

(ii) A Proposed format for organizing the submission, including methods for presenting the data.

§ 312.48 Request for reconsideration or clarification of technical requirements or informal opinions.

FDA is committed to resolving differences between sponsors and FDA reviewing divisions with respect to IND's as quickly and amicably as possible through the cooperative exchange of information and views. That exchange may take place through written correspondence, telephone conversations, or informal meetings. In addition, FDA has established administratively a specific procedure under which a sponsor may ask the agency to reconsider or clarify an agency action or an informal opinion expressed to a sponsor by an agency employee with respect to an IND. Examples of issues contemplated for resolution under the procedure include requests by FDA for specific studies or information, requests to modify or delay a study, and unfavorable responses by FDA to requests from sponsors for waivers or special technical approaches to a scientific problem. The procedure will be marked by the sponsor's submission of a written request for reconsideration of clarification to the division that is responsible for reviewing the application, the division's prompt response to the applicant, and, if the division's response is not acceptable to the applicant, automatic review of the issue by managment to the National Center for Drugs and Biologics. FDA will attempt to issue a final decision within 60 days of the applicant's request. This procedure is described more fully in an FDA Staff Manual Guide (NCDB 4820.5) that is publicly available under FDA's public information regulations in Part 20.

Subpart D—Responsibilities of Sponsors and Investigators

§ 312.50 General responsibilities of sponsors.

Sponsors are responsible for selecting qualified investigators, providing them with the information they need to conduct an investigation properly, ensuring proper monitoring of the investigation(s), ensuring that the investigation(s) is conducted in accordance with the general investigational plan and protocols contained in the IND, maintaining an effective IND with respect to the

investigations, and ensuring that FDA and all participating investigators are promptly informed of significant new adverse effects or risks with respect to the drug. Additional specific responsibilities of sponsors are described elsewhere in this part and in Part 52.

§ 312.53 Selecting investigators and monitors.

(a) *Selecting investigators.* A sponsor shall select only investigators qualified by training and experience as appropriate experts to investigate the drug.

(b) *Control of drug.* A sponsor shall ship investigational new drugs only to investigators participating in the investigation.

(c) *Obtaining information from the investigator.* The sponsor shall obtain from each clinical investigator the following:

(1) A signed investigator statement (Form FDA–1572) containing:

(i) The name and address of the investigator;

(ii) The name and code number, if any, of the protocol(s) in the IND identifying the study(ies) to be conducted by the investigator.

(iii) The name and address of any medical school, hospital, or other research facility where the clinical investigation(s) will be condicted;

(iv) The name and address of any clinical laboratory facilities to be used in the study;

(v) The name and address of the IRB that is responsible for review and approval of the study(ies);

(vi) A commitment by the investigator that he or she—

(*a*) Will conduct the study(ies) in accordance with the relevant, current protocol(s) and will only make changes in a protocol after consultation with the sponsor;

(*b*) Will comply with all requirements of Part 54 regarding the obligations of clinical investigators and all other pertinent requirements in this part;

(*c*) Will personally conduct or supervise the described investigation(s);

(*d*) Will ensure that the requirements relating to obtaining informed consent and institutional review board review and approval are met;

(*e*) Will report to the sponsor immediately any unsuspected or serious side effects that occur in the course of the investigation(s);

(*f*) Has read and understands the information in the investigator's brochure, including the potential risks and side effects of the drug; and

(*g*) Will ensure that all associated, colleagues, and employees assisting in the conduct of the study(ies) are informed about their obligations in meeting the above commitments.

(vii) A list of the names of the subinvestigators (e.g., research fellows, residents, colleagues) who will be assisting the investigator in the conduct of the investigation(s).

(2) *Curriculum vitae.* A curriculum vitae for the investigator showing the education, training, and experience that qualifies the investigator as an expert in the clinical investigation of the drug for the use under investigation.

(3) *Clinical plan.* (i) For Phase 1 investigations, a general outline of the planned investigation including the estimated duration of the study and the maximum number of subjects that will be involved.

(ii) For Phase 2 or 3 investigations, an outline of the plan of investigation including an approximation of the number of subjects to be treated with the drug and the number to be employed as controls, if any; the clinical uses to be investigated; characteristics of subjects by age, sex, and condition; the kind of clinical observations and laboratory tests to be conducted; the estimated duration of the study; and copies or a description of case report forms to be used.

(d) *Selecting monitors.* A sponsor shall select a monitor qualified by training and experience to monitor the investigation in accordance with this part and Part 52.

§ 312.55 Informing investigators.

(a) Before the investigation begins, a sponsor (other than a sponsor-investigator) shall give each participating clinical investigator an investigator brochure containing the information described in § 312.23(a)(5).

(b) The sponsor shall, as the overall investigational plan proceeds, keep each participating investigator informed of new observations discovered by or reported to the sponsor on the drug, particularly with respect to adverse effects and safe use. Such information may be distributed to investigators by means of periodically revised investigator brochures, reprints or published studies, reports or letters to clinical investigators, or other appropriate means. Important safety information should be relayed orally, but shall be followed as soon as practicable by a written communication.

§ 312.56 Monitoring investigations.

(a) A sponsor who discovers that an investigator is not complying with the signed agreement (Form FDA–1572), the general investigational plan, or the requirements of this part or other applicable parts shall promptly either secure compliance or discontinue shipments of the investigational new drug to the investigator and end the investigator's participation in the investigation. If the investigator's participation in the investigation is ended, the sponsor shall require that the investigator dispose of or return the investigational drug in accordance with the requirements of Part 52 and shall notify FDA.

(b) The sponsor shall monitor the progress of all clinical and nonclinical investigations and evaluate the evidence relating to the safety and effectiveness of the drug as it is obtained from the investigators. The sponsors shall make such reports to FDA regarding adverse drug experiences as are required under § 312.31.

(c) A sponsor who determines that safety information presents an unreasonable and significant risk to subjects shall discontinue those investigations that present the risk, notify FDA, all institutional review boards, and all investigators who have at any time participated in the investigation of the discontinuance, assure the disposition of all stocks of the drug outstanding as required by § 52.41, and furnish FDA with a full report of the sponsor's actions. The sponsor shall discontinue the investigation as soon as possible, and in no event later tha 5 working days after making the determination that the investigation should be discontinued. Upon request, FDA will confer with a sponsor on the need to discontinue an investigation.

§ 312.58 Inspection of sponsor's records and reports.

(a) Upon the request at reasonable times of a scientifically trained and properly authorized employee of FDA, the sponsor shall make available for inspection and copying the records and reports required to be maintained under this part and under other applicable parts of this chapter. Upon written request by FDA, the sponsor shall submit the records or reports (or copies of them) to FDA. The sponsor shall discontinue shipments of the drug to any investigator who has failed to maintain or make available records or reports of the investigation as required by this part or Part 54.

(b) If an investigational new drug is a substance listed in any schedule of the Controlled Substances Act (21 U.S.C. 801; 21 CFR 1308), records concerning shipment, delivery, receipt, and disposition of the drug, which are required to be kept under this part or other applicable parts of this chapter

shall, upon the request of a properly authorized employee of the Drug Enforcement Administration of the U.S. Department of Justice, be made available by the investigator or sponsor to whom the request is made, for inspection and copying.

§ 312.60 General responsibilities of investigators.

An investigator is responsible for ensuring that an investigation is conducted according to the signed investigator statement, the investigational plan and applicable regulations, for protecting the rights, safety, and welfare of subjects under the investigator's care and for the control of drugs under investigation. Specific responsibilities of clinical investigators are set forth in Parts 54 and 56.

§ 312.62 Investigator records and reports.

An investigator shall make such reports and maintain such records as are required in accordance with Part 54.

Subpart E—Miscellaneous

§ 312.63 Import and export requirements.

(a) *Imports.* An investigational new drug offered for import into the United States complies with the requirements of this part if it is subject to an effective IND under § 312.40 and either (1) the consignee in the United States is the sponsor of the IND or (2) the consignee is a qualified investigator named in the IND.

(b) *Exports.* An investigational new drug intended for export from the United States complies with the requirements of this part as follows:

(1) If an IND is in effect for the drug under § 312.40 and each person who receives the drug is an investigator named in the application; or

(2) If FDA authorizes shipment of the drug for use in clinical investigation. Authorization may be obtained as follows:

(i) Through submission to FDA of a written request from the person that seeks to export the drug. A request must provide adequate information about the drug to satisfy FDA that the drug is appropriate for the proposed investigational use in humans, that the drug will be used for investigational purposes only, and that the drug may be legally used by that consignee in the importing country for the proposed investigational use. The request shall specify the quantity of the drug to be shipped per shipment and the frequency of expected shipments. If FDA authorizes exportation under this subparagraph, the agency shall concurrently notify the government of the importing country of such authorization.

(ii) Through submission to FDA of a formal request from an authorized official of the government of the country to which the drug is proposed to be shipped. A request must specify that the foreign government has adequate information about the drug and the proposed investigational use, that the drug will be used for investigational purposes only, and that the foreign government is satisfied that the drug may legally be used by the intended consignee in that country.

(iii) Authorization to export an investigational drug under paragraph (b)(2) (i) or (ii) of this section may be revoked by FDA if the agency finds that the conditions underlying its authorization are no longer met.

(3) This paragraph applies only where the drug is to be used for the purpose of clinical investigation. Export of an investigational drug for commercial marketing or for use in routine medical practice is not permitted.

§ 312.120 Foreign clinical studies not conducted under an IND.

(a) *Introduction.* This section describes the criteria for acceptance by FDA of foreign clinical studies not conducted under an IND. In general, FDA accepts such studies provided they are well designed, well conducted, performed by qualified investigators, and conducted in accordance with ethical principles acceptable to the world community. Studies meeting these criteria may be utilized to support clinical investigations in the United States and/or marketing approval. Marketing approval of a new drug or antibiotic drug based solely on foreign clinical data is governed by § 314.106 (proposed in the **Federal Register** of October 19, 1982; 47 FR 46622, 46655).

(b) *Data submissions.* A sponsor who wishes to rely on a foreign clinical study to support a U.S. study in the IND shall submit to FDA the following information:

(1) A description of the investigator's qualification;

(2) A description of the research facilities;

(3) A detailed summary of the protocol and results of the study, and, should FDA request, case records maintained by the investigator or additional background data such as hospital or other institutional records;

(4) A description of the drug substance and drug product used in the study, including a description of components, formulation, specifications and bioavailability of the specific drug product used in the clinical study, if available; and

(5) If the study is intended to support the effectiveness of a drug product, information showing that the study is adequate and well controlled under § 314.126 (proposed in the **Federal Register** of October 19, 1982; 47 FR 46622, 46656).

(c) *Conformance with ethical principles.* (1) Foreign clinical research is required to have been conducted in accordance with the ethical principles stated in the "Declaration of Helsinki" (see paragraph (c)(5) of this section) or the laws and regulations of the country in which the research was conducted, whichever represents the greater protection of the individual.

(2) For each foreign clinical study submitted under this section, the sponsor shall explain how the research conformed to the ethical principles contained in the "Declaration of Helsinki" or the foreign country's standards, whichever were used. If the foreign country's standards were used, the sponsor shall explain in detail how those standards differ from the "Declaration of Helsinki" and how they offer greater protection.

(3) When the research has been approved by an independent review committee, the sponsor shall submit to FDA documentation of such review and approval, including the names and qualifications of the members of the committee. In this regard, a "review committee" means a committee composed of scientists and, where practicable, individuals who are otherwise qualified (e. g., other health professionals or laymen). The investigator may not vote on any aspect of the review of his or her protocol by a review committee.

(4) When the research has not been approved by a review committee, the sponsor shall describe how the research conformed to the ethical standards in the country in which the research was conducted, so as to meet the goals of the "Declaration of Helsinki" In compensating for the lack of review committee approval.

(5) The "Declaration of Helsinki" states as follows:

Recommendations Guiding Medical Doctors in Biomedical Research Involving Human Subjects

I. *Basic Principles*

1. Biomedical research involving human subjects must conform to generally accepted scientific principles and should be based on adequately performed laboratory and animal experimentation and on a thorough knowledge of the scientific literature.

2. The design and performance of each experimental procedure involving human subjects should be clearly formulated in an experimental protocol which should be transmitted to a specially appointed independent committee for consideration, comment and guidance.

3. Biomedical research involving human subjects should be conducted only by scientifically qualified persons and under the supervision of a clinically competent medical person. The responsibility for the human subject must always rest with a medically qualified person and never rest on the subject of the research, even though the subject has given his or her consent.

4. Biomedical research involving human subjects cannot legitimately be carried out unless the importance of the objective is in proportion to the inherent risk to the subject.

5. Every biomedical research project involving human subjects should be preceded by careful assessment of predictable risks in comparison with foreseeable benefits to the subject or to others. Concern for the interests of the subject must always prevail over the interests of science and society.

6. The right of the research subject to safeguard his or her integrity must always be respected. Every precaution should be taken to respect the privacy of the subject and to minimize the impact of the study on the subject's physical and mental integrity and on the personality of the subject.

7. Doctors should abstain from engaging in research projects involving human subjects unless they are satisfied that the hazards involved are believed to be predictable. Doctors should cease any investigation if the hazards are found to outweigh the potential benefits.

8. In publication of the results of his or her research, the doctor is obliged to preserve the accuracy of the results. Reports of experimentation not in accordance with the principles laid down in this Declaration should not be accepted for publication.

9. In any research on human beings, each potential subject must be adequately informed of the aims, methods, anticipated benefits and potential hazards of the study and the discomfort it may entail. He or she is free to withdraw his or her consent to participation at any time. The doctor should then obtain the subject's given informed consent, preferable in writing.

10. When obtaining informed consent for the reasearch project the doctor should be particularly cautious if the subject is in a dependent relationship to him or her or may consent under duress. In that case the informed consent should be obtained by a doctor who is not engaged in the investigation and who is completely independent of this official relationship.

11. In case of legal incompetence, informed consent should be obtained from the legal guardian in accordance with national legislation. Where physical or mental incapacity makes it impossible to obtain informed consent, or when the subject is a minor, permission from the responsible relative replaces that of the subject in accordance with national legislation.

12. The research protocol should always contain a statement of the ethical considerations involved and should indicate that the principles enunciated in the present Declaration are complied with.

II. Medical Research Combined With Professional Care (Clinical Research)

1. In the treatment of the sick person, the doctor must be free to use a new diagnostic and therapeutic measure, if in his or her judgment it offers hope of saving life, reestablishing health or alleviating suffering.

2. The potential benefits, hazards and discomfort of a new method should be weighed against the advantages of the best current diagnostic and therapeutic methods.

3. In any medical study, every patient—including those of a control group, if any—should be assured of the best proven diagnostic and therapeutic methods.

4. The refusal of the patient to participate in a study must never interfere with the doctor-patient relationship.

5. If the doctor considers it essential not to obtain informed consent, the specific reasons for this proposal should be stated in the experimental protocol for transmission to the independent committee (I, 2).

6. The doctor can combine medical research with professional care, the objective being the acquisition of new medical knowledge, only to the extent that medical research is justified by its potential diagnostic or therapeutic value for the patient.

III. Non-Therapeutic Biomedical Research Involving Human Subjects (Non-Clinical Biomedical Research)

1. In the purely scientific application of medical research carried out on a human being, it is the duty of the doctor to remain the protector of the life and health of that person on whom biomedical research is being carried out.

2. The subjects should be volunteers—either healthy persons or patients for whom the experimental design is not related to the patient's illness.

3. The investigator or the team should discontinue the research if in his/her or their judgment it may, if continued, be harmful to the individual.

4. In research on man, the interest of science and society should never take precedence over considerations related to the well-being of the subject.

§ 312.130 Availability for public disclosure of data and information in an IND.

(a) The existence of an investigational new drug application will not be disclosed by FDA unless it has previously been publicly disclosed or acknowledged.

(b) The availability for public disclosure of all data and information in an investigational new drug application for a new drug or antibiotic drug file will be handled in accordance with the provisions established in § 314.430 (proposed in the **Federal Register** of October 19, 1982; 47 FR 46664) for the confidentiality of data and information in applications submitted under Part 314. The availability for public disclosure of all data and information in an investigational new drug application for a biological product will be governed by the provisions of §§ 601.50 and 601.51.

(c) Notwithstanding the provisions of § 314.430 , FDA shall disclose upon request to an individual to whom an investigational new drug has been given a copy of any IND safety report relating to the use in that individual.

§ 312.140 Address for correspondence.

(a) Except as provided in paragraph (b) of this section, a sponsor shall send an initial IND to the Documents and Records Section (HFN–106), Office of New Drug Evaluation, National Center for Drugs and Biologics, Food and Drug Administration, 5600 Fishers Lane, Rockville, MD 20857. On receiving the IND, FDA will inform the sponsor which one of the divisions in the Office of New Drug Evaluation is responsible for the IND. Amendments, reports, and other correspondence relating to matters covered by the IND should be directed to the appropriate division. The outside wrapper of each submission shall state what is contained in the submission, for example, "IND Application", "Protocol Amendment", etc.

(b) Applications for the products listed below should be submitted to the Office of Biologics (HFN–823), National Center for Drugs and Biologics, Food and Drug Administration, 8800 Rockville Pike, Bethesda, MD 20205: (1) Products subject to the licensing provisions of the Public Health Service Act of July 1, 1944 (58 Stat. 682, as amended (42 U.S.C. 201 et. seq.)) or subject to Part 600; (2) ingredients packaged together with containers intended for the collection, processing, or storage of blood or blood components; (3) urokinase products; (4) plasma volume expanders and hydroxyethyl starch for leukapheresis; and (5) coupled antibodies, i.e., products that consist of an antibody component coupled with a drug or radionuclide component in which both components provide a pharmacological effect but the biological component determines the site of action.

(c) All correspondence relating to biological products for human use which are also radioactive drugs shall be submitted to the Division of Oncology and Radiopharmaceutical Drug Products (HFN–150), Office of New Drug Evaluation, National Center for Drugs and Biologics, Food and Drug Administration, 5600 Fishers Lane, Rockville, MD 20857, except that applications for coupled antibodies shall be submitted in accordance with paragraph (b) of this section.

(d) All correspondence relating to export of an investigational drug under § 312.110(b)(2) shall be submitted to the International Affairs Staff (HFY–50), Office of Health Affairs, Food and Drug Administration, 5600 Fishers Lane, Rockville, MD 20857.

§ 312.145 Guidelines

(a) FDA has made available guidelines under § 10.90(b) to help persons to comply with certain requirements of this part.

(b) The National Center for Drugs and Biologics maintains a list of guidelines that apply to the Center's regulations. The list states how a person can obtain a copy of each guideline. A request for a copy of the list should be directed to the Assistant Director for Regulatory Affairs (HFN–7), National Center for Drugs and Biologics, Food and Drug Administration, 5600 Fishers Lane, Rockville, MD 20857.

Subpart F—Drugs for Investigational Use in Laboratory Research Animals or in Vitro Tests

§ 312.160 Drugs for investigational use in laboratory research animals or in vitro tests.

(a) *Authorization to ship.* (1) A person may ship a drug intended solely for tests in vitro or in animals used only for laboratory research purposes if it is labeled as follows:

Caution: Contains a new drug for investigational use only in laboratory research animals, or for tests in vitro. Not for use in humans.

(2) A person shipping a drug under paragraph (a) of this section shall use due diligence to assure that the consignee is regularly engaged in conducting such tests and that the shipment of the new drug will actually be used for tests in vitro or in animals used only for laboratory research.

(3) A person who ships a drug under paragraph (a) of this section shall maintain adequate records showing the name and post office address of the expert to whom the drug is shipped and the date, quantity, and batch or code mark of each shipment and delivery. Such records are to be maintained for a period of 2 years after the shipment. Upon the request of a properly authorized FDA employee at reasonable times, the person shall make such records available for inspection and copying.

(b) *Termination of authorization to ship.* FDA may terminate authorization to ship a drug under this section, if it finds that:

(1) The sponsor of the investigation has failed to comply with any of the conditions for shipment established under this section; or

(2) The continuance of the investigation is unsafe or otherwise contrary to the public interest or the drug is used for purposes other than bona fide scientific investigation. FDS will notify the person shipping the drug of its finding and invite immediate correction. If correction is not immediately made, the person shall have an opportunity for a regulatory hearing before FDA pursuant to Part 16. If authorization to ship the drug is terminated, the person shipping the drug shall recall or have destroyed the unused supplies of the drug.

Interested persons, may, on or before August 8, 1983, submit to the Dockets Management Branch (HFA–305), Food and Drug Administration, Rm. 4–62, 5600 Fishers Lane, Rockville, MD 20857, written comments regarding this proposal. Two copies of any comments are to be submitted, except that individuals may submit one copy. Comments are to be identified with the docket number found in brackets in the heading of this document. Received comments may be seen in the office above between 9 a.m. and 4 p.m., Monday through Friday.

Arthur Hull Hayes, Jr.,

Commissioner of Food and Drugs.

Richard S. Schweiker,

Secretary of Health and Human Services.

Dated: February 3, 1983.

AGENCY PUBLICATION ON ASSIGNED DAYS OF THE WEEK

The following agencies have agreed to publish all documents on two assigned days of the week (Monday/Thursday or Tuesday/Friday). This is a voluntary program. (See OFR NOTICE 41 FR 32914, August 6, 1976.) Documents normally scheduled for publication on a day that will be a Federal holiday will be published the next work day following the holiday.

Monday	Tuesday	Wednesday	Thursday	Friday
DOT/SECRETARY	USDA/ASCS		DOT/SECRETARY	USDA/ASCS
DOT/COAST GUARD	USDA/FNS		DOT/COAST GUARD	USDA/FNS
DOT/FAA	USDA/REA		DOT/FAA	USDA/REA
DOT/FHWA	USDA/SCS		DOT/FHWA	USDA/SCS
DOT/FRA	MSPB/OPM		DOT/FRA	MSPB/OPM
DOT/MA	LABOR		DOT/MA	LABOR
DOT/NHTSA	HHS/FDA		DOT/NHTSA	HHS/FDA
DOT/RSPA			DOT/RSPA	
DOT/SLSDC			DOT/SLSDC	
DOT/UMTA			DOT/UMTA	

Note: The Office of the Federal Register proposes to terminate the formal program of agency publication on assigned days of the week. See 48 FR 19283, April 28, 1983.

List of Public Laws

Last Listing June 1, 1983

This is a continuing list of public bills from the current session of Congress which have become Federal laws. The text of laws is not published in the **Federal Register** but may be ordered in individual pamphlet form (referred to as "slip laws") from the Superintendent of Documents, U.S. Government Printing Office, Washington, D.C. 20402 (phone 202–275–3030).

S. 967/Pub. L. 98–37 To amend the Independent Safety Board Act of 1974 to authorize appropriations for fiscal years 1984, 1985, and 1986. (June 6, 1983; 97 Stat. 204) Price: $1.50

H.R. 2681/Pub. L. 98–38 To make certain amendments to sections 4, 13, 14, 15, and 15B of the Securities Exchange Act of 1934. (June 6, 1983; 97 Stat. 205) Price: $1.50

Slip Laws

Subscriptions Now Being Accepted

98th Congress, 1st Session, 1983

Separate prints of Public Laws, published immediately after enactment, with marginal annotations, legislative history references, and future Statutes volume page numbers.

Subscription Price: **$150.00 per session**

(Individual laws also may be purchased from the Superintendent of Documents, Government Printing Office, Washington, D.C. 20402. Prices vary. See Reminder Section of the Federal Register for announcements of newly enacted laws and prices).

FEDERAL REGISTER Published daily, Monday through Friday, (not published on Saturdays, Sundays, or on official holidays), by the Office of the Federal Register, National Archives and Records Service, General Services Administration, Washington, D.C. 20408, under the Federal Register Act (49 Stat. 500, as amended; 44 U.S.C. Ch. 15) and the regulations of the Administrative Committee of the Federal Register (1 CFR Ch. I). Distribution is made only by the Superintendent of Documents, U.S. Government Printing Office, Washington, D.C. 20402.

The **Federal Register** provides a uniform system for making available to the public regulations and legal notices issued by Federal agencies. These include Presidential proclamations and Executive Orders and Federal agency documents having general applicability and legal effect, documents required to be published by Act of Congress and other Federal agency documents of public interest. Documents are on file for public inspection in the Office of the Federal Register the day before they are published, unless earlier filing is requested by the issuing agency.

The **Federal Register** will be furnished by mail to subscribers, free of postage, for $300.00 per year, or $150.00 for six months, payable in advance. The charge for individual copies is $1.50 for each issue, or $1.50 for each group of pages as actually bound. Remit check or money order, made payable to the Superintendent of Documents, U.S. Government Printing Office, Washington, D.C. 20402.

There are no restrictions on the republication of material appearing in the **Federal Register**.

Questions and requests for specific information may be directed to the telephone numbers listed under INFORMATION AND ASSISTANCE in the READER AIDS section of this issue.

Rules and Regulations

Federal Register
Vol. 48, No. 113
Friday, June 10, 1983

This section of the FEDERAL REGISTER contains regulatory documents having general applicability and legal effect, most of which are keyed to and codified in the Code of Federal Regulations, which is published under 50 titles pursuant to 44 U.S.C. 1510.
The Code of Federal Regulations is sold by the Superintendent of Documents. Prices of new books are listed in the first FEDERAL REGISTER issue of each month.

DEPARTMENT OF AGRICULTURE

Agricultural Marketing Service

7 CFR Part 51

United States Standards for Grades of Tomatoes for Processing

AGENCY: Agricultural Marketing Service, USDA.

ACTION: Final rule.

SUMMARY: This rule amends the voluntary U.S. Standards for Grades of Tomatoes for Processing. This amendment revises color evaluation procedures to permit color measurement to be determined by the type of electronic device specified in grower-processor contracts. Users of the standards will be given the option of utilizing a colorimeter of their choice, without ruling out use of currently specified instrumentation.

The Agricultural Marketing Service has the responsibility, in cooperation with industry, to maintain grade standards in line with current cultural and processing practices.

EFFECTIVE DATE: July 11, 1983.

FOR FURTHER INFORMATION CONTACT: David L. Priester, Fresh Products Branch, Fruit and Vegetable Division, Agricultural Marketing Service, U.S. Department of Agriculture, Washington, D.C. 20250, (202) 447–5410.

SUPPLEMENTARY INFORMATION: This rule as been reviewed under USDA procedures and Executive Order 12291 and has been designated as a "non-major" rule. It will not result in an annual effect of $100 million or more. There will be no major increase in cost or prices for consumers; individual industries; Federal, State, or local government agencies; or geographic regions. It will not result in significant effects on competition, employment, investments, productivity, innovations, or the ability of United States-based enterprises to compete with foreign-based enterprises in domestic or export markets

William T. Manley, Deputy Administrator, Agricultural Marketing Service, has certified that this action will not have a significant economic impact on a substantial number of small entities, as defined by the Regulatory Flexibility Act, Pub. L. 96–354 (5 U.S.C. 601), because it reflects current marketing practices.

The current U.S. Standards for Grades of Tomatoes for Processing have been in effect since March 1973. These standards were developed to provide the processing industry with inspection procedures for determining the quality of grower deliveries to processors based on two factors: (1) Color measurement by use of photo-electric instrument (USDA Tomato Colorimeter) or subjective visual color evaluation of individual fruit; and (2) classification of defects. When using the colorimeter, the "Color Evaluation" section of the standards require that specific procedures be followed for color measurement using only USDA approved equipment.

Since 1973 processors have continued to improve processing equipment and have introduced new manufactured products. This has brought about a need for more flexibility in the type of color measurement equipment than that currently approved for use by the standards.

A proposal to amend these standards was published in the **Federal Register** on April 12, 1983 (48 FR 15633–15634) with a comment period ending May 12, 1983. Copies of the proposal were distributed to interested persons for review and comment. Responses were received from the following: Welch Foods, Inc., Westfield, New York; Keystone Foods, Inc., NorthEast, Pennsylvania; and, Purdue University Department of Horticulture, Indiana. All comments were in favor of the proposed changes. Changes are as follows:

(1) The "General" section is revised by deleting reference to the photo-electric instrument (USDA-Tomato Colorimeter).

(2) Applicable sections concerning color evaluation procedures are revised to require the equipment used in color evaluation be properly calibrated, and the type of device and procedures utilized to be specified in the grower-processor contract.

This rule establishes basic color measurement requirements with the flexibility necessary to adjust to advances is electronic colorimeter technology and meet the changing needs of the industry. Users of the standards will now have the option of using a colorimeter of their choice, without ruling out use of the currently specified instrumentation.

List of Subjects in 7 CFR Part 51

Fresh fruits, Vegetables and other products (Inspection, certification and standards).

PART 51—[AMENDED]

Accordingly 7 CFR Part 51 is amended as follows:

1. Revising § 51.3310 paragraph (a)(1) to read as follows:

§ 51.3310 General.

(a) * * *

(1) Color measurement by use of an electronic colorimeter instrument or subjective visual color evaluation of individual fruit; and,

* * * * * *

2. Revising § 51.3311 paragraph (a)(2) (i) and (ii) to read as follows:

§ 51.3311 Category A.

* * * * * *

(a) * * *

(2) * * *

(i) Electronic color determination shall be as specified in § 51.3317; or

(ii) Visual color analysis shall be as specified in § 51.3317.

* * * * * *

3. Revising § 51.3312 paragraph (a)(2) (i) and (ii) to read as follows:

§ 51.3312 Category B.

* * * * * *

(a) * * *

(2) * * *

(i) Electronic color determination shall be as specified in § 51.3317; or

(ii) Visual color analysis shall be as specified in § 51.3317.

* * * * * *

4. Revising § 51.3313 paragraph (a) (2) (i) and (ii) to read as follows:

§ 51.3313 Category C.

* * * * * *

(a) * * *
(2) * * *
(i) Electronic color determination shall be as specified in § 51.3317; or
(ii) Visual color analysis shall be as specified in §51.3317.
* * * * * *

5. Revising § 51.3314 to read as follows:

§ 51.3314 Culls.

"Culls" are tomatoes which fail to meet the requirements of Category C and, when color evaluation is determined by means of an electronic instrument, includes tomatoes which are completely green.

6. Revising § 51.3317 to read as follows:

§ 51.3317 Color evaluation.

Color may be determined either by an electronic colorimeter or visually.

(a) Electonic color evaluation shall be the color value of a composite raw juice sample. The equipment used in such evaluation shall be properly calibrated, and the type of device and procedures utilized shall be specified in grower-processor contracts. The composite raw juice sample shall be extracted from tomatoes representative of the lot: Provided, that each tomato from which juice is extracted must show a definite change in surface color from green to tannish-yellow, pink, red, or a combination thereof.

(b) Visual analysis requires that each tomato be "fairly well colored" which means that at least two-thirds of the flesh of the tomato has good red color: Provided, that a tomato having flesh of a lighter shade of red shall be considered as "fairly well colored" if a sufficient amount of the flesh has a red color equivalent to that of a tomato with two-thirds good red color.

(Agricultural Marketing Act of 1946, Secs. 203, 205, 60 Stat. 1087, as amended, 1090 as amended [7 U.S.C. 1622, 1624].)

Done at Washington, D.C. on June 6, 1983.

William T. Manley,

Deputy Administrator, Marketing Program Operations.

7 CFR Part 52

United States Standards for Grades of Frozen Green Beans and Frozen Wax Beans

AGENCY: Agricultural Marketing Service, USDA.

ACTION: Final rule.

SUMMARY: The purpose of this final rule is to revise the voluntary U.S. grade standards for frozen green and wax beans. The revision was developed by the U.S. Department of Agriculture at the request of the frozen food industry. The rule will: (1) Provide for multi-blanched (precooked) beans as a type of pack; (2) incorporate an on-line grading procedure; (3) separate "character" defects from other classified defects; (4) adjust the Acceptable Quality Levels (AQL) to be in line with the Regulations (7 CFR 52.38a–38c); (5) replace the dual grade nomenclature with single letter designations; (6) remove the factor of "color" as a classified defect while retaining the prerequisite factor of "brightness" and the classified factor of "blemished"; (7) provide separate definitions for green and wax bean character classifications; (8) reclassify fiber as a character defect; (9) reference "Flat type" beans as "Romano or Italian type" beans and redefine the character requirements; and (10) remove extraneous vegetable material as a classified defect and reassign it as a prerequisite factor. The effect of this rule will be to improve the standards and promote efficient and orderly marketing.

EFFECTIVE DATE: July 11, 1983.

FOR FURTHER INFORMATION CONTACT: Howard W. Schutz. Processed Products Branch, Fruit and Vegetable Division, Agricultural Marketing Service, U.S. Department of Agriculture, Washington, D.C. 20250, (202) 447–6248.

SUPPLEMENTARY INFORMATION: The rule has been reviewed under USDA procedures and Executive Order 12291 and has been designated a "nonmajor" rule. It will not result in an annual effect on the economy of $100 million or more. There will be no major increase in cost prices for consumers; individual industries; Federal, State, or local government agencies; or geographic regions. It will not result in significant adverse effects on competition, employment, investments, productivity, innovations; or the ability of United States-based enterprises to compete with foreign-based enterprises in domestic or export markets.

William T. Manley, Deputy Administrator, Agricultural Marketing Service, has certified that this action will not have a significant economic impact on a substantial number of small entities, as defined in the Regulatory Flexibility Act, Pub. L. 96–354 (5 U.S.C 601), because it reflects current marketing practices.

The U.S. Department of Agriculture (USDA) published proposed revisions of the U.S. Standards for Grades of Frozen Green Beans and Frozen Wax Beans in the **Federal Register** (43 FR 47755) on October 17, 1978, at the request of the American Frozen Food Institute (AFFI). AFFI is a non-profit frozen food trade association with a membership of approximately 120 processors and an associate membership of over 135 allied industries and over 225 marketing associates. Statistics for 1981 show a total U.S. pack of approximately 257.4 million pounds of frozen snap beans. AFFI members processed most of this production.

The 1978 proposal suggested the following revisions of the current grade standards for frozen beans: (1) Provide for multi-blanched (precooked) beans as a separate type of pack; (2) incorporate an on-line grading procedure to be compatible with the current lot attribute grading system; (3) separate character defects from other classified defects (such as blemished units, mechanical damage, stems, etc.) and provide for separate tolerances (character is defined as a measurement of the tenderness, maturity and firmness of the beans); (4) adjust the Acceptable Quality Levels (AQL) to be in line with those published in the "Regulations Governing Inspection and Certification of Processed Fruits and Vegetables and Related Products" (7 CFR 52.38a–38c); and (5) replace the dual grade nomenclature of "U.S. Grade A or U.S. Fancy," "U.S. Grade B or U.S. Extra Standard." and "U.S. Grade C or U.S. Standard" with single letter designations of "U.S. Grade A," "U.S. Grade B," and "U.S. Grade C," respectively.

For several years, many processors of frozen green and wax beans have been producing multi-blanched beans for use in frozen dinners, frozen mixed vegetables, frozen boil-in-bag items, etc. These beans do not have the bright appearance of regular blanched beans therefore, are downgraded using the current standards. This revision would disregard the quality factor of brightness for multi-blanched beans and allow for all quality grades to be assigned to the product.

Since the current standards were published, and on-line grading procedure for attributes was developed. Also a uniform set of AOL's was incorporated into the "Regulations" (7 CFR 52.38a–38c). The frozen food industry requested that the on-line procedure be incorporated into the frozen bean grade standards. By responding to this request, the AQL's in the standards are brought in line with those published in the Regulations.

The tolerances provided in the current standards were established for a combination of "character" (a

measurement of tenderness, maturity and firmness of the beans) and other "defects" (blemishes, mechanical damage, stems, etc.). Because of the importance of "character" in determining different levels of bean quality, there is a need to separate this factor from the other "defects."

Following the policy of making grade standards simpler to understand, the dual grade nomenclature is being replaced with single letter grades of "U.S. Grade A," "U.S. Grade B," and "U.S. Grade C."

In response to the proposed rule, comments were received from two frozen green and wax bean processors who generally favored the proposal. However, one processor objected to the separate classification of normal color changes which occur in snap beans with advancing maturity. USDA agreed that the factor of color, as defined in the proposal, was dependent upon the maturity of the beans and should be considered in evaluating character.

It was also determined that the defect, "fiber," was dependent upon the maturity of the beans. Therefore, fiber should be considered when evaluating "character."

Industry requested that "character" for green and wax beans be defined separately. It was shown that the two varietal types have different character traits at the same level of maturity.

On September 9, 1980, the USDA published in the **Federal Register** (45 FR 59325) a second notice of proposed rulemaking to revise the U.S. Standards for Grades of Frozen Green Beans and Frozen Wax Beans. The 1980 notice included all the provisions in the 1978 proposal and these additional revisions: (1) Remove color from the list of noncharacter classified defects and retain the prerequisite factor of brightness and the classified factor of blemished; (2) provide separate definitions for character classifications of frozen green beans and frozen wax beans; and (3) remove the defect factor of fiber from classified defects and consider it when evaluating the character of the frozen beans.

Two comments were also received regarding the 1980 proposal. One was submitted by the Iowa Consumers League favoring the proposal. The other, submitted by AFFI, also favored the 1980 proposal, but suggested that the reference to "flat type" beans be changed to "Romano or Italian type" since these are the only "flat type" varieties being freezer processed. The AFFI comments also stated that other types exist that may qualify as flat type beans but differ substantially in character structure. If these become commercially significant as a frozen product, they should be handled separately under the factor of character. The comment also suggested that the definitions for the different quality levels of character for "Romano or Italian type" beans should be redefined to more accurately describe this variety.

Another suggestion by AFFI was to remove the factor of "extraneous vegetable material" from classified defects and reassign it as a prerequisite quality factor while retaining the same quality levels. The justification for this was to provide better statistical protection for the processor and the consumer. The AQL for extraneous vegetable material (EVM) is very small, so if the sample size is increased substantially, the protection afforded is increased. By allowing EVM to stand on its own as a prerequisite factor, it is possible to increase the sample size above that recommended for other factors. This revision incorporates the AFFI suggestions.

Fruit and vegetable, Food grades, Standards.

PART 52—[AMENDED]

Accordingly, the revision of Subpart—*United States Standards for Grades of Frozen Green Beans and Frozen Wax Beans* (7 CFR 52.2321 through 52.2334) will read as follows:

Subpart—United States Standards for Grades of Frozen Green Beans and Frozen Wax Beans

Sec.

52.2321 Product description.
52.2322 Styles.
52.2323 Style classification and tolerances.
52.2324 Types.
52.2325 Kinds of pack.
52.2326 Definitions of terms
52.2327 Recommended sample unit sizes.
52.2328 Grades.
52.2329 Factors of quality
52.2330 Classification of defects.
52.2331 Tolerances for defects.
52.2332 Sample size.
52.2333 Style requirement criteria.
52.2334 Quality requirement criteria.

Authority: Agricultural Marketing Act of 1946, Secs. 203, 205, 60 Stat. 1087, 1090, as amended (7 U.S.C. 1622, 1624).

Subpart—United States Standards for Grades of Frozen Green Beans and Frozen Wax Beans

§ 52.2321 Product description.

"Frozen green beans" and "frozen wax beans," hereinafter called "frozen beans," means the frozen product prepared from the clean, sound, succulent pods of the bean plant. The pods are stemmed, washed, blanched, sorted, and properly drained. The product is then frozen in accordance with good commercial practice and maintained at temperatures necessary or the preservation of the product.

§ 52.2322 Styles.

(a) *Whole* means frozen beans consisting of whole pods of any length.

(b) *Cut* means frozen beans consisting of pods that are cut transversely into pieces less than 7 cm (2¾ in) but not less than 1.9 cm ¾ in) in length.

(c) *Short cut* means frozen beans consisting of pods that are cut transversely into pieces less than 1.9 cm (¾ in) in length.

(d) *Mixed* means a mixture of two or more of the following styles of frozen beans: whole, cut, or short cut.

(e) *Sliced lengthwise* means frozen beans consisting of pods that are sliced lengthwise and may also be known as *French Style, French Sliced Julienne,* or *Shoestring.*

§ 52.2323 Style classification and tolerances.

(a) *General.* For the purpose of determining acceptance with the styles of *cut* and *short cut,* pieces are considered as "minor" or "major" defects according to their lengths as specified in Table I. Each "X" represents one (1) defect.

(b) *Requirements.* Tolerances for style requirements are contained in Tables II and III.

TABLE I.—STYLE DEFECT CLASSIFICATION

Style	Defect	Classification	
		Minor	Major
Cut	Each piece shorter than 1.9 cm (¾ in) length.	X	
	Each piece longer than 7 cm (2¾ in) in length.		X
Short cut	Each piece 1.9 cm (¾ in) or longer but not longer than 4.5 cm (1¾ in) in length.	X	
	Each piece longer than 4.5 cm (1¾ in) in length.		X

TABLE II.—TOLERANCES FOR CUT STYLE

	Total [2]	Major
AQL [1]	20.0	2.5

[1] AQL expressed as percent defective.
[2] Total = Minor + Major.

TABLE III.—TOLERANCES FOR SHORT CUT STYLE

	Total [2]	Major
AQL [1]	20.0	0.65

[1] AQL expressed as percent defective.
[2] Total = Minor + Major.

§ 52.2324 Types.

The type of frozen beans is not incorporated in the grades of finished product, since it is not a factor of quality. The types of frozen beans are described as "round type" and "Romano or Italian type."

(a) *Round type* means frozen beans having a width not greater than 1⅓ times the thickness of the beans.

(b) *Romano or Italian type* means frozen beans having a width greater than 1⅓ times the thickness of the beans.

§ 52.2325 Kinds of pack.

The kind of pack of frozen beans is not incorporated in the grades of finished product, since it is not a factor of quality. The kinds of pack of frozen beans are described as "regular process," "multi-blanch process," and "special pack."

(a) *Regular process* means the frozen beans are processed in such a manner that the brightness is not affected by the process.

(b) *Multi-blanch process* means the frozen beans are intentionally processed in such a manner that the brightness is affected by the process.

(c) *Special pack* means the frozen bean pack intentionally contains beans of two or more varietal characteristics (such as a mixture of green and wax beans).

§ 52.2326 Definitions of terms.

(a) *Acceptable Quality Level (AQL)* means the maximum percent of defective units or the maximum number of defects per hundred units of product that, for the purpose of acceptance sampling, can be considered satisfactory as a process average.

(b) *Blemished* means any unit that is affected by discoloration, or any other means to the extent that the appearance or eating quality is adversely affected:

(1) Slightly;

(2) Materially; or

(3) Seriously.

(c) *Brightness* means the extent that the overall appearance of the sample unit as a mass is affected by dullness. (Applies to "regular process" only).

(1) Grade A—not affected.

(2) Grade B—slightly affected.

(3) Grade C—materially affected.

(4) Substandard—seriously affected.

(d) *Character.*—(1) *Round type—Green Beans.*— (i) *Good character* means the pods are full fleshed; after cooking, the pods are tender and the seeds are not mealy.

(ii) *Reasonably good character* means the pods are reasonably fleshy; after cooking, the pods are tender and the seeds are not mealy.

(iii) *Fairly good character* means the pods have not entirely lost their fleshy structure; after cooking, the pods may contain edible fiber (no inedible fiber allowed) and the seeds may be slightly mealy.

(iv) *Poor character* means the beans fail the requirements for "fairly good character."

(2) *Round type—Wax Means.*—(i) *Good character* means the pods are full fleshed and may show slight breakdown of the flesh between seed cavities; after cooking, the pods are tender and the seeds are not mealy.

(ii) *Reasonably good character* means the pods are reasonably fleshy and may show substantial breakdown of the flesh between the seed cavities; after cooking, the pods are tender and the seeds are not mealy.

(iii) *Fairly good character* means the pods may show total breakdown of the flesh between the seed cavities with no definite seed pocket but still retain flesh on the inside pod wall; after cooking, the pods may contain edible fiber (no inedible fiber allowed) and the seeds may be slightly mealy.

(iv) *Poor character* means the beans fail the requirements for "fairly good character."

(3) *Romano or Italian type.*—(i) *Good character* means the pods have a full inner membrane, typical of the variety, and are tender after cooking.

(ii) *Reasonably good character* means the pods have a reasonably well developed inner membrane and are reasonably tender after cooking.

(iii) *Fairly good character* means the pods may lack an inner membrane and are fairly tender after cooking. The pods may contain edible fiber (no inedible fiber allowed).

(iv) *Poor character* means the beans fail the requirements for "fairly good character."

(4) *Fiber.*—(i) *Edible fiber* means fiber developed in the wall of the bean pod that is noticeable upon chewing but may be consumed with the rest of the bean material without objection.

(ii) *Inedible fiber* means fiber developed in the wall of the bean pod that is objectionable upon chewing and tends to separate from the rest of the bean material.

(e) *Defect* means any nonconformance of a unit(s) of product from a specified requirement of a single quality characteristic.

(f) *Detached stem* means the stem or portion of stem that attaches the beam pod to the vine stem and has become separated from the pod.

(g) *Extraneous vegetable material (EVM).*—(1) *Edible EVM* means tender, green, harmless, and edible vegetable material similar in color and texture to that of bean pods, including but not limited to:

(i) Leaves or portion of leaves or grass;

(ii) Material from plants other than the bean plant.

(2) *Inedible EVM* means any harmless plant material that is not tender, may not be green, may be tough, and includes but is not limited to:

(i) Discolored leaves or grass or portions thereof;

(ii) Bean stalk or vine material;

(iii) Material from plants other than the bean plant.

(h) *Flavor and odor.*—(1) *Good flavor and odor* means the product, after cooking, has a good characteristic flavor and odor and is free from objectionable flavors and odors of any kind.

(2) *Fairly good flavor and odor* means the product, after cooking, may be lacking in good flavor and odor but is free from objectionable flavors and odors of any kind.

(i) *Mechanical damage* means any unit that is broken or split in two parts, or has very ragged edges, or is crushed, or is damaged by mechanical means to such an extent that the appearance is seriously affected.

(j) *Sample unit* means the amount of product specified to be used for inspection. It may be:

(1) The entire contents of a container;

(2) A portion of the contents of a container;

(3) A combination of the contents of two or more containers; or

(4) A portion of unpacked product.

(k) *Sloughing* means the separation of the outer layer of tissue from the bean pod giving a ragged or feathery appearance to the unit.

(l) *Small piece (Sliced lengthwise style only)* means a piece of pod less than 1.9 cm (¾ in) in the longest dimension and loose seeds and pieces of seeds.

(m) *Tough strings* mean strings or pieces of strings, removed from the cooked bean pod, that will support a 227 g (½ lb) weight for not less than five (5) seconds.

(n) *Unit* means a bean pod or any individual portion thereof.

(o) *Unsnipped unit* means a unit without an attached stem but with a stem collar that is hard or tough and would be objectionable upon eating.

(p) *Unstemmed unit* means a unit with the attached stem or portion thereof that attaches the pod to the vine stem.

§ 52.2327 Recommended sample unit sizes.

(a) In all styles, other than sliced lengthwise, a mechanically damaged unit that is broken into separate parts will be reassembled to approximate its original size and counted as one unit in the sample unit size.

(b) *Style requirements.* Requirements for cut and short cut styles are based on the recommended sample unit size of 200 units.

(c) *Quality requirements.* Requirements for factors of quality are based on the following recommended sample unit sizes for the respective style:

(1) *Classified defects and character defects.* (i) Sliced lengthwise style—250 g (8.8 oz).

(ii) Whole style—100 units.

(iii) All other styles—200 units.

(2) *Extraneous vegetable material defects (EVM).* (i) On-line grading only (all styles)—1419 g (50 oz). Optional—2838 g (100 oz). Optional—5675 g (200 oz).

(ii) Lot grading only (all styles)—Entire sample.

§ 52.2328 Grades.

(a) *U.S. Grade A* is the quality of frozen beans that:

(1) Meets the following prerequisites in which the beans:

(i) Have similar varietal characteristics (except "special packs");

(ii) Have a good flavor and odor;

(iii) Have a good overall brightness as a mass that is not affected by dullness ("Regular process" only);

(iv) Are practically free from small pieces for the style of "sliced lengthwise";

(v) Have an appearance or eating quality that is not materially affected by sloughing;

(vi) Are practically free from EVM;

(A) On-line grading—within the limits for defects as classified in Table VI and specified in Table XIII.

(B) Lot grading—Not more than two (2) pieces of EVM per 795 g (28 oz) of which not more than one (1) piece may be major.

(2) Is within the limits for defects as classified in Table IV or V and specified in Table VII, VIII, IX, X, XI, or XII, as applicable, for the style.

(b) *U.S. Grade B* is the quality of frozen beans that:

(1) Meets the following prerequisities in which the beans:

(i) Have similar varietal characteristics (except "special pack");

(ii) Have a good flavor and odor;

(iii) Have a reasonably good overall brightness as a mass which may be slightly dull ("Regular process" only);

(iv) Are reasonably free from small pieces for the style of "sliced lengthwise;"

(v) Have an appearance or eating quality that is not seriously affected by sloughing;

(vi) Are reasonably free from EVM;

(A) On-line grading—within the limits for defects as classified in Table VI and specified in Table XIII.

(B) Lot grading—Not more than two (2) pieces of EVM per 395 g (14 oz) of which not more than one (1) piece may be major.

(2) Is within the limits for defects as classified in Table IV or V and specified in Table VII, VIII, IX, X, XI, or XII, as applicable, for the style.

(c) *U.S. Grade C* is the quality of frozen beans that:

(1) Meets the following prerequisites in which the beans:

(i) Have similar varietal characteristics (except "special packs");

(ii) Have a fairly good flavor and odor;

(iii) Have a reasonably good overall brightness as a mass that may be dull but is off-color ("Regular process" only);

(iv) Are fairly free from EVM;

(A) On-line grading—within the limits for defects as classified in Table VI and specified in Table XIII.

(B) Lot grading—Not more than two (2) pieces of EVM per 200 g (7 oz) of which not more than one (1) piece may be major.

(2) Is within the limits for defects as classified in Table IV or V and specified in Table VII, VIII, IX, X, XI, or XII, as applicable, for the style.

(d) Substandard is the quality of frozen beans that fails to meet the requirements of *U.S. Grade C.*

§ 52.2329 Factors of quality.

The grade of frozen beans is based on requirements for the following quality factors:

(a) *Prerequisite quality factors.* (1) Similar varietal characteristics (except "special packs");

(2) Flavor and odor;

(3) Brightness ("Regular process" only);

(4) Freedom from small pieces in the "sliced lengthwise" style;

(5) Freedom from sloughing;

(6) Freedom from extraneous vegetable material (EVM).

(b) *Classified quality factors.* (1) Blemished;

(2) Mechanical damage (all styles except "sliced lengthwise");

(3) Workmanship;

(4) Tough strings;

(5) Character.

§ 52.2330 Classification of defects.

All defects, other than character defects, are classified as minor, major, or severe. All character defects are classified as reasonably good, fairly good, or poor. Each "X" in Tables IV and V represents "one (1) defect."

TABLE IV

Quality factor	Defects	Classification		
		Minor	Major	Severe
Classification of Defects (Other Than Character and EVM) Cut, Short Cut, Whole, Mixed Styles				
Blemished	Slightly (each unit).	X		
	Materially (each unit).		X	
	Seriously (each unit).			X.
Mechanical damage.	(Each reassembled unit).	X		
Workmanship	Undermmed (each unit).			X.
	Detached stem (each unit).			X.
	Unstripped unit (each unit).		X	
Tough strings	(Each unit)		X	
Sliced Lengthwise Style				
Blemished	Slightly (each 2.5 g).	X		
	Materially (each 2.5 g).		X	
	Seriously (each 2.5 g).			X.
Workmanship	Undermmed (each unit).			X.
	Detached stem (each unit).			X.
	Unstripped unit (each unit).		X	
Tough strings	(Each unit)		X	

TABLE V.—CLASSIFICATION OF CHARACTER DEFECTS, ALL STYLES

Quality factor	Defect	Reasonably good	Fairly good	Poor
Character	"B" (each unit)	X		
	"C" (each unit)		X	
	"SSTD" (each unit)			X.

Note.—For sliced lengthwise style only—Each 2.5 g increment equals one (1) unit.

TABLE VI.—CLASSIFICATION OF EXTRANEOUS VEGETABLE MATERIAL (EVM), ALL STYLES

Quality factor	Defect	Classification	
		Minor	Major
Extraneous vegetable material.	Edible EVM (each piece).	X	
	Inedible EVM (each piece).		X.

§ 52.2331 Tolerances for defects.

TABLE VII.—ALL CLASSIFIED DEFECTS EXCEPT CHARACTER AND EVM CUT, SHORT CUT, AND MIXED STYLES (200 PLAN)

	Grade A			Grade B			Grade C		
	Total [4]	Major	Severe	Total [4]	Major	Severe	Total [4]	Major	Severe

	Grade A	Total [8]	Grade B		Grade C	
		Major	Total [8]	Major	Total [8]	Major
AQL [1]	5.0	2.5	10.0	5.0	20.0	10.0

[1] AQL expressed as defects per hundred units.
[8] Total = Minor + Major.

§ 52.2332 Sample size.

The sample size used to determine whether the requirements of these standards are met shall be as specified in the sampling plans and procedures in the "Regulations Governing Inspection and Certification of Processed Fruits and Vegetables, Processed Products Thereof, and Certain Other Processed Food Products" (7 CFR 52.1—52.83) for lot grading and on-line grading, as applicable.

§ 52.2333 Style requirement criteria.

(a) *Lot grading.* A lot of frozen beans is considered as meeting the requirements for style if the Acceptable Quality Levels (AQL) in Tables II and III, as applicable for the style, are not exceeded.

(b) *On-line grading.* A portion of production is considered as meeting the requirements for style if the Acceptable Quality Levels (AQL) in Tables II and III, as applicable for the style, are not exceeded.

(c) *Single sample unit.* Each single sample unit submitted for style evaluation will be treated individually and is considered as meeting the requirements for style if the Acceptable Quality Levels (AQL) in Tables II and III, as applicable for the style, are not exceeded.

§ 52.2334 Quality requirement criteria.

(a) *Lot grading.* A lot of frozen beans is considered as meeting the requirements for quality if:

(1) The prerequisite requirements specified in § 52.1238 are met; and

(2) The Acceptable Quality Levels (AQL) in Tables VII, VIII, IX, X, XI, and XII, as applicable for the style, are not exceeded.

(b) *On-line grading.* A portion of production is considered as meeting the requirements for quality if:

(1) The prerequisite requirements specified in § 52.2328 are met; and

(2) The Acceptable Quality Levels (AQL) in Tables VII, VIII, IX, X, XI, XII, and XIII, as applicable for the style, are not exceeded.

(c) *Single sample unit.* Each single sample unit submitted for quality evaluation will be treated individually and is considered as meeting the requirements for quality if:

(1) The prerequisite requirements specified in § 52.2328 are met; and

(2) The Acceptable Quality Levels (AQL) in Tables VII, VIII, IX, X, XI, and XII, as applicable for the style, are not exceeded.

Done at Washington, D.C., on June 6, 1983.

William T. Manley,

Deputy Administrator, Marketing Program Operations.

[FR Doc. 83-15472 Filed 6-9-83; 8:45 am]
BILLING CODE 3410-02-M

---

7 CFR Part 910

[Lemon Reg. 415]

Lemons Grown in California and Arizona; Limitation of Handling

AGENCY: Agricultural Marketing Service, USDA.

ACTION: Final rule.

SUMMARY: This regulation establishes the quantity of fresh California-Arizona lemons that may be shipped to market during the period June 12–18, 1983. Such action is needed to provide for orderly marketing of fresh lemons for the period due to the marketing situation confronting the lemon industry.

EFFECTIVE DATE: June 12, 1983.

FOR FURTHER INFORMATION CONTACT: William J. Doyle, Chief, Fruit Branch, F&V, AMS, USDA, Washington, D.C. 20250, telephone 202–447–5975.

SUPPLEMENTARY INFORMATION: This final rule has been reviewed under Secretary's Memorandum 1512–1 and Executive Order 12291, and has been designated a "non-major" rule. William T. Manley, Deputy Administrator, Agricultural Marketing Service, has certified that this action will not have a significant economic impact on a substantial number of small entities. This action is designed to promote orderly marketing of the California-Arizona lemon crop for the benefit of producers, and will not substantially affect costs for the directly regulated handlers.

This final rule is issued under Marketing Order No. 910, as amended (7 CFR Part 910; 47 FR 50196), regulating the handling of lemons grown in California and Arizona. The order is effective under the Agricultural Agreement Act of 1937, as amended (7 U.S.C. 601–674). The action is based upon recommendations and information submitted by the Lemon Administrative Committee and upon other available information. It is hereby found that this action will tend to effectuate the declared policy of the Act.

This action is consistent with the marketing policy for 1982–83. The marketing policy was recommended by the committee following discussion at a public meeting on July 6, 1982. The committee met again publicly on June 7, 1983, at Los Angeles, California, to consider the current and prospective conditions of supply and demand and recommended a quantity of lemons deemed advisable to be handled during the specified week. The committee reports the demand for lemons is good.

It is further found that it is impracticable and contrary to the public interest to give preliminary notice, engage in public rulemaking, and postpone the effective date until 30 days after publication in the **Federal Register** (5 U.S.C. 553), because of insufficient time between the date when information became available upon which this regulation is based and the effective date necessary to effectuate the declared purposes of the act. Interested persons were given an opportunity to submit information and views on the regulation at an open meeting. It is necessary to effectuate the declared purposes of the act to make these regulatory provisions effective as specified, and handlers have been apprised of such provisions and the effective time.

List of Subjects in 7 CFR Part 910

Marketing agreements and orders, California, Arizona, Lemons.

Section 910.715 is added as follows:

§ 910.715 Lemon regulation 415.

The quantity of lemons grown in California and Arizona which may be handled during the period June 12, 1983, through June 18, 1983, is established at 315,000 cartons.

(Secs. 1–19, 48 Stat. 31, as amended; 7 U.S.C. 601–674)

Dated: June 8, 1983.

D. S. Kuryloski,

Deputy Director, Fruit and Vegetable Division, Agricultural Marketing Service.

7 CFR Part 966

Tomatoes Grown in Florida; Amendment To Handling Regulation

AGENCY: Agricultural Marketing Service, USDA.

ACTION: Final rule.

SUMMARY: This rule amends the continuing regulation § 966.323 to extend from June 11 to June 25, 1983, the ending date for the grade, size, pack, container and inspection requirements currently in effect for tomatoes grown in Florida. The extension is necessary due to a prolonged shipping season caused by

inclement weather in the production area.

EFFECTIVE DATE: June 10, 1983.

FOR FURTHER INFORMATION CONTACT:
Charles W. Porter, Chief, Vegetable Branch, F&V, AMS, USDA, Washington, D.C. 20250 (202) 447–2615.

SUPPLEMENTARY INFORMATION:

Paperwork Reduction Act

Information collection requirements contained in this regulation (7 CFR Part 966) have been approved by the Office of Management and Budget under the provisions of 44 U.S.C. Chapter 35 and have been assigned OMB #0581–0073.

This action has been reviewed under Secretary's Memorandum 1512–1 and Executive Order 12291 and has been designated a "nonmajor" rule. William T. Manley, Deputy Administrator, Agricultural Marketing Service, has certified that this action will not have a significant economic impact on a substantial number of small entities. It is designed to promote orderly marketing of the Florida tomato crop for the benefit of producers and consumers, and will not substantially affect cost for the directly regulated handlers.

Marketing Agreement No. 125 and Order No. 966, both as amended (7 CFR 966) regulate the handling of tomatoes grown in designated counties of Florida. The program is effective under the Agricultural Marketing Agreement Act of 1937, as amended (7 U.S.C. 601–674). The Florida Tomato Committee, established under the order, is responsible for its local administration.

At its annual meeting held on September 17, 1982, the Florida Tomato Committee recommended that grade, size, pack, container and inspection requirements be established for the 1982–83 season to promote orderly marketing by standardizing shipments and preventing tomatoes of lower quality and undesirable size from being distributed in fresh market channels. Since the Florida tomato marketing season generally extends from mid-October through the following mid-June, such requirements were established for the period October 13, 1982, through June 11, 1983.

Inclement weather in the production area delayed the growing season, however, and tomato shipments are now expected to continue through late June. For this reason, the committee unanimously recommended extending the ending date of the current regulation in a telephone vote conducted on June 3, 1983.

Findings. After consideration of all relevant matter it is hereby found that the following amendment will tend to effectuate the declared policy of the act.

It is hereby further found that it is impracticable and contrary to the public interest to give preliminary notice, engage in public rulemaking procedure, and postpone the effective date of this amendment until 30 days after its publication in the **Federal Register** (5 U.S.C. 553), and good cause exists for making these provisions effective as specified in that (1) this extension of current requirements is needed immediately to promote orderly marketing during the remainder of the marketing season and (2) growers and handlers have been informed of the amendment and compliance will require no special preparation which cannot be completed by the effective date herein.

Marketing agreements and orders, Tomatoes, Florida.

PART 966—[AMENDED]

Section 966.323 *Handling regulation* (47 FR 58213, December 30, 1982) is hereby revised as follows:

§ 966.323. Handling regulation.

During the period January 1, 1983, through June 25, 1983, this season and during the period October 10 through June 15 each season thereafter, no person shall handle any lot of tomatoes for shipment outside the regulated area unless they meet the requirements of paragraph (a) or are exempted by paragraphs (b) or (d).

BILLING CODE 3410-02-M

DEPARTMENT OF THE TREASURY

Comptroller of the Currency

12 CFR Part 5

[Docket No. 83–24]

Change in Location of Head Office or Branch

AGENCY: Office of the Comptroller of the Currency, Treasury.

ACTION: Final rule.

SUMMARY: The Office of the Comptroller of the Currency (Office) is amending its policy statements and procedures concerning the relocation of a national bank head office. This amendment is necessary to incorporate changes made by the Garn-St Germain Depository Institutions Act of 1982 (Act), Pub. L. 97–320 (October 15, 1982). This rulemaking eliminates unnecessary procedural requirements, installs the requirements of the Act, and clarifies other remaining requirements.

EFFECTIVE DATE: June 10, 1983.

FOR FURTHER INFORMATION CONTACT:
Joseph W. Malott, Policy Analyst, Bank Organization and Structure (202) 447–1184, or Brenda Curry, Legal Advisory Services, (202) 447–1880, Office of the Comptroller of the Currency, 490 L'Enfant Plaza East, S.W., Washington, D.C. 20219. Information also may be obtained from the Regional Director of Corporate Activities in any OCC district or regional office.

SUPPLEMENTARY INFORMATION: This final rule effects several regulatory changes necessitated by Act amendments to 12 U.S.C. 30. It implements aspects of the Act and clarifies Office requirements regarding relocations of head offices and branches.

A national bank which desires to relocate its head office to an authorized branch location (including both an approved but unopened branch and an existing branch site) within the limits of the city, town, or village in which the bank is situated must file a letter of notification with the appropriate district office (or regional office, if the bank is currently reporting to a regional office) before relocating. This final rule replaces a formal application process for this type of relocation with a simple notice requirement and eliminates Office approval. The national bank must submit a letter of notification to the appropriate district office and must include the new address and the effective date of relocation. There are no fees or forms required, nor will certificates be issued by the Office for this type of relocation. Further, a national bank is no longer required to publish a newspaper notice concerning the relocation, or to post a notice of the relocation in the bank lobby. Since no application is filed and the Office no longer approves this type of relocation, these notices will no longer be required.

A national bank which desires to relocate its head office to a location other than an authorized branch location within the limits of its city, town, or village must file an application

and receive Office approval. Shareholders owning two-thirds of the voting stock of the bank must approve a relocation outside the limits of the city, town or village and the bank's articles of association must be amended. The relocation cannot be more than 30 miles beyond the limits of the city, town, or village. A relocation of the head office to either an authorized or unauthorized location within the limits does not require shareholder approval or an amendment to the articles of association.

In addition to the amendments which incorporate the aspects of the Act, § 5.40 has been restructured. However, Office policy and procedures have not changed except as discussed above.

Adoption Without Notice and Comments

The Office has found that notice and public procedure concerning this rulemaking are unnecessary and contrary to the public interest. This rulemaking implements those statutory changes made by the Act, and alleviates an expensive, time-consuming regulatory procedure. The results are beneficial and delay in their implementation would be contrary to the public interest. Further this rule is effective immediately since it eliminates an application process and other restrictions no longer required by law.

Regulatory Flexibility Act Analysis

Because the Office has found that notice and public procedure concerning this rulemaking are unnecessary and contrary to the public interest, the provisions of the Regulatory Flexibility Act are not applicable. The Act does not apply when an agency is not required to issue a notice of proposed rulemaking under 5 U.S.C. 553 or any other statute. The amendments ease the application of existing regulation. The effect of the amendments is beneficial rather than adverse, and small entities will share the benefits of the amendments equally with larger institutions.

Regulatory Impact Analysis

The Office has determined that this final rule does not constitute a major rule within the meaning of Executive Order 12291. This final rule eases burdens imposed by regulations and will have no adverse effect on the operations of the depository institutions subject to it. As such, this final rule will not have an annual effect on the economy of $100 million or more, will not affect costs or prices for consumers, individual industries, government agencies or geographic regions, and will not have an adverse effect on competition, employment, investment, productivity, or the ability of United States-based enterprises to compete with foreign-based enterprises in domestic or export markets.

List of Subjects in 12 CFR Part 5

National banks, Administrative procedure and practice, Head office, Relocation.

PART 5—[AMENDED]

Accordingly, 12 CFR Part 5 is amended to read as follows:

i. The authority citation for 12 CFR Part 5 reads as follows:

Authority: 12 U.S.C. 1 *et seq.*

2. Section 5.40 is revised to read as follows:

§ 5.40 Change in location of head office or branch.

(a) *Authority.* A national bank may change the location of its head office in accordance with 12 U.S.C. 30, or change the location of a branch in accordance with 12 U.S.C. 36(e) and 12 U.S.C. 2901 *et seq.*, subject to the additional requirements below.

(b) *Policy.* It is the general policy of the Office to approve applications filed under this section, provided that approval is consistent with applicable law. As provided in § 5.13, the Office reserves the right to deny applications, or to grant approval subject to fulfillment of certain conditions, if: (1) There are significant supervisory concerns with respect to the applicant or any affiliated organization as defined by 12 U.S.C. 221a; or, (2) The applicant's record of helping to meet the credit needs of its entire community, including low- and moderate-income neighborhoods, consistent with the safe and sound operation of the bank, is less than satisfactory; or, (3) Any financial or other business arrangement, direct or indirect, involving the head office or branch and bank insiders (directors, officers, employees, and shareholders owning or controlling, directly or indirectly, 10 percent or more of any class of the bank's voting stock) involves terms and conditions more favorable to the insiders than would be available in a comparable transaction with unrelated parties.

(c) *Rules of general applicability.* Sections 5.8, 5.9, 5.10 and 5.11 do not apply to a head office relocation to an authorized branch location within the limits of the city, town or village (paragraph (d)(1) of this section). All other relocations are subject to the requirements of these sections.

(d) *Head Office relocation.*—

(1) *To authorized branch location within city limits.* A national bank may change the location of its head office to an authorized branch location (approved or existing branch site) within the limits of the same city, town or village provided written notice is submitted to the appropriate district office prior to the relocation. The notice must include the new address of the head office and the effective date of the relocation.

(2) *To other than authorized branch location within city limits.* A national bank desiring to relocate its head office to a location (other than an authorized branch location) within the limits of its city, town, or village shall file an application to relocate on form CC 7027–01.

(3) *To location outside city limits.* A national bank desiring to relocate its head office to a location outside the limits of its city, town, or village shall file an application on form CC 7027–01. A relocation outside these limits requires the approval of shareholders owning two-thirds of the voting stock of the bank and an amendment to the bank's articles of association. The relocation cannot be more than 30 miles beyond the limits of the city, town or village in which the bank is located.

(4) *Retention of head office as branch.* A national bank desiring to retain the head office location as a branch must file a branch application on form CC 7021–01. A decision on the application will be made in accordance with §§ 5.30 or 5.31.

(e) *Branch relocation.* A national bank desiring to relocate a branch shall file an application. An application to relocate a branch is evaluated in essentially the same manner as an application to establish a branch.

(1) *Domestic branch.* Use form CC 7027–01. Refer to § 5.30 for evaluation criteria.

(2) *CBCT branch.* Use form CC 7021–01. Refer to § 5.31 for evaluation criteria.

(f) *Community.* In order to comply with 12 CFR 25.4(d), if the proposed relocated head office or branch will change the bank's existing community delineation, the applicant's board of directors must act upon any material change at its first regular meeting after the change, *i.e.*, the relocation of the office. In the application, the bank must indicate ways it intends to vary its lending policy, procedures or services at the proposed relocated office, if at all, and must discuss the extent to which services to the community surrounding the present location will be diminished, if at all.

(g) *Additional publication requirements for applications.* In

addition to the publication requirement of § 5.8(a), a notice must be published on the same day of two consecutive weeks in a newspaper of general circulation in the community in which the office to be relocated is located. In addition, a notice identical to that required by § 5.8(a) must be posted in the lobby of the office to be relocated on the date of the first publication in the newspaper, and must remain posted for 28 days.

(h) *Fees.* A filing fee of $500 is required with each application. No fee is required for a written notice.

(i) *Decision.* Written notification of the Office's decision on an application will be issued in accordance with § 5.13, except for CBCT branches, in which case the procedures stated in § 5.31(i) apply.

(j) *Commencement of business.* The relocation approval will expire if the subject office has not opened at the relocated site within 18 months (nine months for CBCT branches) after the date of preliminary approval. Extensions to this period generally are not granted; however, in the event of unusual circumstances, requests for extension may be submitted to the district office.

(k) *Authorization.* When all requirements and conditions are satisfied, authorization for the relocation will be granted.

(l) *Forms.* CC 7027–01: Instructions for Filing and Application to Relocate a Head Office or Domestic Branch.

(Approved by the Office of Management and Budget under control number 1557–0057.)

Dated: April 7, 1983.

C. T. Conover,

Comptroller of the Currency.

[FR Doc. 83–15677 Filed 6–9–83; 8:45 am]

BILLING CODE 4810–33–M

SMALL BUSINESS ADMINISTRATION

13 CFR Part 121

[Amdt. 40]

Definition of Small Business for Preferential Treatment in Purchase of Special Salvage Timber Sales (SSTS)

AGENCY: Small Business Administration.

ACTION: Final rule.

SUMMARY: This final rule amends the regulations pertaining to the size standard for small business concerns to be eligible for preferential award of special salvage timber sales (SSTS). The rule change defines and limits the conditions under which subcontractors may be used for harvest of SSTS timber. It will also eliminate the award of contracts to brokers who do not participate in the actual performance of the contracts.

EFFECTIVE DATE: June 10, 1983.

FOR FURTHER INFORMATION CONTACT: Joseph E. Kernan, Director, Office of Natural Resource Sales Assistance, Small Business Administration, 1441 "L" Street NW., Washington, D.C. 20416, Telephone: (202) 653–6586.

SUPPLEMENTARY INFORMATION: In connection with the sale of Government-owned special salvage timber designated by the U.S. Forest Service (USFS) as SSTS, a small business is a concern that:

(1) Is primarily engaged in the logging or forest products industry;

(2) Is independently owned and operated;

(3) Is not dominant in its field of operations; and

(4) Together with its affiliates, its number of employees has not exceeded 25 persons during any pay period for the past 12 months.

(5) Other regulatory restrictions are also applicable depending upon the eventual use to be made of timber. (See 13 CFR 121.3–9(c) (1), (2) and(3).

The SBA/USFS joint SSTS program is separate and distinct from the regular small business set-aside program involving USFS timber.

On March 7, 1983, (48 FR 9529), SBA published a proposed rule change to the size standard definition of a small business concern eligible for preferential award of an SSTS sale. Interested parties were given 30 days in which to submit comments. Three comments were received, all supporting the proposed change. One respondent did recommend a change to the regulation which was not a part of the proposed revision.

SBA hereby certifies that this rule does not constitute a major rule for the purpose of Executive Order 12291. In addition, this rule will not have a significant economic impact on a substantial number of small entities for the purpose of the Regulatory Flexibility Act. In this regard, the regulation will merely clarify that: (1) The SSTS program is intended to benefit small businesses; (2) that small businesses are required to perform SSTS contracts which they are awarded; and (3) that the program is not intended to permit large businesses to benefit as a result of subcontracts. Thus there will be no adverse impact upon small entities as a result of this regulation.

List of Subjects in 13 CFR Part 121

Small business.

PART 121—SMALL BUSINESS SIZE STANDARDS

Accordingly, pursuant to section 5 (b)(6) of the Small Business Act, 15 U.S.C 634(b)(6), 13 CFR 121.3–9 is amended as follows:

1. Paragraph (c)(2) is amended by adding the following new paragraph:

§ 121.3–9 [Amended]

(c) * * *

(2) * * *

(iii) It agrees that as an eligible logger, it will accomplish a significant portion of the logging operation, exclusive of hauling, with its own employees. Significant logging of timber means using its own employees to accomplish two or more of the following elements; (A) Felling and bucking, (B) yarding, (C) loading. It further agrees that such SSTS sale logging elements not accomplished with its own employees will be subcontracted only to concerns eligible for preferential award of an SSTS sale.

* * * * *

2. Paragraph (c)(3) is amended by revising paragraph (ii) and adding (iii) to read as follows:

* * * * *

(c) * * *

(3) * * *

* * * * *

(ii) It agrees that it will manufacture a significant portion of the logs with its own employees. Manufacture of logs means, at the minimum, a breakdown of the log into the rough cut of the finished product. The provision assumes that the successful bidder will remain a small business until the products have been manufactured. Accordingly, if, after acquiring the set-aside sale the bidder is purchased by, becomes controlled by, or merged with a large business, so much of such timber (or sawlogs therefrom) as is necessary shall be sold to one or more small businesses for compliance with the 30 percent (50 percent in Alaska) restriction. Any concern which self certifies as a small business concern for the purpose of award under a small business set-aside sale of government timber is expected to maintain evidence that it did so in good faith. Accordingly, such a concern will have to maintain for a period of 3 years the name, address, and size status of each concern to whom the timber or sawlogs were sold or disposed, and the log species, grades, and volumes involved. Such concern, and any subsequent small business concern that acquires the sawlogs, also shall require its small business purchasers to maintain similar records for a period of 3 years. Further, if the timber purchased is not to be resold in

the form of sawlogs but is to be manufactured into lumber or timbers by a concern other than the bidder, the bidder must maintain records to show the name, address, and size status of the concern manufacturing the sawlogs into lumber or timbers.

(iii) It further agrees that it will accomplish the logging of the SSTS timber, exclusive of hauling, with its own employees, or will subcontract such logging only to concerns eligible for preferential award of an SSTS sale.

(OMB Approval No. 0596–0021)

Dated: May 12, 1983.

In FR Doc. 83–12728 beginning on page 21898 in the issue of Monday, May 16, 1983, make the following correction:

On page 21914, center column, paragraph (c) of § 1406.1, in the tenth line, "after May 16, 1983" should have read "after May 16, 1984".

BILLING CODE 1505–01–M

DEPARTMENT OF HEALTH AND HUMAN SERVICES

Food and Drug Administration

21 CFR Part 177

[Docket No. 82F–0181]

Indirect Food Additives: Polymers; Polysulfone Resins

AGENCY: Food and Drug Administration.

ACTION: Final rule.

SUMMARY: The Food and Drug Administration (FDA) is amending the food additive regulations to provide for changes in the specifications and testing procedure for polysulfone resins as articles or components of articles intended for repeated use in contact with food. This action is based on a petition filed by Union Carbide Corp.

DATES: June 10, 1983; objections by July 11, 1983.

ADDRESS: Written objections to the Dockets Management Branch (HFA–305), Food and Drug Administration, Rm. 4–62, 5600 Fishers Lane, Rockville, MD. 20857.

FOR FURTHER INFORMATION CONTACT: Julie L. Ho, Bureau of Foods (HFF–344), Food and Drug Administration, 200 C St. SW., Washington, DC 20204, 202–472–5090.

SUPPLEMENTARY INFORMATION: In a notice published in the **Federal Register** of June 29, 1982 (47 FR 28159), FDA announced that a food additive petition (FAP 2B3629) had been filed by Union Carbide Corp., River Rd., Bound Brook, NJ 08805, proposing that Part 177 (21 CFR Part 177) of the food additive regulations be amended to provide for a change in the molecular weight specifications and testing requirements for polysulfone resins as articles or components of articles intended for repeated use in contact with food.

FDA has evaluated the data in the petition and other relevant material and concludes that the proposed food additive use is safe and that the regulations should be amended as set forth below.

In accordance with § 171.1(h) (21 CFR 171.1(h)), the petition and the documents that FDA considered and relied upon in reaching its decision to approve the petition are available for inspection at the Bureau of Foods (address above) by appointment with the information contact person listed above. As provided in § 171.1(h)(2), the agency will delete from the documents any materials that are not available for public disclosure before making the documents available for inspection.

The agency has previously considered the potential environmental effects of this rule as announced in the notice of filing published in the **Federal Register**. No new information or comments have been received that would alter the agency's previous determination that there is no significant impact on the human environment and that an environmental impact statement is not required.

List of Subjects in 21 CFR Part 177

Food additives, Polymeric food packaging.

Therefore, under the Federal Food, Drug, and Cosmetic Act (secs. 201(s), 409, 72 Stat. 1784–1788 as amended (21 U.S.C. 321(s), 348)) and under authority delegated to the Commissioner of Food and Drugs (21 CFR 5.10), and redelegated to the Bureau of Foods (21 CFR 5.61 as revised February 4, 1983; 48 FR 5251), Part 177 is amended in § 177.2500 by revising paragraphs (a) and (c), to read as follows:

PART 177—INDIRECT FOOD ADDITIVES: POLYMERS

§ 177.2500 Polysulfone resins.

* * * * *

(a) For the purpose of this section, polysulfone resins (poly(oxy-*p*-phenylenesulfonyl-*p*-phenyleneoxy-*p*-phenyleneisopropylidene-*p*-phenylene)resins) (CAS Reg. No. 25154–01–2) consist of basic resins produced when the disodium salt of 4,4′-isopropylidenediphenol is made to react with 4,4′-diochlorodiphenyl sulfone such that the finished resins have a minimum number average molecular weight of 15,000, as determined by osmotic pressure in monochlorobenzene.

* * * * *

(c) Polysulfone resins, when extracted at reflux temperatures for 6 hours with the solvents-distilled water, 50 percent (by volume) ethyl alcohol in distilled water, 3 percent acetic acid in distilled water, and *n*-heptane, yields total extractives in each extracting solvent not to exceed 0.0078 milligram per square centimeter (0.05 milligram per square inch) of resin surface.

Note.—In testing the finished polysulfone resins, use a separate resin test sample for each required extracting solvent.

* * * * *

Any person who will be adversely affected by the foregoing regulation may at any time on or before July 11, 1983 submit to the Dockets Management Branch (address above) written objections thereto and may make a written request for a public hearing on the stated objections. Each objection shall be separately numbered and each numbered objection shall specify with particularity the provision of the regulation to which objection is made. Each numbered objection on which a hearing is requested shall specifically so state; failure to request a hearing for any particular objection shall constitute a waiver of the right to a hearing on that objection. Each numbered objection for which a hearing is requested shall include a detailed description and analysis of the specific factual information intended to be presented in support of the objection in the event that a hearing is held; failure to include such a description and analysis for any particular objection shall constitute a waiver of the right to a hearing on the objection. Three copies of all documents shall be submitted and shall be identified with the docket number found in brackets in the heading of this regulation. Received objections may be seen in the office above between 9 a.m. and 4 p.m., Monday through Friday.

Effective date. This regulation becomes effective June 10, 1983.

(Secs. 201(s), 409, 72 Stat. 1784–1788 as amended (21 U.S.C. 321(s), 348))

Dated: June 2, 1983.

Richard J. Ronk,

Acting Director, Bureau of Foods.

[FR Doc. 83-15537 Filed 6-9-83; 8:45 am]
BILLING CODE 4160-01-M

21 CFR Part 520

Oral Dosage Form New Animal Drugs Not Subject to Certification; Sulfaquinoxaline

AGENCY: Food and Drug Administration.

ACTION: Final rule.

SUMMARY: The Food and Drug Administration (FDA) is amending the animal drug regulations to reflect approval of supplemental new animal drug applications (NADA's) filed by Ralston Purina Co., providing for use of 3.44–percent and 12.85–percent solutions of sulfaquinoxaline in drinking water for chickens, turkeys, cattle, and calves to control or treat various diseases caused by certain pathogenic organisms. The supplemental NADA's provided revised labeling to conform with the National Academy of Sciences/National Research Council (NAS/NRC) Drug Efficacy Study Implementation (DESI) review of the products.

EFFECTIVE DATE: June 10, 1983.

FOR FURTHER INFORMATION CONTACT: Charles E. Haines, Bureau of Veterinary Medicine (HFV–138), Food and Drug Administration, 5600 Fishers Lane, Rockville, MD 20857, 301–443–3410.

SUPPLEMENTARY INFORMATION: Ralston-Purina Co. Checkerboard Square, St. Louis, MO 63199, filed supplements to NADA's 7–076 and 8–224 that provide for use of 3.44–percent and 12.85–percent solutions of sulfaquinoxaline for medication of chickens, turkeys, cattle, and calves. The products are used in drinking water for control of coccidiosis, fowl typhoid, and acute fowl cholera in chickens and turkeys and for control and treatment of coccidiosis in cattle and calves when the diseases are caused by certain pathogenic organisms.

The NAS/NRC-reviewed Ralston Purina's sulfaquinoxaline products and concluded that they are probably effective or effective for their intended uses. FDA concurred in the NAS/NRC findings (35 FR 11068, July 9, 1970; 48 FR 3962, January 28, 1983). Ralston Purina has submitted information to comply with the NAS/NRC review and has revised its labeling accordingly. On that basis, the supplemental NADA's are approved and the regulations are amended accordingly.

NADA's that pertain to identical products and reflect those conditions of use as set forth in this regulation do not require efficacy data as specified by § 514.1(b)(8)(ii) or § 514.111(a)(5)(ii)(*a*)(*4*) (21 CFR 514.1(b)(8)(ii) or § 514.111(a)(5)(ii)(*a*)(4)) of the animal drug regulations. In lieu of such data, approval may require bioequivalency or similar data as suggested in the guideline for submitting NADA's for NAS/NRC-reviewed generic drugs. The guideline is available from the Dockets Management Branch (HFA–305), Food and Drug Administration, Rm. 4–62, 5600 Fishers Lane, Rockville, MD 20857. In addition, applications must be accompanied by a written commitment to undertake the human safety studies required by FDA.

These supplemental NADA's concern only the drug's effectiveness and its safety to the target animal. The human food safety aspects of sulfaquinoxaline are being evaluated separately (see 48 FR 3963; January 28, 1983).

In accordance with the freedom of information provisions of Part 20 (21 CFR Part 20) and § 514.11(e)(2)(ii) (21 CFR 514.11(e)(2)(ii)), a summary of safety and effectiveness data and information submitted to support approval of this application may be seen in the Dockets Management Branch (address above), from 9 a.m. to 4 p.m., Monday through Friday.

The agency has determined pursuant to 21 CFR 25.24(d)(1)(i) (proposed December 11, 1979; 44 FR 71742) that this action is of a type that does not individually or cumulatively have a significant impact on the human environment. Therefore, neither an environmental assessment nor an environmental impact statement is required.

List of Subjects in 21 CFR Part 520

Animal drugs, Oral use.

Therefore, under the Federal Food, Drug, and Cosmetic Act (Sec. 512(i), 82 Stat. 347 (21 U.S.C. 360b(i))) and under authority delegated to the Commissioner of Food and Drugs (21 CFR 5.10) and redelegated to the Bureau of Veterinary Medicine (21 CFR 5.83), Part 520 is amended in § 520.2325a by revising paragraph (c), the introductory text of paragraph (e), and paragraph (e)(4)(ii) and by adding paragraph (e)(4)(iii), to read as follows:

PART 520—ORAL DOSAGE FORM NEW ANIMAL DRUGS NOT SUBJECT TO CERTIFICATION

§ 520.2325a Sulfaquinoxaline drinking water.

* * * * *

(c) *Sponsor.* (1) Use of a 25-percent soluble powder and a 20-percent solution has been granted to No. 000006 in § 510.600(c) of this chapter for use as provided for in paragraph (e) of this section.

(2) Use of 3.44-percent and 12.85-percent solutions has been granted to No. 017800 in § 510.600(c) of this chapter for use as provided for in paragraph (e)(1), (2), (3), (4)(i), and (4)(ii) of this section.

* * * * *

(e) *Conditions of use.* It is used in drinking water as follows:

* * * * *

(4) * * *

(ii) Administer at the 0.015-percent level for 3 to 5 days in drinking water medicated with sulfaquinoxaline solution.

(iii) In lieu of treatment as provided in paragraph (e)(4)(ii) of this section, administer 1 teaspoon of 25-percent sulfaquinoxaline soluble powder per day for each 125 pounds of body weight for 3 to 5 days in drinking water.

* * * * *

Effective date. June 10, 1983.

(Sec. 512(i), 82 Stat. 347 (21 U.S.C. 360b(i)))

Dated: June 3, 1983.

BILLING CODE 4160-01-M

21 CFR Part 520

Oral Dosage Form New Animal Drugs Not Subject to Certification; Sulfamethazine Sustained-Release Tablets

AGENCY: Food and Drug Administration.

ACTION: Final rule.

SUMMARY: The Food and Drug Administration (FDA) is amending the animal drug regulations to reflect approval of a new animal drug application (NADA) filed by Norden Laboratories, Inc., providing for safe and effective use of sulfamethazine sustained-release tablets in treating calves for certain infections caused by sulfamethazine-sensitive organisms.

EFFECTIVE DATE: June 10, 1983.

FOR FURTHER INFORMATION CONTACT: Charles E. Hines, Bureau of Veterinary

Medicine (HFV–133), Food and Drug Administration, 5600 Fishers Lane, Rockville, MD 20857, 301–443–3410.

SUPPLEMENTARY INFORMATION: Norden Laboratories, Inc., Lincoln, NE 68501, filed NADA 126–232 providing for the safe and effective use of sustained-release tablets containing 8 grams of sulfamethazine for treating calves for bacterial pneumonia caused by *Pasteurella* spp., colibacillosis (bacterial scours) caused by *Escherichica coli,* and calf diphtheria caused by *Fusobacterium necrophorum.* Effectiveness of the product was established based on Norden's approved NADA 49–892, which is for the same product in a different tablet size. Norden also submitted data demonstrating that therapeutically effective blood plasma levels of free sulfamethazine are produced within 4 to 6 hours after administration of the drug and are sustained for up to 96 hours.

Animal safety in calves was established based on data showing the safety of doses containing up to three times the recommended dosage level. A tissue residue study established that use of the drug as proposed, with an 18-day withdrawal period, would result in no residues exceeding the negligible residue tolerance provided for in 21 CFR 556.670. Based on the data and information submitted, the NADA is approved and the regulations are amended accordingly.

In accordance with the freedom of information provisions of Part 20 (21 CFR Part 20) and § 541.11(e)(2)(ii) (21 CFR 541.11(e)(2)(ii)), a summary of safety and effectiveness data and information submitted to support approval of this application may be seen in the Dockets Management Branch (HFA–305), Food and Drug Administration, Rm. 4–62, 5600 Fishers Lane, Rockville, MD 20857, from 9 a.m. to 4 p.m., Monday through Friday.

The Bureau of Veterinary Medicine has carefully considered the potential environmental effects of this action and has concluded that the action will not have a significant impact on the human environment and that an environment impact statement therefore will not be prepared. The Bureau's finding of no significant impact and the evidence supporting this finding, contained in a statement of exemption (pursuant to 21 CFR 25.1(f) (1) (iii) and (g)) may be seen in the Docket Management Branch (address above) between 9 a.m. and 4 p.m., Monday through Friday.

List of Subjects in 21 CFR Part 520

Animal drugs, Oral.

Therefore, under the Federal Food, Drug, and Cosmetic Act (sec. 512(i), 82 Stat. 347 (21 U.S.C. 360b(i))) and under authority delegated to the Commissioner of Food and Drugs (21 CFR 5.10) and redelegated to the Bureau of Veterinary Medicine (21 CFR 5.83), Part 520 is amended by adding new § 520.2260c, to read as follows:

PART 520—ORAL DOSAGE FORM NEW ANIMAL DRUGS NOT SUBJECT TO CERTIFICATION

§ 520.2260c Sulfamethazine sustained-release tablets.

(a) *Sponsor.* See No. 011519 in § 510.600(c) of this chapter for use of an 8-gram sulfamethazine sustained-release tablet.

(b) *Conditions of use*—(1) *Amount.* 8 grams (1 tablet) per 45 pounds of body weight as a single dose.

(2) *Indications for use.* In calves for sustained treatment of pneumonia caused by *Pasteurella* spp., colibacillosis (bacterial scours) caused by *Escherichia coli;* and calf diptheria caused by *Fusobacterium necrophorum.*

(3) *Limitations.* If there is no response within 2 to 3 days, reevaluate therapy. Do not crush tablets. Treated animals must not be slaughtered for food within 18 days after the latest treatment. Federal law restricts this drug to use by or on the order of a licensed veterinarian.

Effective date. June 10, 1983.

(Sec. 512(i), 82 Stat. 347 (21 U.S.C. 360b(i)))

BILLING CODE 4150–01–M

DEPARTMENT OF THE INTERIOR

Bureau of Land Management

30 CFR Part 226

[Circular No. 2527]

Unit or Cooperative Agreements; Formation and Operation of Onshore Federal and Indian Oil and Gas Unit Plans

AGENCY: Bureau of Land Management, Interior.

ACTION: Final rulemaking.

SUMMARY: This final rulemaking will amend the regulations governing the formation and operation of onshore Federal and Indian oil and gas unit plans. The provisions are revised and modernized to eliminate unnecessary items and to incorporate certain modifications in recognition of changed circumstances which have evolved since 1951, when the part was last published in its entirety. The model unit agreement (30 CFR 226.12) for unproven areas is revised to incorporate all previously accepted modifications and those resulting from this rulemaking.

EFFECTIVE DATE: July 11, 1983.

ADDRESS: George F. Brown, Deputy Associate Director for Onshore Minerals Operations, Bureau of Land Management, 12203 Sunrise Valley Drive, Reston, Virginia 22091.

FOR FURTHER INFORMATION CONTACT: Mr. Gerald R. Daniels (703) 860–7535, (FTS) 928–7535, or Mr. Stephen H. Spector (703) 860–7989, (FTS) 928–7989.

SUPPLEMENTARY INFORMATION: The principal authors of this final rulemaking are Mr. Gerald R. Daniels and Mr. Stephen H. Spector, Reston, Virginia; Mr. Leo Kozola, Casper, Wyoming; and Mr. Joseph Lara, Albuquerque, New Mexico.

By Secretarial Order No. 3087, of December 3, 1982, the Secretary of the Interior transferred all onshore minerals management functions, except royalty management, on non-Indian lands from the Minerals Management Service (MMS) to the Bureau of Land Management (BLM). All such functions relating to Indian lands similarly were transferred to the BLM by an amendment to the Order.

These unitization regulations, as well as the non-royalty provisions of other onshore regulations contained in Chapter II, Title 30 of the Code of Federal Regulations will be transferred to Title 43 of the CFR at a later date.

The MMS published these regulations as proposed rulemaking on June 10, 1982 (47 FR 25252). Comments were invited for 45 days ending July 26, 1982. There were 25 separate comments received, including 16 from oil and gas operators, 4 from law firms with oil and gas practice, 2 from consultants involved in the formation of units, 1 from an oil and gas association, 1 from an organization which represents several Indian Tribes, and 1 from an agency of the Federal Government.

Most commenters felt the proposal adequately incorporated all approved modifications to unit agreements currently in use and one went as far as endorsing the proposal as published. However, most respondents recommended various technical, editorial or, in some cases, substantive modification to the proposal, which are discussed herein.

A generalized comment expressed by two operators related to oil and gas

operations in Alaska, particularly on the North Slope. They both expressed concern about a unit operator's ability to meet the time requirements in order to fulfill the obligations under a unit agreement in the Arctic region. We recognize that the model contained in these regulations may not address the unique operating conditions which may be encountered in Alaska. While we believe most of these concerns can be resolved by reliance on section 25 of the model, UNAVOIDABLE DELAY, it is also possible for field personnel in Alaska to authorize appropriate modifications in the language of the model agreement which address these concerns. However, we do not believe such provisions need be included in the model agreement, since most unitization proposals are for lands in the "lower 48."

Another area of general concern expressed by two commenters was the impact of Indian lands and leases on the formation and development of units. While the commenters urged opposite solutions to a perceived problem (one urged more and the other less direct Indian involvement in approval), they both seemed to agree that the proposed modification to section 226.7 was an improvement. We have not adopted the suggestion to include a provision for tribal consent in the regulations. The BLM will continue the past MMS practice of looking to the appropriate office of the Bureau of Indian Affairs (BIA) for contact with and consent by tribal of individual allottee lessors to unitization proposals involving Indian lands, and will continue to require final approval thereof by BIA, including appropriate tribal and allottee consent. In addition, since the Indian leases involved are issued under Federal law contained in Title 25 of the United States Code, reference to "tribal law" does not appear appropriate for these regulations. BLM will continue to incorporate all necessary modifications to proposed unit agreements and plans involving Indian lands which BIA provides to meet special situations. The suggestion to include some of the usual modifications in the model agreement has not been adopted since the vast majority of proposed agreements do not include Indian lands and § 226.12 is provided as a model to cover most situations. The inclusion of references to "Indian lands" or royalties due the "Indian tribe" is generally provided by the BIA prior to the agreement being presented for final approval.

The following comments are listed under the section of the proposed regulation to which they relate. Sections which received no comments or only editorial suggestions are not listed.

Definitions. (§ 226.2)

In the interest of facilitating possible future additions to this section and for uniformity with generally accepted practice, the definitions are now listed in alphabetical order and are listed without any individual designation (i.e., (a), (b), etc.) as they appeared in the proposed rulemaking.

Authorized Officer

The definition of the Deputy Minerals Manager has been replaced with a definition of "authorized officer." The recent transfer of the onshore minerals management functions from MMS to BLM makes this change appropriate; however, this should not impact the performance of the various unit approval functions by BLM. In a related change, the final rulemaking includes a definition for "Proper BLM office." This definition and that for "authorized officer" are identical to those found in Title 43 CFR Group 3000.

Participating area

Several commenters suggested that the definition of a "participating area" be expanded to eliminate uncertainty and different interpretations. While we agree that it would be desirable to have a precise definition that could be used in all cases to determine the participating area, we feel such a definition is not possible. Guidelines to eliminate field office inconsistencies will be developed and issued as soon as practical. However, the regulatory definition must be general enough to cover the diverse situations which actually are encountered by BLM in its administration of these regulations. A suggestion to modify the definition so that it conforms more closely with the content of section 11 of the model agreement has been adopted.

Designation of unit area; depth of test well. (§ 226.3)

A few commenters requested that the references to furnishing and protecting information should be made more specific and refer to the specific section of 30 CFR Part 221. In addition, a reference to land status omitted reference to Indian land. All requested revisions have been made.

Parties to unit agreement. (§ 226.5)

Several commenters recommended revising this section to eliminate the requirement to submit evidence no longer required by the leasing regulations of Title 43 of the CFR. This change has been adopted.

Qualification of unit operator. (§ 226.6)

This section has not been modified even though several commenters pointed to the proposed modification of the BLM's leasing regulations. When the change to Title 43 of the CFR becomes final, the basic "manner" of qualification will be changed; however, the reference in these regulations to such manner will remain correct. Should any future changes be made to the qualification section of the leasing rules, these also would be incorporated automatically by this provision.

Inclusion of non-Federal lands. (§ 226.7)

In addition to the general comments concerning Indian lands noted above, minor changes were made for clarity.

Approval of unit agreement. (§ 226.8)

Several commenters questioned the deletion of paragraph (b) from the existing § 226.8. Generally, they stated the provision authorized the waiver of portions of the operating regulations of 30 CFR Part 221 whenever: (i) Federal land constitutes less than 50 percent of the unitized land, (ii) the field is fully developed, and (iii) the Federal land has less than 50 percent of the estimated recoverable unitized substances. However, past experience has shown that relief under this provision has not been requested and even without the provision, the authorized officer can still apply or waive 30 CFR Part 221, as appropriate, with respect to a particular drilling operation on Federal or Indian land. As previously stated in the proposed rulemaking, we believe the benefit of operating under the same general control has been shown and that retention of the prior provision is unnecessary.

A few commenters stated that the current practice of accepting a non-Federal unit agreement when less than 10 percent of the unitized area is Federal land should be specifically authorized in the regulations. We agree, but believe a more appropriate section for such a provision is § 226.4, *Preliminary consideration of unit agreement,* and appropriate language has been included there.

Retroactive approval of a communitization agreement. (§ 226.9–1)

Several commenters suggested that while the provision may prove beneficial, it was inappropriate for inclusion in these regulations and should be included in Title 43 Group 3100. BLM's proposed rulemaking of June 30, 1982, includes an identical provision at 43 CFR 3105.2 (47 FR 28550, 28561). Therefore, this proposed

provision has been deleted from further consideration by this rulemaking.

Model onshore unit agreement for unproven area. (§ 226.12)

Several commenters recommended editorial changes, such as the capitalization of the section headings, punctuation and grammatical improvement. Where the established meaning of a provision is unaffected by the proposed change, the recommendation has been adopted. The recommended changes to individual sections of the model are discussed below:

Section 1. A few commenters suggested some change in the wording of this paragraph; however, as the existing wording is clear and effective, it has been retained.

Section 2(d). A commenter questioned the addition of language permitting use of a date, other than the agreed to effective date. Upon reconsideration, the proposed language has been dropped.

Section 2(e). Several commenters took exception to the elimination of that portion of section 2(e) of the modified agreements currently in use which provides for a 2-year extension beyond the 10-year period at which time contraction is required. While most commenters agreed that 10 years normally would be sufficient time to develop the unit area, they pointed to several instances when the 2-year extension was appropriate and had been utilized. There have not been any apparent abuses of this provision, and it has been shown to be of legitimate value in aiding conservation of the resource. Therefore, these comments are accepted and the modified language currently in use is retained and included in the regulation.

Sections 9 and 9(a). Several commenters indicated that these proposed provisions were unclear. The language had been included to indicate when operations begin. The suggestion to use only one term throughout the section has been adopted. It should now be clear that the obligations of this section are fulfilled when actual drilling operations are commenced and continued thereafter diligently.

Two commenters took exception to the use of the terms "penetrate" and "penetrated" in place of the existing terms "test" and "tested." The intent of the change was to provide more clarification. As the desired result apparently was not achieved, the existing terms have been retained.

The language of the proposed rulemaking would have changed the ability of the authorized officer to modify the drilling requirement from the model now in use. Several commenters questioned the appropriateness of limiting this discretion. While we continue to believe that fixed drilling requirements are in the public interest, we agree that the limitation of flexibility can result in actual hardship. Therefore, the language of the existing model has been retained.

The designation "9a" has been dropped from the optional multiple well provision so that the model will more clearly indicate that: (i) When multiple wells are required, it is part of the DRILLING TO DISCOVERY section, and (ii) in all cases, the last paragraph of section 9 will relate to unit termination.

The provision which includes voluntary termination of a unit agreement during the first year has been modified in both sections 9 and 20 to read "* * * during the first 6 months * * *." This change is made so that the provision will be consistent with the provision resulting in automatic termination for failure to commence the initial well within 6 months after the unit plan becomes effective, unless an extension has been granted. Several commenters expressed support for this provision. In fact, one commenter stated that "To obtain the benefits of unitization, the parties should be obligated to drill at least one obligation well."

Section 11. One commenter identified an inconsistency between the first and second paragraphs of this section. We agree that the provisions did not agree as to the inclusion of lands "which are necessary for unit operations" in a participating area. While the majority of participating areas include only those lands which are reasonably proved productive of unitized substances in paying quantities, some units require other land which is critical to unit operations to be included in a participating area. For example, these other lands may include those upon which an injection well is located. Therefore, to remove the ambiguity, the phrase "* * * which are necessary for unit operations" has been added to the second paragraph.

One commenter requested the relaxation of strict requirement that only the "* * * last approved public-land survey as of the effective date of each initial participating area" be utilized. We cannot agree. While not all officially recognized cadastral surveys are performed by Government employees, they are all *approved* in accordance with the system used since 1789 to provide for orderly transfer of our Nation's lands.

One commenter pointed out that the same basic concept was referred to twice in the section but with the use of two different terms. The use of the phrase "reasonably *estimated* to be productive" was said to be somewhat different than "reasonably *proved* to be productive." We agree and have changed the reference in the second paragraph to use "proved."

One commenter recommended additional language dealing with elimination of land from a participating area due to depletion of unitized substances. As we are not aware that the current language has presented any problem in administration, this suggested change was not adopted.

Section 13. This section had been rewritten in the proposed rulemaking so that the objective would be stated in simpler terms, recognizing that the current provision covers several possible well locations. One commenter expressed concern that the intent of the provision had been altered. We believe the new terms provide for drilling both to expand an existing participating area and to establish new ones, even when such drilling takes place from a surface location within a previously established participating area. However, to more precisely indicate the intent, the term "that" has been substituted for "the" in line eight of the first sentence. This should clarify the intent that the location of a well proposed pursuant to this section may not be within a participating area for the specific formation to be tested.

Section 15. One commenter requested that the second paragraph be continued as an optional provision. The modified model agreement now in use has not included this as an optional provision for many years. Therefore, the suggestion is not adopted since the change merely brings the model agreement into consistency with actual practice.

Section 17. Several commenters recommended that the language proposed for deletion from the existing model in the regulations be reinserted. This language provided for the payment of compensatory royalty. Because protective wells have long been preferred over the payment of compensatory royalty, the language in question has not appeared in modified models used by the petroleum industry and the government for many years. We agree that since compensatory royalty is an alternative method of dealing with drainage, the section would be more complete with the inclusion of such an option. However, to show clearly that in most cases, protection will be provided by the drilling of a well, the language

inserted has been modified slightly from that proposed.

Section 18. The text of the proposed rulemaking printed in the **Federal Register** erroneously carried a line in paragraph (e) which was to appear in paragraph (b). This has been corrected. A few commenters reiterated their assertion that the provision shown as section 18(h) should be deleted from the model agreement. It is felt that this provision has been included in the model for many years without major problems. In response to comments received as a result of the previous Notice of Intent, the provision was changed to be an optional rather than required term. We believe this provides the flexibility desired by all concerned parties.

Section 20. The effective date of the unit agreement continues to be the date executed on behalf of the Department. The provision relating to voluntary termination during the first year is modified as noted in discussion of § 9. In addition, several commenters recommended including the time frame contained in the leasing regulations (Title 43 CFR) in paragraph 20(c). This recommendation has been adopted.

Section 28. One commenter requested that this provision be changed back to the current language dealing with effective date. This suggestion is not adopted. The language of this section was changed to provide that subsequent joinders to an agreement will be effective as of the date filed, unless otherwise provided in the agreement. The change from effective on the first day of the month following filing was made in accordance with the decision of the Interior Board of Land Appeals (IBLA) in the case of *Bruce Anderson,* 30 IBLA 179 (May 19, 1977). In that decision, the IBLA held that a subsequent joinder was effective on the date filed for the purpose of preserving a lease which would otherwise expire on the last day of the month. However, for determining the benefits and obligations under the unit agreement, some other more appropriate date may be provided in the agreement. We agree with the commenter that the first of the following month would be "* * * preferred, from an accounting viewpoint * * *," but we believe the new provision allows the parties the flexibility of making another date controlling as to the parties, while the filing date will control as to the lessor.

E.O. 12291 Federal Regulation

The Department of the Interior has determined that this document is not a major rule and does not require a regulatory analysis under Executive Order 12291 because the existing regulatory scheme was found to be basically sound and required only minor revision to incorporate approved modifications to current agreement and to eliminate unnecessary provisions. In addition, the revision of § 226.9 has reduced the number of copies of most documents submitted to the authorized officer. This will provide a minor duplicating cost savings for the approximately 150 unit filings made annually.

Regulatory Flexibility Act

The Department has also determined that the rulemaking will not have a significant economic effect on a substantial number of small entities, and does not require a regulatory flexibility analysis under the Regulatory Flexibility Act (5 U.S.C. 601 et seq.). The updating of 30 CFR 226 to more accurately reflect advances made in the past 30 years may result in some savings to those small operators and lessees who wish to enter into unit agreements.

Environmental Effects

It is hereby determined that this final rulemaking does not constitute a major Federal action significantly affecting the quality of the human environment and that no detailed statement pursuant to section 102(2)(C) of the National Environmental Policy Act of 1969 (42 U.S.C. 4332(2)(C)) is required.

Paperwork Reduction Act

Unit agreements which conform to the model set out in § 226.12 of these regulations are basically contracts between the private parties and not an information collection requirement. It is submitted to BLM for approval to insure that the rights granted to each lessee of a Federal or Indian lease and the rights of the lessor are not adversely impacted through the joining of such a lease to a unit plan of operations. All operations continue to be conducted under 30 CFR Part 221 and the information collection requirements of that section apply to the unitized operations as if the unit area were a single, consolidated lease. The model agreement does not constitute information collection as defined by 44 U.S.C. 3502 and, therefore, does not require OMB approval.

List of Subjects in 30 CFR Part 226

Government contracts, Oil and gas reserves, Public lands—mineral resources.

Under the authority of the Act of February 25, 1920, as amended and supplemented (30 U.S.C. 189, 226j), and Executive Order 12291 (46 FR 13193), Part 226, Chapter II, Title 30 of the Code of Federal Regulations is revised as set forth below.

Dated: May 10, 1983.

Garrey E. Carruthers,

Assistant Secretary of the Interior.

PART 226—ONSHORE OIL AND GAS UNIT AGREEMENTS

Sec.

226.1 Introduction and jurisdiction.
226.2 Definitions.
226.3 Designation of unit area; depth of test well.
226.4 Preliminary consideration of unit agreement.
226.5 Parties to unit agreement.
226.6 Qualifications of Unit Operator.
226.7 Inclusion of non-Federal lands.
226.8 Approval of unit agreement.
226.9 Filing of papers and number of counterparts.
226.10 Bonds.
226.11 Appeals.
226.12 Model onshore unit agreement for unproven areas.
226.13 Model Exhibit "A."
226.14 Model Exhibit "B."
226.15 Model collective bond.
226.16 Model for designation of successor unit operator by working interest owners.
226.17 Model for change in unit operator by assignment.

Authority: The Act of February 25, 1920 (30 U.S.C. 181, 189, 226(e), 226(j)), as amended.

§ 226.1 Introduction and jurisdiction.

(a) The regulations in this part prescribe the procedures to be followed and the requirements to be met by the owners of any right, title, or interest in Federal oil and gas leases (see § 226.2), and their representatives who wish to unite with each other, or jointly or separately with others, in collectively adopting and operating under a unit plan for the development of any oil or gas pool, field, or like area, or any part thereof. All unit operations on Federal leases are subject to the regulations contained in 30 CFR Part 221, Onshore Oil and Gas Operations. All unit operations on non-Federal lands included within Federal unit plans are subject to the reporting requirements of 30 CFR Part 221.

(b) Subject to the supervisory authority of the Secretary, the administration of the regulations in this part shall be under the jurisdiction of the Authorized Officer (AO). In the exercise of his jurisdiction, the AO shall be subject to the direction and supervisory authority of the Director, Bureau of Land Management, who may exercise the jurisdiction of the AO.

§ 226.2 Definitions.

The following terms, as used in this part or in any unit agreement approved under the regulations in this part, shall

have the meanings here indicated unless otherwise defined in such unit agreement:

Authorized officer (AO). Any employee of the Bureau of Land Management who has been delegated the authority to perform the duties described in this Part.

Director. The Director of the Bureau of Land Management or any person authorized to act on the Director's behalf.

Federal lease. A lease issued under the Act of February 25, 1920, as amended (30 U.S.C. 181, et seq.); the Act of May 21, 1930 (30 U.S.C. 351–359); the Act of August 7, 1947 (30 U.S.C. 351, et seq.); or the Act of November 16, 1981 (Pub. L. 97–98, 95 Stat. 1070).

Participating area. That part of a unit area which is considered reasonably proven to be productive in paying quantities or which is necessary for unit operations and to which production is allocated in the manner prescribed in the unit agreement.

Proper BLM office. The Bureau of Land Management office having jurisdiction over the lands subject to the regulation in this Part. When two or more offices have jurisdicition over the lands to be unitized, the "proper BLM office" shall be the office having jurisdiction over the majority of the unit area when the unit is formed.

Secretary. The Secretary of the Interior or any person duly authorized to exercise the powers vested in that officer.

Unit agreement (agreement). An agreement or plan for the development and operation which provides for the recovery of oil and/or gas from the lands made subject thereto, as a single consolidated entity without regard to separate ownerships and for the allocation of costs and benefits on a basis, as defined in the agreement or plan.

Unit area. The area described in an agreement as constituting the land logically subject to exploration and/or development under such agreement.

Unit operator. The person, association, partnership, corporation, or other business entity designated under a unit agreement to conduct operations on unitized land, as specified in such agreement.

Unitized land. Those lands within a unit area which are committed to an approved agreement or plan.

Unitized substances. Deposits of oil and gas contained in the unitized land which are recoverable in paying quantities by operation under and pursuant to an agreement.

Working interest. An interest held in unitized substances or in lands containing the same by virtue of a lease, operating agreement, fee title, or otherwise, under which, except as otherwise provided in the agreement, the owner of such interest is vested with the right to explore for, develop, and produce such substances. The rights delegated to the unit operator by the unit agreement are not regarded as a working interest.

§ 226.3 Designation of unit area; depth of test well.

An application for designation of an area as logically subject to development under a unit agreement and for determination of the depth of a test well may be filed by a proponent of such an agreement at the proper BLM office. Such application shall be accompanied by a map or diagram on a scale of not less than 2 inches to 1 mile, outlining the area sought to be designated under this section. The Federal, State, Indian and privately owned land should be indicated by distinctive symbols or colors. Federal and Indian oil and gas leases and lease applications should be identified by lease serial numbers. Geologic information, including the results of any geophysical surveys, and any other available information showing that unitization is necessary and advisable in the public interest should be furnished. If requested, geologic, geophysical and other related information so furnished will be treated as confidential in accordance with the provisions of 30 CFR 221.33. These data will be considered by the AO and the applicant will be informed of the decision reached. The designation of an area, pursuant to an application filed under this section, shall not create an exclusive right to submit an agreement for such area, nor preclude the inclusion of such area or any party thereof in another unit area.

§ 226.4 Preliminary consideration of unit agreement.

The model unit agreement set forth in § 226.12, is acceptable for use in unproven areas. Unique situations requiring special provisions should be clearly identified, since these and other special conditions may necessitate a modification of the model unit agreement set forth in § 226.12. Any proposed special provisions or other modifications of the model agreement should be submitted for preliminary consideration so that any necessary revision may be prescribed prior to execution by the interested parties. Where Federal lands constitute less than 10 percent of the total unit area, a non-Federal unit agreement may be used. Upon submission of such an agreement, the AO will take appropriate action to commit the Federal lands.

§ 226.5 Parties to unit agreement.

The owners of any right, title, or interest in the oil and gas deposits to be unitized are regarded as proper parties to a proposed agreement. All such parties must be invited to join the agreement. If any party fails or refuses to join the agreement, the proponent of the agreement, at the time it is filed for approval, must submit evidence of reasonable effort made to obtain joinder of such party and, when requested, the reasons for such nonjoinders. The address of each signatory party to the agreement should be inserted below the signature. Each signature should be attested by at least one witness if not notarized. The signing parties may execute any number of counterparts of the agreement with the same force and effect as if all parties signed the same document, or may execute a ratification or consent in a separate instrument with like force and effect.

§ 226.6 Qualification of unit operator.

A unit operator must qualify as to citizenship in the same manner as those holding interests in Federal oil and gas leases under the regulations at 43 CFR Group 3100. The unit operator may be an owner of a working interest in the unit area or such other party as may be selected by the owners of working interests. The unit operator shall execute an acceptance of the duties and obligations imposed by the agreement. No designation of or change in a unit operator will become effective until approved by the AO, and no such approval will be granted unless the successor unit operator is deemed qualified to fulfill the duties and obligations prescribed in the agreement.

§ 226.7 Inclusion of non-Federal lands.

(a) Where State-owned land is to be unitized with Federal lands, approval of the agreement by appropriate State officials must be obtained prior to its submission to the proper BLM office for final approval. When authorized by the laws of the State in which the unitized land is situated, appropriate provision may be made in the agreement, recognizing such laws to the extent that they are applicable to non-Federal unitized land.

(b) When Indian lands are included, modification of the unit agreement will be required where appropriate. Approval of an agreement containing Indian lands by the Bureau of Indian

Affairs must be obtained prior to final approval by the AO.

§ 226.8 Approval of unit agreement.

A unit agreement will be approved by the AO upon a determination that such agreement is necessary or advisable in the public interest and is for the purpose of more properly conserving natural resources. Such approval will be incorporated in a Certification-Determination document appended to the agreement (example in § 226.12). No such agreement will be approved unless the parties signatory to the agreement hold sufficient interests in the unit area to provide reasonably effective control of operations. Any modification of an approved agreement will require the prior approval of the AO.

§ 226.9 Filing of papers and number of counterparts.

(a) All papers, instruments, documents, and proposals submitted under this part should be filed in the proper BLM office.

(b) An application for designation of a proposed unit area and determination of the required depth of test well(s) shall be filed in duplicate. A like number of counterparts should be filed of any geologic data and any other information submitted in support of such application.

(c) Where a duly executed agreement is submitted for final approval, a minimum of four signed counterparts should be filed. The number of counterparts to be filed for supplementing, modifying, or amending an existing agreement, including change of unit operator, designation of new unit operator, establishment or revision of a participating area, and termination shall be prescribed by the AO.

(d) Two counterparts of a substantiating geologic report, including structure-contour map, cross sections, and pertinent data, shall accompany each application for approval of a participating area or revision thereof under an approved agreement.

(e) Three counterparts of all plans of development and operation shall be submitted for approval under an approved agreement.

(f) One approved counterpart of each instrument or document submitted for approval will be returned to the unit operator by the AO or his representative, together with such additional counterparts as may have been furnished by that purpose.

§ 226.10 Bonds.

In lieu of separate bonds required for each Federal lease committed to a unit agreement, the unit operator may furnish and maintain a collective corporate surety bond or a personal bond conditioned upon faithful performance of the duties and obligations of the agreement and the terms of the Federal leases subject thereto. Personal bonds shall be accompanied by a deposit of negotiable Federal securities in a sum equal at their par value to the amount of the bonds, and by a proper conveyance to the Secretary of full authority to sell such securities in case of default in the performance of the obligations assumed. The liability under the bond shall be for such amount as the AO shall determine to be adequate to protect the interests of the United States, and additional bond may be required whenever deemed necessary. The bond shall be filed with the AO. A form of corporate surety bond is set forth in § 226.15. In case of change of unit operator, a new bond must be filed or consent of surety to such change of unit operator must be furnished.

§ 226.11 Appeals.

A technical and procedural review may be requested pursuant to 30 CFR 221.72 and/or an appeal may be taken as provided in 30 CFR Part 290 of this chapter from any order or decision issued under the regulations in this part.

§ 226.12 Model onshore unit agreement for unproven areas.

UNIT AGREEMENT FOR THE DEVELOPMENT AND OPERATION OF THE

Unit area _____
County of _____
State of _____
No. _____

This agreement, entered into as of the ——— day of ———, 19— by and between the parties subscribing, ratifying, or consenting hereto, and herein referred to as the "parties hereto,"

WITNESSETH:

WHEREAS, the parties hereto are the owners of working, royalty, or other oil and gas interests in the unit area subject to this agreement; and

WHEREAS, the Mineral Leasing Act of February 25, 1920, 41 Stat. 437, as amended, 30 U.S.C. Sec. 181 et seq., authorizes Federal lessees and their representatives to units with each other, or jointly or separately with others, in collectively adopting and operating a unit plan of development or operations of any oil and gas pool, field, or like area, or any part thereof for the purpose of more properly conserving the natural resources thereof whenever determined and certified by the Secretary of the Interior to be necessary or advisable in the public interest; and

WHEREAS, the parties hereto hold sufficient interests in the ———— Unit Area covering the land hereinafter described to give reasonably effective control of operations therein; and

WHEREAS, it is the purpose of the parties hereto to conserve natural resources, prevent waste, and secure other benefits obtainable through development and operation of the area subject to this agreement under the terms, conditions, and limitations herein set forth;

NOW, THEREFORE, in consideration of the premises and the promises herein contained, the parties hereto commit to this agreement their respective interests in the below-defined unit area, and agree severally among themselves as follows:

1. ENABLING ACT AND REGULATIONS. The Mineral Leasing Act of February 25, 1920, as amended, supra, and all valid pertinent regulations including operating and unit plan regulations, heretofore issued thereunder or valid, pertinent, and reasonable regulations hereafter issued thereunder are accepted and made a part of this agreement as to Federal lands, provided such regulations are not

* Optional sections (in addition the penultimate paragraph of Section 9 is to be included only when more than one obligation well is required and paragraph (h) of section 16 is to be used only when applicable).

inconsistent with the terms of this agreement; and as to non-Federal lands, the oil and gas operating regulations in effect as of the effective date hereof governing drilling and producing operations, not inconsistent with the terms hereof or the laws of the State in which the non-Federal land is located, are hereby accepted and made a part of this agreement.

2. UNIT AREA. The area specified on the map attached hereto marked Exhibit A is hereby designated and recognized as constituting the unit area, containing ——— acres, more or less.

Exhibit A shows, in addition to the boundary of the unit area, the boundaries and identity of tracts and leases in said area to the extent known to the Unit Operator. Exhibit B attached hereto is a schedule showing to the extent known to the Unit Operator, the acreage, percentage, and kind of ownership of oil and gas interests in all lands in the unit area. However, nothing herein or in Exhibits A or B shall be construed as a representation by any party hereto as to the ownership of any interest other than such interest or interests as are shown in the Exhibits as owned by such party. Exhibits A and B shall be revised by the Unit Operator whenever changes in the unit area or in the ownership interests in the individual tracts render such revision necessary, or when requested by the Authorized Officer, hereinafter referred to as AO and not less than four copies of the revised Exhibits shall be filed with the proper BLM office.

The above-described unit area shall when practicable be expanded to include therein any additional lands or shall be contracted to exclude lands whenever such expansion or contraction is deemed to be necessary or advisable to conform with the purposes of this agreement. Such expansion or contraction shall be effected in the following manner:

(a) Unit Operator, on its own motion (after preliminary concurrence by the AO), or on demand of the AO, shall prepare a notice of proposed expansion or contraction describing the contemplated changes in the boundaries of the unit area, the reasons therefore, any plans for additional drilling, and the proposed effective date of the expansion or contraction, preferably the first day of a month subsequent to the date of notice.

(b) Said notice shall be delivered to the proper BLM office, and copies thereof mailed to the last known address of each working interest owner, lessee and lessor whose interests are affected, advising that 30 days will be allowed for submission to the Unit Operator of any objections.

(c) Upon expiration of the 30-day period provided in the preceding item (b) hereof, Unit Operator shall file with the AO evidence of mailing of the notice of expansion or contraction and a copy of any objections thereto which have been filed with Unit Operator, together with an application in triplicate, for approval of such expansion or contraction and with appropriate joinders.

(d) After due consideration of all pertinent information, the expansion or contraction shall, upon approval by the AO, become effective as of the date prescribed in the notice thereof or such other appropriate date.

(e) All legal subdivisions of lands (i.e., 40 acres by Government survey or its nearest lot or tract equivalent; in instances of irregular surveys, unusually large lots or tracts shall be considered in multiples of 40 acres or the nearest aliquot equivalent thereof), no parts of which are in or entitled to be in a participating area on or before the fifth anniversary of the effective date of the first initial participating area established under this unit agreement, shall be eliminated automatically from this agreement, effective as of said fifth anniversary, and such lands shall no longer be a part of the unit area and shall no longer be subject to this agreement, unless diligent drilling operations are in progress on unitized lands not entitled to participation on said fifth anniversary, in which event all such lands shall remain subject hereto for so long as such drilling operations are continued diligently, with not more than 90-days time elapsing between the completion of one such well and the commencement of the next such well. All legal subdivisions of lands not entitled to be in a participating area within 10 years after the effective date of the first initial participating area approved under this agreement shall be automatically eliminated from this agreement as of said tenth anniversary. The Unit Operator shall, within 90 days after the effective date of any elimination hereunder, describe the area so eliminated to the satisfaction of the AO and promptly notify all parties in interest. All lands reasonably proved productive of unitized substances in paying quantities by diligent drilling operations after the aforesaid 5-year period shall become participating in the same manner as during said first 5-year period. However, when such diligent drilling operations cease, all nonparticipating lands not then entitled to be in a participating area shall be automatically eliminated effective as the 91st day thereafter.

Any expansion of the unit area pursuant to this section which embraces lands theretofore eliminated pursuant to this subsection 2(e) shall not be considered automatic commitment or recommitment of such lands. If conditions warrant extension of the 10-year period specified in this subsection, a single extension of not to exceed 2 years may be accomplished by consent of the owners of 90 percent of the working interest in the current nonparticipating unitized lands and the owners of 60 percent of the basic royalty interests (exclusive of the basic royalty interests of the United States) in nonparticipating unitized lands with approval of the AO, provided such extension application is submitted not later than 60 days prior to the expiration of said 10-year period.

3. UNITIZED LAND AND UNITIZED SUBSTANCES. All land now or hereafter committed to this agreement shall constitute land referred to herein as "unitized land" or "land subject to this agreement." All oil and gas in any and all formations of the unitized land are unitized under the terms of this agreement and herein are called "unitized substances."

4. UNIT OPERATOR. ——— is hereby designated as Unit Operator and by signature hereto as Unit Operator agrees and consents to accept the duties and obligations of Unit Operator for the discovery, development, and production of unitized substances as herein provided. Whenever reference is made herein to the Unit Operator, such reference means the Unit Operator acting in that capacity and not as an owner of interest in unitized substances, and the term "working interest owner" when used herein shall include or refer to Unit Operator as the owner of a working interest only when such an interest is owned by it.

5. RESIGNATION OR REMOVAL OF UNIT OPERATOR. Unit Operator shall have the right to resign at any time prior to the establishment of a participating area or areas hereunder, but such resignation shall not become effective so as to release Unit Operator from the duties and obligations of Unit Operator and terminate Unit Operator's rights as such for a period of 6 months after notice of intention to resign has been served by Unit Operator on all working interest owners and the AO and until all wells then drilled hereunder are placed in a satisfactory condition for suspension or abandonment, whichever is required by the AO, unless a new Unit Operator shall have been selected and approved and shall have taken over and assumed the duties and obligations of Unit Operator prior to the expiration of said period.

Unit Operator shall have the right to resign in like manner and subject to like limitations as above provided at any time after a participating area established hereunder is in existence, but in all instances of resignation or removal, until a successor Unit Operator is selected and approved as hereinafter provided, the working interest owners shall be jointly responsible for performance of the duties of Unit Operator, and shall not later than 30 days before such resignation or removal becomes effective appoint a common agent to represent them in any action to be taken hereunder.

The resignation of Unit Operator shall not release Unit Operator from any liability for any default by it hereunder occurring prior to the effective date of its resignation.

The Unit Operator may, upon default or failure in the performance of its duties or obligations hereunder, be subject to removal by the same percentage vote of the owners of working interests as herein provided for the selection of a new Unit Operator. Such removal shall be effective upon notice thereof to the AO.

The resignation or removal of Unit Operator under this agreement shall not terminate its right, title, or interest as the owner of working interest or other interest in unitized substances, but upon the resignation or removal of Unit Operator becoming effective, such Unit Operator shall deliver possession of all wells, equipment, materials, and appurtenances used in conducting the unit operations to the new duly qualified successor Unit Operator or to the common agent, if no such new Unit Operator is selected, elected, to be used for the purpose of conducting unit operations hereunder. Nothing herein shall be construed as authorizing removal of any material.

equipment, or appurtenances needed for the preservation of any wells.

6. SUCCESSOR UNIT OPERATOR. Whenever the Unit Operator shall tender his or its resignation as Unit Operator or shall be removed as hereinabove provided, or a change of Unit Operator is negotiated by the working interest owners, the owners of the working interests according to their respective acreage interests in all unitized land shall, pursuant to the Approval of the Parties requirements of the unit operating agreement, select a successor Unit Operator. Such selection shall not become effective until:

(a) a Unit Operator so selected shall accept in writing the duties and responsibilities of Unit Operator, and

(b) the selection shall have been approved by the AO.

If no successor Unit Operator is selected and qualified as herein provided, the AO at his election may declare this unit agreement terminated.

7. ACCOUNTING PROVISIONS AND UNIT OPERATING AGREEMENT. If the Unit Operator is not the sole owner of working interests, costs and expenses incurred by Unit Operator in conducting unit operations hereunder shall be paid and apportioned among and borne by the owners of working interests, all in accordance with the agreement or agreements entered into by and between the Unit Operator and the owners of working interests, whether one or more, separately or collectively. Any agreement or agreements entered into between the working interest owners and the Unit Operator as provided in this section, whether one or more, are herein referred to as the "unit operating agreement." Such unit operating agreement shall also provide the manner in which the working interest owners shall be entitled to receive their respective proportionate and allocated share of the benefits accruing hereto in conformity with their underlying operating agreements, leases, or other independent contracts, and such other rights and obligations as between Unit Operator and the working interest owners as may be agreed upon by Unit Operator and the working interest owners; however, no such unit operating agreement shall be deemed either to modify any of the terms and conditions of this unit agreement or to relieve the Unit Operator of any right or obligation established under this unit agreement, and in case of any inconsistency or conflict between this agreement and the unit operating agreement, this agreement shall govern. Two copies of any unit operating agreement executed pursuant to this section shall be filed in the proper BLM office prior to approval of this unit agreement.

8. RIGHTS AND OBLIGATIONS OF UNIT OPERATOR. Except as otherwise specifically provided herein, the exclusive right, privilege, and duty of exercising any and all rights of the parties hereto which are necessary or convenient for prospecting for, producing, storing, allocating, and distributing the unitized substances are hereby delegated to and shall be exercised by the Unit Operator as herein provided. Acceptable evidence of title to said rights shall be deposited with Unit Operator and, together with this agreement, shall constitute and define the rights, privileges, and obligations of Unit Operator. Nothing herein, however, shall be construed to transfer title to any land or to any lease or operating agreement, it being understood that under this agreement the Unit Operator, in its capacity as Unit Operator, shall exercise the rights of possession and use vested in the parties hereto only for the purposes herein specified.

9. DRILLING TO DISCOVERY. Within 6 months after the effective date hereof, the Unit Operator shall commence to drill an adequate test well at a location approved by the AO, unless on such effective date a well is being drilled in conformity with the terms hereof, and thereafter continue such drilling diligently until the ——— formation has been tested or until at a lesser depth unitized substances shall be discovered which can be produced in paying quantities (to wit: quantities sufficient to repay the costs of drilling, completing, and producing operations, with a reasonable profit) or the Unit Operator shall at any time establish to the satisfaction of the AO that further drilling of said well would be unwarranted or impracticable, provided, however, that Unit Operator shall not in any event be required to drill said well to a depth in excess of —— feet. Until the discovery of unitized substances capable of being produced in paying quantities, the Unit Operator shall continue drilling one well at a time, allowing not more than 6 months between the completion of one well and the commencement of drilling operations for the next well, until a well capable of producing unitized substances in paying quantities is completed to the satisfaction of the AO or until it is reasonably proved that the unitized land is incapable of producing unitized substances in paying quantities in the formations drilled hereunder. Nothing in this section shall be deemed to limit the right of the Unit Operator to resign as provided in Section 5, hereof, or as requiring Unit Operator to commence or continue any drilling during the period pending such resignation becoming effective in order to comply with the requirements of this section.

The AO may modify any of the drilling requirements of this section by granting reasonable extensions of time when, in his opinion, such action is warranted.

** Multiple well requirements. Notwithstanding anything in this unit agreement to the contrary, except Section 25, UNAVOIDABLE DELAY, —— wells shall be drilled with not more than 6-months time elapsing between the completion of the first well and commencement of drilling operations for the second well and with not more than 6-months time elapsing between completion of the second well and the commencement of drilling operations for the third well, . . . regardless of whether a discovery has been made in any well drilled under this provision. Both the initial well and the second well must be drilled in compliance with the above specified formation or depth requirements in order to meet the dictates of this section; and the second well must be located a minimum of —— miles from the initial well in order to be accepted by the AO as the second unit test well, within the meaning of this section. The third test well shall be diligently drilled, at a location approved by the AO, to test the ——— formation or to a depth of —— feet, whichever is the lesser, and must be located a minimum of —— miles from both the initial and the second test wells. Nevertheless, in the event of the discovery of unitized substances in paying quantities by any well, this unit agreement shall not terminate for failure to complete the ——— well program, but the unit area shall be contracted automatically, effective the first day of the month following the default, to eliminate by subdivisions (as defined in Section 2(e) hereof) all lands not then entitled to be in a participating area.**

Upon failure to commence any well as provided for in this (these) section(s) within the time allowed, prior to the establishment of a participating area, including any extension of time granted by the AO, this agreement will automatically terminate. Upon failure to continue drilling diligently any well commenced hereunder, the AO may, after 15-days notice to the Unit Operator, declare this unit agreement terminated. The parties to this agreement may not initiate a request to voluntarily terminate this agreement during the first 6 months of its term unless at least one obligation well has been drilled in accordance with the provisions of this section.

10. PLAN OF FURTHER DEVELOPMENT AND OPERATION. Within 6 months after completion of a well capable of producing unitized substances in paying quantities, the Unit Operator shall submit for the approval of the AO an acceptable plan of development and operation for the unitized land which, when approved by the DMM, shall constitute the further drilling and development obligations of the Unit Operator under this agreement for the period specified therein. Thereafter, from time to time before the expiration of any existing plan, the Unit Operator shall submit for the approval of the AO a plan for an additional specified period for the development and operation of the unitized land. Subsequent plans should normally be filed on a calender year basis not later than March 1 each year. Any proposed modification or addition to the existing plan should be filed as a supplement to the plan.

Any plan submitted pursuant to this section shall provide for the timely exploration of the unitized area, and for the diligent drilling necessary for determination of the area or areas capable of producing unitized substances in paying quantities in each and every productive formation. This plan shall be as complete and adequate as the AO may determine to be necessary for timely development and proper conservation of the oil and gas resources in the unitized area and shall:

(a) Specify the number and locations of any wells to be drilled and the proposed order and time for such drilling; and

(b) Provide a summary of operations and production for the previous year.

**Provisions to be included only when a multiple well obligation is required.

Plans shall be modified or supplemented when necessary to meet changed conditions or to protect the interests of all parties to this agreement. Reasonable diligence shall be exercised in complying with the obligations of the approved plan of development and operation. The AO is authorized to grant a reasonable extension of the 6-month period herein prescribed for submission of an initial plan of development and operation where such action is justified because of unusual conditions or circumstances.

After completion of a well capable of producing unitized substances in paying quantities, no further wells, except such as may be necessary to afford protection against operations not under this agreement and such as may be specifically approved by the AO, shall be drilled except in accordance with an approved plan of development and operation.

11. PARTICIPATION AFTER DISCOVERY. Upon completion of a well capable of producing unitized substances in paying quantities, or as soon thereafter as required by the AO, the Unit Operator shall submit for approval by the AO, a schedule, based on subdivisions of the public-land survey or aliquot parts thereof, of all land then regarded as reasonably proved to be productive of unitized substances in paying quantities. These lands shall constitute a participating area on approval of the AO, effective as of the date of completion of such well or the effective date of this unit agreement, whichever is later. The acreages of both Federal and non-Federal lands shall be based upon appropriate computations from the courses and distances shown on the last approved public-land survey as of the effective date of each initial participating area. The schedule shall also set forth the percentage of unitized substances to be allocated, as provided in Section 12, to each committed tract in the participating area so established, and shall govern the allocation of production commencing with the effective date of the participating area. A different participating area shall be established for each separate pool or deposit of unitized substances or for any group thereof which is produced as a single pool or zone, and any two or more participating areas so established may be combined into one, on approval of the AO. When production from two or more participating areas is subsequently found to be from a common pool or deposit, the participating areas shall be combined into one, effective as of such appropriate date as may be approved or prescribed by the AO. The participating area or areas so established shall be revised from time to time, subject to the approval of the AO, to include additional lands then regarded as reasonably proved to be productive of unitized substances in paying quantities or which are necessary for unit operations, or to exclude lands then regarded as reasonably proved not to be productive of unitized substances in paying quantities, and the schedule of allocation percentages shall be revised accordingly. The effective date of any revision shall be the first of the month in which the knowledge or information is obtained on which such revision is predicated; provided, however, that a more appropriate effective date may be used if justified by Unit Operator and approved by the AO. No land shall be excluded from a participating area on account of depletion of its unitized substances, except that any participating area established under the provisions of this unit agreement shall terminate automatically whenever all completions in the formation on which the participating area is based are abandoned.

It is the intent of this section that a participating area shall represent the area productive of unitized substances known or reasonably proved to be productive in paying quantities or which are necessary for unit operations; but, regardless of any revision of the participating area, nothing herein contained shall be construed as requiring any retroactive adjustment for production obtained prior to the effective date of the revision of the participating area.

In the absence of agreement at any time between the Unit Operator and the AO as to the proper definition or redefinition of a participating area, or until a participating area has, or areas have, been established, the portion of all payments affected thereby shall, except royalty due the United States, be impounded in a manner mutually acceptable to the owners of committed working interests. Royalties due the United States shall be determined by the AO and the amount thereof shall be deposited, as directed by the AO, until a participating area is finally approved and then adjusted in accordance with a determination of the sum due as Federal royalty on the basis of such approved participating area.

Whenever it is determined, subject to the approval of the AO, that a well drilled under this agreement is not capable of production of unitized substances in paying quantities and inclusion in a participating area of the land on which it is situated in a participating area is unwarranted, production from such well shall, for the purposes of settlement among all parties other than working interest owners, be allocated to the land on which the well is located, unless such land is already within the participating area established for the pool or deposit from which such production is obtained. Settlement for working interest benefits from such a nonpaying unit well shall be made as provided in the unit operating agreement.

12. ALLOCATION OF PRODUCTION. All unitized substances produced from each participating area established under this agreement, except any part thereof used in conformity with good operating practices within the unitized area for drilling, operating, and other production or development purposes, for repressuring or recycling in accordance with a plan of development and operations which has been approved by the AO, or unavoidably lost, shall be deemed to be produced equally on an acreage basis from the several tracts of unitized land of the participating area established for such production. For the purpose of determining any benefits accruing under this agreement, each such tract of unitized land shall have allocated to it such percentage of said production as the number of acres of such tract included in said participating area bears to the total acres of unitized land in said participating area, except that allocation of production hereunder for purposes other than for settlement of the royalty, overriding royalty, or payment out of production obligations of the respective working interest owners, shall be on the basis prescribed in the unit operating agreement whether in conformity with the basis of allocation herein set forth or otherwise. It is hereby agreed that production of unitized substances from a participating area shall be allocated as provided herein regardless of whether any wells are drilled on any particular part or tract of the participating area. If any gas produced from one participating area is used for repressuring or recycling purposes in another participating area, the first gas withdrawn from the latter participating area for sale during the life of this agreement, shall be considered to be the gas so transferred, until an amount equal to that transferred shall be so produced for sale and such gas shall be allocated to the participating area from which initially produced as such area was defined at the time that such transferred gas was finally produced and sold.

13. DEVELOPMENT OR OPERATION OF NONPARTICIPATING LAND OR FORMATIONS. Any party hereto owning or controlling the working interest in any unitized land having thereon a regular well location may with the approval of the AO, at such party's sole risk, costs, and expense, drill a well to test any formation provided the well is outside any participating area established for that formation, unless within 90 days of receipt of notice from said party of his intention to drill the well, the Unit Operator elects and commences to drill the well in a like manner as other wells are drilled by the Unit Operator under this agreement.

If any well drilled under this section by a working interest owner results in production of unitized substances in paying quantities such that the land upon which it is situated may properly be included in a participating area, such participating area shall be established or enlarged as provided in this agreement and the well shall thereafter be operated by the Unit Operator in accordance with the terms of this agreement and the unit operating agreement.

If any well drilled under this section by a working interest owner that obtains production in quantities insufficient to justify the inclusion of the land upon which such well is situated in a participating area, such well may be operated and produced by the party drilling the same, subject to the conservation requirements of this agreement. The royalties in amount or value of production from any such well shall be paid as specified in the underlying lease and agreements affected.

14. ROYALTY SETTLEMENT. The United States and any State and any royalty owner who is entitled to take in kind a share of the substances now unitized hereunder shall be hereafter be entitled to the right to take in kind its share of the unitized substances, and Unit Operator, or the working interest owner in case of the operation of a well by a working interest owner as herein provided for in special cases, shall make deliveries of

such royalty share taken in kind in conformity with the applicable contracts, laws, and regulations. Settlement for royalty interest not taken in kind shall be made by working interest owners responsible therefor under existing contracts, laws and regulations, or by the Unit Operator on or before the last day of each month for unitized substances produced during the preceding calendar month; provided, however, that nothing in this section shall operate to relieve the lessees of any land from their respective lease obligations for the payment of any royalties due under their leases.

If gas obtained from lands not subject to this agreement is introduced into any participating area hereunder, for use in repressuring, stimulation of production, or increasing ultimate recovery, in conformity with a plan of development and operation approved by the AO, a like amount of gas, after settlement as herein provided for any gas transferred from any other participating area and with appropriate deduction for loss from any cause, may be withdrawn from the formation into which the gas is introduced, royalty free as to dry gas, but not as to any products which may be extracted therefrom; provided that such withdrawal shall be at such time as may be provided in the approved plan of development and operation or as may otherwise be consented to by the AO as conforming to good petroleum engineering practice; and provided further, that such right of withdrawal shall terminate on the termination of this unit agreement.

Royalty due the United States shall be computed as provided in 30 CFR Part 221 and paid in value or delivered in kind as to all unitized substances on the basis of the amounts thereof allocated to unitized Federal land as provided in Section 12 at the rates specified in the respective Federal leases, or at such other rate or rates as may be authorized by law or regulation and approved by the AO; provided, that for leases on which the royalty rate depends on the daily average production per well, said average production shall be determined in accordance with the operating regulations as though each participating area were a single consolidated lease.

15. RENTAL SETTLEMENT. Rental or minimum royalties due on leases committed hereto shall be paid by appropriate working interest owners under existing contracts, laws, and regulations, provided that nothing herein contained shall operate to relieve the leases of any land from their respective lessees obligations for the payment of any rental or minimum royalty due under their leases. Rental or minimum royalty for lands of the United States subject to this agreement shall be paid at the rate specified in the respective leases from the United States unless such rental or minimum royalty is waived, suspended, or reduced by law or by approval of the Secretary or his duly authorized representative.

With respect to any lease on non-Federal land containing provisions which would terminate such lease unless drilling operations are commenced upon the land covered thereby within the time therein specified or rentals are paid for the privilege of deferring such drilling operations, the rentals required thereby shall, notwithstanding any other provision of this agreement, be deemed to accure and become payable during the term thereof as extended by this agreement and until the required drilling operations are commenced upon the land covered thereby, or until some portion of such land is included within a participating area.

16. CONSERVATION. Operations hereunder and production of unitized substances shall be conducted to provide for the most economical and efficient recovery of said substances without waste, as defined by or pursuant to State or Federal law or regulation.

17. DRAINAGE. The Unit Operator shall take such measures as the AO deems appropriate and adequate to prevent drainage of unitized substances from unitized land by wells on land not subject to this agreement, which shall include the drilling of protective wells and which may include the payment of a fair and reasonable compensatory royalty, as determined by the AO.

18. LEASES AND CONTRACTS CONFORMED AND EXTENDED. The terms, conditions, and provisions of all leases, subleases, and other contracts relating to exploration, drilling, development or operation for oil or gas on lands committed to this agreement are hereby expressly modified and amended to the extent necessary to make the same conform to the provisions hereof, but otherwise to remain in full force and effect; and the parties hereto hereby consent that the Secretary shall and by his approval hereof, or by the approval hereof by his duly authorized representative, does hereby establish, alter, change, or revoke the drilling, producing, rental minimum royalty, and royalty requirements of Federal leases committed hereto and the regulations in respect thereto to conform said requirements to the provisions of this agreement, and, without limiting the generality of the foregoing, all leases, subleases, and contracts are particularly modified in accordance with the following:

(a) The development and operation of lands subject to this agreement under the terms hereof shall be deemed full performance of all obligations for development and operation with respect to each and every separately owned tract subject to this agreement, regardless of whether there is any development of any particular tract of this unit area.

(b) Drilling and producing operations performed hereunder upon any at the time, such lease shall be extended for 2 years, and so tract of unitized lands will be accepted and deemed to be performed upon and for the benefit of each and every tract of unitized land, and no lease shall be deemed to expire by reason of failure to drill or produce wells situated on the land therein embraced.

(c) Suspension of drilling or producing operations on all unitized lands pursuant to direction or consent of the AO shall be deemed to constitute such suspension pursuant to such direction or consent as to each and every tract of unitized land. A suspension of drilling or producing operations limited to specified lands shall be applicable only to such lands.

(d) Each lease, sublease, or contract relating to the exploration, drilling, development, or operation for oil or gas of lands other than those of the United States committed to this agreement which, by its terms might expire prior to the termination of this agreement, is hereby extended beyond any such term so provided therein so that it shall be continued in full force and effect for and during the term of this agreement.

(e) Any Federal lease committed hereto shall continue in force beyond the term so provided therein or by law as to the land committed so long as such lease remains subject hereto, provided that production of unitized substances in paying quantities is established in paying quantities under this unit agreement prior to the expiration date of the term of such lease, or in the event actual drilling operations are commenced on unitized land, in accordance with provisions of this agreement, prior to the end of the primary term of such lease and are being diligently prosecuted at that time, such lease shall be extended for 2 years, and so long thereafter as oil or gas is produced in paying quantities in accordance with the provisions of the Mineral Leasing Act, as amended.

(f) Each sublease or contract relating to the operation and development of unitized substances from lands of the United States committed to this agreement, which by its terms would expire prior to the time at which the underlying lease, as extended by the immediately preceding paragraph, will expire is hereby extended beyond any such term so provided therein so that it shall be continued in full force and effect for and during the term of the underlying lease as such term is herein extended.

(g) The segregation of any Federal lease committed to this agreement is governed by the following provision in the fourth paragraph of sec. 17(j) of the Mineral Leasing Act, as amended by the Act of September 2, 1960 (74 Stat. 781–784) (30 U.S.C. 226(j)):

"Any [Federal] lease heretofore or hereafter committed to any such [unit] plan embracing lands that are in part within and in part outside of the area covered by any such plan shall be segregated into separate leases as to the lands committed and the lands not committed as of the effective date of unitization: *Provided, however,* That any such lease as to the nonunitized portion shall continue in force and effect for the term thereof but for not less than two years from the date of such segregation and so long thereafter as oil or gas is produced in paying quantities."

*(h) Any lease, other than a Federal lease, having only a portion of its lands committed hereto shall be segregated as to the portion committed and the portion not committed, and the provisions of such lease shall apply separately to such segregated portions commencing as of the effective date hereof. In the event any such lease provides for a lump-sum rental payment, such payment shall be prorated between the portions so segregated in proportion to the acreage of the respective tracts.

* Optional paragraph to be used only when applicable.

19. CONVENANTS RUN WITH LAND. The covenants herein shall be construed to be covenants running with the land with respect to the interests of the parties hereto and their successors in interest until this agreement terminates, and any grant, transfer or conveyance of interest in land or leases subject hereto shall be and hereby is conditioned upon the assumption of all privileges and obligations hereunder by the grantee, transferee, or other successor in interest. No assignment or transfer of any working interest, royalty, or other interest subject hereto shall be binding upon Unit Operator until the first day of the calendar month after Unit Operator is furnished with the original, photostatic, or certified copy of the instrument of transfer.

20. EFFECTIVE DATE AND TERM. This agreement shall become effective upon approval by the AO and shall automatically terminate 5 years from said effective date unless:

(a) upon application by the Unit Operator such date of expiration is extended by the AO, or

(b) it is reasonably determined prior to the expiration of the fixed term or any extension thereof that the unitized land is incapable of production of unitized substances in paying quantities in the formations tested hereunder, and after notice of intention to terminate this agreement on such ground is given by the Unit Operator to all parties in interest at their last known addresses, this agreement is terminated with the approval of the AO, or

(c) a valuable discovery of unitized substances in paying quantities has been made or accepted on unitized land during said initial term or any extension thereof, in which event this agreement shall remain in effect for such term and so long thereafter as unitized substances can be produced in quantities sufficient to pay for the cost of producing same from wells on unitized land within any participating area established hereunder. Should production cease and diligent drilling operations to restore production or new production are not in progress or reworking within 60 days and production is not restored or should new production not be obtained in paying quantities on committed lands within this unit area, this agreement will automatically terminate effective the last day of the month in which the last unitized production occurred, or

(d) it is voluntarily terminated as provided in this agreement. Except as noted herein, this agreement may be terminated at any time prior to the discovery of unitized substances which can be produced in paying quantities by not less than 75 per centum, on an acreage basis, of the working interest owners signatory hereto, with the approval of the AO. The Unit Operator shall give notice of any such approval to all parties herto. Voluntary termination may not occur during the first 6 months of this agreement unless at least one obligation well shall have been drilled in conformance accordance with Section 9.

21. RATE OF PROSPECTING, DEVELOPMENT, AND PRODUCTION. The AO is hereby vested with authority to alter or modify from time to time, in his discretion, the quantity and rate of production under this agreement when such quantity and rate are not fixed pursuant to Federal or State law, or do not conform to any Statewide voluntary conservation or allocation program which is established, recognized, and generally adhered to by the majority of operators in such State. The above authority is hereby limited to alteration or modifications which are in the public interest. The public interest to be served and the purpose thereof, must be stated in the order of alteration or modification. Without regard to the foregoing, the AO is also hereby vested with authority to alter or modify from time to time, in his discretion, the rate of prospecting and development and the quantity and rate of production under this agreement when such alteration or modification is in the interest of attaining the conservation objectives stated in this agreement and is not in violation of any applicable Federal or State law.

Powers is the section vested in the AO shall only be exercised after notice to Unit Operator and opportunity for hearing to be held not less than 15 days from notice.

22. APPEARANCES. Unit Operators shall, after notice to other parties affected, have the right to appear for and on behalf of any and all interests affected hereby before the Department of the Interior and to appeal from orders issued under the regulations of said Department, or to apply for relief from any of said regulations, or in any proceedings relative to operations before the Department, or any other legally constituted authority; provided, however, that any other interested party shall also have the right at its own expense to be heard in any such proceeding.

23. NOTICES. All notices, demands, or statements required hereunder to be given or rendered to the parties hereto shall be in writing and shall be personally delivered to the party or parties, or sent by postpaid registered or certified mail, to the last-known address of the party or parties.

24. NO WAIVER OF CERTAIN RIGHTS. Nothing contained in this agreement shall be construed as a waiver by any party hereto of the right to assert any legal or constitutional right or defense as to the validity or invalidity of any law of the State where the unitized lands are located, or of the United States, or regulations issued thereunder in any way affecting such party, or as a waiver by any such party of any right beyond his or its authority to waive.

25. UNAVOIDABLE DELAY. All obligations under this agreement requiring the Unit Operator to commence or continue drilling, or to operate on, or produce unitized substances from any of the lands covered by this agreement, shall be suspended while the Unit Operator, despite the exercise of due care and diligence, is prevented from complying with such obligations, in whole or in part, by strikes, acts of God, Federal, State, or municipal law or agencies, unavoidable accidents, uncontrollable delays in transportation, inability to obtain necessary materials or equipment in the open market, or other matters beyond the reasonable control of the Unit Operator, whether similar to matters herein enumerated or not.

26. NONDISCRIMINATION. In connection with the performance of work under this agreement, the Unit Operator agrees to comply with all the provisions of section 202 (1) to (7) inclusive, of Executive Order 11246 (30 FR 12319), as amended, which are hereby incorporated by reference in this agreement.

27. LOSS OF TITLE. In the event title to any tract of unitized land shall fail and the true owner cannot be induced to join in this unit agreement, such tract shall be automatically regarded as not committed hereto, and there shall be such readjustment of future costs and benefits as may be required on account of the loss of such title. In the event of a dispute as to title to any royalty, working interest, or other interests subject thereto, payment or delivery on account thereof may be withheld without liability for interest until the dispute is finally settled; provided, that, as to Federal lands or leases, no payments of funds due the United States shall be withheld, but such funds shall be deposited as directed by the AO, to be held as unearned money pending final settlement of the title dispute, and then applied as earned or returned in accordance with such final settlement.

Unit Operator as such is relieved from any responsibility for any defect or failure of any title hereunder.

28. NONJOINDER AND SUBSEQUENT JOINDER. If the owner of any substantial interest in a tract within the unit area fails or refuses to subscribe or consent to this agreement, the owner of the working interest in that tract may withdraw the tract from this agreement by written notice delivered to the proper BLM office and the Unit Operator prior to the approval of this agreement by the AO. Any oil or gas interests in lands within the unit area not committed hereto prior to final approval may thereafter be committed hereto by the owner or owners thereof subscribing or consenting to this agreement, and, if the interest is a working interest, by the owner of such interest also subscribing to the unit operating agreement. After operations are commenced hereunder, the right of subsequent joinder, as provided in this section, by a working interest owner is subject to such requirements or approval(s), if any, pertaining to such joinder, as may be provided for in the unit operating agreement. After final approval hereof, joinder by a nonworking interest owner must be consented to in writing by the working interest owner committed hereto and responsible for the payment of any benefits that may accrue hereunder in behalf of such nonworking interest. A nonworking interest may not be committed to this unit agreement unless the corresponding working interest is committed hereto. Joinder to the unit agreement by a working interest owner, at any time, must be accompanied by appropriate joinder to the unit operating agreement, in order for the interest to be regarded as committed to this agreement. Except as may otherwise herein be provided, subsequent joinders to this agreement shall be effective as of the date of the filing with the AO of duly executed counterparts of all or any papers necessary to establish effective commitment of any interest and/or tract to this agreement.

29. COUNTERPARTS. This agreement may be executed in any number of counterparts, no one of which needs to be executed by all parties, or may be ratified or consented to by separate instrument in writing specifically referring hereto and shall be binding upon all those parties who have executed such a counterpart, ratification, or consent hereto with the same force and effect as if all such parties had signed the same document, and regardless of whether or not it is executed by all other parties owning or claiming an interest in the lands within the above-described unit area.

*30. SURRENDER. Nothing in this agreement shall prohibit the exercise by any working interest owner of the right to surrender vested in such party by any lease, sublease, or operating agreement as to all or any part of the lands covered thereby, provided that each party who will or might acquire such working interest by such surrender or by forfeiture as hereafter set forth, is bound by the terms of this agreement.

If as a result of any such surrender, the working interest rights as to such lands become vested in any party other than the fee owner of the unitized substances, said party may forfeit such rights and further benefits from operations hereunder as to said land to the party next in the chain of title who shall be and become the owner of such working interest.

If as the result of any such surrender or forfeiture working interest rights become vested in the fee owner of the unitized substances, such owner may:

(a) accept those working interest rights subject to this agreement and the unit operating agreement; or

(b) lease the portion of such land as is included in a participating area established hereunder subject to this agreement and the unit operating agreement; or

(c) provide for the independent operation of any part of such land that is not then included within a participating area established hereunder.

If the fee owner of the unitized substances does not accept the working interest rights subject to this agreement and the unit operating agreement or lease such lands as above provided within 6 months after the surrendered or forfeited, working interest rights become vested in the fee owner; the benefits and obligations of operations accruing to such lands under this agreement and the unit operating agreement shall be shared by the remaining owners of unitized working interests in accordance with their respective working interest ownerships, and such owners of working interests shall compensate the fee owner of unitized substances in such lands by paying sums equal to the rentals, minimum royalties, and royalties applicable to such lands under the lease in effect when the lands were unitized.

An appropriate accounting and settlement shall be made for all benefits accruing to or payments and expenditures made or incurred on behalf of such surrendered or forfeited working interests subsequent to the date of surrender or forfeiture, and payment of any moneys found to be owing by such an accounting shall be made as between the parties within 30 days.

The exercise of any right vested in a working interest owner to reassign such working interest to the party from whom obtained shall be subject to the same conditions as set forth in this section in regard to the exercise of a right to surrender.

*31. TAXES. The working interest owners shall render and pay for their account and the account of the royalty owners all valid taxes on or measured by the unitized substances in and under or that may be produced, gathered and sold from the land covered by this agreement after its effective date, or upon the proceeds derived therefrom. The working interest owners on each tract shall and may charge the proper proportion of said taxes to royalty owners having interests in said-tract, and may currently retain and deduct a sufficient amount of the unitized substances or derivative products, or net proceeds thereof, from the allocated share of each royalty owner to secure reimbursement for the taxes so paid. No such taxes shall be charged to the United States or the State of —— or to any lessor who has a contract with his lessee which requires the lessee to pay such taxes.

*32. NO PARTNERSHIP. It is expressly agreed that the relation of the parties hereto is that of independent contractors and nothing contained in this agreement, expressed or implied, nor any operations conducted hereunder, shall create or be deemed to have created a partnership or association between the parties hereto or any of them.

IN WITNESS WHEREOF, the parties hereto have caused this agreement to be executed and have set opposite their respective names the date of execution.

Unit Operator

Working Interest Owners

Other Interest Owners

General Guidelines

1. Executed agreement to be legally complete.

2. Agreement submitted for approval must contain Exhibit A and B in accordance with models shown in §§ 226.13 and 226.14.

3. Consents should be identified (in pencil) by tract numbers as listed in Exhibit B and assembled in that order as far as practical. Unit agreements submitted for approval shall include a list of the overriding royalty interest owners who have executed ratifications of the unit agreement. Subsequent joinders by overriding royalty interest owners shall be submitted in the same manner, except each must include or be accompanied by a statement that the corresponding working interest owner has consented in writing to such joinder. Original ratifications of overriding royalty owners will be kept on file by the Unit Operator or his designated agent.

4. All leases held by option should be noted on Exhibit B with an explanation as to the type of option, i.e., whether for operating rights only, for full leasehold record title, or for certain interests to be earned by performance. In all instances, optionee committing such interests is expected to exercise option promptly.

5. All owners of oil and gas interests must be invited to join the unit agreement, and statement to that effect must accompany executed agreement, together with summary of results of such invitations. A written reason for all interest owners who have not joined shall be furnished by the unit operator.

6. In the event fish and wildlife lands are included, add the following as a separate section:

"Wildlife Stipulation. Nothing in this unit agreement shall modify the special Federal lease stipulations applicable to lands under the jurisdiction of the United States Fish and Wildlife Service."

7. In the event National Forest System lands are included within the unit area, add the following as a separate section:

"Forest Land Stipulation. Notwithstanding any other terms and conditions contained in this agreement, all of the stipulations and conditions of the individual leases between the United States and its lessees or their successors or assigns embracing lands within the unit area included for the protection of lands or functions under the jurisdiction of the Secretary of Agriculture shall remain in full force and effect the same as though this agreement had not been entered into, and no modification thereof is authorized except with the prior consent in writing of the Regional Forester, United States Forest Service, ——,

8. In the event National Forest System lands within the Jackson Hole Area of Wyoming are included within the unit area, additional "special" stipulations may be required to be included in the unit agreement by the U.S. Forest Service, including the Jackson Hole Special Stipulation.

9. In the event reclamation lands are included, add the following as a new separate section:

"Reclamation Lands. Nothing in this agreement shall modify the special, Federal lease stipulations applicable to lands under the jurisdiction of the Bureau of Reclamation."

10. In the event a powersite is embraced in the proposed unit area, the following section should be added:

"Powersite. Nothing in this agreement shall modify the special, Federal lease stipulations applicable to lands under the jurisdiction of the Federal Energy Regulatory Commission."

11. In the event special surface stipulations have been attached to any of the Federal oil and gas leases to be included, add the following as a separate section:

"Special surface stipulations. Nothing in this agreement shall modify the special Federal lease stipulations attached to the individual Federal oil leases."

12. In the event State lands are included in the proposed unit area, add the appropriate State Lands Section as separate section. (See 30 CFR 226.7(a))

13. In the event restricted Indian lands are involved, consult the AO regarding

*Optional sections and subsection. (Agreements submitted for final approval should not identify section or provision as "optional.")

appropriate requirements under 30 CFR 226.7(b).

Certification—Determination

Pursuant to the authority vested in the Secretary of the Interior, under the act approved February 25, 1920, 41 Stat. 437, as amended, 30 U.S.C. sec. 181, et seq., and delegated to the appropriate (Name and Title of authorized officer, BLM) Service under the authority of 30 CFR 226, I do hereby:

A. Approve the attached agreement for the development and operation of the ———, Unit Area, State of ———.

B. Certify and determine that the unit plan of development and operation contemplated in the attached agreement is necessary and advisable in the public interest for the purpose of more properly conserving the natural resources.

C. Certify and determine that the drilling, producing, rental minimum royalty, and royalty requirements of all Federal lease committed to said agreement are hereby established altered, changed, or revoked to conform with the terms and conditions of this agreement.

§ 226.15 Model collective bond.

Collective Corporate Surety Bond

Know all men by these presents. That we, ——— (Name of unit operator), signing as Principal, for and on behalf of the record owners of unitized substances now or hereafter covered by the unit agreement for the ——— (Name of unit), approved ——— (Date) ——— (Name and address of Surety), as Surety are jointly and severally held and firmly bound unto the United States of America in the sum of ——— (Amount of bond) Dollars, lawful money of the United States, for the use and benefit of and to be paid to the United States and any entryman or patentee of any portion of the unitized land here-to-fore entered or patented with the reservation of the oil or gas deposits to the United States, for which payment, well and truly to be made, we bind ourselves, and each of us, and each of our heirs, executors, administrators, successors, and assigns by these presents.

The condition of the foregoing obligation is such, that, whereas the Secretary of the Interior on ——— (Date) approved under the provisions of the Act of February 25, 1920, 41 Stat. 437, 30 U.S.C. secs. 181 *et seq.*, as amended by the Act of August 8, 1946, 60 Stat. 950, a unit agreement for the development and operation of the ——— (Name of unit and State); and

Whereas said Principal and record owners of unitized substances, pursuant to said unit agreement, have entered into certain covenants and agreements as set forth therein, under which operations are to be conducted; and

Whereas said Principal as Unit Operator has assumed the duties and obligations of the respective owners of unitized substances as defined in said unit agreement; and

Whereas said Principal and Surety agree to remain bound in the full amount of the bond for failure to comply with the terms of the unit agreement, and the payment of rentals, minimum royalties, and royalties due under the Federal leases committed to said unit agreement; and

Whereas the Surety hereby waives any right of notice of and agrees that this bond may remain in force and effect notwithstanding:

(a) Any additions to or change in the ownership of the unitized substances herein described;

(b) Any suspension of the drilling or producing requirements or waiver, suspension, or reduction of rental or minimum royalty payments or reduction of royalties pursuant to applicable laws or regulations thereunder; and

Whereas said Principal and Surety agree to the payment of compensatory royalty under the regulations of the Interior Department in lieu of drilling necessary offset wells in the event of drainage; and

Whereas nothing herein contained shall preclude the United States (from requiring an additional bond at any time when deemed necessary);

Now, therefore, if the said Principal shall faithfully comply with all of the provisions of the above-indentified unit agreement and with the terms of the leases committed thereto, then the above obligation is to be of no effect; otherwise to remain in full force and virtue.

§ 226.16 Model for designation of successor unit operator by working interest owners.

Designation of successor Unit Operator ——— Unit Area, County of ———, State of ———. No. ———.

This indenture, dated as of the — day of ——, 19—, by and between ——, hereinafter designated as "First Party," and the owners of unitized working interests, hereinafter designated as "Second Parties,"

Witnesseth: Whereas under the provisions of the Act of February 25, 1920, 41 Stat. 437, 30 U.S.C. secs. 181, *et seq.*, as amended by the Act of August 8, 1946, 60 Stat. 950, the Secretary of the Interior, on the ——— day of ———, 19—, approve a unit agreement ——— Unit Area, wherein ——— is designated as Unit Operator, and

Whereas said ——— has resigned as such Operator [1] and the designation of a successor Unit Operator is now required pursuant to the terms thereof; and

Whereas the First Party has been and hereby is designated by Second Parties as

[1] Where the designation of a successor Unit Operator is required for any reason other than resignation, such reason shall be substituted for the one stated.

Unit Operator, and said First Party desires to assume all the rights, duties, and obligations of Unit Operator under the said unit agreement:

Now, therefore, in consideration of the premises hereinbefore set forth and the promises hereinafter stated, the First Party hereby covenants and agrees to fulfill the duties and assume the obligations of Unit Operator under and pursuant to all the terms of the ——— unit agreement, and the Second Parties covenant and agree that, effective upon approval of this indenture by the (Name and Title of authorized officer, BLM) First Party shall be granted the exclusive right and privilege of exercising any and all rights and privileges as Unit Operator, pursuant to the terms and conditions of said unit agreement; said Unit agreement being hereby incorporated herein by reference and made a part hereof as fully and effectively as though said unit agreement were expressly set forth in this instrument.

In witness whereof, the parties hereto have executed this instrument as of the date hereinabove set forth.

(Witnesses)

(Witnesses)

(First Party)

(Second Party)

I hereby approve the foregoing indenture designating ——— as Unit Operator under the unit agreement for the ——— Unit Area, this — day of ———, 19—.

Authorized officer of the Bureau of Land Management.

§ 226.17 Model for change in unit operator by assignment.

Change in Unit Operator ——— Unit Area, County of ———, State of ———, No. —. This indenture, dated as of the — day of ———, 19—, by and between ——— hereinafter designated as "First Party," and ——— hereinafter designated as "Second Party."

Witnesseth: Whereas under the provisions of the Act of February 25, 1920, 41 Stat. 437 30 U.S.C. secs. 181, *et seq.*, as amended by the Act of August 8, 1946, 60 Stat. 950, the Department of the Interior, on the — day of ———, 19—, approved a unit agreement for the ——— Unit Area, wherein the First Party is designated as Unit Operator; and

Whereas the First Party desires to transfer, assign, release, and quitclaim, and the Second Party desires to assume all the rights, duties and obligations of Unit Operator under the unit agreement; and

Whereas for sufficient and valuable consideration, the receipt whereof is hereby acknowledged, the First Party has transferred, conveyed, and assigned all his/its rights under certain operating agreements involving lands within the area set forth in said unit agreement unto the Second Party;

Now, therefore, in consideration of the premises hereinbefore set forth, the First Party does hereby transfer, assign, release, and quitclaim unto Second Party all of First Party's rights, duties, and obligations as Unit Operator under said unit agreement; and

Second Party hereby accepts this assignment and hereby covenants and agrees to fulfill the duties and assume the obligations of Unit Operator under and pursuant to all the terms of said unit agreement to the full extent set forth in this assignment, effective upon approval of this indenture by the (Name and Title of authorized officer, BLM); said unit agreement being hereby incorporated herein by reference and made a part hereof as fully and effectively as though said unit agreement were expressly set forth in this instrument.

In witness whereof, the parties hereto have executed this instrument as of the date hereinabove set forth.

(Witnesses)

BILLING CODE 4310-84-M

Minerals Management Service

30 CFR Part 256

Offshore Lessee/Payor; Payment by Electronic Funds Transfer (EFT)

AGENCY: Minerals Management Service (MMS), Interior.

ACTION: Interim rule with request for comments.

SUMMARY: The MMS is publishing an interim regulation requiring any offshore lessee/payor to remit payment to MMS by Electronic Funds Transfer (EFT), when the total payment on any given day to MMS at the Royalty Management Accounting Center (RMAC) Lakewood, Colorado, totals $50,000 or more for royalties and rentals. Payment of the four-fifth bonus and first year's rental shall also be made by EFT.

This remittance method will provide the U.S. Treasury with funds on the actual date of transfer rather than several days later, as is the case with current manual check clearing procedures. It will also significantly improve MMS internal controls for handling cash receipts.

DATES: Interim rule effective July 11, 1983. Comments must be received on or before August 9, 1983.

ADDRESS: Send written comments to Deputy Associate Director for Royalty Management (Policy), 12203 Sunrise Valley Drive, Mail Stop 660, Reston, Virginia 22091.

FOR FURTHER INFORMATION CONTACT: Mr. Orie L. Kelm, (703) 860–7511, (FTS) 928–7511.

SUPPLEMENTARY INFORMATION: This rule requires EFT payment utilizing the Treasury Financial Communications System (TFCS), when the aggregated amount paid to MMS on any given day is $50,000 or more for royalties and rentals. Payments to MMS by EFT for royalties and rentals shall begin only after payor is notified by RMAC. The four-fifths bonus amounts and first year's rentals are also to be paid by EFT, beginning January 1, 1984. Detailed instructions will be provided in the notice of each lease offering.

Payors will not be held responsible for late payments resulting from any third party, mechanical or systems failure of the TFCS. However, late payments resulting from a payor's action, such as improper coding instructions that he gives to his bank to authorize EFT, will be the payor's responsibility.

Daily payments to the RMAC for royalties and rentals totaling less than $50,000 may be made by check, bank draft, or money order payable to MMS. Because the payments for royalties, rentals, and the four-fifths bonus amount are often significant amounts, MMS intends to mandate the use of available technology for larger payments to ensure earlier funds availability for the Government. This interim rule will remain in effect until superseded by the final rulemaking to be published on or after January 1, 1984, after consideraton of comments.

In the past, the one-fifth bid deposit received by the Government has occasionally been returned to the high bidder due to later rejection of the bid for the convenience of the Government. The bid money was held by the Government and was returned without interest. This action places an unreasonable risk on bidders. This interim intends to provide for payment of any interest earned by the Government on the one-fifth bid deposit, if it is later returned for Government convenience. The Government is authorized to pay interest, but has never done so in such situations in the past. The amount of interest estimated to be payable is relatively small (4% of the amount estimated to be saved through use of EFT to remove the present check clearing float time advantage to industry). This provision will become effective for lease offerings after January 1, 1984.

Administrative Procedure Act

Because the overall savings to the Government is considered significant even after consideration of possible interest payments if the one-fifth deposit is returned for Government convenience, the Department of the Interior has determined that the public interest requires that this interim rule be implemented before receipt of comments. Publication of a proposed rulemaking before this interim rule would not be in the public interest because it would prevent the speedup of receipt of monies due the Government, and is waived under 5 U.S.C. 553(b).

Executive Order 12291

The Department has determined that this rule is not a major rule and does not, therefore, require the preparation of a regulatory impact analysis under Executive Order 12291 because it is estimated to result in a total economic effect of less than $5 million annually. The total and individual economic effect is not deemed significant.

Regulatory Flexibility Act

The Department has also determined that this interim rulemaking does not require a small entity flexibility analysis under the Regulatory Flexibility Act (5 U.S.C. 601 *et seq.*), because there will not be a substantial number of small entities affected and the economic impact on those affected will be insignificant.

National Environmental Policy Act of 1969

It is hereby determined that this interim rulemaking does not constitute a major Federal action significantly affecting the quality of the human environment and that no detailed statement pursuant to Section 102(2)(C) of the National Environmental Policy Act of 1969 (42 U.S.C. 4332(2)(C)) is required.

Paperwork Reduction Act of 1980

The Department has also determined that this interim rulemaking does not constitute any action requiring collection of data and, therefore, the Paperwork Reduction Act of 1980 (44 U.S.C. 3501 *et seq.*) does not apply.

List of Subjects in 30 CFR Part 256

Administrative practice and procedure, Banks and banking, EFT, Minerals royalties, Royalty accounting, Continental shelf, Government contracts, Oil and gas exploration, Pipelines, Public lands—mineral resources, Public lands rights-of-way, Reporting and record keeping requirements, Surety bonds.

Under the authority of the Outer Continental Shelf Lands Act of 1953, as amended (43 U.S.C. 1221 *et seq.*), Part 256, Chapter II of Title 30 of the Code of Federal Regulations is amended as set forth below.

Dated: May 26, 1983.

Daniel N. Miller, Jr.,

Assistant Secretary of the Interior.

PART 256—OUTER CONTINENTAL SHELF MINERAL AND RIGHTS-OF-WAY MANAGEMENT; GENERAL

Section 256.13 is revised to read as follows:

§ 256.13 Payment.

(a) Payments for Royalties and Rents: All payors whose combined remittance (on payment due date) totals $50,000 or more in payment to MMS at the Royalty Management Accounting Center (RMAC), Lakewood, Colorado, for royalties and rents (note that bonuses and first year's rentals are separately considered under paragraph (c) of this section) must make payment by electronic funds transfer (EFT), utilizing the Treasury Financial Communications Systems (TFCS), unless otherwise directed by the Secretary. Payments to MMS by EFT for royalties and rentals shall begin only after payor is notified by RMAC.

(b) Each payor for those items in paragraph (a) of this section, whose combined remittance on any given day is less than $50,000 must use one of the following payment instruments made payable to MMS:

(1) Federal Reserve check
(2) Commercial check
(3) Money order
(4) Bank Draft

(c) Payment of bonus bid amounts and first year rental: Each bid must include a payment for the one-fifth bonus bid deposit amount unless otherwise directed by the Secretary. Detailed instructions of how to make payment with the bid will be included in the notice of each lease offering.

(1) Beginning with lease offerings held after January 1, 1984, the one-fifth bonus amount received from a high bidder shall be deposited into an interest bearing account pending issuance of the lease, in the Department of Treasury in an account created pursuant to an agreement between the Department of the Interior and Treasury. Investment of this amount by the Government does not indicate acceptance of the bid. The one-fifth bonus amounts submitted with bids other than the highest valid bid shall be returned to respective bidders after bids are opened, recorded and ranked. Return of such deposits will not affect the status, validity, or ranking of bids. The one-fifth bonus amount received from the high bidder and held by the Government, will be returned with actual interest earned, if the bid is subsequently rejected for Government convenience. The interest accrued during the period held in the account pending issuance of the lease will accrue to the Government when the lease is issued.

(2) The payment of the four-fifths bonus amount and the first year's rental shall be made to MMS by EFT unless otherwise directed by the Secretary. The payment by EFT must be received by Federal Reserve Bank of New York no later than noon, eastern standard time, on the 10th business day after receipt of the lease forms by the successful bidder. The lease will not be executed by the authorized officer until payment is received. Failure to remit by EFT, or as directed by the Secretary, within the time specified above will result in forfeiture of the one-fifth bonus amount and the lease will not be executed by the authorized officer. Payors will not be held responsible for late payment due to third, party, mechanical or systems failure of TFCS.

(d) Payments for pipeline rights-of-way and costs for grants of same, shall be remitted to MMS by cash, check, or bank draft unless otherwise directed by the Secretary.

(e) Payments for other items, such as filing charges and fees, shall be made to the manager of the appropriate Outer Continental Shelf field office by cash, check, or bank draft, payable to MMS unless otherwise directed by the Secretary.

DEPARTMENT OF EDUCATION

34 CFR Part 668

Student Assistance General Provisions

AGENCY: Department of Education.

ACTION: Notice regarding implementation of final regulations for the Student Assistance General Provisions—Selective Service Registration Requirements.

SUMMARY: The Secretary of Education announces that the regulations on registration with Selective Service as a condition for receipt of student financial assistance will not be enforced by the Secretary while a preliminary injunction prohibiting the enforcement of these regulations is in effect.

FOR FURTHER INFORMATION CONTACT: Mr. William Moran, Office of Student Financial Assistance, U.S. Department of Education, 400 Maryland Ave. SW. (Room 4100, Regional Office Building 3), Washington, D.C. 20202, (202) 245–2247.

SUPPLEMENTARY INFORMATION: On April 11, 1983, the Secretary of Education published regulations amending Subpart B of the Student Assistance General Provisions, 34 CFR Part 668, to implement section 113 of the Fiscal Year 1983 Defense Department Authorization Act (Pub. L. 97–252) 48 FR 15578–84. Section 113 provides that beginning with the 1983–1984 award year, any student who is required to be registered with Selective Service and fails to register is ineligible for student financial assistance provided through programs established under Title IV of the Higher Education Act.

These programs include the Pell Grant, Supplemental Educational Opportunity Grant (SEOG), College Work Study (CWS), National Direct Student Loan (NDSL), Guaranteed Student Loan (GSL), PLUS Loan, and State Student Incentive Grant Programs.

The regulations took effect on May 26, 1983. However, in accordance with a preliminary injunction issued by the United States District Court for the District of Minnesota, the Secretary will not enforce the regulations until the preliminary injunction is dissolved or modified. Another notice in the **Federal Register** will be published in the event of such dissolution or modification.

Dated: June 6, 1983.

T. H. Bell,

Secretary of Education.

Wyoming; Partial Revocation of Phosphate Withdrawal

Correction

In FR Doc. 83–13169 beginning on page 22149 in the issue of Tuesday, May 17, 1983, make the following correction:

On page 22150, first column, in the land description for T. 39 N., R. 116 W., the last line of the entry for Sec. 19 should have read "NW¼NE¼ NW¼SE¼, and NW¼NW¼SE¼;"

BILLING CODE 1505–01–M

FEDERAL EMERGENCY MANAGEMENT AGENCY

44 CFR Part 64

[Docket No. FEMA 6529]

List of Communities Eligible for the Sale of Insurance Under the National Flood Insurance Program

AGENCY: Federal Emergency Management Agency.

ACTION: Final rule.

SUMMARY: This rule lists communities participating in the National Flood Insurance Program (NFIP) and eligible for second layer insurance coverage. These communities have applied to the program and have agreed to enact certain flood plain management measures. The communities' participation in the regular program authorizes the sale of flood insurance to owners of property located in the communities listed.

EFFECTIVE DATES: The date listed in the fourth column of the table.

ADDRESSES: Flood insurance policies for property located in the communities listed can be obtained from any licensed property insurance agent or broker serving the eligible community, or from the National Flood Insurance Program (NFIP) at: P.O. Box 34294, Bethesda, Maryland 20034, Phone: (800) 638–6620.

FOR FURTHER INFORMATION CONTACT: Mr. Richard E. Sanderson, Chief, Natural Hazards Division, (202) 287–0270, 500 C Street Southwest, Donohoe Building, Room 505, Washington, DC 20472.

SUPPLEMENTARY INFORMATION: The National Flood Insurance Program (NFIP), enables property owners to purchase flood insurance at rates made reasonable through a Federal subsidy. In return, communities agree to adopt and administer local flood plain management measures aimed at protecting lives and new construction from future flooding. Since the communities on the attached list have recently entered the NFIP, subsidized flood insurance is now available for property in the community.

In addition, the Director of the Federal Emergency Management Agency has identified the special flood hazard areas in some of these communities by publishing a Flood Hazard Boundary Map. The date of the flood map, if one has been published, is indicated in the fifth column of the table. In the communities listed where a flood map has been published, Section 102 of the Flood Disaster Protection Act of 1973, as amended, requires the purchase of flood insurance as a condition of Federal or federally related financial assistance for acquisition or construction of buildings in the special flood hazard area shown on the map.

The Director finds that delayed effective dates would be contrary to the public interest. The Director also finds that notice and public procedure under 5 U.S.C. 553(b) are impracticable and unnecessary.

The Catalog of Domestic Assistance Number for this program is 83.100 "Flood Insurance." This program is subject to procedures set out in OMB Circular A–95.

Pursuant to the provisions of 5 U.S.C. 605(b), the Associate Director, State and Local Programs and Support, to whom authority has been delegated by the Director, Federal Emergency Management Agency, hereby certifies that this rule, if promulgated will not have a significant economic impact on a substantial number of small entities. This rule provides routine legal notice stating the community's status in the NFIP and imposes no new requirements or regulations on participating communities.

List of Subjects in 44 CFR Part 64

Flood insurance, Flood plains.

Section 64.6 is amended by adding in alphabetical sequence new entries to the table.

In each entry, a complete chronology of effective dates appears for each listed community. The entry reads as follows:

§ 64.6 List of eligible communities.

State and county	Location	Community No.	Effective date of authorization of sale of flood insurance for area[1]	Hazard area identified
New Jersey:				
Bergen County	Edgewater, borough of	340029	750925, emergency; 830410, regular	740802
Gloucester County	Harrison, township of	340205	750407, emergency; 830401, regular	740729
Sussex County	Hopatcong, borough of	340452	741210, emergency; 830401, regular	740528

44 CFR Part 64

[Docket No. FEMA 6530]

List of Communities Eligible for the Sale of Insurance Under the National Flood Insurance Program

AGENCY: Federal Emergency Management Agency.

ACTION: Final rule.

SUMMARY: This rule lists communities participating in the National Flood Insurance Program (NFIP). These communities have applied to the program and have agreed to enact certain flood plain management measures. The communities' participation in the program authorizes the sale of flood insurance to owners of property located in the communities listed.

EFFECTIVE DATES: The date listed in the fifth column of the table.

ADDRESSES: Flood insurance policies for property located in the communities listed can be obtained from any licensed property insurance agent or broker serving the eligible community, or from the National Flood Insurance Program (NFIP) at: P.O. Box 3429, Bethesda, Maryland, 20034, Phone: (800) 638–6620.

FOR FURTHER INFORMATION CONTACT: Mr. Richard E. Sanderson, Chief, Natural Hazards Division, (202) 287–0270, 500 C Street SW., Donohoe Building—Room 505, Washington, DC 20472.

SUPPLEMENTARY INFORMATION: The National Flood Insurance Program (NFIP), enables property owners to purchase flood insurance at rates made reasonable through a Federal subsidy. In return, communities agree to adopt and administer flood plain management measures aimed at protecting lives and new construction from future flooding. Since the communities on the attached list have recently entered the NFIP, subsidized flood insurance is now available for property in the community.

In addition, the Director of the Federal Emergency Management Agency has identified the special flood hazard areas in some of these communities by publishing a Flood Hazard Boundary Map. The date of the flood map, if one has been published, is indicated in the fifth column of the table. In the communities listed where a flood map has been published, Section 102 of the Flood Disaster Protection Act of 1973, as amended, requires the purchase of flood insurance as a condition of Federal or federally related financial assistance for acquisition or construction of buildings in the special flood hazard area shown on the map.

The Director finds that delayed effective dates would be contrary to the public interest. The Director also finds that notice and public procedure under 5 U.S.C. 553(b) are impracticable and unnecessary.

The Catalog of Domestic Assistance Number for this program is 83.100 "Flood Insurance." This program is subject to procedures set out in OMB Circular A–95.

Pursuant to the provisions of 5 U.S.C. 605(b), the Associate Director, State and

Local Programs and Support, to whom authority has been delegated by the Director, Federal Emergency Management Agency, hereby certifies that this rule, if promulgated will not have a significant economic impact on a substantial number of small entities. This rule provides routine legal notice stating the community's status in the NFIP and imposes no new requirements or regulations on participating communities.

List of Subjects in 44 CFR Part 64

Flood insurance, Flood plains.

Section 64.6 is amended by adding in alphabetical sequence new entries to the table.

In each entry, a complete chronology of effective dates appears for each listed community. The entry reads as follows:

§ 64.6 List of eligible communities.

State and county	Location	Community No.	Effective dates of authorization/cancellation of sale of flood insurance in community	Special flood hazard area identified
Alaska: Yukon-Koyukuk Division	Galena, city of	020124	Apr. 26, 1983, emergency	
Arkansas: Poinsett	Unincorporated areas	050172A	May 6, 1983, emergency	June 7, 1977.
Oklahoma: Oklahoma	...do	400466A	...do	July 13, 1982.
Indiana: Grant	...do	180435A	...do	May 19, 1978.

BILLING CODE 6718-03-M

---

44 CFR Part 67

National Flood Insurance Program; Final Flood Elevation Determinations; Alabama et al.

AGENCY: Federal Emergency Management Agency.

ACTION: Final rule.

SUMMARY: Final base (100-year) flood elevations are finalized for the communities listed below.

The base (100-year) flood elevations are the basis for the flood plain management measures that the community is required to either adopt or show evidence of being already in effect in order to qualify or remain qualified for participation in the National Flood Insurance Program (NFIP).

EFFECTIVE DATE: The date of issuance of the Flood Insurance Rate Map (FIRM) showing base (100-year) flood elevations, for the community. This date may be obtained by contacting the office where the maps are available for inspection indicated on the table below.

ADDRESS: See table below.

FOR FURTHER INFORMATION CONTACT: Dr. Brian R. Mrazik, Acting Chief, Engineering Branch, National Flood Insurance Program, Federal Emergency Management Agency, Washington, D.C. 20472, (202) 287–0230.

SUPPLEMENTARY INFORMATION: The Federal Emergency Management Agency gives notice of the final determinations of flood elevations for each community listed. Proposed base flood elevations or proposed modified base flood elevations have been published in the **Federal Register** for each community listed.

This final rule is issued in accordance with Section 110 of the Flood Disaster Protection Act of 1968 (Title XIII of the Housing and Urban Development Act of 1968 (Pub. L. 90–448)), 42 U.S.C. 4001–4128, and 44 CFR Part 67. An opportunity for the community or individuals to appeal proposed determination to or through the community for a period of ninety (90) days has been provided.

The Agency has developed criteria for flood plain management in flood-prone areas in accordance with 44 CFR Part 60.

Pursuant to the provisions of 5 U.S.C. 605(b), the Associate Director, to whom authority has been delegated by the Director, Federal Emergency Management Agency, hereby certifies for reasons set out in the proposed rule that the final flood elevation determinations, if promulgated, will not have a significant economic impact on a substantial number of small entities. Also, this rule is not a major rule under terms of Executive Order 1229, so no regulatory analyses have been prepared. It does not involve any collection of information for purposes of the Paperwork Reduction Act.

List of Subjects in 44 CFR Part 67

Flood insurance, Flood plains.

Interested lessees and owners of real property are encouraged to review the proof Flood Insurance Study and Flood Insurance Rate Map available at the address cited below for each community.

The base (100-year) flood elevations are finalized in the communities listed below. Elevations at selected locations in each community are shown. No appeal was made during the 90-day period and the proposed base flood elevations have not been changed.

State	City/town/county	Source of flooding	Location	#Depth in feet above ground. *Elevation in feet (NGVD)
Alabama	City of Anniston, Calhoun County (FEMA-6470)	Cane Creek	Approximately 100 feet downstream of Southern Railway.	*670
			Approximately 250 feet upstream of Weaver Road	*677

Issued: May 20, 1983.

Dave McLoughlin,

Deputy Associate Director, State and Local Programs and Support.

[FR Doc. 83-15457 Filed 6-8-83; 8:45 am]

BILLING CODE 6718-03-M

---

44 CFR Part 67

National Flood Insurance Program; Final Flood Elevation Determinations; California et al.

AGENCY: Federal Emergency Management Agency.

ACTION: Final rule.

SUMMARY: Final base (100-year) flood elevations are finalized for the communities listed below.

The base (100-year) flood elevations are the basis for the flood plain management measures that the community is required to either adopt or show evidence of being already in effect in order to qualify or remain qualified for participation in the National Flood Insurance Program (NFIP).

EFFECTIVE DATE: The date of issuance of the Flood Insurance Rate Map (FIRM) showing base (100-year) flood elevations, for the community. This date may be obtained by contacting the office where the maps are available for inspection indicated on the table below.

ADDRESSES: See table below.

FOR FURTHER INFORMATION CONTACT: Dr. Brian R. Mrazik, Acting Chief, Engineering Branch, National Flood Insurance Program, Federal Emergency Management Agency, Washington, D.C. 20472, (202) 287–0230.

SUPPLEMENTARY INFORMATION: The Federal Emergency Management Agency gives notice of the final determinations of flood elevations for each community listed. Proposed base flood elevations or proposed modified base flood elevations have been published in the **Federal Register** for each community listed.

This final rule is issued in accordance with Section 110 of the Flood Disaster Protection Act of 1968 (Title XIII of the Housing and Urban Development Act of 1968 (Pub. L. 90–448)), 42 U.S.C. 4001–4128, and 44 CFR Part 67. An opportunity for the community or individuals to appeal proposed determination to or through the community for a period of ninety (90) days has been provided.

The Agency has developed criteria for flood plain management in flood-prone areas in accordance with 44 CFR Part 60.

Pursuant to the provisions of 5 U.S.C. 605(b), the Associate Director, to whom authority has been delegated by the Director, Federal Emergency Management Agency, hereby certifies for reasons set out in the proposed rule that the final flood elevation determinations, if promulgated, will not have a significant economic impact on a substantial number of small entities. Also, this rule is not a major rule under terms of Executive Order 1229, so no regulatory analyses have been prepared. It does not involve any collection of information for purposes of the Paperwork Reduction Act.

List of Subjects in 44 CFR Part 67

Flood insurance, Flood plains.

Interested lessees and owners of real property are encouraged to review the proof Flood Insurance Study and Flood Insurance Rate Map available at the address cited below for each community.

The base (100-year) flood elevations are finalized in the communities listed below. Elevations at selected locations in each community are shown. No appeal was made during the 90-day period and the proposed base flood elevations have not been changed.

State	City/town/county	Source of flooding	Location	#Depth in feet above ground. *Elevation in feet (NGVD)
California	Carlsbad (city), San Diego County, FEMA-6485	Buena Vista Creek	30 feet upstream from center of Haymar Drive	*39

(National Flood Insurance Act of 1968 (Title XIII of Housing and Urban Development Act of 1968), effective January 28, 1969 (33 FR 17804, November 28, 1968), as amended; 42 U.S.C. 4001–4128; Executive Order 12127, 44 FR 19367; and delegation of authority to the Associate Director)

Issued: May 27, 1983.

Dave McLoughlin,

Deputy Associate Director, State and Local Programs and Support.

[FR Doc. 83-15443 Filed 6-9-83; 8:45 am]

BILLING CODE 6718-03-M

ACTION

45 CFR Part 1207

Senior Companion Program

AGENCY: ACTION.

ACTION: Final rule.

SUMMARY: This final regulation clarifies and updates existing Senior Companion Program regulations relating to project development and funding, project operations, non-ACTION funded projects and special limitations affecting aspects of project operation. The text is simplified and reduced wherever possible.

EFFECTIVE DATE: This regulation shall take effect on July 25, 1983.

FOR FURTHER INFORMATION CONTACT: C. Wade Freeman, Director, Older American Volunteer Programs, ACTION, 806 Connecticut Avenue, NW., Room M–1006, Washington, D.C. 20525, (202) 254–7310.

SUPPLEMENTARY INFORMATION: ACTION has determined that this regulation is not a major rule as defined by Executive Order 12291. The regulation will not result in any of the following:

1. Any effect on the economy;
2. Any increase in costs or prices for consumers, individual industries, Federal, State, or local government agencies or geographic regions; or
3. Any adverse effects on competition, employment, investment productivity, innovation or on the ability of the United States-based enterprises to compete with foreign-based enterprises in domestic or export markets.

Discussion of Comments and Response

The Agency received numerous comments by volunteers, project directors, sponsors, nursing home administrators and associations, and other members of the public on proposed regulations (47 FR 49673). The vast majority of the comments pertained to restrictions on the placement of Senior Companions in proprietary health care organizations. The following is the Agency response to the substantive comments, and the resulting modifications.

Section 1207.1.2: Several comments suggested that the definitions of "care plan" and "in home" be dropped because they are not mentioned elsewhere in the text. This change has been adopted. Others suggested adding definitions for "rural" and "handicapped" because they appear in the body of the text. The term "rural" has been deleted from the text and a definition of "handicapped" has been added. The Agency inadvertently excluded definitions for three technical terms used in the text, "letter of Agreement", "Memorandum of Understanding" and "United States and States." These have been added.

One substantive and two minor clarifying changes have been made in the definition of volunteer station. The respondents pointed out that: (1) Nursing home residents in urban areas should have equal access to Senior Companions; (2) The exclusion of urban proprietary health care organizations is discriminatory in that it eliminates Senior Companion service to socially isolated persons because of the ownership category of a health care organization; (3) Senior Companions assigned to such organizations do not function as staff, their role being to establish one-to-one relationships with residents who lack family or friends, which supplements, not duplicates, the work of paid staff; (4) The assignment of Senior Companions to proprietary health care organizations generates significant in-kind resources for physicals, transportation, and meals, which enables projects to place Companions in other stations that cannot provide comparable support levels.

Proprietary health care organizations have been included in the definition of volunteer station without regard to geographic location. In addition, the Agency did not intend to require licensure or certification when none was required by state or local governmental agencies. Thus, the sentence, "Each volunteer station must be licensed or otherwise certified by the appropriate state or local government" has been revised by inserting "when required" after "certified." The sentence "Private homes are not volunteer stations" has been added to clarify the role of station in-home placement assignments.

Section 1207.2–4: Paragraph (b) has been revised to reflect the replacement to OMB Circular A–95 with Executive Order 12372, the "Intergovernmental Review of Federal Programs and Activities"

Section 1207.3–1: A new paragraph has been added to clarify the sponsor's role in obtaining ACTION concurrence in the selection of volunteer stations.

Section 1207.3–2: Several persons appeared confused about the requirement in paragraph (c) that project directors "may not * * * serve, concurrently, in another capacity, paid or unpaid, during established working hours" without prior Agency approval. Their contention that this paragraph prohibits service in unpaid community volunteer or aging service activities is not accurate. ACTION encourages its sponsors to coordinate with other related groups in the community (§ 1207.1–3) and to take a leadership role in promoting such coordination. In order to eliminate the confusion, subsection (c) has been modified.

Section 1207.3–4: Paragraph (a)(3) has been modified to delete the reference to "rural service area" and add "sparsely populated areas".

Section 1207.3–5: Several comments objected to the requirement in paragraph (a)(5) that Senior Companion selection may not be based on ownership of or access to a vehicle since this impairs recruitment of Companions in rural service areas. This provision has been deleted.

Comments received from projects recommended that paragraph (c) be amended to provide a waiver of the requirement that volunteer direct benefits be a sum equal to at least 90% of the Federal share of the grant. This provision was inadvertently omitted from the text and the following language has been added: "In exceptional circumstances the Director may waive this requirement."

Paragraph (c)(1)(iii)(C) has been modified to clarify the requirements for personal automobile liability insurance.

Several comments suggested deletion of the provision in paragraph (c)(5) which limits the stipend to one member in households in which more that one eligible member serves as a Senior Companion or Foster Grandparent, except where enrollees of these programs marry. It was felt that this provision discriminates against eligible married couples. The Agency has concluded that this provision must be retained for the following reasons: (1) Pursuant to the statute, SCP enrollment is targeted at the poorest low-income Americans and this provision assures that the opportuntiy to receive stipends is extended to more low-income households; (2) Other direct benefits, in the form of insurance, meals, physical examinations, transportation, and recognition, provided to all income eligible members, offset the cost of volunteering for the household member who does not receive the stipend.

Several comments suggested deleting the prohibition in paragraph (c)(6) against using project funds for transportation provided for or on behalf of clients. The Agency has concluded that this provision must be retained because the purpose of project funds is to transport or provide reimbursement for transportation of Senior Companions between their homes and places of assignment. Transportation of clients is the responsibility of the volunteer station which provides services to the client.

The Senior Companion Program is identified by No. 72.008 in the Catalog of Federal Domestic Assistance.

Pursuant to Section 3(c)3 of E.O. 12291, entitled "Federal Regulation," the required review process has been completed by the Director of the Office of Management and Budget.

List of Subjects in 45 CFR Part 1207

Aged, Grant programs—social programs, Reporting and recordkeeping requirements, Volunteers.

45 CFR Part 1207 is revised to read as follows:

PART 1207—SENIOR COMPANION PROGRAM

Subpart A—General

Sec.
1207.1–1 Purpose of the program.
1207.1–2 Definitions.
1207.1–3 Coordination.

Subpart B—Project Development and Funding

1207.2–1 Inquiries.
1207.2–2 Local support.
1207.2–3 Sponsor eligibility and solicitation of proposals.
1207.2–4 Project proposals.
1207.2–5 Review of project proposals.
1207.2–6 Awards.
1207.2–7 Grand management.
1207.2–8 Suspension, termination, denial of refunding.

Subpart C—Project Operations

1207.3–1 Sponsor responsibility.
1207.3–2 Project staff.
1207.3–3 Advisory council.
1207.3–4 Volunteer station responsibility.
1207.3–5 Senior companions.
1207.3–6 Senior companion assignments.

Subpart D—Non-ACTION Funded Projects

1207.4–1 Memorandum of agreement.

Subpart E—Sanctions and Legal Representation

Sec.
1207.5–1 Special limitations.
1207.5–2 Legal representation.

Authority: Secs211(d), (e); 212, 213, 221, 222, 223, 402(14) and 420 of Pub. L. 93–113, 87 Stat. 402, 403, 404, 407 and 414, sec. 213 of Pub. L. 97–35, 97 Stat. 487, 42 U.S.C. 5011 (d), (e); 5012, 5021, 5022, 5023, 5042(14), 5060 and 5013.

Subpart A—General

§ 1207.1–1 Purpose of the program.

The Senior Companion Program (SCP) is authorized under Title II, Part C,of the Domestic Volunteer Service Act of 1973, as amended (Pub. L. 93–113). The dual purpose of the program is to create part-time stipended volunteer community service opportunities for low-income persons aged 60 and over, and to provide supportive person-to-person services to assist adults having exceptional needs, developmental disabilities or other special needs for companionship.

§ 1207.1–2 Definitions.

Terms used in this part are defined as follows:

"Act" is the Domestic Volunteer Service Act of 1973, as amended (Pub. L. 93–113, 87 Stat. 394, 42 U.S.C. 4951).

"Adult" is any person aged 21 or over.

"Advisory Council" is a group of persons formally organized by the project sponsor for the purpose of advising and supporting the sponsor in operating the project effectively.

"Agency" is the federal ACTION agency.

"Direct Benefits" are stipends, meals, transportation, annual physical examinations, volunteer insurance, recognition and uniforms included in the budget as *Volunteer Expenses.*

"Director" is the Director of ACTION.

"Exceptional Needs" are one or more physical, emotional, or mental health limitation(s).

"Federally recognized Indian tribal government" means the governing body or a governmental agency of any Indian tribe, band, nation, or other organized group or community (including any Native village as defined in Section 3 of the Alaska Native Claims Settlement Act, 85 Stat. 688) certified by the Secretary of Interior as eligible for the special programs and services provided through the Bureau of Indian Affairs.

"Handbook" is the SCP Handbook No. 4405.91, which contains policies for implementing these regulations.

"Handicapped" is a person or persons having physical or mental impairments that substantially limit one or more major life activities.

"Hard-to-reach" individuals are those who are physically or socially isolated because of factors such as language, disability, or inadequate transportation.

"Household" refers to related or unrelated persons living under the same roof and sharing common living expenses.

"Letter of Agreement" is a written agreement between a volunteer station, the project sponsor and the adult served or the person legally responsible for the adult. It authorizes the assignment of a Senior Companion in the client's home, defines Senior Companion activities and delineates the specific arrangements for supervision.

"Memorandum of Understanding" is a written statement prepared and signed by the Senior Companion sponsor and the volunteer station which identifies project requirements, working relationships and mutal responsibilities.

"OAVP" refers to the Older American Volunteer Programs, which include: the Senior Companion Program, the Foster Grandparent Program, and the Retired Senior Volunteer Program.

"Project" is the locally planned and implemented Senior Companion Program activity as agreed upon between ACTION and the sponsor.

"Service Area" is a geographically defined area in which Senior Companions are recruited, enrolled, and placed on assignments.

"Service Schedule" is the 20 hours per week that a Senior Companion serves.

"Sponsor" is a public agency or private nonprofit organization which is responsible for the operation of the Senior Companion project.

"Stipend" is a payment to Senior Companions to enable them to serve without cost to themselves.

"United States and States" means the several states, the District of Columbia, the Virgin Islands, Puerto Rico, Guam, American Samoa and the Trust Territory of the Pacific Islands.

"Volunteer Station" is a public agency, private nonprofit organization or proprietary health care agency or organization that accepts the responsibility for assignment and supervision of Senior Companions. Each volunteer station must be licensed or otherwise certified, when required, by the appropriate state or local government. Private homes are not volunteer stations.

§ 1207.1-3 Coordination.

The sponsor shall coordinate activities with project-related groups and individuals, including those representing government, industry, labor, volunteer organizations, programs for the aging, including State and Area Agencies on Aging, and other ACTION programs, to facilitate cooperation with existing or planned community services and to develop community support.

Subpart B—Project Development and Funding

§ 1207.2-1 Inquiries.

Inquiries regarding the Senior Companion Program application process, program criteria, or the availability of funds, should be directed to the ACTION State Office serving the inquirer's own state. ACTION headquarters office in Washington, D.C. will assist in directing inquiries to the appropriate State office.

§ 1207.2-2 Local support.

An ACTION grant may be awarded to fund up to 90% of the cost of development and operation of a Senior Companion project. The sponsor is required to contribute at least 10% of the total project cost. Stipend payments in excess of the amount established by ACTION may not be included as part of the local support commitment. In exceptional circumstances the Director may approve assistance for more than 90% of the total project costs if: (a) The project is located in an area where local resources are too limited to provide 10%; or (b) a test project is determined to be of exceptional value, sufficient to warrant Federal support in excess of 90% of the total project cost.

§ 1207.2-3 Sponsor eligibility and solicitation of proposals.

(a) *Sponsor eligibility.* ACTION will award grants only to public agencies and private non-profit organizations in the United States which have the authority to accept and the capability to administer such grants.

(b) *Solicitation of proposals.* Any eligible organization may file an application for a grant. Applicants may also be solicited by ACTION pursuant to its objective of achieving equitable program resource distribution. Solicited applications are not assured of selection of approval and may have to compete with other solicited or unsolicited applications.

§ 1207.2-4 Project proposals.

(a) Applicants shall use standard forms prescribed by ACTION. ACTION State Offices will provide applicants with guidance and any additional instruction necessary to plan and budget proposed program activities.

(b) Agencies and organizations submitting grant applications must comply with provisions of Executive Order 12372, the "Intergovernmental Review of Federal Programs and Activities," as set forth in 45 Code of Federal Regulations (CFR) Part 1233.

(c) A potential sponsor must submit one copy of an application for a new SCP project to the State Agency on Aging, which has 45 days to review the application and make recommendations. The State Agency on Aging shall state in writing to ACTION its recommendations and reasons within this time period or will be considered to have waived its rights under this part.

§ 1207.2-5 Review of project proposals.

(a) The ACTION State Office for the applicant's state will review the grant application to ensure that program requirements are complied with and that required documentation has been attached.

(b) If not approved, the application will be returned to the applicant with explanation of ACTION's decision. The unsuccessful applicant may reapply when the inadequacy, if any, found in the application is resolved.

§ 1207.2-6 Awards.

(a) ACTION will, within funds available, award a grant in writing to those applicants whose grant proposals provide the best potential for serving the purpose of the program. The award will be documented by Notice of Grant Award (NGA).

(b) The parties to the NGA are ACTION and the sponsoring organization. The NGA will document the sponsor's commitment to fulfill specific programmatic objectives and financial obligations. It will document the extent of ACTION's obligation to provide financial support to the sponsor.

(c) A sponsor may receive a grant award for more than one OAVP project.

§ 1207.2-7 Grant management.

(a) Sponsors shall manage grants awarded to them in accordance with these regulations, ACTION Handbook 2650.2, entitled *Grants Management Handbook for Grantees*, and SCP Handbook No. 4405.91. A copy of each document will be furnished the sponsor at the time the initial grant is awarded.

(b) Project support provided under an ACTION grant shall be furnished at the lowest possible cost consistent with the effective operation of the project.

(c) Project costs for which ACTION funds are budgeted must be justified as being essential to project operation.

§ 1207.2-8 Suspension, termination and denial of refunding.

Grant suspension, termination and denial of refunding procedures are set forth in 45 CFR Part 1206, Chapter XII, and in ACTION Handbook 2650.2.

Subpart C—Project Operations

§ 1207.3–1 Sponsor responsibility.

The sponsor is responsible for all programmatic and fiscal aspects of the project and may not delegate or contract this responsibility to another entity. The sponsor has the responsibility to:

(a) Employ, supervise and support a Project Director who will be directly responsible to the sponsor for the management of the project, including selection, training and supervision of project staff;

(b) Provide for the recruitment, assignment, supervision and support of Senior Companions. Special efforts are to be made to recruit and assign persons from minority groups, handicapped and hard-to-reach individuals, and groups in the community which are underrepresented in the project. The sponsor will stress the recruitment and enrollment of persons not already volunteering;

(c) Provide financial and in-kind support to fulfill the project's local share commitment;

(d) Establish, orient, and support an independent SCP Advisory Council;

(e) Provide the Senior Companions with not less than the minimum accident, personal liability, and excess auto liability insurance required by ACTION;

(f) Provide for appropriate recognition of the Senior Companions and their activities;

(g) Establish personnel practices, including provision of position descriptions for project staff, and service policies for Senior Companions, including grievance and appeal procedures for both volunteers and project staff;

(h) Ensure compliance with ACTION requirements relating to nondiscrimination, religious activity, political activity, lobbying, patronage toward persons related by blood or marriage, labor or anti-labor organization or related activities, nondisplacement of employed workers, nonimpairment of contracts, and noncompensation for services;

(i) Maintain project records in accordance with generally accepted accounting practice and provide for the accurate and timely preparation and submission of reports required by ACTION;

(j) Develop Senior Companion service opportunities through volunteer stations;

(k) Obtain ACTION concurrence in the selection of volunteer stations prior to the placement of Senior Companions;

(l) Negotiate, prior to placement of Senior Companions; a written Memorandum of Understanding with each volunteer station, identifying sponsor responsibilities, volunteer station responsibilities, and joint responsibilities;

(m) Orient volunteer station staff to the program and its activities;

(n) Provide not less than 40 hours of pre-service orientation to the Senior Companions;

(o) Arrange group in-service training for Senior Companions for a minimum of four hours each month;

(p) Provide or arrange for direct benefits (insurance, meals, physical examinations, recognition, stipends, transportation, and uniforms, if needed) for the Senior Companions in a timely manner;

(q) Ensure provision for volunteer safety;

(r) Comply with program regulations, policies and procedures prescribed by ACTION;

(s) Ensure that appropriate liability insurance is maintained for owned, nonowned, or hired vehicles used in the project;

(t) Develop a realistic transportation plan for the project based on lowest cost transportation modes; and

(u) Conduct an annual appraisal of volunteers' performance and an annual review of volunteers' income eligibility.

§ 1207.3–2 Project staff.

(a) Project staff are employees of the sponsor and are subject to its personnel policies and practices.

(b) ACTION must concur in writing with the sponsor's selection of a project director before such person is employed or earns pay from grant funds.

(c) The SCP project director shall serve full time and may not be employed or serve concurrently in another capacity, paid or unpaid, during established working hours without prior approval from ACTION. This does not preclude participation of the project director in activities of related local agencies, boards or organizations for the purposes of coordination and facilitating achievement of project goals and objectives.

(d) Compensation levels for project staff, including wages, salaries and fringe benefits, should be comparable to like or similar positions in the sponsor organization and in the community.

§ 1207.3–3 Advisory Council.

An Advisory Council shall be established to advise and assist the project sponsor and staff. There shall be a separate Advisory Council for each Older American Volunteer project administered by the sponsor. When a small number of volunteers is enrolled or other special conditions prevail, this requirement may be waived by the Director of OAVP. The Advisory Council shall:

(a) Advise the project director in the formulation of local policy, planning, and the development of operational procedures and practices consistent with program policies;

(b) Assist the sponsor by promoting community support for the project, advise on personnel actions affecting volunteers and project staff, and assist in developing local financial and in-kind resources;

(c) Include in its membership, when available: community, business and labor leaders, representatives from volunteer stations, public and private agencies, and persons specializing in the fields of aging and voluntarism. In addition, at least one-fourth of the Advisory Council shall be low-income persons aged 60 or over. This group must include Senior Companions as voting members. The sponsor's chief executive or designee, one member of its governing board, and the project director should be members of the Advisory Council but may not be officers of the Advisory Council. The sponsor's chief executive and the project director may not be voting members. The member representing the sponsor's governing board may be a voting member. The provisions of Section 1207.5–1, Nondiscrimination, apply to the Advisory Council;

(d) Meet on a regular schedule and establish its own procedures, including election of officers and terms of office;

(e) Conduct an annual appraisal of project operation and submit a report to the sponsor, which shall be attached to the continuation grant application;

(f) Have an opportunity to advise the sponsor in advance on the selection or termination of the project director; and

(g) Ensure procedures are in effect to hear an appeal to actions affecting a Senior Companion adversely.

§ 1207.3–4 Volunteer station responsibility.

(a) Normally the volunteer station is an organization other than the sponsoring organization. The sponsor may function as a Senior Companion station only if the sponsor is: (1) A state organization administering a statewide Senior Companion project where the volunteer station is part of the state organization; (2) a federally-recognized Indian tribal government; or (3) in a sparsely populated area. In such sparsely populated areas, up to 10% of the enrolled volunteers may be placed directly by the sponsor.

(b) Volunteer station responsibilities include:

(1) Assisting with or arranging for volunteer transportation on or between assignments;

(2) Assisting in the provision of appropriate volunteer recognition;

(3) Developing and monitoring volunteer assignments, selecting adults to be served, supervising the volunteers, assisting the sponsor in matching volunteers to assignments and in providing pre-service orientation and in-service training for the Senior Companions;

(4) Providing for volunteer safety;

(5) Keeping records and preparing reports required by the sponsor; and

(6) Signing, prior to the placement of Senior Companions, a Memorandum of Understanding with the sponsor establishing working relationships and mutual responsibilities, and detailing the responsibilities outlined above as well as other agreed upon responsibilities, including the particulars of the volunteers' supervision.

(i) When Senior Companions are to serve in private homes, the Memorandum of Understanding shall also require that the volunteer station obtain a Letter of Agreement from the person to be served, or the person legally responsible for that person, authorizing or requesting volunteer service in the home and indicating what specific activities are to be performed.

(ii) The Memorandum of Understanding is to be reviewed and, as appropriate, changed annually. The Memorandum may be amended at any time by mutual agreement and must be signed and dated annually to indicate that review and update, if needed, have been accomplished.

§ 1207.3–5 Senior Companions.

(a) *Eligibility.* (1) Senior Companions shall be 60 years of age or older, no longer in the regular work force, determined by a physical examination to be capable of serving adults with exceptional or special needs without detriment to either themselves or the adult served, and willing to accept supervision as required.

(2) Eligibility to be a Senior Companion may not be restricted on the basis of education, experience, citizenship, race, color, creed, belief, sex, national origin, handicap, or political affiliation.

(3) To be enrolled, a Senior Companion cannot have an annual income, from all sources, exceeding the ACTION income eligibility guideline for the state in which he or she resides. The ACTION income eligibility guideline for each state is the higher amount of either: (i) 125% of the poverty line as set forth in Section 625 of the Economic Opportunity Act of 1964, as amended by Pub. L. 92–424 (42 U.S.C. 2971d), or (ii) 100% of the poverty line plus the amount the state supplements Federal Supplemental Security Income (SSI). In cases where a Senior Companion is a member of a household in which other persons share common expenses, his or her income eligibility is determined by the combined income of members of the household.

(4) Once enrolled, a Senior Companion shall remain eligible to serve and to receive a stipend as long as his or her income does not exceed the prescribed ACTION income eligibility guideline by 20%. Income eligibility shall be reviewed annually by the sponsor.

(5) Recruitment and selection of a Senior Companion may not be based on any requirement of employment experience or formal education.

(b) Terms of service. (1) Senior Companions serve a total of twenty hours a week, usually five days a week. Travel time between the volunteer's home and place of assignment may not be considered part of the service schedule and is not stipended. Travel time between individual assignments is a part of the service schedule. Meal time may be part of the service schedule only if meals are taken with the individual served, and the taking of meals together is deemed by the sponsor and the volunteer station to be beneficial to the person served.

(2) Senior Companions are volunteers, not employees, of the sponsor.

(c) *Direct benefits.* The total of direct benefits for Senior Companions, including stipends, insurance, transportation, meals, physical examinations, recognition, and uniforms if appropriate, shall be a sum equal to at least 90% of the amount of the ACTION Federal share of the grant. In exceptional circumstances, the Director may waive this requirement. Federal and non-federal resources can be used to make up this sum. Direct benefits may not be subject to any tax or charge or be treated as wages or compensation for the purposes of unemployment insurance, temporary disability, retirement, public assistance, or similar benefit payments or minimum wage laws. Direct benefits include:

(1) *Insurance.* Senior companions shall be provided with the ACTION specified minimum levels of accident insurance, personal liability insurance and, when appropriate, excess automobile liability insurance.

(i) *Accident insurance.* Accident insurance shall cover Senior Companions for personal injury during travel between their homes and places of assignment, during their volunteer service, during meal periods while serving as a volunteer, and while attending project-sponsored activities, such as recognition activities, orientation and Advisory Council meetings.

Protection shall be provided against claims in excess of any benefits or services for medical care or treatment available to the volunteer from other sources including:

(A) Health insurance coverage;

(B) Other hospital or medical service plans;

(C) Any coverage under labor-management trusteed plans, union welfare plans, employer organization plans, or employee benefit organization plans; and

(D) Coverage under any governmental programs or coverage provided by any statute.

When benefits are provided in the form of services rather than by cash payments, the reasonable cash value of each service rendered shall be considered in determining the applicability of this provision. The benefits payable under a plan shall include the benefits that would have been payable had a claim been duly made therefor. The benefits payable shall be reduced to the extent necessary so that the sum of such reduced benefits and all the benefits provided for by any other plan shall not exceed the total expenses incurred by the volunteer.

(ii) *Personal liability insurance.* Protection shall be provided against claims in excess of protection provided by other insurance.

(iii) *Excess automobile liability insurance.* Protection shall be provided against claims in excess of the greater of either:

(A) Liability insurance volunteers carry on their own automobiles, or

(B) The limits of the applicable state financial responsibility law, or

(C) In the absence of a state financial responsibility law, levels of protection to be determined by ACTION for each person, each accident, and for property damage.

Senior Companions who drive their personal vehicles to or on assignments or project related activities must maintain personal automobile liability insurance equal to or exceeding the levels established by (B) or (C) above

(2) *Meals.* Within the limits of available resources and project policy, Senior Companions will be provided or will receive assistance with the cost of

meals taken during their service schedule.

(3) *Physical examinations.* Senior Companions are required to have a physical examination prior to assignment and annually thereafter.

(4) *Appropriate recognition* will be provided for Senior Companions.

(5) *Stipends.* A Senior Companion will receive a stipend in an amount determined by ACTION and payable in regular installments. The minimum amount of the stipend is set by law and may be adjusted by the Director from time to time. When more than one eligible member of a household serves as a Senior Companion or Foster Grandparent, only one member shall be entitled to receive a stipend. All income eligible members in such cases shall be entitled to other direct benefits. Only in cases where enrolled Senior Companions or Foster Grandparents marry, may each continue to receive a stipend.

(6) *Transportation.* Senior Companions shall be provided transportation or receive assistance with the cost of transportation to and from volunteer assignments and official project activities, including orientation, training, advisory council meetings and recognition events. Reimbursement will be within the limits of available resources and project policy. Project funds may not be utilized to reimburse Senior Companions for transportation provided for or on behalf of clients.

§ 1207.3–6 Senior companion assignments.

(a) Assignments and activities must involve person-to-person relationships with the individuals served and may not include service to the volunteer station.

(b) Individuals served by Senior Companions must be adults, primarily older adults, who have one or more physical, emotional, or mental health limitations and are in need of assistance to achieve and maintain their highest level of independent living.

Subpart D—Non-ACTION Funded Projects

§ 1207.4–1 Memorandum of agreement.

(a) If an eligible agency or organization wishes to sponsor a project without ACTION funding, and wishes to receive technical assistance and materials from ACTION, it must sign a Memorandum of Agreement with ACTION identifying mutual responsibilities and certifying its intent to comply with ACTION regulations.

(b) A non-ACTION funded project sponsor's noncompliance with the Memorandum of Agreement may result in suspension or termination of ACTION's technical assistance to the project.

(c) Termination of the agreement by either the project sponsor or ACTION will result in loss of the tax exempt status of volunteer direct benefits allowable to Senior Companions and loss of coverage by the statutory provision that receipt of the stipend will not affect the volunteers' eligibility for any governmental assistance.

(d) Entry into a Memorandum of Agreement with a sponsoring agency which does not receive ACTION funds will not, under any circumstances, create a financial obligation on the part of ACTION for costs associated with the project including increases in required payments to volunteers which may result from changes in the Act or in ACTION regulations.

Subpart E—Sanctions and Legal Representation

§ 1207.5–1 Special limitations.

(a) *Political activities.* (1) No part of any grant shall be used to finance, directly or indirectly, any activity to influence the outcome of any election to public office, or any voter registration activity.

(2) No project shall be conducted in a manner involving the use of funds, the provision of services, or the employment or assignment of personnel in a manner supporting or resulting in the identification of such project (i) any partisan or nonpartisan political activity associated with a candidate, or contending faction or group, in an election or, (ii) any activity to provide voters or prospective voters with transportation to the polls or similar assistance in connection with any such election, or (iii) any voter registration activity.

(3) No Senior Companion or employee of a sponsor or volunteer station may take any action, when serving in such capacity, with respect to a partisan or nonpartisan political activity that would result in the identification or apparent identification of the Senior Companion Program with such activity.

(4) No grant funds may be used by the sponsor in any activity for the purpose of influencing the passage or defeat of legislation or proposals by initiative petition, except

(i) in any case in which a legislative body, a committee of a legislative body, or a member of a legislative body requests a Senior Companion, a sponsor chief executive, his or her designee, or project staff to draft, review or testify regarding measures or to make representation to such legislative body, committee or member, or (ii) in connection with an authorization or appropriations measure directly affecting the operation of the Senior Companion Program.

Prohibitions on Electoral and Lobbying Activities are fully set forth in 45 CFR Part 1226 and in ACTION Handbook 2650.2.

(b) *Restrictions on State or local government employees.* If the sponsor is a State or local government agency which received a grant from ACTION, certain restrictions contained in Chapter 15 of Title 5 of the United States Code are applicable. They are related to persons who are principally employed in activities associated with the project. The restrictions are not applicable to employees of educational or research institutions. An employee subject to these restrictions may not:

(1) Use his/her official authority or influence for the purpose of interfering with or affecting the result of an election or nomination for office; or

(2) Directly or indirectly coerce, attempt to coerce, command or advise a State or local officer or employee to pay, lend, or contribute anything of value to a political party, committee, organization, agency, or person for a political purpose; or

(3) Be a candidate for elective office, except in a nonpartisan election. "Nonpartisan election" means an election at which none of the candidates is to be nominated or elected as representing a political party any of whose candidates for Presidential elector received votes in the last preceding election at which Presidential electors were selected.

(c) *Religious activities.* Senior Companions and project staff funded by ACTION shall not give religious instruction, conduct worship services or engage in any form of proselytization as part of their duties.

(d) *Nondiscrimination.* For purposes of this subpart, and for purposes of Title VI of the Civil Rights Act of 1964 (42 U.S.C. 2000 d *et seq.*), section 504 of the Rehabilitation Act of 1973 (29 U.S.C. 794) and the Age Discrimination Act of 1975 (Pub. L. 94–135, Title III; 42 U.S.C. 6101 *et seq.*), any program, project, or activity to which volunteers are assigned under this Act shall be deemed to be receiving federal financial assistance.

(1) No person with responsibility in the operation of a project shall discriminate with respect to any activity or program because of race, creed, belief, color, national origin, sex, age, handicap, or political affiliation.

(2) Sponsors are required to take affirmative action to overcome the effects of prior discrimination. Even in the absence of prior discrimination, a sponsor may take affirmative action to overcome conditions which resulted in limiting participation.

(3) No person in the United States shall on the ground of sex be excluded from participation in, be denied the benefits of, be subjected to discrimination under, or be denied employment in connection with a Senior Companion project.

(e) *Labor and anti-labor activity.* No grant funds shall be directly or indirectly utilized to finance labor or anti-labor organization or related activity.

(f) *Nondisplacement of employed workers.* A Senior Companion may not perform any service or duty or engage in any activity which would otherwise be performed by an employed worker or which would supplant the hiring of employed workers.

(g) *Nonimpairment of contracts.* A Senior Companion may not perform any service, or duty, or engage in any activity which impairs an existing contract for service. The term "contract for service" includes but is not limited to contracts, understandings, and arrangements, either written or oral, to provide professional, managerial, technical, or administrative services.

(h) *Noncompensation for services.* No person, organization, or agency shall request or receive any compensation for services of Senior Companions.

(i) *Nepotism.* Persons selected for projects staff positions may not be related by blood or marriage to other project staff, sponsor staff or officers, or members of the sponsor Board of Directors, unless there is concurrence by the Advisory Council, with notification to ACTION.

(j) *Volunteer separation.* A sponsor may separate a volunteer for cause, including, but not limited to, extensive or unauthorized absences, misconduct, inability to perform assignments or having income in excess of the eligibility level established by ACTION.

§ 1207.5–2 Legal representation.

Counsel may be employed and counsel fees, court costs, bail, and other expenses incidental to the defense of a Senior Companion may be paid in a criminal, civil or administrative proceeding, when such a proceeding arises directly out of the performance of the Senior Companion activities. 45 CFR Part 1220 establishes the circumstances under which ACTION may pay such expenses.

Signed at Washington, D.C. this 3rd day of June, 1983.

Thomas W. Pauken,

Director, ACTION.

45 CFR Part 1208

Foster Grandparent Program

AGENCY: ACTION.

ACTION: Final rule.

SUMMARY: This final regulation clarifies and updates existing Foster Grandparent Program regulations relating to project development and funding, project operations, non-ACTION funded projects and special limitations affecting aspects of project operations. The test is simplified and reduced wherever possible.

EFFECTIVE DATE: This regulation shall take effect on July 25, 1983.

FOR FURTHER INFORMATION CONTACT: C. Wade Freeman, Director, Older American Volunteer Programs, ACTION, 806 Connecticut Avenue, NW., Room M–1006, Washington, D.C. 20525, (202) 254–7310.

SUPPLEMENTARY INFORMATION: ACTION has determined that this regulation is not a major rule as defined by Executive Order 12291. The regulation will not result in any of the following:

1. Any effect on the economy;
2. Any increase in costs or prices for consumers, individual industries, Federal, State, or local government agencies of geographic regions; or
3. Any adverse effects on competition, employment, investment productivity, innovation or on the ability of the United States-based enterprises to compete with foreign-based enterprises in domestic or export markets.

Discussion of Comments and Response: A total of 15 commenters submitted recommendations in regard to the proposed rule revision (47 FR 49679). Each recommendation has been duly considered. The following is ACTION's response to substantive comments/recommendations received and, where considered appropriate, resulting modifications. Some suggestions made in regard to the proposed revision of regulations for the Senior Companion Program (45 CFR Part 1207) considered equally applicable to this part, are also incorporated herein.

Section 1208.1–2: One suggestion is to add "nurses" to the list of professionals who are to verify a child's special or exceptional needs. The words "a registered nurse or licensed practical nurse," have been added. Suggestions that children who do not have verified special or exceptional needs should be served by Foster Grandparents does not conform to Section 211(a) of Pub. L. 93–113 and is not adopted. Other comments suggested adding definitions for "rural" and "handicapped" because they appear in the body of the text. The term "rural" has been deleted from the text and a definition of "handicapped" has been added. Inadvertent omission of definitions for "Letter of Agreement", "Memorandum of Understanding" and "United States and States" is remedied by inclusion of definitions of these technical terms.

The definition of "Volunteer Station" is modified in conformance with a suggestion that reference to volunteer stations assigning volunteers to children is more appropriately addressed elsewhere as a volunteer station responsibility, and to clarify that certification or licensing of volunteer stations is necessary only when required by the appropriate state or local government.

Consistent with existing regulations, language regarding proprietary health care agencies and organizations serving as volunteer stations is retained.

A sentence also was added to the effect that private homes are not volunteer stations.

Section 1208.2–3: To correct an oversight that was commented upon, § 1208.2–3(a): *Sponsor Eligibility* has been changed.

Section 1208.2–4: Paragraph (b) has been revised to reflect the replacement of OMB Circular A–95 with Executive Order 12372, the "Intergovernmental Review of Federal Programs and Activities".

Section 1208.3–1: A new paragraph has been added to clarify the sponsor's role in obtaining ACTION concurrence in the selection of volunteer stations.

Section 1208.3–2: Two commenters questioned the requirement in subsection (c) that project directors "may not * * * serve concurrently, in another capacity, paid or unpaid, during established working hours" without prior Agency approval. Their contention that this paragraph restricts service in unpaid community volunteer or aging service activities is not accurate. ACTION encourages its sponsors to coordinate with other related groups in the community (§ 1208.1–3) and to take a leadership role in promoting such coordination. In order to eliminate the confusion, subsection (c) will be modified by adding the following: "This does not preclude participation of the project director in activities of related

local agencies, boards or organizations for purposes of coordination and facilitating achievement of project goals and objectives."

Section 1208.3–4: Paragraph (a)(3) has been modified to delete the reference to "rural service area" and add "sparsely populated areas".

Section 1208.3–5: The requirement in paragraph (a)(6) that Foster Grandparent selection may not be based on ownership of or access to a vehicle has been deleted since this may impair recruitment of Foster Grandparents in sparsely populated areas.

In paragraph (c) of this section, following the phrase "* * * at least 90% of the amount of the ACTION federal share of the grant award.", the following sentence, omitted by oversight, is added: "In exceptional circumstances the Director may waive this requirement."

Paragraph (c)(1)(iii)(C) has been modified to clarify the requirements for personal automobile liability insurance.

Several comments suggested deletion of the provision in paragraph (c)(5) which limits the stipend to one member in households in which more than one eligible member serves as a Foster Grandparent or Senior Companion, except where enrollees of the programs marry. It was felt that this provision discriminates against eligible married couples. The Agency has concluded that this provision must be retained for the following reasons: (1) Pursuant to the statute, FGP enrollment is targeted at the poorest low-income Americans and this provision assures that the opportunity to receive stipends is extended to more low-income households; (2) Other direct benefits, in the form of insurance, meals, physical examinations, transportation, and recognition, provided to all income-eligible members, offset the cost of volunteering for the household member who does not receive the stipend.

One commenter suggested deleting the prohibition in paragraph (c)(6) against using project funds for transportation provided for or on behalf of clients. The Agency has concluded that this provision must be retained because the purpose of project funds is to transport or provide reimbursement for transportation of Foster Grandparents between their homes and the volunteer stations which provide services to the client.

The Foster Grandparent Program is identified by No. 72.001 in the Catalog of Federal Domestic Assistance.

Pursuant to Section 3(c)3 of Executive Order 12291, entitled "Federal Regulation," the required review process has been completed by the Director of the Office of Management and Budget.

List of Subjects in 45 CFR Part 1208

Aged, Grant programs—social programs, Reporting and recordkeeping requirements, Volunteers.

45 CFR Part 1208 is revised to read as follows:

PART 1208—FOSTER GRANDPARENT PROGRAM

Subpart A—General

Sec.

1208.1–1 Purpose of the program.
1208.1–2 Definitions.
1208.1–3 Coordination.

Subpart B—Project Development and Funding

1208.2–1 Inquiries.
1208.2–2 Local support.
1208.2–3 Sponsor eligibility and solicitation of proposals.
1208.2–4 Project proposals.
1208.2–5 Review of project proposals.
1208.2–6 Awards.
1208.2–7 Grant management.
1208.2–8 Suspension, termination, denial of refunding.

Subpart C—Project Operations

1208.3–1 Sponsor responsibility.
1208.3–2 Project staff.
1208.3–3 Advisory Council.
1208.3–4 Volunteer station responsibility.
1208.3–5 Foster grandparents.
1208.3–6 Foster grandparent assignments.
1208.3–7 Children served.

Subpart D—Non-ACTION Funded Projects

1208.4–1 Memorandum of agreement.

Subpart E—Sanctions and Legal Representation

1208.5–1 Special limitations.
1208.5–2 Legal representation.

Authority: Secs. 211(a), 212, 221, 222, 223, 402(14) and 420 of Pub. L. 93–113, 87 Stat. 402, 403, 404, 407 and 414, 42 U.S.C. 5011(a), 5012, 5021, 5022, 50023, 5042(14), and 5060.

Subpart A—General

§ 1208.1–1 Purpose of the program.

The Foster Grandparent Program (FGP) is authorized under Title II, Part B, of the Domestic Volunteer Service Act of 1973, as amended (Pub. L. 93–113). The dual purpose of the program is to provide opportunities for low-income persons aged 60 or over to give supportive person-to-person service in health, education, welfare or related settings to help alleviate the physical, mental, or emotional problems of children having exceptional or special needs.

§ 1208.1–2 Definitions.

Terms used in this part are defined as follows:

"Act" is the Domestic Volunteer Service Act of 1973, as amended (Pub. L. 93–113, 87 Stat. 394, 42 U.S.C. 4951).

"Advisory Council" is a group of persons formally organized by the project sponsor for the purpose of advising and supporting the sponsor in operating the project effectively.

"Agency" is the federal ACTION agency.

"Child" is any individual under 21 years of age.

"Children having exceptional needs" are those who are developmentally disabled such as those who are mentally retarded, autistic, have cerebral palsy or epilepsy or are visually handicapped, speech impaired, multi-handicapped, emotionally disturbed or have a language disorder, specific learning disability or other significant health impairment. Existence of a child's exceptional need shall be verified by an appropriate professional, such as a physician, psychiatrist, psychologist, registered nurse or licensed practical nurse, speech therapist or educator before a Foster Grandparent is assigned to the child.

"Children with special needs" includes those who are: abused or neglected; in need of foster care; status offenders and other children or youth, as further defined in Title III of the Juvenile Justice Act Amendments of 1977; certain teen-age parents; and children in need of protective intervention in their homes. Existence of a child's special need shall be verified by an appropriate professional before a Foster Grandparent is assigned to the child.

"Direct Benefits" are stipends, meals, transportation, annual physical examinations, volunteer insurance, recognition and uniforms included in the budget as *Volunteer Expenses*.

"Director" is the Director of ACTION.

"Federally recognized Indian tribal government" means the governing body or a governmental agency of any Indian tribe, band, nation, or other organized group or community (including any Native village as defined in Section 3 of the Alaska Native Claims Settlement Act, 85 Stat. 688) certified by the Secretary of the Interior as eligible for the special programs and services provided through the Bureau of Indian Affairs.

"Handbook" is the FGP Handbook No. 4405.90 which contains policies for implementing these regulations.

"Handicapped" is a person or persons having physical or mental impairments that substantially limit one or more major life activities.

"Hard-to-reach" individuals are those who are physically or socially isolated because of factors such as language, disability, or inadequate transportation.

"Household" refers to related or unrelated persons living under the same roof and sharing common living expenses.

"Individual Care or Treatment Plan" is a written description of a Foster Grandparent's assignment with a child. The plan defines the goals for the child to be attained through the relationship with a Foster Grandparent and the specific activities to be performed by the Foster Grandparent in the assignment.

"In-home" refers to non-institutional assignment of a Foster Grandparent in a private residence, a foster home, or a group home.

"Letter of Agreement" is a written agreement between a volunteer station, the project sponsor, and the person or persons legally responsible for the child served. It authorizes the assignment of a Foster Grandparent in the child's home, defines the Foster Grandparent's activities and delineates specific arrangements for supervision.

"Memorandum of Understanding" is a written statement prepared and signed by the Foster Grandparent project sponsor and the volunteer station which identifies project requirements, working relationships and mutual responsibilities.

"OAVP" refers to the Older American Volunteer Programs, which include: the Foster Grandparent Program, the Retired Senior Volunteer Program, and the Senior Companion Program.

"Parent" is a natural parent or a person acting in place of a natural parent, such as a child's natural grandparent, or a step-parent with whom the child lives. The term also includes otherwise unrelated individuals who are legally responsible for a child's welfare.

"Project" is the locally planned and implemented Foster Grandparent Program activity as agreed upon between ACTION and the sponsor.

"Service Area" is a geographically defined area in which Foster Grandparents are recruited, enrolled, and placed on assignments.

"Service Schedule" is the 20 hours per week that a Foster Grandparent serves.

"Sponsor" is a public agency or private nonprofit organization which is responsible for the operation of the Foster Grandparent project.

"Stipend" is a payment to Foster Grandparents to enable them to serve without cost to themselves.

"United States and States" mean the several states, the District of Columbia, the Virgin Islands, Puerto Rico, Guam, American Samoa and the Trust Territory of the Pacific Islands.

"Volunteer Station" means a public agency, private nonprofit organization or proprietary health care agency or organization that accepts the responsibility for assignment and supervision of Foster Grandparents in health, education, welfare or related settings such as private homes, hospitals, homes for dependent and neglected children, or similiar establishments.

Each volunteer station must be licensed or otherwise certified, when required, by the appropriate state or local government.

Private homes are not volunteer stations.

§ 1208.1-3 Coordination.

The sponsor shall coordinate activities with project-related groups and individuals, including those representing government, industry, labor, volunteer organizations, programs for children, programs for the aging, including State and Area Agencies on Aging, and other ACTION programs, to facilitate cooperation with existing or planned community services and to develop community support.

Subpart B—Project Development and Funding

§ 1208.2-1 Inquiries.

Inquiries regarding the Foster Grandparent Program application process, program criteria, or the availability of funds, should be directed to the ACTION State Office serving the inquirer's own state. ACTION headquarters office in Washington, D.C. will assist in directing inquiries to the appropriate state office.

§ 1208.2-2 Local support.

An ACTION grant may be awarded to fund up to 90% of the cost of development and operation of a Foster Grandparent project. The sponsor is required to contribute at least 10% of the total project cost. Stipend payments in excess of the amount established by ACTION may not be included as part of the local support commitment. In exceptional circumstances the Director may approve assistance for more than 90% of the total project cost if:

(a) The project is located in an area where local resources are too limited to provide 10%; or

(b) A test project is determined to be of exceptional value, sufficient to warrant Federal support in excess of 90% of the total project cost.

§ 1208.2-3 Sponsor eligibility and solicitation of proposals.

(a) *Sponsor eligibility.* ACTION will award grants only to public agencies and private non-profit organizations in the United States which have the authority to accept and the capability to administer such grants.

(b) *Solicitation of Proposals* (1) Any eligible organization may file an application for a grant. Applicants may also be solicited by ACTION pursuant to its objective of achieving equitable program resource distribution. Solicited applications are not assured of selection or approval and may have to compete with other solicited or unsolicited applications.

(2) Grants for projects to be carried out over an area in a state more comprehensive than one community shall be awarded to the State Agency on Aging unless:

(i) The state has not established or designated such an agency, or

(ii) Such agency has been afforded at least 45 days to review and make recommendations on a prospective sponsor's application.

(3) Grants for projects to be carried out entirely in a community served by a Community Action Agency shall be awarded to that agency unless that agency and the State Agency on Aging have been afforded at least 45 days to review and make recommendations on a new grant application.

(4) In the event that the State Agency on Aging or the Community Action Agency is not awarded the applicable grant, any application that is approved will contain or be supported by satisfactory assurances that the project has been developed and will, to the extent feasible, be conducted in consultation with, or with the participation of such agencies.

§ 1208.2-4 Project proposals.

(a) Applicants shall use standard forms prescribed by ACTION. ACTION State Offices will provide applicants with guidance and any additional instruction necessary to plan and budget proposed program activities.

(b) Agencies and organizations submitting grant applications must comply with the provisions of Executive Order 12372, the "Intergovernmental Review of Federal Programs and Activities," as set forth in 45 CFR Part 1233.

(c) A potential sponsor must submit one copy of an application for a new FGP project to the State Agency on Aging, which has 45 days to review the application and make recommendations. The State Agency on Aging shall state in writing to ACTION its recommendations and reasons within this time period or will be considered to have waived its rights under this part.

§ 1208.2-5 Review of project proposals.

(a) The ACTION State Office for the applicant's state will review the grant application to ensure that program requirements are complied with and that required documentation has been attached.

(b) If not approved, the application will be returned to the applicant with explanation of ACTION's decision. The unsuccessful applicant may reapply when the inadequacy, if any, found in the application is resolved.

§ 1208.2-6 Awards.

(a) ACTION will, within funds available, award a grant in writing to those applicants whose grant proposals provide the best potential for serving the purpose of the program. The award will be documented by *Notice of Grant Award* [NGA].

(b) The parties to the NGA are ACTION and the sponsoring organization. The NGA will document the sponsor's commitment to fulfill specific programmatic objectives and financial obligations. It will document the extent of ACTION's obligation to provide financial support to the sponsor.

(c) A sponsor may receive a grant award for more than one OAVP project.

§ 1208.2-7 Grant management.

(a) Sponsors shall manage grants awarded to them in accordance with these regulations. ACTION Handbook 2650.2 entitled, *Grants Management Handbook for Grantees,* and the FGP Handbook No. 4405.90. A copy of each document will be furnished to the sponsor at the time the initial grant is awarded.

(b) Project support provided under an ACTION grant shall be furnished at the lowest possible cost consistent with the effective operation of the project.

(c) Project costs for which ACTION funds are budgeted must be justified as being essential to project operation.

§ 1208.2-8 Suspension, termination and denial of refunding.

Grant suspension, termination and denial of refunding procedures are set forth in 45 CFR Part 1206, Chapter XII, and in ACTION Handbook 2650.2

Subpart C—Project Operations

§ 1208.3-1 Sponsor responsibility.

The sponsor is responsible for all programmatic and fiscal aspects of the project and may not delegate or contract this responsibility to another entity. The sponsor has the responsibility to:

(a) Employ, supervise and support a Project Director, who will be directly responsible to the sponsor for the management of the project, including selection, training and supervision of project staff;

(b) Provide for the recruitment, assignment, supervision and support of Foster Grandparents. Special efforts are to be made to recruit and assign persons from minority groups, handicapped and hard-to-reach individuals, and groups in the community which are underrepresented in the project. The sponsor will stress the recruitment and enrollment of persons not already volunteering;

(c) Provide financial and in-kind support to fulfill the project's local share commitment;

(d) Establish, orient and support an independent FGP Advisory Council;

(e) Provide Foster Grandparents with not less than the minimum accident, personal liability, and excess auto liability insurance required by ACTION;

(f) Provide for appropriate recognition of the Foster Grandparents and their activities;

(g) Establish personnel practices, including provision of position descriptions for project staff, and service policies for Foster Grandparents, including grievance and appeal procedures for both volunteers and project staff;

(h) Ensure compliance with ACTION requirements relating to nondiscrimination, religious activity, political activity, lobbying, patronage toward persons related by blood or marriage, labor or anti-labor organization or related activities, nondisplacement of employed workers, nonimpairment of contracts, and noncompensation for services;

(i) Maintain project records in accordance with generally accepted accounting practice and provide for the accurate and timely preparation and submission of reports required by ACTION;

(j) Develop Foster Grandparent service opportunities through volunteer stations;

(k) Obtain ACTION concurrence in the selection of volunteer stations prior to the placement of Foster Grandparents.

(l) Negotiate, prior to placement of Foster Grandparents, a written Memorandum of Understanding with each volunteer station, identifying sponsor responsibilities, volunteer station responsibilities and joint responsibilities;

(m) Orient volunteer station staff to the Program and its activities;

(n) Provide not less than 40 hours of pre-service orientation to Foster Grandparents;

(o) Arrange group in-service training for Foster Grandparents for a minimum of four hours each month;

(p) Provide or arrange for direct benefits (insurance, meals, physical examinations, recognition, stipends, transportation and uniforms, if needed) for the Foster Grandparents in a timely manner;

(q) Ensure provision for volunteer safety;

(r) Comply with program regulations, policies and procedures prescribed by ACTION;

(s) Ensure that appropriate liability insurance is maintained for owned, nonowned, or hired vehicles used in the project;

(t) Develop a realistic transportation plan for the project based on the lowest cost transportation modes; and

(u) Conduct an annual appraisal of volunteers' performance and an annual review of volunteers' income eligibility.

§ 1208.3-2 Project staff.

(a) Project staff are employees of the sponsor and are subject to its personnel policies and practices.

(b) ACTION must concur in writing with the sponsor's selection of a project director before such person is employed or earns pay from grant funds.

(c) The FGP Project Director shall serve full time and may not be employed or serve concurrently in another capacity, paid of unpaid, during established working hours, without prior approval from ACTION. This does not preclude participation of the project director in activities of related local agencies, boards or organizations for the purposes of coordination and facilitating achievement of project goals and objectives.

(d) Compensation levels for project staff, including wages, salaries and fringe benefits, should be comparable to like or similar positions in the sponsor organization and in the community.

§ 1208.3-3 Advisory council.

An Advisory Council shall be established to advise and assist the project sponsor and staff. There shall be a separate Advisory Council for each Older American Volunteer project administered by the sponsor. When a small number of volunteers is enrolled or other special conditions prevail, this requirement may be waived by the Director of OAVP. The Advisory Council shall;

(a) Advise the project director in the formulation of local policy, planning, and the development of operational procedures and practices consistent with program policies;

(b) Assist the sponsor by promoting community support for the project, advise on personnel actions affecting volunteers and project staff, and assist in developing local financial and in-kind resources;

(c) Include in its membership, when available: community, business and labor leaders, representatives for volunteer stations, public and private agencies, and persons specializing in the fields of aging, child development and voluntarism. In addition, at least one-fourth of the Advisory Council shall be low-income persons aged 60 or over. This group must include Foster Grandparents as voting members. The sponsor's chief executive or designee, one member of its governing board, and the project director should be members of the Advisory Council but may not be officers of the Advisory Council. The sponsor's chief executive and the project director may not be voting members. The member representing the sponsor's governing board may be a voting member. The provisions of Section 1208.5–1(d), Nondiscrimination, apply to the Advisory Council;

(d) Meet on a regular schedule and establish its own procedures, including election of officers and terms of office;

(e) Conduct an annual appraisal of project operation and submit a report to the sponsor, which shall be attached to the continuation grant application;

(f) Have an opportunity to advise the sponsor in advance on the selection or termination of the project director; and

(g) Ensure procedures are in effect to hear an appeal to actions affecting a Foster Grandparent adversely.

§ 1208.3–4 Volunteer station responsibility.

(a) Normally the volunteer station is an organization other than the sponsoring organization. The sponsor may function as a Foster Grandparent volunteer station only if the sponsor is:

(1) A state organization administering a statewide Foster Grandparent project where the volunteer station is part of the state organization, (2) a Federally recognized Indian tribal government, or (3) in a sparsely populated area. In such sparsely populated areas, up to 10% of the enrolled volunteers may be placed directly by the sponsor.

(b) Volunteer Station responsibilites include:

(1) Assisting with or arranging for volunteer transportation on or between assignments;

(2) Assisting in the provision of appropriate volunteer recognition;

(3) Developing and monitoring volunteer assignments, selecting children to be served, supervising the volunteers, assisting the sponsor in matching volunteers to assignments and in providing pre-service orientation and in-service training for the Foster Grandparents;

(4) Providing for volunteer safety;

(5) Keeping records and preparing reports required by the sponsor; and

(6) Signing, prior to the placement of Foster Grandparents, a Memorandum of Understanding with the sponsor establishing working relationships and mutual responsibilities, and detailing the responsibilities outlined above, as well as other agreed upon responsibilities, including the particulars of the volunteers' supervision.

(i) When Foster Grandparents are to serve in private homes, the Memorandum of Understanding shall also require that the volunteer station obtain a Letter of Agreement from the child's parent(s) authorizing or requesting volunteer service in the home and indicating what specific activities are to be performed. This agreement will constitute an individual care plan and will be followed for the child served by a Foster Grandparent in an in-home placement.

(ii) The Memorandum of Understanding is to be reviewed and, as appropriate, changed annually. It may be amended at any time by mutual agreement and must be signed and dated annually to indicate that review and update, if needed, have been accomplished.

§ 1208.3–5 Foster grandparents.

(a) *Eligibility.* (1) Foster Grandparents shall be 60 years of age or older, no longer in the regular work force, determined by a physical examination to be capable of serving children with exceptional or special needs without detriment to either themselves or the children served, and willing to accept supervision as required.

(2) Eligibility to be a Foster Grandparent may not be restricted on the basis of education, experience, citizenship, race, color, creed, belief, sex, national origin, handicap, or political affiliation.

(3) To be enrolled, a Foster Grandparent cannot have an annual income from all sources, exceeding the ACTION income eligibility guideline for the state in which he or she resides. The ACTION income eligibility guideline for each state is the higher amount of either: (i) 125% of the poverty line as set forth in Section 625 of the Economic Opportunity Act of 1964, as amended by Public Law 92–424 (42 U.S.C. 2971d), or (ii) 100% of the poverty line plus the amount the state supplements Federal Supplemental Security Income (SSI). In cases where a Foster Grandparent is a member of a household in which other persons share common expenses, his or her income eligibility is determined by the combined income of members of the household.

(4) Once enrolled, a Foster Grandparent shall remain eligible to serve and to receive a stipend as long as his or her income does not exceed the prescribed ACTION income eligibility guideline by 20%. Income eligibility shall be reviewed annually by the sponsor.

(5) Recruitment and selection of a Foster Grandparent may not be based on any requirement of employment experience or formal education.

(b) *Terms of service.* (1) Foster Grandparents serve a total of twenty hours a week, usually five days a week. Travel time between the volunteer's home and place of assignment may not be considered part of the service schedule and is not stipended. Travel time between individual assignments is a part of the service schedule. Meal time may be part of the service schedule only if meals are taken with the individual served, and the taking of meals together if deemed by the sponsor and the volunteer station to be beneficial to the person served.

(2) Foster Grandparents are volunteers, not employees, of the sponsor.

(c) *Direct benefits.* The total of direct benefits for Foster Grandparents, including stipends, insurance, transportation, meals, physical examinations, recognition, and uniforms if appropriate, shall be a sum equal to at least 90 percent of the amount of the ACTION federal share of the grant award. In exceptional circumstances, the Director may waive this requirement. Federal and non-federal resources can be used to make up this sum. Direct benefits may not be subject to any tax or charge or be treated as wages or compensation for the purposes of unemployment insurance, temporary disability, retirement, public assistance, or similar benefit payments or minimum wage laws. Direct Benefits include:

(1) *Insurance:* Foster Grandparents shall be provided with the ACTION-specified minimum levels of accident insurance, personal liability insurance and, when appropriate, excess automobile liability insurance.

(i) *Accident insurance:* Accident insurance shall cover Foster Grandparents for personal injury during travel between their homes and places of assignment, during their volunteer service, during meal periods while serving as a volunteer, and while attending project-sponsored activities.

such as recognition activities, orientation and Advisory Council meetings. Protection shall be provided against claims in excess of any benefits or services for medical care or treatment available to the volunteer from other sources, including:

(A) Health insurance coverage;

(B) Other hospital or medical service plans;

(C) Any coverage under labor-management trusteed plans, union welfare plans, employer organization plans, or employee benefit organization plans; and

(D) Coverage under any governmental programs, or coverage provided by any statute.

When benefits are provided in the form of services rather than by cash payments, the reasonable cash value of each service rendered shall be considered in determining the applicability of this provision. The benefits payable under a plan shall include the benefits that would have been payable had a claim been duly made therefor. The benefits payable shall be reduced to the extent necessary so that the sum of such reduced benefits and all the benefits provided for by any other plan shall not exceed the total expenses incurred by the volunteer.

(ii) *Personal Liability Insurance:* Protection shall be provided against claims in excess of protection provided by other insurance.

(iii) *Excess Automobile Liability Insurance:* Protection shall be provided against claims in excess of the greater of either:

(A) Liability insurance volunteers carry on their own automobiles, or

(B) The limits of applicable state financial responsibility law, or

(C) In the absence of a state financial responsibility law, levels of protection to be determined by ACTION for each person, each accident, and for property damage.

Foster Grandparents who drive their personal vehicles to or on assignments or project-related activities must maintain personal automobile liability insurance equal to or exceeding the levels established by (B) or (C) above.

(2) *Meals:* Within the limits of available resources and project policy, Foster Grandparents will be provided or will receive assistance with the cost of meals taken during their service schedule.

(3) *Physical Examinations:* Foster Grandparents are required to have a physical examination prior to assignment and annually thereafter.

(4) *Appropriate Recognition* will be provided for Foster Grandparents.

(5) *Stipends:* A Foster Grandparent will receive a stipend in an amount determined by ACTION and payable in regular installments. The minimum amount of the stipend is set by law and may be adjusted by the Director from time to time. When more than one eligible member of a household serves as a Foster Grandparents or Senior Companion, only one member shall be entitled to receive a stipend. All income-eligible members in such cases shall be entitled to other direct benefits. Only in cases where enrolled Foster Grandparent or Senior Companions marry, may each continue to receive a stipend.

(6) *Transportation:* Foster Grandparents shall be provided transportation or receive assistance with the cost of transportation to and from volunteer assignments and official project activities, including orientation, training, advisory council meetings and recognition events. Reimbursement will be within the limits of available resources and project policy. Project funds may not be utilized to reimburse Foster Grandparents for transportation provided for or on behalf of children.

§ 1208.3–6 Foster grandparent assignments.

(a) Foster Grandparents shall serve children with special or exceptional needs.

(b) Priority consideration shall be given to placing Foster Grandparents in assignments where: those assignments constitute early intervention; there is a possibility for significant improvement in the quality of life for the children served, and there is a probability of a long-term relationship between the Foster Grandparent and the child.

(c) Priority consideration shall also be given to preventing or minimizing institutionalization by placing Foster Grandparents with children in-home, in special education classes, in special training centers, in developmental centers, in day care centers for children with exceptional or special needs, in hospitals, and in the juvenile justice system.

(d) The individualized care plan for a Foster Grandparent to follow in each in-home assignment he or she receives, should include the projected role and functions of the Foster Grandparent be updated on a regular basis, and be used as a guide for evaluating the child's development and the Foster Grandparent's role.

(e) Where state, county or local sponsor's definition(s) of children having exceptional needs and children with special needs vary from the definitions in § 1208.1–2 of these regulations, ACTION will determine the suitability on non-ACTION definition(s) in regard to placement of Foster Grandparents with children.

(f) Foster Grandparent activities develop person-to-person, supportive relationships with children and do not provide service to volunteer stations or any other agency or organization where volunteers serve. Activities of Foster Grandparents should serve the dual purpose of being personally meaningful to the volunteers themselves and providing support and companionship to the children served.

§ 1208.3–7 Children served.

(a) Identification of individual children to receive supportive person-to-person services from a Foster Grandparent is a responsibility of volunteer station professional staff and will be made in accordance with criteria specified in § 1208.3–6. Actual Foster Grandparent assignments to individual children and a determination of the length of time each child should receive such services will be made with concurrence of the sponsor or his or her designee, usually the project director, in accordance with the Memorandum of Understanding described in § 1208.3–1(k).

(b) Foster Grandparent concurrence with assignments to individual children is required.

(c) Preference will be given to assigning Foster Grandparents to young children. Each Foster Grandparent shall preferably, but not exclusively, be assigned to two children.

(d) When a Foster Grandparent is assigned to a mentally retarded child, that assignment may continue beyound the child's 21st birthday, provided:

(1) That such child was receiving such services prior to attaining the chronological age of 21;

(2) That the the public or private nonprofit agency (volunteer station) responsible for providing services to the child determines that it is in the best interest of both the Foster Grandparent and the child; and

(3) There is mutual agreement by all parties with respect to provision of services to the child involved.

Subpart D—Non-ACTION Funded Projects

§ 1208.4–1 Memorandum of agreement.

(a) If an eligible agency or organization wishes to sponsor a project without ACTION funding, and wishes to receive technical assistance and materials from ACTION, it must sign a Memorandum of Agreement with

ACTION identifying mutual responsibilities and certifying its intent to comply with ACTION regulations.

(b) A non-ACTION funded project sponsor's noncompliance with the Memorandum of Agreement may result in suspension or termination of ACTION's technical assistance to the project.

(c) Termination of the agreement by either the project sponsor or ACTION will result in loss of the tax exempt status of volunteer direct benefits allowable to Foster Grandparents and loss of coverage by the statutory provision that receipt of the stipend will not affect the volunteers' eligibility for any governmental assistance.

(d) Entry into a Memorandum of Agreement with a sponsoring agency which does not receive ACTION funds will not, under any circumstances, Create a financial obligation on the part of ACTION for costs associated with the project including increases in required payments to volunteers which may result from changes in the Act or in ACTION regulations.

Subpart E—Sanctions and Legal Representation

§ 1208.5–1 Special limitations.

(a) *Political activities.* (1) No part of any grant shall be used to finance, be directly or indirectly, any activity to influence the outcome of any election to public office, or any voter registration activity.

(2) No project shall be conducted in a manner involving the use of funds, the provision of services or the employment or assignment of personnel in a matter supporting or resulting in the identification of such project with (i) any partisan or nonpartisan political activity associated with a candidate, or contending faction or group, in an election, or (ii) any activity to provide voters or prospective voters with transportation to the polls or similar assistance in connection with any such election, or (iii) any voter registration activity.

(3) No Foster Grandparent or employee of a sponsor or volunteer station may take any action, when serving in such capacity, with respect to a partisan or nonpartisan political activity that would result in the identification or apparent identification of the Foster Grandparent Program with such activity.

(4) No grant funds may be used by the sponsor in any activity for the purpose of influencing the passage or defeat of legislation or proposals by initiative petition, except

(i) In any case in which a legislative body, a committee of a legislative body, or a member of a legislative body requests a Foster Grandparent, a sponsor chief executive, his or her designee, or project staff to draft, review or testify regarding measures or to make representation to such legislative body, committee or member; or

(ii) In connection with an authorization or appropriations measure directly affecting the operation of the Foster Grandparent Program. Prohibitions on Electoral and Lobbying-Activities are fully set forth in 45 CFR Part 1226.

(b) *Restrictions on State or local Government Employees.* If the sponsor is a State or local government agency which receives a grant from ACTION, certain restrictions contained in Chapter 15 of Title 5 of the United States Code are applicable. They are related to persons who are principally employed in activities associated with the project. The restrictions are not applicable to employees of educational or research institutions. An employee subject to these restrictions may not:

(1) Use his/her official authority or influence for the purpose of interfering with or affecting the result of an election or nomination for office;

(2) Directly or indirectly coerce, attempt to coerce, command or advise a State or local officer or employee to pay, lend, or contribute anything of value to a party, committee, organization agency, or person for political purposes; or

(3) Be a candidate for elective office, except in a nonpatisan election.

"Nonpartisan election" means an election at which none of the candidates is to be nominated or elected as representing a political party any of whose candidates for Presidential elector received votes in the last preceding election at which Presidential electors were selected.

(c) *Religious activities.* Foster Grandparents and project staff funded by ACTION shall not give religious instruction, conduct worship services or engage in any form of proselytization as part of their duties.

(d) *Nondiscrimination.* For purposes of this subpart, and for purposes of Title VI of the Civil Rights Act of 1964 (42 U.S.C. 2000 d *et seq.*). Section 504 of the Rehabilitation Act of 1973 (29 U.S.C. 794), and the Age Discrimination Act of 1975 (Pub. L. 94–135, Title III; 42 U.S.C. 6101 *et seq.*), any program, project, or activity to which volunteers are assigned under this Act shall be deemed to be receiving Federal financial assistance.

(1) No person with responsibility in the operation of a project shall discriminate with respect to any activity or program because of race, creed, belief, color, national origin, sex, age, handicap, or political affiliation.

(2) Sponsors are required to take affirmative action to overcome the effects of prior discrimination. Even in the absence of prior discrimination, a sponsor may take affirmative action to overcome conditions which resulted in limiting participation.

(3) No person in the United States shall on the ground of sex be excluded from participation in, be denied the benefits of, be subjected to discrimination under, or be denied employment in connection with a Foster Grandparent project.

(e) *Labor and Anti-Labor Activity.* No grant funds shall be directly or indirectly utilized to finance labor or anti-labor organization or related activity.

(f) *Nondisplacement of Employed Workers.* A Foster Grandparent may not perform any service or duty or engage in any activity which would otherwise be performed by an employed worker or which would supplant the hiring of employed workers.

(g) *Nonimpairment of Contracts.* A Foster Grandparent may not perform any service or duty or engage in any activity which impairs an existing contract for service. The term "contract for service" includes but is not limited to contracts, understandings, and arrangements, either written or oral, to provide professional, managerial, technical, or administrative service.

(h) *Noncompensation for Services.* No person, organization, or agency shall request or receive any compensation for services of Foster Grandparents.

(i) *Nepotism.* Persons selected for project staff positions may not be related by blood or marriage to other project staff, sponsor staff or officers, or members of the sponsor Board of Directors, unless there is concurrence by the Advisory Council, with notification to ACTION.

(j) *Volunteer Separation.* A sponsor may separate a volunteer for cause, including, but not limited to, extensive or unauthorized absences, misconduct, inability to perform assignments or having income in excess of the eligibility level established by ACTION.

§ 1208.5–2 Legal representation.

Counsel may be employed and counsel fees, court costs, bail and other expenses incidental to the defense of a Foster Grandparent may be paid in a criminal, civil or administrative

proceeding, when such a proceeding arises directly out of performance of the Foster Grandparent's activities. 45 CFR Part 1220 establishes the circumstances under which ACTION may pay such expenses.

Signed at Washington, D.C., this 3rd day of June 1983.

Thomas W. Pauken,

Director, ACTION.

45 CFR Part 1209

Retired Senior Volunteer Program

AGENCY: ACTION.

ACTION: Final rule.

SUMMARY: This final regulation clarifies and updates the existing Retired Senior Volunteer program regulation relating to project development and funding, project operations, non-ACTION funded projects and special limitations affecting aspects of project operation. The text is simplified and reduced whenever possible.

DATE: This regulation shall take effect on July 25, 1983.

FOR FURTHER INFORMATION CONTACT: C. Wade Freeman, Director, Older American Volunteer Programs, ACTION, 806 Connecticut Avenue, NW., Room M-1006, Washington, D.C. 20525, (202) 254-7310.

SUPPLEMENTARY INFORMATION: ACTION has determined that this regulation is not a major rule as defined by Executive Order 12291. The regulation will not result in any of the following:

1. Any effect on the economy;
2. Any increase in costs or prices for consumers, individual industries, Federal, State, or local government agencies or geographic regions; or
3. Any adverse effects on competition, employment, investment productivity, innovation or on the ability of the United States-based enterprises to compete with foreign-based enterprises in domestic or export markets.

Discussion of Comments and Response

The Agency received numerous comments on the proposed rules (47 FR 49685) from program sponsors, project directors, members of Advisory Councils, and one letter from a Member of Congress. The following is the Agency response to the substantive comments, and the resulting modification.

Section 1209.2-2: The majority of the comments expressed concern that this section will enable ACTION to require local support of more than 30% for the fourth and succeeding years of a grant, which seems unfounded given the express language of § 1209.2-2. It expressly provided that the amount of local support will be a matter to be negotiated between ACTION and the sponsor.

There was nothing in the proposed regulation to indicate that the percentages specified in it are to be required by ACTION.

On the contrary, it was clearly stated that those percentages, specifically provided for in the Act, are to be used as a guide by ACTION in negotiating the level of local support, and that the level of local support may be higher or lower as mutually agreed to by ACTION and the sponsor, and as justified by local conditions.

The proposed rule recognized that there are sponsors with the capability and resources to maximize local support for the program. It was also cognizant of the fact that there are others who, because of local circumstances, may be severely restricted in their efforts to generate local support. The rule as written was intended to accommodate these two divergent situations and to enable the agency to respond more reasonably to local conditions.

Section 1209.2-7: Comments focused primarily on paragraph (b) which provides that project support be provided at the lowest possible cost, and paragraph (c) which requires that costs for which ACTION funds are budgeted be justified as being essential to project operations. Many of the comments recommended deletion of paragraphs (b) and (c) because they felt that these paragraphs give ACTION, rather than local funding sources, the right to determine how local funds are used.

The language of paragraph (b) reflects a requirement mandated by section 404(b) of the Act and cannot be deleted or modified. The agency is obligated to assure that ACTION funds are expended only for essential project purposes. Therefore, subsection (c) remains unchanged.

Section 1209.3-2: Comments recommended that the requirement that a project director serve full time in that capacity, be either deleted or clarified as it places undue restriction on the ability of the project director to participate in activities of related local organizations. Such participation is considered as essential to project success and promotes coordination of program activities with other groups.

In order to eliminate the concerns expressed, paragraph (c) was modified by adding a sentence to allow such participation.

The Retired Senior Volunteer Program is identified by No. 72.002 in the Catalog of Federal Domestic Assistance.

Pursuant to Section 3(c)3 of E.O. 12291, entitled "Federal Regulation," the required review process has been completed by the Director of the Office of Management and Budget.

Section 1209.3-5: Paragraph (b)(1)(iii)(C) has been modified to clarify the requirements for personal automobile liability insurance.

Subpart A—General

§ 1209.1-1 Purpose of the program

The Retired Senior Volunteer program (RSVP) is authorized under Title II, Part A, of the Domestic Volunteer Service Act of 1973, as amended (Pub. L. 93-113). The purpose of the program is to provide

a variety of opportunities for retired persons aged 60 or over to participate more fully in the life of their community through significant volunteer service.

§ 1209.1–2 Definitions.

Terms used in this part are defined as follows:

"Act" is the Domestic Volunteer Service Act of 1973, as amended (Pub. L. 93–113, 87 Stat. 394, 42 U.S.C. 4951).

"Advisory Council" is a group of persons formally organized by the project sponsor for the purpose of advising and supporting the sponsor in operating the project effectively.

"Agency" is the federal ACTION Agency.

"Director" is the Director of ACTION.

"Handbook" is the RSVP Operations Handbook No. 4405.92 which contains policies for implementing this regulation.

"Handicapped" is a person or persons having physical or mental impairments that substantially limit one or more major life activities.

"Hard-to-reach" individuals are those who are physical by or socially isolated because of factors such as language, disability, or inadequate transportation.

"Letter of Agreement" is a written agreement between a volunteer station, the project sponsor, and the person served or the person legally responsible for the person served. The agreement authorizes assignment of an RSVP volunteer in the home of the person served, defines volunteer activities and specific arrangements for supervision.

"Memorandum of Understanding" is a statement prepared and signed by the administrator of a volunteer station and the RSVP director or which identifies mutual responsibilities and working relationships.

"OAVP" refers to the Older American Volunteer Programs, which include: the Retired Senior Volunteer Program, the Foster Grandparent Program, and the Senior Companion Program.

"Project" is the locally planned and implemented Retired Senior Volunteer Program activity as agreed upon between ACTION and the sponsor.

"Service Area" is a geographically defined area in which volunteers are recruited, enrolled, and placed on assignments.

"Sponsor" is a public agency or private nonprofit organization which is responsible for the operation of the local RSVP project.

"United States and States" means the several states, the District of Columbia, the Virgin Islands, Puerto Rico, Guam, American Samoa, and the Trust Territories of the Pacific Islands.

"Volunteer Station" is a public or private non-profit organization, or a proprietary health care agency or organization that accepts responsibility for assignment and supervison of volunteers. Each volunteer station must be licensed or otherwise certified, when required, by appropriate state or local government. Private homes are not volunteer stations.

§ 1209.1–3 Coordination.

The sponsor shall coordinate activities with project-related groups and individuals, including those representing government, industry, labor, volunteer organizations, programs for the aging, including State and Area Agencies on Aging, and other ACTION programs, to facilitate cooperation with existing or planned community services and to develop community support.

Subpart B—Project Development and Funding

§ 1209.2–1 Inquiries.

Inquiries regarding the Retired Senior Volunteer Program application process, program criteria, or the availability of funds, should be directed to the ACTION State Office serving the inquirer's own state. ACTION headquarters office in Washington, D.C., will assist in directing inquiries to the appropriate state office.

§ 1209.2–2 Budget support.

(a) An RSVP sponsor is responsible for generating needed financial support for the RSVP project from all sources, federal and non-federal, including grants, cash and in-kind contributions, to meet budgeted costs of the project. The sponsor will supplement an ACTION grant with other support to the fullest extent possible and at least equal in amount to that negotiated between ACTION and the sponsor. The following percentages will be used as a guide by ACTION in negotiating the level of local support a sponsor will be required to contribute to the total project budget. In no event shall the required proportion of local support (including in-kind contributions) be more than 10% in the first year, 20% in the second year, 30% in the third year, 40% in the fourth year, and 50% in the fifth and succeeding years. The level of local support negotiated may be higher or lower than these percentages, as mutually agreed to by ACTION and the sponsor, and as justified by local conditions. Sponsors proposing to contribute local support of less than 30% of the total project budget for the third or succeeding years must provide ACTION with an acceptable written justification for the lower level of support.

(b) The total of Volunteer Expenses for Senior Volunteers, including insurance, transportation, meals, and recognition activities, shall be an amount equal to at least 25% of the amount of the ACTION grant award. Federal and non-Federal resources may be used to make up this sum.

Exceptions to this requirement may be requested of the Director, Older American Volunteer Programs, through the ACTION State Director by an RSVP Sponsor who can clearly demonstrate that (1) this requirement will result in undue hardship in the conduct of project operation, and (2) a lesser amount will meet the volunteer expense needs of the number of volunteers budgeted.

§ 1209.2–3 Sponsor eligibility and solicitation of proposals.

(a) *Sponsor eligibility.* ACTION will award grants only to public agencies and private non-profit organizations in the United States which have the authority to accept and the capability to administer such grants.

(b) *Solicitation of proposals.* (1) Any eligible organization may file an application for a grant. Applicants may also be solicited by ACTION pursuant to its objective of achieving equitable program resource distribution. Solicited applications are not assured of selection or approval and may have to compete with other solicited or unsolicited applications.

(2) The Director may not award any grant or contract for a project in any state to any agency or organization unless, if such state has a state agency established or designated pursuant to Section 305(a)(1) of the Older Americans Act of 1965, as amended (42 U.S.C. 3025(a)(1)), such agency itself is the recipient of the award, or such agency has been afforded at least 45 days in which to review and make recommendations on new grant applications.

§ 1209.2–4 Project proposals.

(a) Applicants shall use standard forms prescribed by ACTION. ACTION State Offices will provide applicants with guidance and any additional instructions necessary to plan and budget proposed program activities.

(b) Agencies and organizations submitting grant applications must comply with the provisions of Executive Order 12372, the "Intergovernmental Review of Federal Programs and Activities," as set forth in 45 CFR Part 1232.

(c) A potential sponsor must submit one copy of an application for a new RSVP project to the State Agency on Aging, which has 45 days to review the application and make recommendations.

The State Agency on Aging shall state in writing to ACTION its recommendations and reasons within this time period or will be considered to have waived its rights under this part.

§ 1209.2-5 Review of project proposals.

(a) The ACTION State Office for the applicant's state will review the grant application to ensure that program requirements are complied with and that required documentation has been attached.

(b) If not approved, the application will be returned to the applicant with an explanation of ACTION's decision. The unsuccessful applicant may reapply when the inadequacy, if any, found in the application is resolved.

§ 1209.2-6 Awards.

(a) ACTION will, within funds available, award a grant in writing to those applicants whose grant proposals provide the best potential for serving the purpose of the program. The award will be documented by *Notice of Grant Award* (NGA).

(b) The parties to the NGA are ACTION and the sponsoring organization. The NGA will document the sponsor's commitment to fulfill specific programmatic objectives and financial obligations. It will document the extent of ACTION's obligation to provide financial support to the sponsor.

(c) A sponsor may receive a grant award for more than one OAVP project.

§ 1209.2-7 Grant management.

(a) Sponsors shall manage grants awarded to them in accordance with provisions of these regulations; ACTION Handbook No. 2650.2, *Grants Management Handbook for Grantees,* and ACTION Handbook No. 4405.92, *RSVP Operations Handbook.* A copy of each document will be furnished to the sponsor at the time the initial grant is awarded.

(b) Project support provided under an ACTION grant shall be furnished at the lowest possible cost consistent with the effective operation of the project.

(c) Project costs for which ACTION funds are budgeted must be justified as being essential to project operation.

§ 1209.2-8 Suspension, termination and denial of refunding.

Grant suspension, termination and denial of refunding procedures are set forth in 45 CFR Part 1206, Chapter XII, and in ACTION Handbook 2650.2.

Subpart C—Project Operations

§ 1209.3-1 Sponsor responsibility.

The sponsor is responsible for all programmatic and fiscal aspects of the project and may not delegate or contract this responsibility to another entity. The sponsor has the responsibility to:

(a) Employ, supervise, and support a project director, who will be directly responsible to the sponsor for the management of the project, including selection, training and supervision of project staff;

(b) Provide for the recruitment, assignment, supervision and support of volunteers. Special efforts are to be made toward recruitment and assignment of older persons from minority groups, handicapped and hard-to-reach individuals, and groups in the community which are under-represented in the project. The sponsor will stress the recruitment and enrollment of persons not already volunteering;

(c) Provide financial and in-kind support to fulfill the project's local support commitment;

(d) Establish, orient and support an independent RSVP Advisory Council;

(e) Provide the volunteers with not less than the minimum accident, personal liability, and excess auto liability insurance required by ACTION;

(f) Provide for appropriate recognition of the volunteers and their activities;

(g) Establish personnel practices, including provision of position descriptions for project staff and grievance and appeal procedures for both volunteers and project staff;

(h) Ensure compliance with ACTION requirements relating to nondiscrimination, religious activity, political activity, lobbying, patronage toward persons related by blood or marriage, labor and anti-labor organization of related activities, nondisplacement of employed workers, nonimpairment of contracts, and noncompensation for services;

(i) Maintain project records in accordance with generally accepted accounting practices and provide for accurate and timely preparation and submission of reports required by ACTION;

(j) Develop volunteer service opportunities through volunteer stations;

(k) Negotiate, prior to placement of volunteers, a written Memorandum of Understanding with each volunteer station, identifying sponsor responsibilities, volunteer station responsibilities, and joint responsibilities;

(l) Orient volunteer station staff to RSVP and its activities;

(m) Provide pre-service orientation to the volunteers on RSVP goals and activities;

(n) Arrange for in-service training of the volunteers by volunteer stations or other sources of training as needed;

(o) Provide or arrange for volunteer benefits in a timely manner;

(p) Ensure provision for volunteer safety;

(q) Comply with program regulations, policies and procedures prescribed by ACTION;

(r) Ensure that appropriate liability insurance is maintained for owned, non-owned, or hired vehicles used in the project; and

(s) Develop a realistic transportation plan for the project based on the lowest cost transportation modes.

§ 1209.3-2 Project staff.

(a) Project staff are employees of the sponsor and subject to its personnel policies and practices.

(b) ACTION must concur in writing with the sponsor's selection of a project director before such person is employed or earns pay from grant funds.

(c) A project director shall serve full-time and may not be employed or serve concurrently in another capacity, paid or unpaid, during established working hours, without prior approval from ACTION. This does not preclude participation of the project director in activities of related local agencies, boards or organizations for the purposes of coordination and facilitating achievement of project goals and objectives.

(d) Compensation levels of the project staff, including wages, salaries and fringe benefits, should be comparable to like or similar positions in the sponsor organization and in the community.

§ 1209.3-3 RSVP Advisory Council.

An Advisory Council shall be established to advise and assist the project sponsor and staff. There shall be a separate Advisory Council for each Older American Volunteer Program administered by the sponsor. When a small number of volunteers is enrolled or other special conditions prevail, this requirement may be waived by the Director of OAVP. The Advisory Council shall:

(a) Advise the project director in the formulation of local policy, planning, and the development of operational procedures and practices consistent with program policies;

(b) Assist the sponsor by promoting community support for the project, advise on personnel actions affecting volunteers and project staff, and assist in developing local financial and in-kind resources;

(c) Include in its membership, when available; community business and labor leaders, representatives from volunteer stations, public and private

agencies, and persons specializing in the fields of aging or voluntarism. In addition at least one-fourth of the Advisory Council shall be persons aged 60 or over. This group must include RSVP volunteers as voting members. The sponsor's chief executive or designee, one member of its governing board, and the project director should be members of the Advisory Council but may not be officers of the Advisory Council. The sponsor's chief executive and the project director may not be voting members. The member representing the sponsor's governing board may be a voting member. The provisions of Section 1209.5–1(c). Nondiscrimination, apply to the Advisory Council;

(d) Meet on a regular schedule and establish its own procedures, including election of officers and terms of office;

(e) Conduct an annual appraisal of project operation and submit a report to the sponsor, which shall be attached to the continuation grant application;

(f) Have an opportunity to advise the sponsor in advance on the selection or termination of the project director; and

(g) Ensure procedures are in effect to hear an appeal to actions affecting a volunteer adversely.

§ 1209.3–4 Volunteer station responsibility.

(a) Normally the volunteer station is an organization other than the sponsoring organization. The sponsor may function as a volunteer station, provided that not more than 5% of the total number of volunteers budgeted for the project are assigned to it. This limitation does not apply to the assignment of volunteers to other programs administered by the sponsor. Also, the RSVP project itself may function as a volunteer station or may initiate special volunteer activities which temporarily function at that location, provided ACTION agrees that these activities are in accord with program objectives and will not hinder overall project operation.

(b) Volunteer stations at which volunteers serve will be in the community where such persons live or in nearby communities. Volunteer services will be performed either on publicly owned and operated facilities or projects, or on local projects sponsored by private nonprofit organizations (other than political parties), other than projects involving construction, operation, or so much of any facility used or to be used for sectarian instruction or as a place of religious worship.

(c) Volunteer station responsibilities include: (1) Assisting with or arranging for volunteer transportation and meals, and assisting in the provision of appropriate volunteer recognition:

(2) Developing and monitoring volunteer assignments, assigning, supervising and training volunteers and providing them with preservice orientation and in-service training;

(3) Providing for volunteer safety;

(4) Keeping records and preparing reports required by sponsor;

(5) Signing, prior to placement of volunteers, a Memorandum of Understanding with the sponsor establishing working relationships and mutual responsibilities, and detailing responsibilities outlined above as well as other agreed-upon responsibilities. The Memorandum of Understanding is to be reviewed and, as appropriate, changed annually. The Memorandum may be amended at any time by mutual agreement and must be signed and dated annually to indicate that review and update, if needed, have been accomplished.

§ 1209.3–5 RSVP volunteers.

(a) *Eligibility.* (1) To be eligible for enrollment as an RSVP volunteer, a person must be 60 years of age or over, retired, willing to serve on a regular basis, and willing to accept instruction and supervision as required.

(2) Eligibility to be an RSVP volunteer may not be restricted on the basis of education, income, experience, citizenship, race, color, creed, belief, sex, national origin, political affiliation, or handicap.

(b) *Volunteer expenses.* (1) Within the limits of a project's approved budget and in accordance with provisions of the RSVP Operations Handbook, volunteers will be provided transportation or will receive assistance with costs of transportation, recognition activities, and, when possible, meals. Project funds may not be used to reimburse volunteers for volunteer expenses, including transportation costs, incurred while performing their volunteer assignments. Provision shall be made by the sponsor to obtain ACTION specified minimum levels of accident insurance, personal liability insurance and, when appropriate, excess automobile liability insurance.

(i) *Accident insurance:* Accident insurance shall cover RSVP volunteers for personal injury during travel between their homes and places of assignment, during their volunteer service, during meal periods while serving as a volunteer, and while attending project-sponsored activities, such as recognition activities, orientation and Advisory Council meetings. Protection shall be provided against claims in excess of any benefits or services for medical care or treatment available to the volunteer from other sources, including:

(A) Health insurance coverage;

(B) Other hospital or medical service plans;

(C) Any coverage under labor-management trusteed plans, union welfare plans, employer organization plans, or employee benefit organization plans; and

(D) Coverage under any governmental programs, or provided by any statute. When benefits are approved in the form of services rather than by cash payments, the reasonable cash value of each service rendered shall be considered in determining the applicability of this provision. The benefits payable under a plan shall include the benefits that would have been payable had a claim been duly made therefor. The benefits payable shall be reduced to the extent necessary so that the sum of such reduced benefits and all the benefits provided for by any other plan shall not exceed the total expenses incurred by the volunteer.

(ii) *Personal Liability Insurance:* Protection shall be provided against claims in excess of protection provided by other insurance.

(iii) *Excess Automobile Liability Insurance:* Protection shall be provided against claims in excess of the greater of either:

(A) Liability insurance volunteers carry on their own automobiles, or

(B) The limits of applicable state financial responsibility law, or

(C) In the absence of a state financial responsibility law, levels of protection to be determined by ACTION for each person, each accident, and for property damage.

Volunteers who drive their personal vehicles to or on assignments or project-related activities, must maintain personal automobile liability insurance equal to or exceeding the levels established by (b)(1)(iii) (B) and (C) of this section.

§ 1209.3–6 Volunteer assignments

(a) A variety of assignnments shall be developed prior to the recruitment of RSVP volunteers. Assignments shall include opportunities to respond to significant community needs.

(b) Assignments shall be matched to the interests, abilities, preferences and availability of volunteers. Special consideration shall be given to developing assignments that allow for the limited physical strength and mobility of the handicapped older volunteer.

§ 1209.3-7 Service area.

The service area of a project identified in the approved grant application may not be redefined without prior written approval from ACTION.

Subpart D—Non-ACTION Funded RSVP Projects

§ 1209.4-1 Memorandum of agreement.

(a) If an eligible agency or organization wishes to sponsor an RSVP project without ACTION funding, and wishes to receive technical assistance and materials from ACTION, it must sign a Memorandum of Agreement with ACTION identifying mutual responsibilities and certifying its intent to comply with ACTION regulations.

(b) A non-ACTION funded project sponsor's noncompliance with the Memorandum of Agreement may result in suspension or termination of ACTION's technical assistance to the project.

(c) Entry into a Memorandum of Agreement with a sponsoring agency which does not receive ACTION funds will not, under any circumstances, create a financial obligation on the part of ACTION for costs associated with the project.

Subpart E—Sanctions

§ 1209.5-1 Special limitations and legal representation.

(a) *Political activities.* (1) No part of any grant shall be used to finance, directly or indirectly, any activity to influence the outcome of any election to public office, or any voter registration activity.

(2) No project shall be conducted in a manner involving the use of funds, the provision of services, or the employment or assignment of personnel in a manner supporting or resulting in the identification of such project with (i) any partisan or nonpartisan political activity associated with a candidate, or contending faction or group, in an election, or (ii) any activity to provide voters or prospective voters with transportation to the polls or similar assistance in connection with any such election, or (iii) any voter registration activity.

(3) No RSVP volunteer or employee of a sponsor or volunteer station may take any action, when serving in such capacity, with respect to a partisan or nonpartisan political activity that would result in the identification or apparent identification of the Retired Senior Volunteer Program with such activity.

(4) No grant funds may be used by the sponsor in any activity for the purpose of influencing the passage or defeat of legislation or proposals by initiative petition, except:

(i) In any case in which a legislative body, a committee of a legislative body, or a member of a legislative body requests an RSVP volunteer, a sponsor chief executive, his or her designee, or project staff to draft, review or testify regarding measures or to make representation to such legislative body, committee or member, or

(ii) In connection with an authorization or appropriation measure directly affecting the operation of the Retired Senior Volunteer Program.

(5) Prohibitions on Electoral and Lobbying Activities are fully set forth in 45 CFR Part 1226.

(b) *Restrictions on State or Local Government Employees.* If the sponsor is a State or local government agency which received a grant from ACTION, certain restrictions contained in Chapter 15 of Title 5 of the United States Code are applicable to persons who are principally employed in activities associated with the project. The restrictions are not applicable to employees of educational or research institutions. An employee subject to these restrictions may not:

(1) Use his or her official authority or influence for the purpose of interfering with or affecting the result of an election or nomination for office; or

(2) Directly or indirectly coerce, attempt to coerce, command or advise a State or local officer or employee to pay, lend, or contribute anything of value to a party, committee, organization, agency, or person for political purposes; or

(3) Be a candidate for elective office, except in a nonpartisan election. "Nonpartisan election" means an election at which none of the candidates is to be nominated or elected as representing a political party any of whose candidates for Presidential elector received votes in the last preceding election at which Presidential electors were selected.

(c) *Religious activities.* RSVP volunteers and project staff funded by ACTION shall not give religious instruction, conduct worship services or engage in any form of proselytization as part of their duties.

(d) *Nondiscrimination.* For purposes of this subpart, and for purposes of Title VI of the Civil Rights Act of 1964 (42 U.S.C. 2000d *et seq.*), Section 504 of the Rehabilitation Act of 1973 (29 U.S.C. 794), and the Age Discrimination Act of 1975 (Pub. L. 94-135, Title III; 42 U.S.C. 6101 *et seq.*), any project or activity to which volunteers are assigned shall be deemed to be receiving federal financial assistance.

(1) No person with responsibility in the operation of a project shall discriminate with respect to any activity or program because of race, creed, belief, color, national origin, sex, age, handicap, or political affiliation.

(2) Sponsors are required to take affirmative action to overcome the effects of prior discrimination. Even in the absence of prior discrimination, a sponsor may take affirmative action to overcome conditions which resulted in limiting participation.

(3) No person in the United States shall, on the ground of sex, be excluded from participation in, be denied the benefits of, be subjected to discrimination under, or be denied employment in connection with any project.

(e) *Labor or Anti-Labor Activity.* No grant funds shall be directly or indirectly utilized to finance labor or anti-labor organization or related activity.

(f) *Nondisplacement of Employed Workers.* An RSVP volunteer may not perform any service or duty or engage in any activity which would otherwise be performed by an employed worker or which would supplant the hiring of employed workers.

(g) *Nonimpairment of Contracts.* An RSVP volunteer may not perform any service or duty, or engage in any activity which impairs an existing contract for service. The term "contract for service" includes but is not limited to contracts, understandings and arrangements, either written or oral, to provide professional, managerial, technical, or administrative service.

(h) *Noncompensation for Services.* No person, organization, or agency shall request or receive any compensation for services of RSVP voluneers.

(i) *Volunteer Status.* RSVP volunteer service shall not be deemed employment for any purpose.

(j) *Nepotism.* Persons selected for project staff positions may not be related by blood or marriage to other project staff, sponsor staff or officers, or members of the sponsor Board of Directors, unless there is concurrence by the Advisory Council, with notification to ACTION.

(k) *Volunteer Separation.* A volunteer may be separated from the program for cause, including, but not limited to, extensive absences, misconduct, or inability to perform assignments.

§ 1209.5-2 Legal representation.

Counsel may be employed and counsel fees, court costs, bail, and other expenses incidental to the defense of a Senior Volunteer may be paid in a

criminal, civil or administrative proceeding, when such a proceeding arises directly out of performance of the RSVP volunteer's activities. 45 CFR Part 1220 establishes the circumstances under which ACTION may pay such expenses.

Signed at Washington, D.C., this 3rd day of June, 1983.

Thomas W. Pauken,

Director, ACTION.

BILLING CODE 6050-01-M

FEDERAL COMMUNICATIONS COMMISSION

47 CFR Part 22

[CC Docket No. 79-318; FCC 83-161]

Public Mobile Radio Service; Use of the Bands 825–845 and 870–890 MHz for Cellular Communications Systems; and Amendment of the Commission's Rules Relative to Cellular Communications Systems

AGENCY: Federal Communications Commission.

ACTION: Final rule.

SUMMARY: The FCC hereby amends Part 22 of the Commission's Rules governing the use of the bands 825–845 MHz and 870–890 MHz for cellular communications systems. The Order amends procedural rules previously adopted for cellular communications in order to assure that the public will receive the best possible cellular service as quickly as possible. The rules, as amended, provide for new filing dates for applications for nontop-90 markets, direct cases and rebuttal cases. These changes in filing dates were made so that the filings will more nearly track the time when the staff would reach them for processing. In addition, the order clarifies rules for filing amendments and motions to enlarge issues with respect to cellular applications.

EFFECTIVE DATE: April 18, 1983.

FOR FURTHER INFORMATION CONTACT: Gene Belardi, Mobile Services Division, Common Carrier Bureau (202) 632–6450.

List of Subjects in 47 CFR Part 22

Cellular radio service, Communications common carriers.

Memorandum Opinion and Order

In the matter of An Inquiry Into the Use of the Bands 825–845 and 870–890 MHz for Cellular Communications Systems; and Amendment of Parts 2 and 22 of the Commission's Rules Relative to Cellular Communications Systems; CC Docket No. 79–318.

Adopted: April 18, 1983.
Released: April 22, 1983.

By the Commission.

1. On February 25, 1982, the Commission adopted a *Memorandum Opinion and Order on Reconsideration (Reconsideration Order)* in this proceeding, 89 FCC 2d 58 (1982). In the *Reconsideration Order*, the Commission provided, *inter alia*, that cellular system applications for the top 30 markets were to be filed on June 7, 1982, and that applications for all other markets were to be filed starting September 7, 1982. 89 FCC 2d at 87–88. In a *Memorandum Opinion and Order on Further Reconsideration*, 90 FCC 2d 571 (1982), the Commission revised the dates for the filing of applications in markets 31–60 to November 8, 1982; markets 61–90 to January 7, 1983; and all other markets beginning March 8, 1983. By *Order*, FCC 82–466, released October 28, 1982, the Commission extended the January 7, 1983 filing date to March 8, 1983, and the March 8, 1983, date to June 7, 1983. In addition the Commission provided that direct affirmative cases for markets smaller than the top 30 were to be submitted within 90 days, rather than 30 days, of the date of the public notice announcing mutually exclusive applications.

2. Our experience in dealing with the applications filed in the top 90 markets has demonstrated that the processing of cellular applications requires significantly more staff time than previously contemplated. Thus far we have placed on Public Notice 543 applications in the top 60 markets and received 567 more applications for markets 61–90. We have also received over 700 pleadings relating to the applications filed in the top 50 markets. We anticipate that many more pleadings will be filed when all the applications have been placed on public notice. As a result, the associated workload is considerably greater than initially expected. Therefore, we believe it is necessary to revise the time frames for filing applications for the remaining markets and for filing amendments and submitting direct affirmative and rebuttal cases for pending and future applications.

3. First, we will revise the date for accepting applications for the remaining other markets from June 7, 1983, to *December 1, 1983.* We have chosen this date based on our expectation that initial processing of the applications for markets 61–90 will be placed on Public Notice by that date, and we will be well-along with hearing designations in markets 31–60; thus, the staff will be able to begin to process the applications in markets below the top 90. By extending the filing date for all other markets to December 1, 1983, the cellular filing date will be in line with realistic projections of our ability to process applications, and will avoid the applicants' having to rush to prepare applications only to have them sit on file but receive no attention for months. Interested parties are reminded that December 1, 1983 is not a one-day filing date but that normal Public Mobile Radio Services public notice and cut-off procedures will be applicable to the applications filed on or after December 1, 1983. *See Further Reconsideration* at para. 3.

4. We will also revise the due date for the submission of direct and rebuttal cases for all mutually exclusive applications filed for markets *other than the top 30 markets.* The affirmative direct cases, and all accompanying documentary evidence must be submitted within 30 days of the date of publication in the **Federal Register** of the order designating mutually exclusive applications for hearing. This change will give applicants additional time to prepare thorough, informative, affirmative direct cases that will assist the Commission in selecting the best-qualified cellular applicants. The direct cases will not be needed until the Administrative Law Judge (ALJ) and Separated Trial Staff are ready to work on them. Therefore, this new filing date will also more nearly track the time when the Commission's staff will be able to work on direct cases for other than the top 30 markets.[1] Likewise, we will revise the due date for submission of rebuttals to direct cases. Mutually exclusive applicants must submit rebuttal cases *within 45 days from the date that the direct cases are due to be filed.*[2] While we recognize that the additional time for filing rebuttal cases will slightly extend the hearing process, the other changes we are adopting for filing amendments and motions to enlarge issues should result in further time savings in conducting comparative hearings.

5. We will take this opportunity to reemphasize our concern over the numerous amendments that are being filed by cellular applicants. In our *Order*

[1] Applicants need only file four copies of their direct cases with the Commission: two for the ALJ, one for the Common Carrier Bureau Hearing Division (Separated Trial Staff) and one for Downtown Copy Center.

[2] Because direct cases will now be filed at a later date, we are giving competing applicants an additional 15 days to file rebuttal cases.

in CC Docket No. 79–318, FCC 82–409, released September 3, 1982, at para. 2 and n. 3, we amended the cellular rules to further limit the applicants' ability to amend their applications. See 47 CFR 22.23(a) and 22.918. Even though we have strictly enforced these rules, there have been a large number of amendments filed with the ALJs. For the most part these post-designation amendments propose cell site modifications, and have resulted in frustrating our efforts to ensure expedited cellular hearing proceedings.

6. Another problem we have encountered is that cellular applicants are submitting various types of amendments under § 1.65 of the Commission's Rules (47 CFR 1.65), which requires applicants to ensure that their applications are kept current and accurate. We do not intend that, for purposes of our Part 22 processing rules, § 1.65 may be used by cellular applicants as grounds to change their financial, technical, and comparative showings. These kinds of changes may be filed and accepted only in accordance with the rules contained in Part 22. The purpose of § 1.65 is merely to ensure that applicants inform the Commission of any information in their applications which is inaccurate. Thus, acceptance of an amendment for purposes of § 1.65 may involve no determination as to the effect to be given it for other purposes.

7. Based on the experience that we have gained in processing cellular applications and amendments, we have also decided to revise our rules in minor respects to clarify the types of amendments that will be accepted at various states of processing.[3] After an application is filed, applicants will not be permitted to file major amendments unless otherwise ordered by the Commission, or amendments that improve an applicant's comparative posture. Applicants continue to be allowed to file minor amendments within forty-five days of the public notice of the filing of the application. Section 1.65 amendments must also be filed during this 45 day period. Subsequently, amendments will be accepted only in the following circumstances. First, amendments in connection with full or partial settlement agreements involving mutually exclusive applicants may be filed at any time. Second, minor amendments reflecting changes in the ownership of an applicant not related to a settlement agreement may be filed at any time up to 30 days after publication of the designation order in the Federal Register. Finally, amendments may be filed in response to requests from the Commission, and, where an application has been designated for hearing, upon leave of the Administrative Law Judge. However, the ALJ shall grant post designation requests to amend applications *only* where good cause has been demonstrated, such as unforseen changes concerning cell sites and obsolescent equipment (see § 22.31(e)(6)(i)–(iii)), and where clerical and minor changes are needed to ensure an accurate record. Subsequent to designation, the disclosure requirements of § 1.65, which were temporarily suspended, again must be complied with. However, we remind applicants that compliance with § 1.65 does not, in and of itself, constitute "good cause" for other purposes.[4] We anticipate that these rules which further restrict the filing of amendments will expedite the administrative processes to the maximum extent possible thereby making service available to the public as soon as possible.

8. In a further effort to minimize administrative delay during the comparative hearing proceeding and to reduce the number of pleadings filed with the ALJ, we will adopt a change regarding motions to enlarge issues filed under § 1.229 of the Commission's rules. Competing applicants have inundated the ALJs with numerous motions to enlarge issues, arguing among other things that although an applicant had initially demonstrated reasonable assurance of site availability, upon further investigation the cell site location was found not available or not suitable for the intended use. In almost all cases, the site information was available and could have been discovered and objected to by the movant in petition to deny. Because parties have ample opportunity to timely raise the matter in a petition to deny, and because our intention is to expedite the provision of cellular service to the public, we find that motions to enlarge issues filed by competing applicants should be limited only to evidence which was not in existence or ascertainable on the date petitions to deny were due. We do not anticipate that this limitation on motions to enlarge will result in an unwarranted hardship on the parties since they have ample opportunity to examine competing applications.[5] We are not precluding a party from raising a legitimate issue against a competing applicant. We are requiring only that the issue be raised at the petition to deny stage rather than after the application has been designated for hearing. Since interested parties have already filed petitions to deny applications filed for the top 60 markets, this change will only apply to markets other than the top 60.

9. Also, a procedural matter concerning whether major amendments to cellular applications pending before the ALJ are required be placed on public notice has arisen. After careful consideration of this question, we have determined that certain cellular amendments filed with an ALJ need not be placed on public notice. First, amendments that reflect full or partial settlements resulting in a merger of interests between two or more mutually exclusive parties need not be placed on public notice.[6] *See Thunder Bay Broadcasting Corporation,* 49 FCC 2d 1023, 1024 (1974). Next, an amendment which decreases the size of the applicant's proposed Cellular Geographic Service Area (CGSA) and does not cover any new geographic area need not be placed on public notice; it is a minor change since reducing the size of the CGSA would not cause interference in other markets.[7]

10. Lastly, we will also take this opportunity to complete some remaining administrative housekeeping in this proceeding. MCI Cellular Telephone Company (MCI) and American Mobile Communications (AMCOM) filed petitions for reconsideration of our *Order* of September 3, 1982, *supra,* requesting modification of our procedural rules. Among other things, the petitioners argued that applicants were unfairly required to file rebuttal cases before the ALJ ruled on proffered amendments to applications and the direct cases of competing applicants. Various parties filed comments,[8] some

[3] The new amendment rules will supersede those adopted in the September 3, 1982, Order and will apply to all pending applications.

[4] See *Memorandum Opinion and Order,* FCC 83M–997, released March 29, 1983, at paras. 19–23, for an ALJ's discussion of the difference between permissible and impermissible amendments.

[5] For the most part, applicants have been exchanging copies of each others' applications well in advance of the public notice triggering the 30-day petition period.

[6] In the unlikely event that the settlement agreement results in a former minority shareholder or an entirely new party obtaining a controlling interest, public notice of that change is required.

[7] Presently § 22.23(c)(1) indicates that any change in the CGSA is deemed to be a major amendment. It was not our intention to treat as major amendments which propose to decrease the CGSA. We will therefore amend § 22.23(c)(1) to more clearly express our intentions.

[8] Other parties filing comments were Cellular Communications of Cleveland, Inc., Cellular Communications of Cincinnati, Inc., Cellular Mobile Systems, Inc. (CMS), Post Cellular Telecommunications, Inc., and the law firm of

in support of the petition, others offering alternative procedures, and others responding to the various proposals. Since the petitions were filed, the Administrative Law Judges have had numerous opportunities to rule on similar requests by competing applicants to extend the time for rebuttals. In denying these requests, the ALJs have held that rebuttal cases must address proffered direct case exhibits and amendments as if they will be accepted in their entirety. See *Order* (FCC 82M–3983) released December 15, 1983 and *Order* (FCC 83M–178) released January 14, 1983. Based on our experience, we see no reason to further change our procedural rules as requested in the petitions for reconsideration. These rules were adopted to ensure expedited hearing proceedings. While these rules may be somewhat burdensome to the parties, to date they have accomplished their intended purpose. We will, therefore, deny the petitions for reconsideration and CMS's request for stay (see note 7, *supra*).

11. Our action today is a rule of agency procedure and practice, rather than a substantive rule, because it affects only the time when applications and related pleadings and amendments can be filed. Therefore, there is no need for publication or service prior to the effective date of this order.

12. Accordingly, it is ordered, That applications for all other markets, including SMSA and non-SMSA areas, are to be accepted starting December 1, 1983, and are subject to the requirements of 47 CFR 22.901 *et seq.*

13. It is further ordered, That competing cellular applicants are required to submit their affirmative direct cases within 30 days of the date of publication in the **Federal Register** of the order designating their applications for hearing.

14. It is further ordered, That competing cellular applicants are required to file rebuttals within 45 days from the date affirmative direct cases are required to be filed.

15. It is further ordered, That amendments to cellular applications may only be filed in accordance with the rules adopted here.

16. It is further ordered, That competing cellular applicants in other than the top 60 markets may raise in motions to enlarge issues filed under § 1.229 of the Rules only matters which were not in existence or ascertainable on the date petitions to deny were due.

17. It is further ordered, That the Petitions for Reconsideration filed by MCI Cellular Telephone Company and American Mobile Communications are denied.

18. It is further ordered, That the request for stay filed by Cellular Mobile Systems, Inc., is denied.

19. It is further ordered, Pursuant to 47 U.S.C. 154(i), 301 and 303(r), that Part 22 of Title 47 of the Code of Federal Regulations is amended as set forth in the Attachment. These amendments shall become effective April 18, 1983.

20. It is further ordered, That the Secretary shall cause a copy of this Order to be published in the **Federal Register.**

Federal Communications Commission.

William J. Tricarico,

Secretary.

PART 22—[AMENDED]

47 CFR Part 22 is revised as follows:

§ 22.23 [Amended]

1. Section 22.23(c)(1) is revised as follows:

* * * * *

(c) * * *

(1) If in the Domestic Public Cellular Radio Telecommunications Service, the amendment results in an increase in the Cellular Geographic Service Area.

* * * * *

2. Section 22.916 is amended by revising the first sentence of paragraph (b)(1) and revising paragraph (b)(4) as follows:

§ 22.916 Evaluation of cellular applicants.

* * * * *

(b) * * *

(1) The affirmative direct case, including all documentary evidence upon which an applicant intends to rely in a comparative context, must be submitted within 30 days of the date of publication in the **Federal Register** of the order designating the application for hearing. * * *

* * * * *

(4) Rebuttal cases must be filed within forty-five days of the date the direct cases are required to be filed. Four copies of the rebuttal case must be filed with the Commission and a copy served on each other party to the proceeding.

* * * * *

3. In § 22.918, paragraphs (a) and (b) are revised and paragraphs (c)–(e) are added as follows:

§ 22.918 Amendment of cellular applications.

(a) Minor and technical amendments and those required by § 1.65 of the Rules, but no major amendments as defined in § 22.23(c), may be proffered within forty-five days of public notice of the filing of the application.

(b) Amendments in connection with full settlement agreements under § 22.29 of the Rules, or partial settlements resulting in a merger of interests between two or more mutually exclusive parties may be filed at any time.

(c) Amendments requested by the Commission or the Administrative Law Judge may be filed at any time.

(d) Amendments reflecting changes in ownership of an applicant not related to a settlement agreement and which do not result in a transfer of control may be filed up to 30 days after publication in the **Federal Register** of the order designating the application for hearing, and

(e) After an application is designated for hearing, amendments may be filed for good cause upon leave of the ALJ.

4. A new § 22.919 is added to read as follows:

§ 22.919 Restrictions on motions to enlarge issues.

In comparative hearing proceedings involving markets other than the top 60, motions to enlarge issues filed under § 1.229(a) of the Rules will not be entertained by the presiding judge unless the facts in question were not in existence or ascertainable on the date a petition to deny the application was due. In the absence of such a showing, the movant must meet the burden imposed by § 1.229(c).

BILLING CODE 6712–01–M

INTERSTATE COMMERCE COMMISSION

49 CFR Part 1039

[Ex Parte No. 346 (Sub-7)]

Railroad Exemption—Export Coal

AGENCY: Interstate Commerce Commission.

ACTION: Notice of final rules and exemption.

SUMMARY: Upon review of the record in this proceeding the Commission has decided to exempt rail movements of export coal moving from United States ports, including Great Lakes Ports, from regulation pursuant to 49 U.S.C. 10505. Regulations, in the appendix, are

---

Kadison, Pfaelzer, Woodard, Quinn & Rossi. In addition, CMS requested a stay of the procedural rules pending action on the reconsideration petitions.

adopted to carry out this exemption. Exemption is also proposed for export coal movements by all-rail to Canada and Mexico.

Exemption of rail export coal movements will further the goals Congress set forth in the rail transportation policy, 49 U.S.C. 10101a. Regulation is not necessary to carry out the rail transportation policy, or to protect shippers against the abuse of market power. Exemption will permit the free operation of market forces, let the railroads obtain needed revenue, and allow the carriers the necessary flexibility to respond to a rapidly changing environment.

DATES: *Effective:* The decision is effective on September 12, 1983.

Comments: Due July 11, 1983 on the issue of Canadian and Mexican all-rail export coal traffic.

FOR FURTHER INFORMATION CONTACT:
Louis E. Gitomer, (202) 275–7245.

SUPPLEMENTARY INFORMATION:
Additional information is contained in the Commission's full decision. To purchase a copy of the full decision write to: T. S InfoSystems, Inc., Room 2227, Interstate Commerce Commission, Washington, D.C 20423; or call 289–4357 (D.C. metropolitan area) or toll free (800) 424–5043.

List of Subjects in 49 CFR Part 1039

Administrative practice and procedure, Agricultural commodities, Coal, Intermodal transportation, Railroads.

By the Commission, Chairman Taylor, Vice Chairman Sterrett, Commissioners Andre and Gradison. Chairman Taylor dissented with a separate expression. Vice Sterrett and Commissioners Andre and Gradison commented with a separate expression.

Agatha L. Mergenovich,
Secretary.

Chairman Taylor Dissenting: [1]

I appreciate the majority's summarization of the proponent railroads' comments [2] but feel that perhaps a more neutral approach would provide a better basis on which to rationally decide this important case. Consequently, I will begin and conclude with an analysis of this proposal under 49 U.S.C. 10505 and the legislative intent of the Staggers Act.

The key to assessing the merits of a proposed exemption, insofar as the statutory criteria are concerned, is the recognition that Congress intended the Commission to retain only that measure of regulation necessary to protect shippers, especially captive shippers, from the abuse of market power. Congress specifically expressed its intent that regulation be continued in those situations where competition is absent and market forces cannot come into play.[3]

The legislative history of the Staggers Act reflects the particular concern of Congress over captive coal traffic. The Senate Committee Report directs the Commission to ensure that coal traffic bears only its fair share of costs, and that "higher rated captive traffic is not unduly burdened." [4] The Conference Committee Report emphasizes "the encouragement and promotion of the transportation of coal by rail * * * at rates which do not exceed a reasonable maximum where there is an absence of effective competition." [5] No other commodity was so singled out by Congress.

Accordingly, the central question here is whether, in the absence of regulation, competition in the world and domestic markets would both: (i) Hold coal rates to reasonable levels, and (ii) encourage and expand the transportation of export coal. My analysis of the evidence, including the comments filed by shippers, receivers, government agencies, and others, together with several reports prepared by the Commission's staff, all lead to the inevitable conclusion that because the necessary competition is not present, neither of the foregoing results will occur if the exemption is granted. Actually, the evidence of record strongly indicates that granting the exemption will result in increased rates, together with decreased demand and production. Therefore, the discussion that follows will consider the interrelated effects of exempting export coal movements from all ICC regulation, including rate provisions and car hire/car service obligations.

Turning now to the issues, let me begin by stating that while I agree there is competition in the international coal export market,[6] I am not at all convinced of its relevance as an effective constraint on rail ratemaking for domestic movements from mines to ports. First, the relationship between competition among international suppliers and domestic movements was not directly addressed in our *Market Dominance* proceeding.[7] The Commission there concluded only that potential sources of competition should not be excluded from consideration. Thus, world competition is only one factor among many to be considered.[8]

Of even more importance is the fact that competition in the world export market has only limited relevance in this proceeding. The "source" of such world competition is too remote and takes place entirely outside the U.S. Any analysis must consider the effects of an exemption on both rates and service, and at best, world competition will only set a price cap for U.S. coal in foreign countries, i.e., a maximum price above which coal will not move for export.

This "price cap," however, will neither ensure a reasonable division of profits between the railroads and the coal interests, nor enable the captive shipper to move its coal if a railroad, once freed from its common carrier obligation, determines not to serve such shipper at all or to condition service

---

[1] Before discussing the issues, I want to point out that my opposition to this proposal is shared by Commissioner J. J. Simmons III, who, before leaving the Commission, actively participated in the oral argument and in our deliberations on the merits of the proposal. In the determinative round of voting which culminated on March 3, 1983, and in which a 3–2 majority voted to grant the exemption, Commissioner Simmons voted, on Feb. 28, 1983, to deny the exemption stating: "If I am in the minority and the decision is revised so as to grant the exemption in whole or in part, I wish to be shown as dissenting and having voted to deny the exemption in its entirety." It is my firm belief that Commissioner Simmons' vote is a proper and integral part of the Commission's determination of this matter.

[2] See, e.g., majority decision, ns. 3–8, 10–16, 18–31, 38–40, 51, 58, 61, and 63.

[3] See especially S. Rep. No. 470, 96th Cong., 1st Sess. 43 (1979) which states that the exemption power should not be used "at the expense of captive shippers who have no reasonable transportation alternatives."

Also see the discussion set forth on page 17 of that report indicating the Committee's concern with the magnitude of rate increases on coal movements and the importance of energy considerations.

[4] *Id.* at 7–8. It should be noted, at this juncture, that in expressing its concern for captive coal traffic, Congress did *not* distinguish between domestic and export coal.

[5] H. Rep. No. 1430, 96th Cong. 2nd Sess. 80 (1980).

[6] There is considerable question regarding the effectiveness of competition in the movement of metallurgical (met) coal to Western Europe. The U.S. supplies 55 percent of Western European met coal, and is considered the "swing supplier." The major alternative suppliers, Australia (labor problems), Poland (strikes and martial law), South Africa (political unrest and self-imposed quotas), and the U.S.S.R. are not considered reliable substitutes for U.S. coal.

[7] Ex Parte No. 320 (Sub-No. 2), *Market Dominance Determinations and Consideration of Product Competition*, 365 I.C.C. 118 (1981) (remanded, *Western Coal Traffic League and Its Members, et al.* v. *United States of America*, 5th Cir. No. 81–4257 (Dec. 6, 1982). The court held that the Commission was statutorily precluded from considering geographic and product competition in making market dominance determinations). Rehearing *en banc* granted March 7, 1983; oral argument scheduled for June 6, 1983.

[8] *But see*, section 205(a)(2)(D) of the Staggers Act which specifically excludes consideration of imported coal as competition in any market dominance determination regarding domestic coal rates.

upon unreasonable rates. That nearly all coal shippers are captive is undeniably demonstrated by the record, which reflects neither intramodal nor intermodal competition in domestic movements for export coal. Over 95 percent of individual U.S. mines producing export coal are served by just one railroad. In the East, the CSX and the N&W[9] effectively divide the market. In the West, the Union Pacific participates in virtually all export coal movements, while the Atchison, Topeka and Santa Fe participates in a limited number of these movements.[10] Most traffic, especially in the East, is handled by a single railroad from mine to port. Railroads *are* in a position to exact substantial premiums without fear of diverting traffic to other carriers.

There is no effective intermodal competition. Pipelines do not yet exist for the transportation of export coal, and truck competition is not economically practical for large shipments or long distances.[11] Barge transportation almost always involves a prior movement by rail, which makes the railroad indispensable to the water carrier's ability to carry coal. This point has not been lost on the railroads. For example, until last summer, rates on coal movements to the river system were set higher than those to the East Coast, thus assuring that traffic moved all rail, and in most instances, to railroad-owned port facilities.

However, because the shippers and competing barge lines had recourse under the Interstate Commerce Act, the railroads dropped their rates to the river to the domestic level.[12]

But, under the exemption proposed here, the railroads could effectively eliminate all barge participation in export coal traffic, and thus adversely affect the New Orleans gateway, either by setting a prohibitively high rate for coal movements to the water connecting point vis-a-vis the rates established for all-rail movements or by refusing to provide any service at all to water-connecting points for export coal movements. The railroads have a powerful incentive to eliminate barges as a competitive alternative so that more and more export coal will move via all-rail service, often to export coal facilities owned and operated by the railroads. As a result, insofar as the barge alternative is concerned, the export coal exemption can only be regarded as truly anti-competitive.

Moreover, geographic and product competition within the United States is neither a counterbalance nor a solution to the problem. The coal producing regions of the U.S. do not compete with each other for most of the export market. According to the railroads' own testimony, the vast coal reserves now available in the Powder River Basin (Montana and Wyoming) are a very long distance from port (over 1,000 miles) and the coal in such reserves is not of export quality, because its energy value is less than 10,000 BTUs and it has a relatively high moisture content. The coal from Ohio, Western Kentucky, and Illinois is not of met quality and has too much sulfur for all but a small part of the steam coal export market. Coal from Colorado, Utah, and New Mexico goes to Japan, where there appears to be some competition with eastern coal. However, these western reserves produce no met coal, and the delivered price to Japan of eastern steam coal is more than $20 per ton higher than the delivered price of coal from New Mexico, Utah, and Colorado. Therefore, competition between the two sources is minimal. Almost all of our steam and met coal exports to Europe move through Atlantic ports.

The premise underlying the argument that export contracts can be freely filled from mines on more than one railroad is also unrealistic. First, export tonnage is frequently a blend of coal from several mines, and many times, some mines are on one railroad, some on another. Second, for a shipper to be able to substitute tonnage from a mine on a second railroad, certain conditions must be met, i.e., the tonnage must be available and not already committed to a long-term contract, the extraction costs must be relatively the same, and the tonnage from the second mine must be technologically substitutable for the tonnage from the first. Shippers point out that the chance for such substitution does not usually occur, especially since the Chessie hauls primarily met coal and the N&W primarily steam coal. Third, there must be no price leadership, in that if one railroad raises its rates, the other will not, or at least not to the same level. It appears highly unlikely that all three of the foregoing conditions would coalesce, and even if they did, the advantage would accrue only to the particular shippers affected.

The fact remains that ninety-five percent of the mines producing export coal are captive to the railroads that serve them.

The argument that big shippers can play one railroad against another (i.e., by substituting tonnage from mines served by more than one carrier) is still less convincing, even were one to ignore the problem of lack of substitutability discussed *supra*. When a shipper negotiates with a railroad, its corporate affiliation is less important than its access to alternate transportation. There are over 100 companies involved in the export coal trade. Although some of the shippers are large, with connections to still larger entities, only twenty-four percent of the mines served by the Chessie System and the N&W are controlled by operators having mines on both railroads. As for the West and the Mid-West, there appears to be virtually no possibility of substitution between railroads at the present time.

Therefore, contrary to the suggestion of the railroads, the adverse consequences of granting the exemption would not be offset by theorizing that: (i) The railroads and the coal suppliers would negotiate as "partners," or that (ii) big shippers could exert more bargaining power than the railroads.

In light of the lack of any form of domestic competition, it cannot be argued that the transportation of coal from mine to port is a joint venture where profits are distributed according to the percentage of equity participation. Instead, such transportation is an undertaking in which the parties' interests are the same only in the broadest sense, i.e., getting the coal to market. However, in the only sense that is germane here, each participant is solely concerned with maximizing its own profit. Because most mines are served by only one railroad, and because many mines may be on that one railroad's line of track, it is perfectly possible for such a railroad to maximize its profit at the expense of one of the shippers it serves. To illustrate, such a railroad could easily recapture business lost at one captive mine from a second mine that has greater production capabilities and/or lower production costs than the first.

To be sure, if coal does not move, neither the railroad nor the coal producer makes any money. However, the magnitude of the loss is not the same for each. For example, each of the two major eastern railroads has over 200 mines on its rail lines. In any negotiation, each mine is bargaining for all of the profit which can be made from that mine. The railroad, on the other hand, is bargaining for profits on only one of several mines that it serves,

---

[9] Now a subsidiary of Norfolk Southern Corporation.

[10] At the time the record closed, the Burlington Northern had not developed an export market for its Powder River Basin coal. See text *infra*.

[11] The statistic of the majority regarding the 13 percent truck movements is 13 percent of total coal production. There is no indication of whether any of this is for export.

[12] See complaint No. 35602, *Water Transport Assoc. v. The Chesapeake and Ohio Railway and Norfolk and Western Railway Company.*

many of which may be located on the same line of track. Thus, in the negotiating arena, only a relatively small share of the railroad's profits will be at risk.

Clearly, the railroad can rely upon the traffic from other mines on its rail lines and the profit from other commodities it carries to mitigate the loss from its failure to agree with a particular mine, and while so doing, the railroad will remain secure in the knowledge that the coal from such mine must move eventually, if at all, and then only over the railroad's trackage. If the mine does not ship, some other mine on the carrier's line may increase the amount it exports, thereby allowing the railroad to gain a share of the profit from that transaction. Because the individual mine has, for the most part, nowhere else to turn, it will be forced to reach agreement with the railroad or not produce coal. Thus, under the scenario contemplated by the proposed exemption, the railroad would be in a strong position to capture most or all of the individual mine's profit, since the latter's rate of return would effectively be determined by the carrier.[13] Furthermore, given a lack of intermodal and geographic competition, even those few suppliers which could exert significant bargaining power would not protect the interests of the many, nor would they have any incentive to protect the interests of their competitors.[14]

Also, it should be noted here that the record is devoid of any concrete evidence in support of the contention that regulation imposes a chilling effect upon contracting. Hundreds of coal contracts have been filed with the Commission, and the railroads have not evidenced a single instance where they have lost a contract because a shipper has insisted upon a "regulatory backstop" clause. Nor have the railroads indicated what shippers have asked for such a clause or how many times the request has arisen in negotiations. None of the railroads' shipper witnesses testified that they have demanded a "backstop" clause, whereas the shippers opposing the exemption testified that they had never even heard of a "backstop" clause, much less insisted upon one.

It should be noted too that the railroads already exercise a substantial measure of ratemaking flexibility.[15] The Commission does not have jurisdiction to examine maximum rate reasonableness unless we first determine that a railroad has market dominance over the transportation to which a particular rate applies, 49 U.S.C. 10701a(b)1 and 10709.

Furthermore, in Ex Parte No. 347 (Sub-No. 1), *Coal Rate Guidelines, Nationwide* (not printed), decided February 8, 1983, we published a carefully crafted proposal for prescribing maximum reasonable coal rates in instances where railroads exercise market dominance over coal traffic. That proposal reflects the dual concern of Congress that captive coal shippers be protected from abuse and that the railroad industry achieve revenue adequacy.[16]

However, quite apart from the ratemaking flexibility proposed in Ex Parte No. 347 (Sub-No. 1), the railroads have stated that they will, given the export coal exemption, engage in discriminatory pricing based on each mine's long-term marginal cost. This discriminatory pricing, as contrasted with differential pricing, will be completely free of regulation and will adversely affect the production of export coal. The natural result of setting rates according to the cost of extraction is to transfer from the mine to the railroad those returns from the production of coal which exceed the mine's long-term marginal cost. A producer who knows that his profits are captive to the carrier has no reason to expand.[17] Appendix A to this dissent sets forth, by example, an illustration of how coal production could be reduced while railroads still maintain maximum returns. In any event, regardless of whether the railroads extract monopoly profits by resort to either simple or discriminating monopoly power, export coal production can predictably be expected to decline over the long run.

Also of importance is the fact that the effects of the exemption extend far beyond profit and loss to coal shippers and carriers. It is impossible to separate out the extensive foreign and domestic ramifications. While the railroads supplied no economic calculation of the effect on the volume of export coal that their actions under deregulation will have, the majority of the comments and the Commission's own Environmental Assessment Statement (EA) support the conclusion that the exemption and the concomitant rate increases will result in a decline in demand for export coal.

In contrast, Section 203 of the Staggers Act (49 U.S.C. 10701a(e)(2)(B)(iii), i.e., the Long Cannon Amendment) mandates consideration of the impact of a proposed rate or rate increase on the attainment of national energy goals when the Commission determines whether to investigate certain rate proposals. As explained in the Conference Committee Report, the national energy goals include reduction of dependence on foreign sources. Further, "[t]o reduce dependence on foreign energy sources this country must stimulate utilization of its abundant, indigenous coal reserve."[18] Consideration of our national energy goals will no longer be a factor in view of the action taken by the majority in this proceeding.

Domestically, a diminishing demand for export coal translates immediately into reduced growth in production in coal supply regions. In fact, the Commission's EA composite case shows that by 1985, Virginia, Utah, and Colorado will experience a complete loss of all export production directly as a result of the declining demand for export coal brought about by increased transportation rates. The EA also indicates that by 1990, there will be substantial declines in the coal productivity of Southern West Virginia, Alabama, and Oklahoma, and that by 1995, New Mexico will lose its entire export coal market. Needless to say, these losses will have a severe adverse impact upon the nation's balance of trade, upon primary and secondary employment levels, upon local and regional tax bases, and upon the communities and families dependent on those mines which are forced to decrease or stop production.

In addition to the foregoing economic and social effects, a grant of the exemption is in direct conflict with the

---

[13] The railroads have stated that they will set their bargaining according to the mine's cost of extraction rather than their own cost of operation.

[14] In fact, as some railroads lease coal producing land to mines, the closure of another mine would only serve to increase royalties to the railroad from its own land. See discussion in text *infra*.

[15] From 1977 through 1981, the average railroad freight charge increased 65.9 percent while the value of coal, per the F.O.B. mine price, increased only 31.2 percent.

[16] The proposal recognizes the need for differential pricing if railroads are to achieve revenue adequacy, thereby providing the railroads with broad ratemaking flexibility. The approach taken is one of constrained market pricing.

[17] A more efficient coal producer will have lower production costs, and therefore will be able to absorb greater transportation charges while remaining competitive in the world market. At the same time, the less efficient producer will be unable to absorb equivalent transportation charges. Consequently, transportation costs will dictate coal prices, not production. The efficient producer who will be punished by paying higher transportation charges than his less efficient competitor will compete only on an equivalent footing with less efficient producers. Thus, the efficient mine will not have a cushion to decrease its price and compete more effectively, nor will it have the entrepreneurial incentive to expand production in return for increased profit.

[18] H. Rep. 1430, 96th Cong. 2d Sess 96 (1980).

Administration's efforts to stimulate demand for the export of U.S. coal to our allies in the Pacific Rim nations and in Western Europe,[19] and with the President's policy statement to our allies that foreign consumers be allowed complete, open, and nondiscriminatory access to the U.S. coal market.[20] Foreign customers are greatly concerned with the stability of pricing and the reliability of supply. The numerous comments forwarded to the Commission from foreign governments and coal purchasers in countries such as Japan, Spain, Brazil, Italy, the Netherlands, and Ireland all express the strong fear that price increases and a lack of stability in the delivered price will reduce the attractiveness of U.S. coal as a reliable source and as an alternative for not only foreign coal, but also for OPEC oil and Soviet gas. Significantly too, these foreign markets, once lost, cannot be easily regained.[21]

Moreover, as recognized by the Departments of State and Commerce and the International Trade Representative, it is important to our national security that both ourselves and our allies have a secure, economic, and competitively priced alternative to unpredictable supplies of imported energy. In derogation of this objective, the proposed exemption, by shifting profit from producer to carrier and precipitating a long-term decline in coal exports, would undercut a key element of U.S. international energy policy,[22] impair the health of our mining industry, jeopardize the jobs of thousands, and substantially weaken, if not eliminate, a potentially important factor in the restoration of a favorable balance of payments for the United States.

In addition to the glaring defects in the majority's position on the effects of "competition," this decision is also subject to numerous oversights and procedural deficiencies.

Antitrust Immunity

Certainly no exemption should be authorized which retains antitrust immunity. However, let no one assume that the antitrust laws will protect shippers from the abuse of market power. The most that the antitrust laws can do is to prevent collusion among existing competitors. The holder of a lawful natural monopoly generally is free to set its rates and provide its services in the manner deemed most profitable.[23] The carriers appear to be immune from antitrust actions with respect to any traffic, such as export coal, which has always been captive. The courts cannot provide the regulatory supervision necessary to curb abuses.

The Railroads' Modified Proposal

Recognizing the serious problems inherent in an across-the-board exemption, the N&W, in a later pleading, proposed that any exemption be limited to the rate regulations of 49 U.S.C. 10701–10712. This would have retained Commission jurisdiction in such critical areas as car hire and service (especially 49 U.S.C. 11126), the commodities clause (49 U.S.C. 10746), the war powers clause (49 U.S.C. 11128), the contract rate provisions (49 U.S.C. 10713), and the common carrier obligation (40 U.S.C. 11101(a)) to name only a few. However, the majority decision rejects this modified proposal, but since the N&W's suggested limitations have been addressed only summarily in the majority's analysis of the National Transportation Policy, it is difficult to determine if the impact of their removal was seriously considered.[24]

For instance, as discussed *supra*, with the demise of the common carrier obligation, what incentive is there, in these days of unit trains, for a railroad to drop and pick up a few cars at the site of a small family-owned mine in Appalachia? Although many such mines have already been shut out of certain export markets because of high transportation costs (which can run as high as one-third to one-half of the purchaser's costs), the few that remain will face inevitable exclusion from such markets by virtue of the exemption granted herein.

Congress specifically recognized the problem of obtaining cars in 49 U.S.C. 11126(a), which requires railroads to make "a reasonable distribution of cars for transportation of coal among the coal mines served by it [the railroad] whether the mines are located on its line or are customarily dependent on it for car supply." Thus, by imposing an obligation to supply cars, in tandem with the common carrier obligation and various rate regulations, Congress sought to ensure continued participation in the market, not just for mines that a railroad chooses to serve, but for *all* mines.

Did the majority also consider the impact of removing the commodities clause limitation on the exemption granted? Railroads own enormous amounts of coal, most of which they received in the form of grants from the government. Three railroads (i.e., the Burlington Northern, the Union Pacific, and the Santa Fe) own over 16 billion tons of coal reserves, which approximates 25 percent of the total non-federal coal reserves located in the Western States. Recently, these railroads have been active in marketing their coal, but the commodities clause, 49 U.S.C. 10746, prohibits them from transporting it. However, the exemption granted by the majority will void the statutory prohibition against such railroads directly transporting their own coal to an export gateway. As a result, with the exemption, the railroads can determine which mines will receive service, and thus they could decide that export coal will come only from their own mines. Under the exemption, it would appear that coal-owning railroads can now mine their own coal and haul it in their own cars, over their own tracks, to their own piers for export.[25] As a consequence, independent coal producers will instantly, upon the exemption becoming effective, be confronted with a legal vertical monopoly against which it will be very difficult to compete.

Lack of an Environmental Impact Statement

In the majority's unexplained rush to issue this decision, the required

---

[19] These actions are part of an integrated effort which includes improvement in port and waterway facilities.

[20] The President's "Coal Export Policy Statement" of July 17, 1981. A foreign purchaser could plausibly conclude that the deregulation of the export market, while leaving domestic coal regulated, is a measure aimed at extracting profits from overseas consumers. In fact, the railroads have confirmed this impression. See the transcript of oral argument, TR 54, 55, 218; see also the Reply Verified Statement of Gould and Landes at 7–8: "Higher prices for delivered coal would be borne by foreign consumers, while U.S. railroads would gain. . . [T]his transfer makes the U.S. better off." Such a conception of the nature of the U.S. commitment to coal exports is clearly not consonant with the President's policy statement.

[21] For a complete discussion on this point, see text *infra*, at "Revocations," and the comments of the Departments of State and Commerce and those of foreign purchasers.

[22] See also United States Department of Energy, Interim Report of the Interagency Coal Export Task Force, Jan., 1981 (DOE/FE–0012) which stated that the role of the United States in future coal trade "depends upon the buying strategies of the consuming nations, the policies and prices of competing exporters and the actions taken by the United States to maintain reasonable prices, prompt delivery and dependable quality."

The Commission's EA also predicts, at 51, that "U.S. shares of both the European and Pacific Rim markets are projected to decline significantly."

[23] *Berkley Photo, Inc.* v. *Eastman Kodak Co.*, 603 F2d 263, 297 (2d. Cir. 1979).

[24] For a contrast, see the Commission's recent decision exempting boxcars, wherein these questions were discussed at length and it was emphasized that jurisdiction was being retained to protect against shipper abuse.

[25] Some railroads are currently investigating the desirability of entering into the ocean portion of export coal transportation.

environmental impact statement (EIS) and energy impact statement (SEI) have both been omitted. The purpose of an EIS and an SEI is to enable the Commission to consider fully the environmental and energy impacts of its decision. However, when voting was concluded in early March and the exemption was granted, the Commission had nothing before it on this issue.[26] Ironically, however, also in March of this year, the entire Commission issued a notice of intent to prepare an EIS in Ex Parte No. 347 (Sub-No. 1), *Coal Rate Guidelines—Nationwide, supra.*[27] That notice found that a significant environmental effect arises out of any major change in coal rate regulation, and as a result, several possible effects of coal rate increases were listed. In fact, the EIS in Ex Parte No. 347 (Sub-No. 1) stated that it would "consider the effect of the proposed action on potential overseas demand for domestic coal," and on how the proposed rate guidelines "might * * * affect other important considerations such as export coal policy."

Thus, the Commission has recently acknowledged, as a matter of public record, that the export coal market and the environmental manifestation of any changes in that market are not economically isolable from the domestic coal transportation market. The National Environmental Policy Act (NEPA) requires federal agencies to produce a detailed environmental impact statement (EIS) for "major Federal actions significantly affecting the quality of the human environment." 42 U.S.C. 4332(2)(C). See *Aberdeen & Rockfish R. Co.* v. *SCRAP,* 422 U.S. 289, 318–319 (1975).

The logic of the above NEPA analysis also applies to the requirements of the Energy Policy and Conservation Act (EPACA), 42 U.S.C. 6201 et seq., which requires the Commission, where practicable, to include in any major regulatory action a statement of the action's probable impact on energy efficiency and energy consumption. 42 U.S.C. 6362(b). A statement of energy impact (SEI) is certainly indicated here, because the exemption affects coal rates, because the Commission's regulations generally require an SEI in rulemaking proposals affecting carrier operations, 49 CFR 1106.5(a)(9), and because the Commission acknowledged potential energy impact in the export exemption rulemaking notice. 46 FR 44532 (Sept. 4, 1981).

The Commission has thus formally acknowledged that as to energy consumption and environmental considerations, the export coal market is inherently intertwined with the domestic market. Yet, to avoid preparing an EIS in this proceeding, the majority has found that exempting export coal movements from regulation is not a major federal action significantly affecting the quality of the human environment or the consumption of energy. Such a finding is manifestly indefensible!

The assessment statement (EA) on which the majority's above conclusion is based is seriously flawed and incomplete.[28] First, the EA is based entirely on the assumption that the only effect of the export coal exemption will be an increase in rates.[29] While I certainly agree that this will be the primary result, the possibility of selective decreases, especially on movements from railroad-owned sources, combined with service discontinuances to others, cannot be discounted. The purpose and result of such selective decreases would be to shift supply sources from current producers to railroad-owned mines. Such a direct manipulation of the supply market, while perhaps a reasonable reaction on the part of the railroads to a continuing coal surplus, could only be accomplished if all regulation were removed. Therefore, the failure of the EA to address the effects of decreases in rates and the resultant shifts in supply sources is a major defect.

Also, the assessment addresses only indirectly the relationship between export and domestic markets. Export coal rates (and delivered prices which include those rates) have a clear "secondary impact" on the domestic coal market and coal production in general. This secondary impact flows, in part, from the fact that the amount of coal exported can affect the quantity and price of coal available for domestic use, as well as the price at which railroads would be willing to move domestic coal. These effects, in turn, help determine whether domestic coal users will switch to alternate fuels. Thus, while the domestic environmental effects of exempting export coal may not be as direct as those resulting from the Commission's proposed guidelines in Ex Parte No. 347 (Sub-No. 1), they are, nevertheless, closely related and reasonably foreseeable. See 40 CFR 1508.8. Under NEPA, an agency must discuss all such secondary impacts having significant adverse environmental effects. See, for example, *South Louisiana Environmental Council* v. *Sand,* 629 F.2d 1005, 1016 (5th Cir. 1980).

Because of the limited rate increase scenarios studied in the EA, I can only conclude that its overly broad findings are not supported by reasonable evidence. The fact of the matter is the majority has not fulfilled its statutory responsibility to produce an EIS. Instead, the majority has opted for the EA, and as a result, the decision to grant the exemption is based, in part, on a faulty and incomplete study.

Revocation

The ability to re-impose regulation by revoking the exemption under 49 U.S.C. 10505(d) has definite practical limitations in this proceeding. Even if the exemption were in effect for only a relatively short period of time, there would still be great potential for the occurrence of serious damage. The railroads could absorb shippers profits, thereby causing some producers to go out of business. Plans for expansion could be canceled or postponed at the very time a demand for increased national coal production is emerging. Also, coal contracts are often long-term commitments, and the parties to many actual or potential coal export contracts or rail transportation agreements could irrevocably change their positions and suffer losses that could not be recouped.

Besides, authorizing an exemption on the basis that we can re-impose regulation is clearly unwise when the potential for serious abuse of market power, the likelihood of decreased U.S. coal exports, and the possibility of grave and irretrievable social, economic, and political damage is so apparent.

Limited Exemption

Without question, the exemption proposed should definitely have been denied. In so doing, however, I would have urged the railroads to refile for a partial exemption seeking the establishment of a special zone of rate freedom for export coal movements. Such a zone could have had a fluctuating base and ceiling tied to an index related to the current price of coal.[30] Within the moving zone, the

[26] The threshold environmental analysis was prepared in March of 1982 and recalled by the Director of the Office of Transportation Analysis in November of 1982, because the analysis was insufficient to reach a conclusion that no significant adverse impacts were likely.

[27] 49 FR 9706, March 8, 1983.

[28] The instant EA, which was prepared subsequent to the March 3, 1983 decision to grant the exemption, warns that impacts are "discussed in general terms because of: (1) The absence of knowledge concerning the exact location of extraction activities, (2) the lack of adequate methods to quantify impacts, and (3) the absence of precise or consistent information * * *".

[29] "[We] have further limited our analysis to a study of the impacts of future rate increases." EA at 2.

[30] The zone's fluctuations could have been based on a percentage relationship to a recognized index,

railroads would have been free to set rates without regulatory interference. The Commission could have been relatively certain that rates set within the exempt zone would not involve an abuse of market power because of the relationship established between the index and the zone.

While the proposal and justification of any particular index would have been up to the proponent railroads,[31] the point is that such a zone of rate freedom would have provided the benefits sought from this exemption without its overwhelming detriments. Regulatory burdens would have been reduced, railroads would have had the ability to respond quickly to changing market conditions, and the Commission would have been in a position to fulfill its statutory duty to protect shippers, when necessary, from an abuse of market power.

Summary

This discussion has now come full circle and ends where it began, with the exemption status itself. 49 U.S.C. 10505 requires that the Commission, using the guidelines established by the Staggers Act, must make two findings. First it must find that the proposal is either of limited scope or will not result in an abuse of market power. Then, the Commission must analyze the expected results of the exemption and find that they compare favorably with the goals of the National Rail Transportation Policy (NRTP).

A simple juxtaposition of the above criteria and the facts and evidence presented in this proceeding shows them to be inalterably incompatible. Certainly rail transportation of export coal is not a matter of "limited scope." No single commodity (other than "coal, all types") comprises more than export coal's traffic share of the railroad industry's annual originating carloads.[32] Export coal involves the shipment of millions of tons of coal worth millions of dollars. No one has made a serious attempt to characterize this exemption as "limited in scope."

More relevant to this proceeding is the alternate standard of whether the exemption will result in an abuse of market power. Based on the record, I cannot find that where undue concentrations of market power already exist due to the near vacuum of any form of domestic competition, it is unnecessary to protect captive shippers of export coal from an abuse of market power. The exemption will not improve the captive shipper's lot but will only remove what little competition and bargaining ability remains. More specifically, the exemption will impair the balance between shipper and carrier interests that Congress so carefully sought to preserve through the reasonable rate and service provisions of the Staggers Act.

Turning now to the most important criterion of all, i.e., the National Rail Transportation Policy of 49 U.S.C. 10101a, it must be remembered that this policy has a considerably broader purpose than the improvement of a railroad's profits. The real objective is the maintenance of our rail transportation system for the benefit of all who are dependent upon it. Therefore, such policy mandates a consideration of the whole rail transportation system and the needs of not just the carriers, but also the shipping, receiving, and consuming public. Although the Commission's regulatory reins can and should be loosened or eliminated whenever practicable, caution must be taken to see that reform proceeds in a systematic manner after a careful consideration of all affected interests. Competition and reliance upon the marketplace are important goals of the NRTP, and to achieve these goals, parties must have relatively equal bargaining positions. Where, as here, one party holds monopoly power, some regulation of that party provides the leverage needed to maintain equilibrium in the marketplace.

The consequences of granting the exemption herein proposed will be a distinct lessening of competition, distortion of the demand for services, unreasonable costs for captive products (thereby imposing an artificial limit on the output of those products), and a serious misallocation of resources. Equally grave are the negative effects the exemption will have on our economic and social well being, on our national security, and on our foreign policy. These results violate all the provisions of 49 U.S.C. 10101a, the object of which is to preserve and improve our rail transportation system so that it may better serve those who use it. Instead of giving the railroads an opportunity to seek a reasonably limited exemption that would have enhanced our transportation system, the majority has, by approving the total exemption, greatly impeded the achievement of the goals set forth in the National Rail Transportation Policy.

As a result, it is regretful but true that only those who yearn for the overly regulatory days of yesteryear will gain any real comfort from the majority's blatant disregard for the policies of Congress and the Administration.

APPENDIX A.—Hypothetical Effect of Eastern Railroads' Market Power Over Domestic Shippers on Year 2000 Steam Coal Exports to Europe Assuming a Constant Port Price for Coal

[1] Two mine mouth price/rate levels have been added in order to pin-point the profit-maximizing rate.

NOTE.—This table by National Economic Research Associates (p. 24 of Dec. 21, 1981 Verified Statement) redone assuming a multiple of 2.5 instead of 5 to compute marginal extraction cost.

such as the Railroad Freight Price Index, published by the U.S. Department of Labor's Bureau of Labor Statistics (developed by BLS in cooperation with the Commission's Office of Transportation Analysis) or the Department of Labor's Producer Price Index for Coal.

[31] The use of an index for these purposes is not new. Congress adopted a similar approach for the motor carrier zone of rate freedom [49 U.S.C. 10708(d)(3)(B)] which establishes a ratemaking ceiling for the zone based on "the percentage change in the Producers Price Index, as published by the Department of Labor, that has occurred during the one-year period prior to the effective date of the proposed rate."

[32] At the 5-digit commodity coal level, the portion of annual carloads represented by export coal is among the highest of all individual commodities. In 1981, for instance, over 93 million tons of coal were moved for export to U.S. ports, in over one million cars.

Vice Chairman Sterrett and Commissioners Andre and Gradison Commenting:

In view of the significance of this case and the fact that it will be litigated, we believe it is important to emphasize that all statutory requirements and Commission procedures have been met. A brief history may serve to clearly detail the voting and review process that was followed.

On March 3, 1983, a majority of the Commission voted to reject the draft decision which denied the petition for exemption in this proceeding. That decision was prepared and circulated at the direction of the Chairman. In making a determination whether to approve or reject the circulated draft decision, each Commissioner had the benefit of the entire record including information addressing economic, legal, regulatory and environmental issues, and each was free to vote based on his or her consideration of the evidence. However, no final vote could be taken on the exemption petition until a new decision was drafted which effectuated the Commission's determination. Thus, in response to the majority's vote, the staff prepared a new draft decision which approved the exemption petition. The environmental assessment was also expanded to provide greater detail and additional analysis. Our final decision was therefore reached on the basis of the revised draft, the expanded assessment, and the complete underlying record.

The procedure followed in preparing the final decision and environmental assessment were entirely consistent with the statutory requirements and Commission procedures and gave appropriate respect and consideration to the rights and viewpoints of all parties.

Appendix

Chapter X Title 49 of the Code of Federal Regulations is amended as follows:

PART 1039—[AMENDED]

1. Part 1039 is amended by adding a new § 1039.15 to read as follows:

§ 1039.15. Rail transportation of export coal.

Railroad transportation of export coal traffic moving through all U.S. ports, including Great Lakes ports, is exempt from the provisions of 49 U.S.C. Subtitle IV with certain exceptions. Carriers must continue to comply with Commission accounting and reporting requirements. All railroad tariffs pertaining to the transportation of export coal will no longer apply. Nothing in this exemption shall be construed to affect our jurisdiction under section 10505 or our ability to enforce this decision or any subsequent decision made under authority of this exemption section. This exemption shall remain in effect, unless modified or revoked by a subsequent order of this Commission.

(49 U.S.C. 10321(a) and 10505)

Proposed Rules

Federal Register
Vol. 48, No. 113
Friday, June 10, 1983

This section of the FEDERAL REGISTER contains notices to the public of the proposed issuance of rules and regulations. The purpose of these notices is to give interested persons an opportunity to participate in the rule making prior to the adoption of the final rules.

CIVIL AERONAUTICS BOARD

14 CFR Part 291

[EDR-462; Economic Reg. Docket 41510]

Domestic Cargo Transportation; Exemption From Tariff Filing Requirements

Dated: May 27, 1983.

AGENCY: Civil Aeronautics Board.

ACTION: Notice of proposed rulemaking.

SUMMARY: The CAB proposes to exempt carriers that engage in intra-Alaska or intra-Hawaii cargo transportation from tariff filing requirements. This rulemaking is at the CAB's initiative, and is designed to reduce the regulatory burden on domestic cargo transportation.

DATES: Comments by: August 9, 1983. Reply comments by: August 24, 1983.

Comments and other relevant information after the date will be considered by the Board only to the extent practicable.

Requests to be put on the Service List by: June 20, 1983.

The Docket Section prepares the Service List and sends it to each person listed, who then serves comments to others on the list.

ADDRESSES: Twenty copies of comments should be sent to Docket 41510, Civil Aeronautics Board, 1825 Connecticut Avenue, NW., Washington, D.C. 20428. Individuals may submit their views as consumers without filing multiple copies. Comments may be examined in Room 711, Civil Aeronautics Board, 1825 Connecticut Avenue, NW., Washington, D.C., as soon as they are received.

FOR FURTHER INFORMATION CONTACT: Joanne Yancy Hitchcock or Joseph A. Brooks, Office of the General Counsel, Civil Aeronautics Board, 1825 Connecticut Avenue, NW., Washington, D.C. 20428; 202-673-5442.

SUPPLEMENTARY INFORMATION: Air carriers are subject to the provisions of the Board's rules in 14 CFR Part 291, if they are certificated under sections 401 or 418 of the Federal Aviation Act to carry domestic cargo. The regulations that make up Part 291 are the result of a rulemaking to comply with a Congressional mandate to substantially deregulate domestic cargo transportation, as set forth in the cargo deregulation amendments, Pub. L. 95-163. In ER-1080, 43 FR 53628, November 16, 1978, adopting Part 291, the Board used its powers under section 416(b) of the Act to exempt domestic cargo carriers from the section 403 duty to file tariffs. ER-1080 does not, however, exempt carriers from the tariff filing requirement for the air transportation of property solely within the States of Alaska and Hawaii. That transportation was not otherwise deregulated by Pub. L. 95-163.

Under section 1601(a)(2) of the Act, 49 U.S.C. 1551(a)(2), the Board's authority to require tariff filing for domestic passenger transportation expired on January 1, 1983, including passenger transportation between points in Alaska and Hawaii. This change, combined with other exemptions the Board has granted from the requirement to file tariffs for domestic transportation means that the only tariff filing requirement remaining in purely domestic air transportation applies to carriers transporting property within the States of Alaska or Hawaii.

For the reasons set forth below, the Board tentatively concludes that carriers engaged in intrastate cargo transportation in Alaska or Hawaii should be exempted from the requirement of filing tariffs for that transportation.

For Federal aviation regulatory purposes, the States of Alaska and Hawaii have generally been treated as unique. Geographic isolation, lack of competition when compared to the other 48 States, and thin markets with long distance conditions have traditionally contributed to their different status in the regulatory scheme. The Board now believes that it is no longer necessary to treat cargo air transportation in these States differently from that in the rest of the States or U.S. possessions with respect to tariff filing. The Board believes that experience in other similar areas has shown that those factors do not require the filing of tariffs to achieve remaining Federal regulatory purposes. In fact, tariff filing may now be inhibiting those purposes.

At present, tariffs that contain changes in prices or practices must be filed at the Board in advance of their effective date. Tariff filing thus limits the ability of the filing carriers to respond quickly and effectively to changes in market conditions, and so hinders competition.

In addition, the costs and procedural requirements for numerous tariff filings discourage the testing of new marketing ideas, and tend to promote the use of the complicated tariffs filed at the Board as the major means of disseminating information to shippers on pricing and conditions of carriage. The tariff filing requirement is not the only means of informing shippers or other interested parties of changes in price or conditions of carriage, however. Carriers now distribute rate sheets informally to shippers in an easy-to-read format, and this practice could easily fulfill the need for information, as it does in the 48 contiguous States. The Board's experience with air taxi operators who have been exempt from tariff filing for interstate passenger transportation within those States indicates that there is sufficient economic incentive to ensure adequate communication of information on prices and rules to users.

The filing of tariffs containing rules of carriage allows carriers to incorporate all of those rules into the contract waybill with little input from shippers. Supervision by a distant government agency is no substitute for knowledgeable shippers insisting on proper notice in the contract of reasonable rules of carriage. Without required tariff filing, shippers will have a more immediate, more local, and less costly forum for complaints in the local court system.

Although carrier entry into Alaska and Hawaii for purposes of domestic all-cargo transportation has been somewhat limited, the board has adopted a permissive entry policy for scheduled cargo service, and is currently reviewing the situation to ascertain whether some or all of the restrictions on cargo charter entry in these States should be removed. The elimination of the tariff filing requirement for interstate air transportation of property between points in Alaska or Hawaii would add to the process of placing cargo air transportation on a more equal footing

with such air transportation in the other States and U.S. possessions.

The Board will retain the authority to obtain rates and rules information, if necessary, under section 407 of the Act, 49 U.S.C. 1377, thus giving the board the means to enforce its remaining regulatory responsibilities and, if necessary, to monitor the effect of this exemption on shippers, carriers, and the public.

Initial Regulatory Flexibility Act Analysis

The Regulatory Flexibility Act, Pub. L. 96-354, is designed to insure that agencies consider flexible approaches to the regulation of small businesses and other small entities defined in the Act. It requires a regulatory flexibility analysis for a rule that, if adopted, will have a "significant economic impact on a substantial number of small entities."

The analysis is required to describe the need, objectives and legal rationale for, and flexible alternatives to the action proposed here. The need, objectives and the legal rationale for this proposed rule are discussed in this notice of proposed rulemaking. This rule is designed to complete the process of eliminating the tariff filing requirement in domestic air transportation. This rule would also, if adopted as proposed, reduce government-required administrative costs of a large number of small air carriers that are currently required to file tariffs at the Board for intrastate cargo transportation in Alaska and Hawaii, by eliminating the tariff filing requirement. There are two alternatives that Board action could take. Both of these alternatives—retain tariff requirements, or eliminate them—are discussed above.

List of Subjects in 14 CFR Part 291

Air carriers, Antitrust, Freight, Insurance, Reporting and recordkeeping requirements.

PART 291—[AMENDED]

Accordingly, the Civil Aeronautics Board proposes to amend 14 CFR Part 291, *Domestic Cargo Transportation*, as follows:

Section 291.31(a) introductory text and (1) would be revised to read:

§ 291.31 Exemptions from the Act for direct air carriers.

(a) Each direct air carrier providing domestic cargo transportation is, with respect to such transportation, exempted from the following section or subsection of the Act only if and so long as it complies with the provisions of this part and the conditions imposed herein, and to the extent necessary to permit it to conduct domestic transportation operations.

(1) Section 403.

* * * * *

(Secs. 102, 204, 401, 407, 408, 416, and 418, Pub. L. 85-726, as amended, 72 Stat. 740, 743, 754, 766, 767, 771; 91 Stat. 1284; 49 U.S.C. 1302, 1324, 1371, 1377, 1378, 1386, and 1388)

By the Civil Aeronautics Board.

Phyllis T. Kaylor,

Secretary.

BILLING CODE 6320-01-M

DEPARTMENT OF ENERGY

Federal Energy Regulatory Commission

18 CFR Part 35

[Docket No. RM83-62-000]

Treatment of Purchased Power in the Fuel Cost Adjustment Clause for Electric Utilities; Extension of Time for Comments

June 3, 1983.

AGENCY: Federal Energy Regulatory Commission, DOE

ACTION: Notice of proposed rulemaking; extension of comment period.

SUMMARY: On May 3, 1983, the Commission issued a Notice of Proposed Rulemaking involving the treatment of purchased power in the fuel cost adjustment clause for electric utilities (48 FR 21161, May 11, 1983). The comment period is being extended at the request of Virginia Electric and Power Company.

DATES: Comments must be submitted on or before June 24, 1983. Reply comments must be submitted on or before July 25, 1983.

ADDRESS: Submit comments to: Office of the Secretary, Federal Energy Regulatory Commission, 825 North Capitol Street, NE., Washington, D.C. 20426.

FOR FURTHER INFORMATION CONTACT: Kenneth F. Plumb, Secretary, (202) 357-8400.

SUPPLEMENTARY INFORMATION:

In the matter of treatment of purchased power in the fuel cost adjustment clause for electric utilities, extension of time; Docket No. RM83-62-000.

On May 28, 1983, Virginia Electric and Power Company (VEPCO) filed a motion for an extension of time to file comments in response to the Commission's Notice of Proposed Rulemaking issued May 3, 1983, in the above-docketed proceeding. The motion states that VEPCO requires additional time in order to compile relevant data and to coordinate the preparation of the company's comments. The motion further states that additional time is needed because of the press of other business involving VEPCO officials and counsel for the company.

Upon consideration, notice is hereby given that an extension of time for the filing of comments is granted to and including June 24, 1983. Reply comments shall be filed on or before July 25, 1983.

Kenneth F. Plumb,

Secretary.

BILLING CODE 6717-01-M

DEPARTMENT OF THE TREASURY

Customs Service

19 CFR Ch. I

General Notice of Review of the Customs Regulations

AGENCY: U.S. Customs Service, Treasury.

ACTION: Proposed rule related notice.

SUMMARY: In compliance with the Regulatory Flexibility Act, which requires the periodic review of existing regulations having a significant economic impact on a substantial number of small entities, and as part of its continuing efforts to reduce or eliminate obsolete or burdensome regulatory requirements, Customs is planning further revisions of its regulations. In 1973, Customs undertook the massive task of revising its regulations. Since the project was instituted, many portions of the regulations have been revised. An updated plan has now been implemented to review, and possibly revise other parts of the regulations on an expedited basis.

The document sets forth the parts of the regulations now being considered for revision and invites written comments on the project. After consideration of any comments received and further review of the matter, notices will be prepared for publication requesting comments on specific proposed regulation changes.

DATE: Comments must be received on or before August 9, 1983.

ADDRESS: Comments (preferably in triplicate) should be addressed to the Commissioner of Customs, Attention: Regulations Control Branch, U.S. Customs Service, 1301 Constitution

Avenue, NW., Room 2426, Washington, D.C. 20229.

FOR FURTHER INFORMATION CONTACT: Marvin M. Amernick, Regulations Control Branch, U.S. Customs Service, Washington, D.C. 20229 (202–566–8237).

SUPPLEMENTARY INFORMATION: .

Background

As part of a continuing project instituted in 1973, all, or portions of 16 parts of the Customs Regulations (19 CFR Chapter I), have been revised. An updated plan has now been implemented to review, and possibly revise, all or portions of 17 parts of the regulations on an expedited basis. Task forces made up of representatives of various Customs offices having operational and/or legal responsibility for various subject areas of the regulations are now doing a preliminary review of substantial portions of the existing regulations. The aim of this review is to identify those regulations having a significant economic impact on a substantial number of small entities and to seek ways of modifying procedures to reduce or eliminate obsolete or burdensome regulatory requirements. Another goal of this review, which is in compliance with the Regulatory Flexibility Act (5 U.S.C. 601), will be to make non-substantive changes to insure that the regulations are written in easily understood "plain English."

To assist Customs in this review, written comments are invited on any aspect of the project. After consideration of any comments received in response to this notice, and after further review of the matter, notices of proposed rulemaking will be published in the **Federal Register** and Customs Bulletin requesting comments on specific proposed regulatory changes.

The initial five task force areas being reviewed are as follows:

Task force area	Part No.	Title
I	Part 4	Vessels in Foreign and Domestic Trades.
	Part 6	Air Commerce Regulations.
II	Part 10	Articles Conditionally Free, Subject to a Reduced rate, etc.
	Part 54	Certain Importations Temporarily Free of Duty.
	Part 158	Relief from Duties on Merchandise Lost, Damaged, Abandoned, or Exported.
	Part 159	Liquidation of Duties.
III	Part 161	General Enforcement Provisions.
	Part 162	Recordkeeping, Inspection, Search, and Seizure.
	Part 171	Fines, Penalties, and Forfeitures.
	Part 172	Liquidated Damages.
IV	Part 173	Administrative Review in General.
	Part 174	Protests.
	Part 175	Petitions by Domestic Interested Parties.
	Part 177	Administrative Rulings.
V	Part 11	Packing and Stamping; Marking.
	Part 133	Trademarks, Trade Names, and Copyrights.
	Part 134	Country of Origin Marking.

Comments

Before proceeding to a notice of proposed rulemaking on this proposal, consideration will be given to any written comments, preferably in triplicate, that are submitted timely to the Commissioner of Customs. Comments submitted will be available for public inspection in accordance with § 103.11(b), Customs Regulations (19 CFR 103.11(b)), on regular business days between the hours of 9:00 a.m. and 4:30 p.m. at the Regulations Control Branch, Room 2426, Headquarters, U.S. Customs Service, 1301 Constitution Avenue, NW., Washington, D.C. 20229.

Authority

This document is issued under the authority of R.S. 251, as amended (19 U.S.C. 66), and section 623, as amended, 624, 46 Stat. 759 (19 U.S.C. 1623, 1624).

Drafting Information

The principal author of this document was John E. Elkins, Regulations Control Branch, Office of Regulations and Rulings, U.S. Customs Service. However, personnel from other Customs offices participated in its development.

William von Raab,
Commissioner of Customs.

Approved: May 26, 1983.

John M. Walker, Jr.,
Assistant Secretary of the Treasury.

19 CFR Part 123

Withdrawal of Proposal To Abolish Customs Form 7533

AGENCY: Customs Service, Treasury.

ACTION: Withdrawal of proposed rule.

SUMMARY: This document withdraws a proposal to abolish present Customs Form 7533 (Inward Cargo Manifest for Vessel Under Five Tons, Ferry, Train, Car, Vehicle, Etc.) and develop a new standardized manifest to be used in its place. After careful consideration of the comments received in response to the proposal, and further review of the matter, it was found that there was no need for the change. Accordingly, Customs has determined to: (1) Retain the use of Customs Form 7533; (2) continue the practice of allowing carriers to develop their own version of the form; and (3) authorize rail carriers to use a computer printout which shows the required entry information and attach it to an approved Customs Form 7533.

DATE: Withdrawal is effective on June 10, 1983.

FOR FURTHER INFORMATION CONTACT: Patricia Anson, Cargo Processing Division, Office of Inspection and Control, U.S. Customs Service, 1301 Constitution Avenue NW., Washington, D.C. 20229 (202–566–5354).

SUPPLEMENTARY INFORMATION:

Background

Section 123.3, Customs Regulations (19 CFR 123.3), requires that baggage or other merchandise carried on a vehicle or on a vessel of less than 5 net tons arriving otherwise than by sea from Canada or Mexico be listed on a manifest as prescribed by § 123.4, Customs Regulations (19 CFR 123.4). With certain exceptions, section 123.4 provides that the inward foreign manifest required by section 123.3 for a vehicle or vessel of less than 5 net tons arriving in the United States from Canada or Mexico otherwise than by sea with baggage or merchandise, shall be on Customs Form 7533.

For many years Customs has permitted individual carriers to develop their own version of Customs Form 7533 recognizing that each mode of transportation has specific documentation requirements. As a result, there are about 200 versions of this form in use today so that two shipments from the same exporter to the same importer but shipped by different carriers generally would not be on the same documents. This lack of uniformity and standardization in manifest documentation reportedly presented problems for exporters who wish to computerize their operations, as well as for Customs in processing these entries.

Accordingly, to eliminate these problems and facilitate the processing of entries from contiguous countries, by notice published in the **Federal Register** on April 21, 1982 (47 FR 17072), Customs proposed to abolish present Customs Form 7533 and develop a new standardized manifest to be used in its place. To ensure that the new manifest would meet the special needs of each type of carrier, could be easily computerized, and yet cause the least disruption to industry, before taking any final action Customs solicited public comments on its suggested format, and the effect of the elimination of present Customs Form 7533. Comments were to have been received on or before June 21,

1982. However, in response to a request from a railroad association, by notice published in the **Federal Register** on July 22, 1982 (47 FR 31708), the period of time for the submission of comments was extended to August 21, 1982.

Discussion of Comments

Seven of the eight comments received in response to the notice indicated that the commenters were generally satisfied with present Customs Form 7533 and wanted it to be retained. Two of these commenters proposed a new manifest substantially similar to the present one with minor changes to accommodate their particular needs. One commenter suggested that the manifest be eliminated entirely. However, he had no thoughts on the development of a new one.

Another commenter, representing a rail carrier, wanted to introduce the use of a computer printout which shows the required entry information in lieu of the manifest. According to this commenter, the use of a printout would reduce its operating costs, expedite the movement of its trains, eliminate the incidents of lost manifests, and reduce paper handling. Customs has determined that this procedure would not be acceptable because the use of Customs Form 7533 is required by law and regulation. However, rail carriers and freight forwarders, after obtaining approval from the district directors of Customs, could use a computer printout which shows the required information and attach it to an approved Customs Form 7533.

Comments on the proposal were also solicited from Customs regional offices. It was determined that they were not experiencing operational control problems because of the wide variance in manifest documentation; nor were there complaints from carriers about lack of uniformity and standardization in Customs manifest requirements.

After careful consideration of the comments received, and further review of the matter, Customs has determined to retain the use of Customs Form 7533 and continue the practice of allowing carriers to develop their own version, subject to prior approval from Customs. Accordingly, the proposal is withdrawn.

Drafting Information

The principal author of this document was Jesse V. Vitello, Regulations Control Branch, Office of Regulations and Rulings, U.S. Customs Service. However, personnel from other Customs offices participated in its development.

Approved May 26, 1983.

Alfred R. De Angelus,

Acting Commissioner of Customs.

John M. Walker, Jr.,

Assistant Secretary of the Treasury.

19 CFR Part 175

Receipt of Domestic Interested Party Petition Concerning Tariff Classification of Total Milk Proteinate, Whey Protein Concentrate, and Lactalbumin

AGENCY: Customs Service, Treasury.

ACTION: Notice of receipt of domestic interested party petition.

SUMMARY: Customs has received a petition submitted on behalf of two domestic interested parties, requesting that total milk proteinate, whey protein concentrate, and lactalbumin be classified for tariff purposes under different provisions of the Tariff Schedules of the United States than they are currently classified. In general, the classifications which the petitioners assert are correct are subject to quota restraints, while the current classifications are free of quota restraints. This document invites comments with respect to the correctness of the current classification.

DATE: Comments must be received on or before August 9, 1983.

ADDRESS: Comments (preferably intriplicate) may be submitted to the Commissioner of Customs, Attention: Regulations Control Branch, Room 2426, 1301 Constitution Avenue, NW., Washington, D.C. 20229.

FOR FURTHER INFORMATION CONTACT: Lee C. Seligman, Classification and Value Division, U.S. Customs Service, 1301 Constitution Avenue, NW., Washington, D.C. 20229 (202) 566-8161.

SUPPLEMENTARY INFORMATION:

Background

A petition has been filed pursuant to section 516, Tariff Act of 1930, as amended (19 U.S.C. 1516), on behalf of two domestic interested parties, requesting that total milk proteinate, whey protein concentrate, and lactalbumin be classified for tariff purposes under different provisions of the Tariff Schedules of the United States (TSUS; 19 U.S.C. 1202) than they are currently classified. In general, the classifications which the petitioners assert are correct are subject to quota restraints, while the current classifications are free of quota restraints.

The petitioners contend that total milk proteinate, which is currently classified under the provision for "casein and mixtures in chief value thereof: other" in item 493.17, TSUS, is properly classifiable under the provision for "malted milk; and articles not specially provided for, of milk or cream" in item 118.30, TSUS. This contention is made on the bases that: the product is derived from skim milk; it is suitable for use for the same purposes as nonfat dry milk and related products; and it contains a substantial percentage of albumin, which should be present in products properly classified as "caseins."

The petitioners assert that whey protein concentrate and lactalbumin are properly classifiable in items 118.00 or 118.05, TSUS, under the provisions for fluid and dried wheys, because they are modified whey products. Whey protein concentrate is currently classified in item 182.92, 183.00, or 183.05, TSUS. Lactalbumin is currently classifed under the provision for "albumen, not specially provided for: other" in item 180.15, TSUS.

Comments

Pursuant to § 175.21(a), Customs Regulations (19 CFR 175.21(a)), before making a determination on this matter, Customs invites written comments from interested parties on the correctness of Customs classification.

The domestic party petition, as well as all comments received in response to this notice, will be available for public inspection in accordance with section 103.11(b), Customs Regulations (19 CFR 103.11(b)), between the hours of 9:00 a.m. and 4:30 p.m. on normal business days, at the Regulations Control Branch, U.S. Customs Service, 1301 Constitution Avenue, NW., Washingon, D.C. 20229.

Authority

This notice is published in accordance with § 175.21(a), Customs Regulations (19 CFR 175.21(a)).

Drafting Information

The principal author of this document was Gerard J. O'Brien, Jr., Regulations Control Branch, U.S. Customs Service. However, personnel from other Customs offices participated in its development.

Dated: June 3, 1983.

Donald W. Lewis,

Acting Director, Office of Regulations and Rulings.

BILLING CODE 4820-02-M

DEPARTMENT OF STATE

22 CFR Part 11

[Docket No. SD-183]

Appointment of Members of the Foreign Service

AGENCY: Department of State.

ACTION: Proposed rule.

SUMMARY: The Department of State, with the concurrence of the Departments of Agriculture and Commerce, the Agency for International Development, and the United States Information Agency, proposes to amend its regulations governing the appointment of members of the Foreign Service to add a new § 11.30 relative to the appointment of Senior Foreign Service Officer Career Candidates.

DATE: Written comments, to be assured of consideration, must be received no later than July 11, 1983.

ADDRESS: Written comments should be sent to Frontis B. Wiggins, Executive Director, Board of Examiners, Office of Recruitment, Examination, and Employment, Department of State, Washington, D.C. 20520.

FOR FURTHER INFORMATION CONTACT: Frontis B. Wiggins, Board of Examiners, Department of State, Washington, D.C. 20520, (703) 235-9232.

SUPPLEMENTARY INFORMATION: Section 101(b)(7) of the Foreign Service Act of 1980 (Pub. L. 96-465) established a Senior Foreign Service, characterized by strong policy formulation capabilities, outstanding executive leadership qualities, and highly developed functional, foreign language, and area expertise.

This proposed new subpart would provide the procedures to establish the eligibility of candidates for the Senior Foreign Service Career Candidate Program, the competitive requirements for that program, and the terms and conditions of appointment for successful candidates. It also would provide procedures for making limited non-career Senior Foreign Service Officer appointments.

The proposed program would supplement the Junior, Mid-Level, and Specialist Foreign Service Career Candidate Programs (or similar department/agency programs) to meet identified Senior Foreign Service officer needs which cannot otherwise be met from within the ranks of the career Foreign Service.

E.O. 12291, Federal Regulation

The Department of State has determined that this is not a major rule for the purposes of E.O. 12291, Federal Regulation, because it will not result in:

(1) An annual effect on the economy of $100 million or more;

(2) A major increase in costs or prices for consumers, individual industries, Federal, State, or local government agencies, or geographic regions; or

(3) Significant adverse effects on competition, employment, investment, productivity, innovation, or on the ability of United States-based enterprises to compete with foreign based enterprises in domestic or export markets.

In addition, this rule relates solely to agency personnel and falls under section (1)(a)(3) of E.O. 12291.

List of Subjects in 22 CFR Part 11

Foreign service.

PART 11—[AMENDED]

Accordingly, under the authority of sections 206(a) and 301(b) of the Foreign Service Act of 1980 (secs. 206(a) and 301(b), Pub. L. 96-465, 94 Stat. 2079 and 2083 (22 U.S.C. 3926 and 3941)), 22 CFR Part 11 is amended by adding § 11.30 to read as follows:

§ 11.30 Senior Foreign Service Officer career candidate appointments.

(a) *General considerations.* (1) Career officers at the Senior Level normally shall be appointed as the result of promotion of Mid-Level career officers. Where the needs of the Foreign Service at the Senior Level cannot othewise be met by this approach, limited appointments may be granted to applicants as Senior Career Candidates or as limited non-career appointees in accordance with these regulations. However, as required by section 305(b) of the Foreign Service Act of 1980 (hereinafter referred to as the Act), but qualified by sections 305(b) (1) and (2) and section 2403(c) of the Act, the limited appointment of an individual in the Senior Foreign Service shall not cause the number of members of the Senior Foreign Service serving under limited appointments to exceed 5 percent of the total members of the Senior Foreign Service.

(2) Successful applicants under the Senior Career Candidate Program will be appointed to Career Candidate status for a period not to exceed 5 years. Such limited Career Candidate appointments may not be renewed or extended beyond 5 years.

(3) In accordance with section 306 of the Act, Senior Career Candidates may be found qualified to become career members of the Senior Foreign Service. Those who are not found to be so qualified prior to the expiration of their limited appointments will be separated from the Career Candidate Program no later than the expiration date of their appointments. Separated candidates who originally were employees of a Federal department or agency, and who were appointed to the Senior Foreign Service with the consent of the head of that department or agency, will be entitled to reemployment rights in that department or agency in accordance with section 110 of the Act and section 3597 of title 5, United States Code.

(4) The following regulations shall be utilized in conjunction with section 593, Volume 3, Foreign Affairs Manual ("Senior Foreign Service Officer Career Candidate Program"). (Also see Foreign Affairs Manual Circulars No. 8 [applicable to the Department of State only] and No. 9 [applicable to the Departments of State, Agriculture, and Commerce, the Agency for International Development, and the United States Information Agency], dated March 6, 1981.)

(b) *Senior Career Candidate appointments.*—(1) *Eligibility requirements.* Senior Career Candidates must meet the following eligibility requirements:

(i) *Citizenship.* Each person appointed as a Senior Career Candidate must be a citizen of the United States.

(ii) *Age.* All career candidate appointments shall be made before the candidate's 60th birthday. The maximum age for appointment under this program is based on the requirement that all career candidates shall be able to: (A) Complete at least two full tours of duty, exclusive of orientation and training; (B) complete the requisite eligibility period for tenure consideration; and (C) complete the requisite eligibility period to receive retirement benefits, prior to reaching the mandatory retirement age of 65 prescribed by the Act.

(iii) *Service.* (A) On the date of application, an applicant must have completed a minimum of 15 years of professional work experience, including at least 5 years of service in a position of responsibility in a Federal Government agency or agencies or elsewhere equivalent to that of a Mid-Level Foreign Service officers (classes FS-1 through FS-3). The duties and responsibilities of the position occupied by the applicant must have been similar to or closely related to that of a Foreign Service officer in terms of knowledge, skills, abilities, and overseas work experience. In addition, an applicant must currently be in, or have been in, a position comparable to a Foreign

Service officer of class 1 (FS–1), or higher.

(B) Applicants from outside the Federal Government, and Federal employees who at the time of application lack the 15 years of professional work experience or the 5 years of service in a position of responsibility as defined in the preceding paragraph, may, however, be considered if they are found to possess a combination of educational background, professional work experience, and skills needed by the Foreign Service at the Senior Level in employment categories which normally are not staffed by promotion of Mid-Level career officers.

(C) Non-career members of the Senior Foreign Service of a Federal Government department or agency also may apply for the Senior Career Candidate Program if they meet the eligibility requirements for the program.

(iv) *Certification of need.* Before an application can be processed, the Director of Personnel of the foreign affairs agency concerned must certify that there is a need for the applicant as a Senior Career Candidate based upon (A) the projections of personnel flows and needs mandated by section 6701(c)(2) of the Act, and (B) a finding that the combination of educational background, professional work experience, and skills possessed by the applicant is not expected to be available in the immediate future in sufficient numbers within the Senior Foreign Service, including by promotion and/or special training of career personnel. This certification of need will be requested by the Board of Examiners for the Foreign Service from the appropriate foreign affairs agency Director of Personnel.

(2) *Application.* All applicants for the Senior Career Candidate Program must apply in writing through the prospective employing agency to the Board of Examiners for consideration. The applicant shall submit a completed Standard Form 171, "Personnel Qualifications Statement," and Form DSP–34, "Supplement to Application for Federal Employment," to the Board. In addition, the applicant shall submit a narrative statement, not exceeding four typewritten pages in length, describing the applicant's pertinent background and professional work experience, which includes a statement of the applicant's willingness and ability to accept the obligation of worldwide service. The Board may request additional written information from the applicant following receipt of the initial application.

(3) *Qualifications evaluation panel.* (i) The Board of Examiners will establish a file for each applicant, placing in it all available documentation of value in evaluating the applicant's potential for service as a Senior Career Candidate. For an applicant from within the Federal Government, this will include the personnel file from the employing department or agency.

(ii) The complete file will be reviewed by a Qualifications Evaluation Panel of the Board of Examiners to determine whether the applicant meets the statutory and other eligibility requirements, to assess the applicant's skills in accordance with the certification of need issued by the prospective employing agency, and to recommend whether the applicant should be examined for possible appointment as a Senior Career Candidate. If the Qualifications Evaluation Panel decides that the applicant is not eligible for examination, the prospective employing agency shall be informed by the Board of the reasons for that decision.

(4) *Written examination.* The Board of Examiners normally will not require Senior Career Candidate applicants to undergo a written examination. However, the Board may, upon securing the agreement of the prospective employing agency, decide that such applicants should be required to take an appropriate written examination prescribed by the Board. If so, an applicant whose score on the written examination is at or above the passing level set by the Board will be eligible for selection for the oral examination.

(5) *Oral examination.* (i) *Examining panel.* Applicants recommended by the Qualifications Evaluation Panel will be given an appropriate oral examination by a Panel of Senior Foreign Service deputy examiners of the Board of Examiners. The Oral Examining Panel shall be composed of at least two deputy examiners who are Senior Foreign Service career officers of the prospective employing agency, and at least one deputy examiner who is a Senior Foreign Service career officer from another foreign affairs agency operating under the Foreign Service Act. The Examining Panel shall be chaired by a deputy examiner who is a Senior Foreign Service career officer of the prospective employing agency. At least one of the Examining Panel members shall represent the functional or specialist field for which the applicant is being examined. Determinations of duly constituted panels of deputy examiners are final, unless modified by specific action of the Board of Examiners.

(ii) *Criteria.* (A) The Examining Panel will question the applicant regarding the indicated functional or specialist field and other matters relevant to the applicant's qualifications for appointment as a Senior Career Candidate. Prior to the oral examination, the applicant will be asked to write an essay, on a topic related to Foreign Service work, to enable the Examining Panel to judge the applicant's effectiveness of written expression. This essay requirement may be waived at the request of the head of the prospective employing agency, if, for example, the applicant is a career member of the Senior Executive Service.

(B) The oral examination will be conducted in accordance with written criteria, established in consultation with the prospective employing agency and publicly announced by the Board of Examiners. The examination will seek to determine the ability of the applicant to meet the objective of section 101 of the Act, which provides for a Senior Foreign Service "characterized by strong policy formulation capabilities, outstanding executive leadership qualities, and highly developed functional, foreign language, and area expertise."

(iii) *Grading.* Applicants taking the oral examination will be graded as "recommended," or "not recommended" by the Examining Panel. Those graded as "recommended" also will be given a numerical score, in accordance with the standard Board of Examiners scoring criteria, for use by the Final Review Panel.

(6) *Background investigation.* Senior Career Candidate applicants recommended by the Examining Panel will be subject to the same background investigation as required for Junior and Mid-Level Foreign Service Officer Career Candidates. The background investigation shall be conducted to determine suitability for appointment to the Foreign Service.

(7) *Medical examination.* Senior Career Candidate applicants recommended by the Examining Panel, and their dependents, will be subject to the same medical examination as required for the Junior and Mid-Level Foreign Service Career Candidates. The medical examination shall be conducted to determine the applicant's physical fitness to perform the duties of a Foreign Service officer on a world-wide basis and, for applicants and dependents, to determine the presence of any physical, neurological, or mental condition of such a nature as to make it unlikely that they would be able to function on a world-wide basis. Applicants and/or dependents who do not meet the required medical standards may be given further consideration, as appropriate, in accordance with the

procedures of the prospective employing agency.

(8) *Foreign language requirement.* Applicants recommended by the Examining Panel will be required to take a subsequent examination to measure their fluency in foreign languages, and/or their aptitude for learning them. Senior Career Candidates will be subject to the foreign language requirements established for their occupational category by their prospective employing agency. Senior Career Candidate applicants for the Foreign Commercial Service must demonstrate proficiency by examination in two foreign languages. United States Information Agency Senior Career Candidates, other than Senior Specialist Career Candidates, must demonstrate proficiency in at least one foreign language. Except for the Foreign Commercial Service and the United States Information Agency, an applicant may be appointed without first having passed an examination in a foreign language, but the appointed Senior Career Candidate may not be commissioned as a Career Senior Foreign Service officer unless adequate proficiency in a foreign language is achieved. This language requirement will not apply to candidates in occupational categories which, in the judgment of the prospective employing agency, do not require foreign language proficiency.

(9) *Final review panel.* (i) The entire file of an applicant recommended by the Examining Panel will be reviewed and graded by a Final Review Panel, after the results of the background investigation, medical examination and language examination are received. The Final Review Panel will decide whether or not to recommend the applicant for appointment, taking into account all of the available information concerning the applicant.

(ii) The Final Review Panel shall consist of a chairperson who shall be a Deputy Examiner who is a career Senior Foreign Service officer of the prospective employing agency, and at least two other Deputy Examiners of the Board of Examiners. Of the Deputy Examiners serving on the Final Review Panel, the majority shall be career Senior Foreign Service officers of the prospective employing agency; and at least one shall be a career Senior Foreign Service officer of one of the other foreign affairs agencies operating under the Act.

(10) *Certification of appointment.* The file of an applicant recommended by the Final Review Panel will be submitted to the Board of Examiners for consideration and approval. An applicant found by the Board to meet the standards for appointment as a Senior Foreign Service Career Candidate shall be so certified to the Director of Personnel of the prospective employing agency.

(c) *Limited non-career appointments.* (1) Other Senior Foreign Service appointments may be made on a limited non-career basis for individuals who do not wish to compete for career appointments, but for whom a need can be certified by the Director of Personnel of the foreign affairs agency concerned. Such limited non-career senior appointees will be subject to the eligibility requirements set forth in § 11.30(b)(1) (i) and (iv). The maximum age set forth in § 11.30(b)(1)(ii) does not apply to such appointments. However, because Foreign Service members generally are subject to the mandatory retirement age of 65, in accordance with section 812 of the Act, limited non-career Senior appointments normally will not extend beyond the appointee's 65th birthday. Limited non-career appointees of the Department of Commerce and the United States Information Agency will not be subject to the language requirements of § 11.30(b)(8). Applicants for limited non-career senior appointments will be subject to the same background investigation and medical examination required of career candidates, but normally they will not be subject to a written or oral examination, or to approval by the Board of Examiners. Processing procedures for such applicants will be established by the Director of Personnel of the foreign affairs agency concerned. Their appointments normally will be limited to the duration of the specific assignments for which they are to be hired, may not exceed 5 years in duration, and may not be renewed or extended beyond 5 years.

(2) Prior to the expiration of their limited noncareer senior appointments, if they meet all the eligibility requirements set forth in § 11.30(b)(1), such individuals may elect to compete for career candidate status in the Senior Foreign Service by qualifying at that time for and taking the examinations required of career candidates. If appointed as career candidates, the length of service under their previous limited non-career appointments may be counted in accordance with the procedures of the employing agency as part of the trial period of service prescribed before a career candidate can receive a career appointment. The total period of limited appointment (non-career and career candidate) of such individuals may not exceed 5 years in duration.

(3) Nothing in this section will limit the right of an individual who has previously served as a limited noncareer senior appointee from subsequently applying for consideration as a new applicant and being appointed as a Senior Career Candidate after a limited non-career appointment has expired.

(d) *Reporting requirement.* The Director of Personnel of each foreign affairs agency shall report annually to the Director General of the Foreign Service, Department of State, the number and nature of the limited Senior Foreign Service appointments (non-career and career candidates) made by that agency in accordance with these regulations.

April 28, 1983.

Arlene Triplett,

29 CFR Part 1952

[Docket No. T-2]

Virgin Islands State Plan; Change of Location of Informal Public Hearing

AGENCY: Occupational Safety and Health Administration (OSHA), Labor.

ACTION: Change of location of informal public hearing.

SUMMARY: On May 6, 1983, OSHA published a notice in the **Federal Register** (48 FR 20434) requesting comments and scheduling an informal public hearing on whether final approval on the Virgin Islands State plan should be granted. A change in the availability of the announced hearing room has

occurred since that date. In view of this new information, OSHA has relocated the public hearing but has retained the same date, June 29, 1983.

DATE: The informal public hearing is now scheduled as follows: June 29, 1983: Virgin Islands Legislature, Conference Room, Veteran's Drive, Charlotte Amalie, St. Thomas, Virgin Islands. The hearing will begin at 9:30 a.m.

FOR FURTHER INFORMATION CONTACT: James Foster, Director, Office of Information and Consumer Affairs, Occupational Safety and Health Administration, U.S. Department of Labor, Room N–3637, 200 Constitution Avenue, NW., Washington, D.C. 20210, telephone (202) 523–8148.

Anyone who has not yet submitted a notice of intention to appear, and wishes to schedule an appearance now, may call Mr. Tom Hall, OSHA Office of Consumer Affairs, (202) 523–8024. Advance notice is preferred, although not required.

This document was prepared under the direction of Thorne G. Auchter, Assistant Secretary of Labor for Occupational Safety and Health, U.S. Department of Labor, 200 Constitution Avenue, NW., Washington, D.C. 20210.

(Sec. 18, 84 Stat. 1608 (29 U.S.C. 667); 29 CFR Part 1902, Secretary of Labor's Order No. 8–76 (41 FR 25059))

Signed at Washington, D.C. this 6th day of June, 1983.

Thorne G. Auchter,

Assistant Secretary of Labor.

BILLING CODE 4510–26–M

DEPARTMENT OF THE INTERIOR

Minerals Management Service

30 CFR Part 250

Oil and Gas and Sulfur Operations in the Outer Continental Shelf

AGENCY: Minerals Management Service, Interior.

ACTION: Notice of proposed rulemaking.

SUMMARY: This proposed revision to the rules would provide an exemption from air quality review for Outer Continental Shelf (OCS) oil and gas facilities which are located more than 20 miles from shore for exploration activities and more than 50 miles from shore for development or production activities. Lessees would not be required to provide emissions information for such facilities. The Minerals Management Service is issuing this document as a part of the Department of the Interior's effort to review current regulations and amend any requirements that are found to be excessive, burdensome, or counterproductive.

DATE: Written comments and recommendations on this proposal to amend 30 CFR 250.57 must be delivered or postmarked by July 11, 1983.

ADDRESSES: Comments and recommendations may be mailed to Mr. David A. Schuenke, Offshore Rules and Operations Division, Mail Stop 646, Room 6A110, Minerals Management Service, U.S. Department of the Interior, 12203 Sunrise Valley Drive, Reston, Virginia 22091.

FOR FURTHER INFORMATION CONTACT: David A. Schuenke, telephone (703) 860–7916, (FTS) 928–7916.

SUPPLEMENTARY INFORMATION:

Background

The proposed rulemaking is part of a larger effort by the Department of the Interior to review current regulations and amend those requirements found to be excessive, burdensome, or counterproductive. The policy of the Department of the Interior, whenever practicable, is to afford the public an opportunity to participate in the rulemaking process. Accordingly, interested persons may submit comments, suggestions, or objections regarding the proposed rule to the location in the Addresses section of this preamble. Comments are specifically solicited on 30 CFR 250.57 concerning air quality.

Discussion of Changes

Current regulations implementing section 5(a)(8) of the OCS Lands Act, concerning air emissions from oil and gas operations on the OCS, effective June 2, 1980, were designed to ensure that air emissions from OCS facilities do not cause significant adverse effects on the onshore air quality of a State. The regulatory program provides for three steps for each air pollutant. The first two steps are screening procedures to determine whether emissions of an air pollutant from an OCS facility would significantly affect the onshore air quality of a State. The third step, if necessary, determines what measures a lessee must take to mitigate the impact of the emissions of an air pollutant which causes a significant effect.

Based on the review of facilities during the time since the rules became effective, the Minerals Management Service (MMS) has gathered information on the air pollutants emitted from OCS facilities. We have attempted to identify a distance from shore beyond which the largest and potentially most polluting facility practical for operation on the OCS would not adversely affect the onshore air quality. The proposal would exempt facilities located on the OCS beyond that distance from air emissions reporting and control otherwise required by the regulations.

The MMS proposal is premised on the requirement that OCS facilities do not significantly affect the onshore air quality, and accordingly, the distance from shore in the proposal reflects that requirement. We believe that few, if any, facilities located on the OCS beyond that distance would be likely to cause a significant impact onshore. The term significant impact refers to the significance levels as defined in 30 CFR 250.57–1(e).

It should be noted that the distance exemption of this proposal is intended to operate as a screen. It is anticipated that there will be facilities closer to shore that will be exempt under the current exemption formula using emission levels and distance factors.

The proposed distance-from-shore exemption is based on the existing exemption formula of 30 CFR 250.57–1(d) in which "E" (emissions in tons per year)=33.3D (distance from shore in statute miles) and also reflects consideration of the pollutant emitted from OCS facilities, nitrogen oxides (NO_x), that is most likely to cause a significant impact.

In formulating the proposal for facilities described in exploration plans, emissions were estimated as emanating from a large dynamically-positioned drill ship as outlined in the May 1979 Radian Corporation study (Technical Support to USGS [U.S. Geological Survey] in Preparing Regulations for Implementation of the Air Quality Portion of Public Law 95–372). The estimate of 770 tons of NO_x per year was based on 365 days per year of operations, assuming a vessel remained on one tract drilling multiple wells while consuming 9,000 gallons of diesel fuel per day when drilling and assuming emission factors set out in the Compilation of Air Pollutant Emission Factors, Supplement No. 9, Environmental Protection Agency, 1979 (AP–42). Because drilling, casing, coring, and associated activities occur less than 90 percent of the time, the 770-ton value has been reduced to 690 tons per year which was translated to a distance from shore of about 20 statute miles using the exemption formula.

For facilities engaged in development and production activities, estimates were based on a maximum installed requirement of 13,000 horsepower with the assumption that diesel engines running at near full loading would be

used for all power generation. The AP-42 emission factors were used. An upper bound estimate of about 1,600 tons of NO_x per year resulted from those estimates which was translated to a distance from shore of about 50 statute miles using the exemption formula.

Comments and recommendations are solicited with respect to the MMS-proposed exemptions described above. Comments and recommendations are also solicited with respect to the following questions.

1. What alternative distance-from-shore exemptions should be considered; what assumptions should be used in determining the exemption such as facility or drilling scenarios, emission factors, fuel usage, and engine loading and related information; and what estimated number of OCS facilities would be affected by the alternative exemptions?

2. Should MMS develop separate criteria for diesel and gas turbine-power generation operations? If so, how should such criteria be implemented?

3. What engine loadings and fuel-consumption rates should be used to develop the distance-from-shore exemption?

4. Should a distance-from-shore exemption be premised on facilities other than the largest practical for use on the OCS? If so, how should such an approach be implemented?

5. Should there be separate criteria for facilities based on size, i.e., number of wells and amount of production? If, so, how should such criteria be implemented?

6. Due to the unusual demands created by severe weather conditions and due to limited operational experience in the Alaska OCS Region (especially in those areas north of the Arctic Circle), should the Alaska OCS Region be exempt from the proposed modification to the rule, or should alternate criteria be established in place of maximum horsepower for formulating the distance exemption for operations in those areas?

The primary effect of this rule as proposed would be that lessees whose facilities fall within the exemption would not be required to present the projected emission information required in 30 CFR 250.34–3(a)(4)(ii) or 3(b)(4)(ii). These sections of the rules require that a lessee submit only that information needed to make findings under 30 CFR 250.57. Because distance offshore will be the only information necessary to make those findings for facilities located beyond the specified distance from shore, the projected emission information would not be required in the plan review.

If the proposed distance exemptions had been in effect during the recent past, approximately two-thirds of exploration activities and one-half of development and production activities in the Gulf of Mexico OCS Region would have been exempt. Based on the location of existing and proposed lease sale tracts, it is anticipated that for the near future no activities would be exempt off the coast of California, few off the cost of Alaska, and the majority of activities would be exempt off the Atlantic coast.

Special circumstances could cause some facilities that are beyond the proposed specific distance from shore to exceed the exemption formula screening criteria and would necessitate use of an air quality model to determine whether the facilities were causing a significant onshore impact. For example, large amounts of sulfur dioxide might be emitted from facilities producing exceptionally sour gas, or large amounts of Volatile Organic Compounds might be emitted if offshore production is transported by tankers. Such activities might require mitigating measures.

For these cases, comments are specifically solicited on:

1. Identification of the special circumstances that might result in facilities beyond the proposed distance from shore exceeding the exemption formula amount.

2. Procedures to handle special cases. For example, should provisions be made for tankering? Should the special cases be handled on an individual basis as they arise, such as using the existing provisions in 30 CFR 250.57–1(j), or should specific rules attempt to cover every potentiality?

Authors: John Goll and Mitch Baer (703) 860–6461, and Jane Roberts and David Schuenke (703) 860–7916, Minerals Management Service, Department of the Interior.

Executive Order (E.O.) 12291; Regulatory Flexibility Act; The Paperwork Reduction Act; and National Environmental Policy Act of 1969

The Department of the Interior has determined that this document is not a major rule under E.O. 12291 because the cost impact is estimated to be a savings of $70,000 annually. The Department also certifies that this document will not have a significant economic effect on a substantial number of small entities under the Regulatory Flexibility Act (5 U.S.C. 601 et seq.) as the entities that operate on the OCS are not considered small due to the extensive technical complexity and financial investment require to conduct such operations.

The information collection requirement(s) contained in 30 CFR 250.57 will be submitted to the Office of Management and Budget (OMB) for approval as required by 44 U.S.C. 3501 et seq. The collection of this information will not be required until it has been approved by OMB.

The Department has also determined that the proposed amendments to 30 CFR 250.57 do not constitute a major Federal action significantly affecting the quality of the human environment, and therefore, preparation of an environmental impact statement is not required.

List of Subjects in 30 CFR Part 250

Continental shelf, Environmental impact statements, Environmental protection, Government contracts; Investigations, Mineral royalities, Oil and gas reserves, Penalties, Pipelines, Public lands/mineral resources, Reporting and recordkeeping requirements.

Dated: May 12, 1983.

Daniel N. Miller, Jr.,

Assistant Secretary of the Interior.

PART 250—[AMENDED]

For reasons set forth above, it is proposed that 30 CFR 250.57 be amended as shown.

§ 250.57 [Amended]

1. Section 250.57–1, Paragraph (d) is redesignated paragraph (d)(2).

2. A new paragraph (d)(1) is added to read as follows:

* * * * *

(d) * * *

(1) Distance-from-shore exemption:

(i) A facility described in an exploration plan is exempt from air quality review required by paragraphs (d)(2) through (i) of this section if the facility is located more than 20 statute miles from the closest onshore area within the baseline of a State from which the territorial sea is measured.

(ii) A facility described in a development and production plan is exempt from air quality review required by paragraphs d(2) through (i) of this section if the facility is located more than 50 statute miles from the closest onshore area within the baseline of a State from which the territorial sea is measured and if production from the facility is pipelined directly to shore.

BILLING CODE 4310–MR–M

Office of Surface Mining Reclamation and Enforcement

30 CFR Part 917

Public Comment and Opportunity for Public Hearing on Modified Portions of the Kentucky Permanent Regulatory Program

AGENCY: Office of Surface Mining Reclamation and Enforcement (OSM), Interior.

ACTION: Proposed rule.

SUMMARY: OSM is announcing procedures for the public comment period and for a public hearing on the substantive adequacy of a program amendment submitted by the State of Kentucky as a modification to the Kentucky Permanent Regulatory program (hereinafter referred to as the Kentucky program) under the Surface Mining Control and Reclamation Act of 1977 (SMCRA). The amendment is submitted to satisfy condition (a) pertaining to the stocking plan approval for commercial forest land imposed by the Secretary of the Interior on the approval of the Kentucky program.

This notice sets forth the times and locations that the Kentucky program and the proposed amendment are available for public inspection, the comment period during which interested persons may submit written comments on the proposed program elements, and the procedures that will be followed at the public hearing.

DATES: Written comments must be received on or before 4:00 p.m., July 11, 1983, to be considered.

A public hearing on the proposed modifications will be held on request only, on June 30, 1983, from 7:00 p.m. to 9:00 p.m., or until all comments have been heard.

Any person interested in making an oral or written presentation at the hearing should contact W. H. Tipton at the address and phone number listed below by the close of business five working days before the date of the hearing. If no one has contacted Mr. Tipton to express an interest in participating in the hearing by that date, the hearing will not be held. If only one person has so contacted Mr. Tipton, a public meeting, rather than a public hearing, may be held and the results of the meeting included in the Adminstrative Record.

ADDRESSES: Written comments should be mailed or hand delivered to: W. H. Tipton, Director, Lexington Field Office, Office of Surface Mining, 340 Legion Drive, Suite 28, Lexington, Kentucky 40504.

The public hearing, if held, will be at the Harley Hotel, 2143 North Broadway, Lexington, Kentucky 40505.

Copies of the Kentucky program, the proposed modifications to the program, a listing of any scheduled public meetings and all written comments received in response to this notice will be available for review at the OMS Offices and the Office of the State regulatory authority listed below, Monday through Friday, 8:00 a.m. to 4:00 p.m., excluding holidays.

Lexington Field Office, Office of Surface Mining, 340 Legion Drive, Suite 28, Lexington, Kentucky 40504.
Office of Surface Mining, Reclamation and Enforcement, Room 5315, 1100 "L" Street NW., Washington, D.C. 20240.
Bureau of Surface Mining, Reclamation and Enforcement, Capitol Plaza Tower, Third Floor, Frankfort, Kentucky 40601.

FOR FURTHER INFORMATION CONTACT: W. H. Tipton, Director, Lexington Field Office, 340 Legion Drive, Suite 28, Lexington, Kentucky 40504, Telephone: (606) 233–7327.

SUPPLEMENTARY INFORMATION: On December 30, 1981, Kentucky resubmitted its proposed regulatory program to OSM. On April 13, 1982, following a review of the proposed program as outlined in 30 CFR Part 732, the Secretary approved the program subject to the correction of 12 minor deficiencies. The approval was effective upon publication of the notice of conditional approval in the May 18, 1982, **Federal Register** (47 FR 21404–21435).

Information pertinent to the general background, revisions, modifications, and amendments to the proposed permanent program submission, as well as the Secretary's findings, the disposition of comments and a detailed explanation of the conditions of approval of the Kentucky program can be found in the May 18, 1982, **Federal Register** notice.

Condition (a) required Kentucky to submit copies of promulgated regulations eliminating the discretionary stocking plan approval for noncommercial forest land or otherwise amend its program to set standards for stocking when the post mining land use is forest land other than commercial forest. Additionally, the Secretary required Kentucky to utilize the reference area concept for these areas until condition (a) is removed.

Submission of Material to Satisfy Conditions

In accepting the Secretary's approval, Kentucky agreed to correct deficiency (a) by October 31, 1983. Kentucky submitted material dated May 4, 1983, to OSM to correct the deficiency. The State has developed "Technical Reclamation Memorandum #9" (TRM #9) to provide technical guidance procedures for reforested areas and to establish technical standards for ground cover, productivity, and stocking rates that may be used in lieu of the reference area method.

The Secretary seeks public comment on whether the material submitted satisfies condition (a). If the program amendment is approved, condition (a) in 30 CFR 917.11 will be removed.

Procedural Matters

1. Compliance with the National Environmental Policy Act: The Secretary has determined that, pursuant to section 702(d) of SMCRA, 30 U.S.C. 1292(d) no environmental impact statement need be prepared on this rulemaking.

2. Executive Order No. 1291 and the Regulatory Flexibility Act: On August 28, 1981, the Office of Management and Budget (OMB) granted OSM exemption from Sections 3, 4, 7 and 8 of Executive Order 1291 for actions directly related to approval of State regulatory programs. Therefore, this action is exempt from the preparation of a Regulatory Impact Analysis and regulatory review by OMB.

The Department of the Interior has determined that this rule would not have a significant economic effect on a substantial number of small entities under the Regulatory Flexibility Act (5 U.S.C. 601 *et seq.*). This rule would not impose any new requirements; rather, it would ensure that existing requirements established by SMCRA and the Federal rules will be met by the State.

3. Paperwork Reduction Act: This rule does not contain information collection requirements which require approval by the Office of Management and Budget under 44 U.S.C. 3507.

Antitampering and Anti-Fuel Switching Programs To Reduce In-Use Emissions From Motor Vehicles

AGENCY: Environmental Protection Agency..

ACTION: Notice of Availability of Information; Request for Comments and Public Workshops.

SUMMARY: This Notice announces the availability of a draft EPA technical report on antitampering and antifuel switching programs to reduce in-use emissions from motor vehicles, and presents EPA's intent regarding the application of the report's results in the State Implementation plan (SIP) process.

DATES: EPA will consider comments received on or before July 25, 1983, in completing the report for publication and in developing any policy statement on its use.

Workshop will be held at: Washington, D.C.—June 24, 1983—U.S. Environmental Portection Agency, Room S–353, 401 M. Street S.W., Washington, D.C. 20460; Chicago—June 28, 1983—Blackstone Hotel, 636 South Michigan Avneue, Chicago, Illinois 60605; Los Angeles—June 30, 1983—Holiday Inn—Los Angeles International Airport, 9901 La Cienega Boulevard, Los Angeles, California 90045.

ADDRESSES: The draft technical report has been placed in Public Docket No. A–83–28, located at the Environmental Protection Agency, Central Docket Section, West Tower Lobby, Gallery 1, LE–131, 401 M Street S.W., Washington, D.C. 20460. The docket may be inspected weekdays between 8:00 a.m. and 4:00 p.m. A reasonable fee may be charged for copying.

In addition, single copies of the draft technical report may be obtained by contacting: Mr. Alfonse Mannato (EN–397), Field Operations and Support Division, U.S. Environmental Protection Agency, 401 M Street SW., Washington, D.C. 20460, (202) 382–2667.

Those persons desiring to provide written comment on the draft report should submit those comments to Docket No. A–83–28 at the Central Docket Section address given earlier.

FOR FURTHER INFORMATION CONTACT: Mr. Alfonse Mannato, Field Operations and Support Division (EN–397F), Environmental Protection Agency, 401 M Street, SW., Washington, D.C. 20460, telephone (202) 382–2667.

SUPPLEMENTARY INFORMATION:

I. Background

Since the 1960's, automotive designers have added to and redesigned various components of the standard internal combustion engine to reduce its emission of hydrocarbons (HC), carbon monoxide (CO), and nitrogen oxides (NO_x). The success of their efforts is evident in the fact that new passenger vehicles emit only a small fraction of the HC, CO and NO_x emissions of pre-controlled cars.

The full benefit of these modifications, however, is not being realized in the field. EPA studies have shown repeatedly that maladjustments, and disablements, in the emission control systems of automobiles occur frequently and that the result is often emission levels many times the design standards. In particular, EPA's 1982 Tampering and Fuel Switching Survey shows that tampering and fuel switching of the light-duty vehicle fleet is at very high levels. Overall, 20% of the vehicle fleet surveyed was either tampered or fuel switched. This rate climbs to 24.4% in the five non-Inspection/Maintenance (I/M) areas surveyed. The excess emissions attributable to these problems are a major source of HC, CO, and NO_x from mobile sources and a significant contributing factor to air pollution in urban areas.

Federal law and regulation prohibit retail gasoline stations and wholesale purchaser consumers, i.e., fleet operators with fuel dispensing facilities, from introducing, causing or allowing the introduction of leaded gasoline into vehicles designed for unleaded (fuel switching). Federal law also prohibits tampering by automobile manufacturers, dealers, automobile repair facilities and fleet operators. In addition, forty States have enacted laws which prohibit removing or rendering inoperative the emission control systems of vehicles or operating tampered vehicles on public highways. Tampering survey data, however, indicate widespread occurrences of disconnected emission controls in the in-use motor vehicle population. There is also a disturbingly high rate of the use of leaded fuel in catalyst vehicles.

In order to reduce the level of non-compliance among vehicle owners, States or local areas may wish to implement programs which require the inspection and repair of tampered emission control devices. There are also other strategies which aim at reducing the opportunity and incentive for tampering and misfueling among the general public. To assist interested State and local governments, EPA has investigated the current rate of tampering the fuel switching, calculated the effect of such actions on motor vehicle emissions, and estimated the emission reductions available from certain control strategies. The results of EPA's work are presented in the draft technical report entitled "Antitampering and Anti-Fuel Switching Programs to Reduce In-Use Emissions From Motor Vehicles."

The draft document estimates the emission benefits of various types of antitampering and anti-fuel switching programs. A number of assumptions were made to support the calculation methodology which appears in the document. The purpose of releasing this draft document is to obtain input from State and local governments and other interested parties as to whether the scope of the document is adequate, and whether the methodology and its supporting assumptions are appropriate. The purpose of the workshops is to explain the document and its technical basis and to meet with those parties who might possess information which would be of use in finalizing the report, and to allow all interested parties to provide input to the revision process.

II. Review of the Draft Technical Report

The following discussion provides an overview of the report's contents.

The potential benefits from antitampering and anti-fuel switching programs will be affected by: (1) How much tampering and fuel switching are occurring given existing efforts, if any, to control them; (2) the effects of tampering and fuel switching on the emissions from vehicles; and (3) the effectiveness of the program in reducing the observed rate of tampering and fuel switching. There are two ways in which antitampering and anti-fuel switching programs reduce excess emissions. First, a program may require repair and replacement of damaged or missing emission control components when they are discovered. Secondly, programs may deter tampering and fuel switching which would have occurred if the program had not been implemented. Any program's benefit will be some mix of these two elements.

The draft report discusses the current knowledge about tampering and fuel switching rates. Since 1978, EPA has conducted surveys of in-use vehicles in seventeen States and collected data from over 8,000 vehicles. The latest of these surveys, completed in 1982, collected data from nearly 3,000 cars in ten States. All of the surveys were conducted either in conjunction with a random police roadside pullover or as a

special, temporary addition to a safety or emissions inspection at State-run or private inspection stations. Although the inspections were voluntary, efforts were made to ensure as complete participation as possible. The draft report presents the data collected in the 1982 survey on four specific types of tampering—PCV, evaporative control system, air pump and catalyst removal—and fuel switching. Rates are calculated for each of the observed forms of tampering. Separate rates are presented which reflect the observed differences between passenger cars and light trucks and the differences between I/M and non-I/M areas.

In order to estimate the excess emissions caused by tampering and fuel switching on a future date, it was necessary to predict the tampering and fuel switching rates when the average age of the vehicles would be older than observed in the 1982 survey. Examination of the data showed an increase in the tampering and fuel switching rates as the average mileage of the sample increased. The draft report uses a linear regression equation fitted to the 1982 survey data to estimate future tampering and fuel switching rates.

The interpretation of the 1982 survey data to determine tampering rates was straightforward except for fuel switching. The survey examined three vehicle parameters relative to fuel switching: whether the lead content of the fuel in the tank was over the legal limit of 0.05 gram/gallon, whether the fuel inlet restrictor had been enlarged enough to allow a leaded fuel nozzle to be used, and whether lead sensitive test paper detected lead deposits in the tailpipe. Because of the uncertainties associated both with the tailpipe test and the unknown level of damage of the catalysts of these vehicles the draft report excluded vehicles which did not have fuel inlet enlargement or the presence of leaded fuel in the tank before calculating the fuel switching rate.

The effect of a particular disablement of a specific emission control component on vehicle emissions is not easy to quantify. There are many different varieties of similar emission control devices which can differ from manufacturer to manufacturer and from model year to model year. This variation will result in different tampering effects on vehicle emissions. The effect of a particular disablement is also dependent on engine type, overall state of tune, and the condition of other emission control components. EPA has conducted some testing to assess the impact of disablements. Usually the Federal Test Procedure (FTP) and other tests were performed with and without a particular emission control component disconnected. The draft report calculates the effect of disablements from these test data where available. Where adequate test data are not available, the report estimates the change in emissions by comparing known controlled and uncontrolled emission levels of vehicles from different model years. While EPA believes that the draft report estimates the effect of tampering and fuel switching using the best information available, there remains the fact that test data are sparse and a certain level of uncertainty remains.

Benefits from anti-tampering and anti-fuel switching programs are obtained by addressing two problems, existing tampering and fuel switching and the tampering and fuel switching which has not yet occurred. The draft report calculates the effect of various program options on reducing emissions in either or both of these categories. The benefits section of the report introduces the concept of a program effectiveness factor for each inspection element. The effectiveness factor takes into account the fact that a certain amount of tampering will go undetected and unrepaired even in the presence of a tampering inspection. It also accounts for the likely success of the program in deterring subsequent tampering and fuel switching. Separate benefits are calculated for adding a tampering check to an I/M program and for implementing an antitampering program in the absence of an emissions inspection. Various field enforcement efforts such as random roadside pullovers or programs which inspect retail gasoline stations for fuel switching are also evaluated.

Some of the programs discussed in the report will provide substantial emission reduction. The programs which in fact would provide the largest reductions would require replacement of catalysts on a large portion of the vehicle fleet on the basis of apparent misfueling (i.e., tampered filler inlets, and evidence of lead particles in the exhaust pipe.). The establishment of such programs may be difficult from a public acceptance viewpoint, because there is uncertainty as to the extent of deactivation of the catalysts, and because the program would require replacement of these catalysts on older vehicles.

EPA is investigating the feasibility of various test procedures which could be used in the field which would reduce the uncertainty regarding catalyst deactivation.

This would reduce some of the uncertainty and increase the likelihood of public acceptance for such programs—at least with respect to the recent model year vehicles. It would not, however, deal with the question of repair of older vehicles.

Because of the likely connection to the SIP process in non-attainment areas, the benefits have been calculated at a December 31, 1987 evaluation point and are expressed as milligrams per mile. States or local areas planning to implement a program can then apply the benefits by subtracting from the currently projected December 31, 1987 emission factor.

The draft report also addresses the general administrative requirements which are considered necessary for achieving the specific emission reduction credits calculated from the data. There requirements cover the areas of training, quality control, enforcement and public awareness.

Written comments on EPA's report methodology are invited. The record will remain open until August 25, 1983 and comments should be submitted to the EPA docket identified above. It is also requested, but not required, that a copy of any submittal be sent directly to Mr. Alfonse Mannato at the address listed previously.

Dated: June 3, 1983.

Charles L. Elkins,

Acting Assistant Administrator for Air, Noise, and Radiation.

Approval and Promulgation of Implementation Plans; Wisconsin

AGENCY: Environmental Protection Agency (EPA).

ACTION: Proposed rulemaking.

SUMMARY: EPA is proposing approval of a revision to the Wisconsin State Implementation Plan (SIP). This action is based upon a request from the State of Wisconsin, Department of Natural Resources, to incorporate into the Wisconsin SIP additional controls adopted by the State for fugitive dust emissions in or near nonattainment areas for total suspended particulate matter (TSP). The intent of today's rulemaking is to discuss the material submitted by the State to support the request, and to provide an opportunity

for the public to comment on the revision and EPA's proposed action.

DATE: Comments on this revision and on EPA's proposed action must be received by July 11, 1983.

ADDRESSES: Copies of the SIP revision and other materials relating to this rulemaking are available for inspection at the following addresses:

Environmental Protection Agency, Region V, Air and Radiation Branch, 230 South Dearborn Street, Chicago, Illinois 60604

Wisconsin Department of Natural Resources, Bureau of Air Management, 101 South Webster, Madison, Wisconsin 53707.

Comments on this proposed rule should be addressed to: Gary Gulezian, Chief, Regulatory Analysis Section, Air and Radiation Branch (5AP26), U.S. Environmental Protection Agency, Region V, 230 South Dearborn Street, Chicago, Illinois 60604.

FOR FURTHER INFORMATION CONTACT: Sharon Reinders (312) 886–6034.

SUPPLEMENTARY INFORMATION:

1. Background

The Clean Air Act (Act) amendments of 1977 added a new subsection 107(d) to the Act which required each State to submit a list of the National Ambient Air Quality Standards (NAAQS) attainment status of each air quality control region within the State to the Administrator of the EPA. Pursuant to section 107(d), the Administrator promulgated the attainment status for each area of every State on March 3, and October 5, 1978 (43 FR 8962, 43 FR 45993). For specific section 107 attainment status designations, see the Code of Federal Regulations, Title 40, Chapter I, Part 81 (40 CFR Part 81). The 1977 amendments also added a new Part D to the Act which required each State to amend its SIP to provide for attainment of each NAAQS in each nonattainment area not later than December 31, 1982, with certain exceptions for attainment of the ozone and carbon monoxide NAAQS. The exceptions are not relative to this rulemaking action and will not be discussed further.

With respect to the attainment status designation for TSP in the State of Wisconsin, the Administrator has designated portions of certain Counties in the State as nonattainment for the primary TSP standard and other portions as nonattainment for the secondary TSP standard. The reader is again referred to 40 CFR 81.350 for the specific nonattainment areas of each County. Subsequently, Wisconsin revised the TSP portion of its SIP to provide for attainment of the primary and secondary TSP standards in Rock, Milwaukee, and Waukesha Counties by December 31, 1982. In June 1981, the State submitted the final revision of its TSP SIP to EPA, pursuant to Part D of the Act. The SIP consists of regulations contained in Wisconsin Administrative Code (WAC) NR 154.01, Definitions, NR 154.11, Control of Particulate Emissions, and associated Technical Support Documents issued by the State. With the exception of one element in WAC NR 154.11(7), EPA approved Wisconsin's Part D SIP for the TSP nonattainment areas in Rock, Milwaukee, and Waukesha Counties on March 9, 1983 (48 FR 9860).

2. Revision to Wisconsin's SIP for TSP

In today's rulemaking action, EPA is announcing receipt of an additional request from the State of Wisconsin, dated December 7, 1982, for revision of its SIP for TSP. The revision consists of two amendments to WAC NR 154.01 and NR 154.11(2) which clarify the fugitive dust emission limitation in TSP nonattainment areas in Rock, Milwaukee, and Waukesha Counties and revise the applicability criteria for both the public and private sources to which the regulations apply.

The first amendment to WAC NR 154.01 creates definitions for "motor vehicle" or "vehicle", and "trafficable area". The first amendment also repeals NR 154.11(2)(b)1; renumbers NR 154.11(2)(b)2., 3., and 4. to NR 154.11(2)(b)1., 2., and 3.; renumbers NR 154.11(2)(c) to NR 154.11(2)(d); and creates NR 154.11(2)(c). This amendment was effective in the State on April 1, 1982.

The second amendment to WAC NR 154.01 creates definitions for "highway", "municipality", "public trafficable area", and "roadway". The amendment further creates WAC NR 154.11(2)(e) pertaining to control of fugitive dust from publicly owned roadways and trafficable areas in or within one mile of nonattainment areas for TSP. The amendment was effective in the State on November 1, 1982.

Under the amendments, all subject areas, private or public owned, that are located inside or within 1 mile of the TSP nonattainment areas identified by the State, which have a total area of at least 20,000 square feet and are subject on 3 separate days during any 14-consecutive-day period to a traffic rate of at least 10 vehicles per 60-minute period, would be required to meet the control measures contained in WAC NR 154.11(2).

The amendments also revise the appropriate cross reference in the compliance schedule, section NR 154.11(2)(d), that must be met by owners or operators of affected sources. The compliance schedule for the subject sources set forth at NR 154.11(2)(b) and (c) is unchanged from SIP approved by EPA at 48 FR 9860. The compliance schedule requirements for roadways or public trafficable areas set forth at section NR 154.11(2)(e) commences on November 1, 1982, the date that the new rule was effective in the State.

3. Conclusion

EPA has reviewed these amendments and concludes that the controls extend above and beyond the requirements of the Act and the Part D SIP for TSP previously approved by EPA. Accordingly, EPA sees no reason to deny the State's request to approve the amendments to WAC NR 154.01 and NR 154.11(2) as a revision to the Wisconsin SIP. The complete text of this revision can be found in the Wisconsin Administrative Code and in the TSP portion of the Wisconsin in SIP.

The Office of Management and Budget has exempted this rule from the requirements of Section 3 of Executive Order 12291.

Under 5 U.S.C. 605(b), the Administrator has certified that SIP approvals do not have a significant economic impact on a substantial number of small entities. (See 46 FR 8709).

List of Subjects in 40 CFR Part 52

Air pollution control, Ozone, Sulfur oxides, Nitrogen dioxide, Lead, Particulate matter, Carbon monoxide, Hydrocarbons, Intergovernmental relations

This notice is issued under authority of Sections 110 and 172 of the Clean Air Act, as amended (42 U.S.C. 7410 and 7502).

Dated: May 6th, 1983.

Valdas V. Adamkus,

Regional Administrator.

40 CFR Part 145

[OW FRL 2380–5]

Colorado Oil and Gas Conservation Commission Underground Injection Control Primacy Application

AGENCY: Environmental Protection Agency.

ACTION: Notice of Public Comment Period and of Public Hearing.

SUMMARY: The purpose of this notice is to announce that: (1) The Environmental Protection Agency (EPA) has received a complete application from the Colorado Oil and Gas Conservation Commission requesting primary enforcement responsibility for the Underground Injection Control (UIC) Program; (2) the application is now available for inspection and copying; (3) public comments are requested; and (4) a public hearing will be held.

The proposed comment period will provide EPA the breadth of information and public opinion necessary to approve, disapprove, or approve in part and disapprove in part the application of the Colorado Oil and Gas Conservation Commission to regulate Class II oil and natural gas related injection wells.

DATES: Requests to present oral testimony should be filed by July 11, 1983. The public hearing will be held on July 12, 1983, in two sessions: 10:00 a.m. and 7:00 p.m. Written comments must be received by July 12, 1983.

ADDRESSES: Comments and requests to testify should be mailed to Patrick A. Crotty, Drinking Water Branch (8WM–DW), Environmental Protection Agency, Region VIII, 1860 Lincoln Street, Denver, Colorado 80295. Copies of the application and pertinent materials are available between 8:30 a.m. and 4:00 p.m., Monday through Friday, at the following locations:

Evironmental Protection Agency, Region VIII, Drinking Water Branch, 1860 Lincoln Street, Sixth Floor, Denver, Colorado 80295, PH: (303) 827–2731

Colorado Oil and Gas Conservation Commission, Room 721, Centennial Building, 1313 Sherman Street, Denver, Colorado 80203, PH: (303) 866–3531.

The Hearing will be held in the Federal Building, Room 239, 1961 Stout Street, Denver, Colorado.

FOR FURTHER INFORMATION CONTACT: Patrick A. Crotty, Chief, Colorado/North Dakota/Wyoming Section, Drinking Water Branch, Environmental Protection Agency, Region VIII, 1860 Lincoln Street, Denver, Colorado 80295. (303) 837–2731.

SUPPLEMENTARY INFORMATION: This application from the Colorado Oil and Gas Conservation Commission is for the regulation of all Class II oil and natural gas related injection wells in the State.

Class II injection wells include those which inject fluids: (1) Which have been brought to the surface in connection with conventional oil and natural gas production and are disposed of through such injections; (2) for enhanced recovery of oil or natural gas (i.e. water flooding); and (3) for storage of hydrocarbons which are liquid at standard pressure and temperature. There are approximately 1,000 Class II injection wells in the State of Colorado.

This application includes a description of the State Underground Injection Control program, copies of all applicable regulations and forms, a statement of legal authority, and the memorandum of agreement between the Colorado Oil and Gas Conservation Commission and the Region VIII office of the Environmental Protection Agency.

Dated: June 6, 1983.

Rebecca W. Hanmer,

Acting Assstant Administrator for Water.

[FR Doc. 83–15611 Filed 6–9–83; 8:45 am]

BILLING CODE 6560–50–M

DEPARTMENT OF COMMERCE

National Oceanic and Atmospheric Administration

50 CFR Part 646

[Docket No. 30608–102]

Snapper-Grouper Fishery of the South Atlantic; Implementation of Conservation and Management Measures

AGENCY: National Oceanic and Atmospheric Administration (NOAA), Commerce.

ACTION: Proposed rule.

SUMMARY: NOAA issues and requests comments on this proposed rule to implement conservation and management measures as prescribed in the proposed Fishery Management Plan for the Snapper-Grouper Fishery of the South Atlantic. Currently, a number of the major species in the fishery are being harvested at less than optimal sizes, and certain harvest techniques have resulted in controversy among user groups. The proposed rule would: (1) Establish minimum sizes for certain species and (2) establish limitations on the use of certain gear including poisons, explosives, fish traps, and trawls for the taking of fish in the snapper-grouper fishery. The intended effect of the proposed rule is to prevent overfishing, restore to the optimum level those species that are overfished, and promote orderly utilization of the resource.

DATE: Comments on the proposed rule must be received on or before July 25, 1983.

ADDRESSES: Comments on the proposed rule, and requests for copies of the plan, the regulatory impact review/initial regulatory flexibility analysis, or final environmental impact statement should be sent to Jack T. Brawner, Regional Director, Southeast Region, National Marine Fisheries Service, 9450 Koger Boulevard, St. Petersburg, Florida 33702.

FOR FURTHER INFORMATION CONTACT: Jack T. Brawner, 813–893–3141.

SUPPLEMENTARY INFORMATION: The South Atlantic Fishery Management Council (Council) prepared the Fishery Management Plan for the Snapper-Grouper Fishery of the South Atlantic (FMP). A notice of availability of the FMP was published in the **Federal Register** on May 13, 1983 (48 FR 21607). These proposed regulations implement the FMP

The FMP manages the snapper-grouper fishery throughout the fishery conservation zone (FCZ) off the southern Atlantic coastal States from the Virginia-North Carolina border south to the boundary line between the Gulf of Mexico and South Atlantic Fishery Management Councils. A more precise definition of the southern boundary line is found in § 646.2.

The FMP covers 69 species of fish including snappers, sea basses, groupers, porgies, grunts, tilefishes, triggerfishes, wrasses, and jacks. Minimum sizes are proposed for red snapper, vermilion snapper, yellowtail snapper, red grouper, Nassau grouper, and black sea bass. For black sea bass the management regime applies only south of Cape Hatteras, North Carolina. Black sea bass north of Cape Hatteras are considered a separate stock and will be managed by the Mid-Atlantic Fishery Management Council under a separate plan. In addition, jewfish are protected from being harvested by certain gear.

Background

Species in the snapper-grouper fishery support valuable commercial and recreational fisheries in the South Atlantic area. Approximately 1,400 vessels are currently engaged in the commercial sector of the fishery. These vessels are capable of operating in both the nearshore and distant offshore fishing grounds. The four dominant types of commercial gear are hook and line, bottom longline, trap, and trawl. In 1981, the total commercial harvest equaled about 9.9 million pounds and had an exvessel value of $9.6 million. The total regional economic impact of the commercial snapper-grouper fishery was estimated to have been $28.4 million in 1981.

The recreational sector includes 95 head boats, 71 charter boats, and approximately 48,000 private boats. Total recreational landings of species in

the fishery were approximately 14.4 million pounds in 1979. The most recent data indicated that the direct economic impact of recreational fishing for snapper-grouper in the South Atlantic area in 1975 was $135 million, including related expenditures for such items as bait, fuel, and lodging.

Yield-Per-Recruit

The principal focus of this FMP is to maximize yield-per-recruit (YPR) from the fishery. The Council concluded that YPR is the appropriate methodology for evaluating management approaches directed at such maximization. YPR is a theoretical calculation based on known growth and natural mortality rates that allows an estimate of relative yield (i.e., the quantity of fish available to be harvested) from a fishery without knowing landings. Yield is predicted according to the growth pattern of individual fish, rather than the growth of the entire population. An index of yield per fish rather than an absolute total weight per year from the fishery is calculated. This index is called YPR.

Biological data exist for conducting YPR analysis on 17 of the 69 species in the snapper-grouper fishery. Evaluation of the 17 species indicates that red hind, graysby, white grunt, and tomtate are not in the range of growth overfishing. (Growth overfishing means that the fish are being harvested before reaching their optimum harvest size; this results in a decreased yield from the fishery.) Thirteen species are likely to be in a range of growth overfishing: vermilion snapper, red snapper, yellowtail snapper, black sea bass, red grouper, Nassau grouper, gray snapper, speckled hind, scamp, gag grouper, yellowfin grouper, black grouper, and red porgy.

The Council concluded that growth overfishing should be resolved by imposing minimum sizes. Each minimum size was evaluated in the following manner: (1) Choice of the minimum size; (2) internal rate of return (IRR) analysis, which compares the short-term loss by weight against the long-term gain by weight for 20 years after a minimum size is implemented, taking into account the survival rate of released fish; and (3) evaluation of distributional impacts (which occur when minimum size restrictions force one group of fishermen to forego harvesting small fish that are then harvested later (when they are larger) by another group of fishermen. Based on these three steps and the criteria outlined in each, a minimum harvest size for vermilion snapper, red snapper, yellowtail snapper, black sea bass, red grouper, and Nassau grouper is justified.

Those species for which data do not permit evaluation will be monitored and when the catch indicates that a species is in or near the range of growth overfishing, minimum sizes will be evaluated and if justified will be implemented by the Secretary of Commerce (Secretary) amending the regulations rather than through amendments to the FMP itself. This procedure is outlined under the discussion of minimum sizes.

Optimum Yield

Optimum Yield (OY) for each species (other than jewfish) is the yield that results from the recommended minimum size. The numerical estimate of OY is the estimated numerical value of YPR (measured in grams) derived from the best estimate of population parameters available. At this time, OY is the YPR that occurs with the population parameters specified in the YPR Appendix (Appendix A in the FMP) for each species regulated by a minimum size:

	Minimum harvest size (inches)	Optimum yield [1]
Vermilion snapper	12	177.19
Red snapper	12	540.64
Yellowtail snapper	12	462.10
Black sea bass	8	100.00
Red grouper	12	263.83
Nassau grouper	12	263.83

[1] Yield-per-recruit in grams with minimum size.

OY for jewfish is all jewfish harvested by U.S. fishermen utilizing lawful gear. The numerical estimate is the 1981 recorded commercial landings of 19,000 pounds.

Minimum Sizes

Existing data justify imposition of a mimimum size (total length) on six species to control growth overfishing: vermilion snapper, 12 inches; red snapper, 12 inches; yellowtail snapper, 12 inches; black sea bass, 8 inches; red grouper, 12 inches; Nassau grouper, 12 inches.

These minimum sizes will result in increases in yield ranging between 8 and 91 percent depending on the species and assuming constant recruitment. Size limits are not proposed for the seven remaining species (of the 13 in the range of growth overfishing) because of unknown survival rates of released fish and unknown or unacceptable distributional impacts.

Additional minimum sizes for other species or changes in minimum size will be implemented in the following manner. A monitoring team will analyze relevant fishery data. When the data indicate that a species is in or near the range of growth overfishing, the monitoring team will evaluate alternative minimum sizes in accordance with criteria established in the FMP. The team will then submit a report to the Council recommending adopting or rejecting further minimum sizes.

The team's report, along with an environmental assessment or supplemental environmental impact statement and/or regulatory impact review as appropriate, will be submitted to the Council for its consideration. If the Council concurs with the team's suggestions, the Council will recommend implementation of additional minimum sizes and appropriate adjustments to OY, domestic annual harvest, and total allowable level of foreign fishing to the Secretary. If the Secretary concurs, these regulations will be proposed to modify the existing regime.

Gear Limitations

Vermilion snapper are taken primarily by trawls and the majority of the fish retained are very small (i.e., 5 to 10 inches). The taking of such undersized fish results in approximately a 34 percent reduction in potential yield and results in an economic loss, particularly since larger fish command a higher price. A 4-inch minimum mesh size for trawl nets targeting species in the snapper-grouper fishery is proposed to increase the minimum size of vermilion snapper retained to 12 inches. However, any vermilion snapper taken using trawl nets with a mesh size of 4 inches or larger may be retained even if the fish is shorter than 12 inches. The size limits proposed for other species must be complied with when using trawls. Fishermen utilizing such trawl nets will be given one year from the date of implementation of the FMP to comply with the minimum-mesh-size regulation.

In recent years, there has been an increase in the use of fish traps that has resulted in intense competition among user groups in narrow shelf areas off south Florida. In 1980, the State of Florida banned the use and possession of fish traps; these prohibitions apply to all persons within, and to Florida residents fishing beyond, State waters.

The Council has elected to allow and regulate the use of fish traps by specifying proposed managment measures which address concerns regarding their use; such regulation will supersede the application of Florida trap law with respect to fishing beyond Florida's seaward boundary. Fish traps are prohibited shoreward of the 100-foot

contour, south of 25° 36.5' N. latitude (Fowey Rocks Light, Florida). This prohibition would separate traps from other gear along the narrow shelf area where competition, primarily with recreational fishermen, is most intense. Any fish traps deployed within the prohibited area may be seized by an authorized officer. Degradable panels or degradable door fasteners will be required on all fish traps to prevent lost traps from retaining fish and thus wasting the resource. Also, a minimum trap mesh size of 1 x 2 inches or 1.5-inch hexagonal is proposed to be effective one year after the FMP is implemented. This measure will prevent the use of mesh smaller than is currently used, thereby minimizing the potential harvest of small, unmarketable fish. The one-year grace period is designed to allow fishermen to replace traps as they wear out.

The FMP proposes to prohibit the harvest of jewfish by spears, spearguns, pole guns, and powerheads. Thus, the esthetic enjoyment of seeing large jewfish for recreational divers is preserved.

The use of poisons and explosives (exclusive of powerheads) for taking fishes of the snapper-grouper fishery is prohibited. However, poisons may be used if authorized by permit under State or Federal law. This measure will prevent alteration and destruction of habitat and incidental mortality of non-target species.

Harvest Limitations

The FMP proposes certain limitations on harvest practices involving fish traps to reduce conflicts within the fishery and aid in the enforcement of these regulations. No person may tend or pull another's fish traps without the owner's written permission. South of 28° 24.5' N. latitude (Cape Canaveral, Florida) fish traps may only be pulled between the period one hour before sunrise and one hour after sunset, and must be identified as belonging to the boat or vessel fishing them. (This gear identification provision is being held in reserve until a region-wide system is developed.)

The FMP indicates that traps and trap buoys will be identified as belonging to the boat or vessel fishing the traps. However, further discussion with the Council revealed that its intent was that the measure would apply only south of Cape Canaveral. This intent is indicated in the FMP by the exclusion of black sea bass traps (fished primarily north of Cape Canaveral) from the identification requirement.

Special Management Zones

Holders of U.S. Army Corps of Engineers artificial reef or fish attraction device permits may petition the Council to designate the area surrounding their artificial reef or fish attraction device as a special management zone (SMZ). Such designation would prohibit or restrain, in the SMZ, the use of fishing gear which is incompatible with the purpose for which such artificial reef or device was established. A Council monitoring team will consider such petition and report its recommendation thereon to the Council. If the Council concludes that such a SMZ should be established, it may refer the matter to the Secretary with a recommendation that he promulgate implementing regulations.

Catch Monitoring

To monitor attainment of OY, provide information necessary for further YPR analysis, and to evaluate other stock assessment methods, the FMP proposes that statistical reporting agents will sample and inspect recreational and commercial landings. Fishermen and dealers whose catch is selected for sampling and inspection must make their fish available to statistical reporting agents. This sampling method will be supplemented by information regarding landings and value as compiled in "Fishery Statistics of the United States."

Procedures for Disposition of Illegally Fished Fish Traps

The regulations provide abandonment procedures for fish traps deployed within the prohibited area. These procedures authorize the disposition of the traps by the Secretary or an authorized officer. The procedures supplement the procedures provided for seizure, forfeiture, and disposal in 50 CFR Part 219. Special characteristics of the trap fishery necessitate this additional method of abandonment and disposal of fish traps deployed in the prohibited area. First, the traps are heavy and bulky, which makes them difficult to handle without proper equipment. Currently, this equipment is not available to law enforcement officers. Second, limited resources, both in terms of time and money, make it impracticable, if not impossible, for authorized enforcement officers to haul all illegal traps to shore and to store them for the one-year time period required by 50 CFR 219.29 before the traps can be destroyed. The procedure of abandonment and destruction provided in these regulations will discourage illegal fishing with fish traps.

Classification

Section 304(a)(1) (C)(ii) of the Magnuson Fishery Conservation and Management Act, as amended, (Magnuson Act), requires the Secretary to publish regulations proposed by a council within 30 days of receipt of the FMP and regulations. At this time the Secretary has not determined that this FMP is consistent with the national standards, other provisions of the Magnuson Act, and other applicable law. The Secretary, in making that determination, will take into account the data, views, and comments received during the comment period.

The Council prepared a draft environmental impact statement for this FMP; a notice of availability was published on August 20, 1982, (47 FR 36468).

The NOAA Administrator determined that this proposed rule is not a major rule requiring a regulatory impact analysis under Executive Order 12291. The Council proposed a regulatory impact review (RIR) which concludes that this rule will have a following economic effects.

The proposed regulations will result in benefits to the fishermen and to the economy that are greater than the associated Federal costs to manage the fishery on a continuing basis. Benefits that will accrue from implementing the proposed measures come from the minimum sizes on red snapper, vermilion snapper, yellowtail snapper, black sea bass, red grouper, and Nassau grouper. The benefit/cost analysis was performed utilizing a 20-year planning horizon. The benefit/cost ratio is defined as present value benefits divided by present value costs. There are alternative benefit/cost ratios depending on the assumed per pound value of the fish to commercial and recreational fishermen:

Assumed per pound value	Benefit/cost ratio
$0.75	$15,570,462/$4,085,126=3.80.
$1.00	$20,719,263/$4,085,126=5.07.
$1.25	$25,999,104/$4,085,126=6.34.
$1.50	$31,078,825/$4,085,126=7.61.

The conclusion is that the return for government investment, in implementing minimum size restrictions for the six fish species, ranges from $3.80 to $7.61 for each dollar invested. You may obtain a copy of this review from the Regional Director at the address listed above.

This proposed rule is exempt from the procedures of Executive Order 12291 under section 8(a)(2) of that order. Deadlines imposed under section 304 of the Magnuson Act require the Secretary

to publish this proposed rule 30 days after its receipt. Accordingly, the proposed rule is being reported to the Director, Office of the Management and Budget, with an explanation of why it is not possible to follow procedures of the order.

The rules to implement the FMP are subject to provisions of the Regulatory Flexibility Act (RFA). The Council prepared an initial regulatory flexibility analysis (IRFA) in conjunction with the RIR, as provided by section 605(a) of the RIR/IRFA; this analysis is summarized above. On the basis of this RIR/IRFA, the NOAA Administrator determined that this proposed rule will have a significant economic impact on a substantial number of small entities. You may obtain a copy of the RIR/IRFA from the Regional Director at the address noted above.

This rule does not contain a collection of information requirement for purposes of the Paperwork Reduction Act.

The Council determined that this rule will be implemented in a manner that is consistent to the maximum extent practicable with the approved coastal zone management programs of Florida, South Carolina, and North Carolina. This determination has been submitted for review by the responsible State agencies under section 307 of the Coastal Zone Management Act.

List of Subjects in 50 CFR Part 646

Fish, Fisheries, Fishing.

Dated: June 7, 1983.

Carmen J. Blondin,

Acting Deputy Assistant Administrator for Fisheries Resource Management, National Marine Fisheries Service.

For the reasons set out in the preamble, Chapter VI of 50 CFR is proposed to be amended by adding a new Part 646 to read as follows:

PART 646—SNAPPER-GROUPER FISHERY OF THE SOUTH ATLANTIC

Subpart A—General Provisions

Sec.

646.1 Purpose and scope.
646.2 Definitions.
646.3 Relationship to other laws.
646.4 Catch monitoring.
646.5 Gear identification. [Reserved]
646.6 Prohibitions.
646.7 Facilitation of enforcement.
646.8 Penalties.

Subpart B—Management Measures

646.20 Harvest limitations.
646.21 Size limitations.
646.22 Gear limitations.
646.23 Specifically authorized activities.

Authority: 16 U.S.C. 1801 *et seq.*

Subpart A—General Provisions

§ 646.1 Purpose and scope.

(a) The purpose of this part is to implement the Fishery Management Plan for the Snapper-Grouper Fishery of the South Atlantic prepared by the South Atlantic Fishery Management Council under the Magnuson Act.

(b) This part regulates fishing for fish in the snapper-grouper fishery by fishing vessels within the South Atlantic portion of the fishery conservation zone.

§ 646.2 Definitions.

In addition to the definitions in the Magnuson Act, and unless the context requires otherwise, the terms used in this part have the following meaning:

Authorized officer means—

(a) Any commissioned, warrant, or petty officer of the U.S. Coast Guard;

(b) Any certified enforcement officer or special agent of the National Marine Fisheries Service;

(c) Any officer designated by the head of any Federal or State agency which has entered into an agreement with the Secretary and the Commandant of the U.S. Coast Guard to enforce the provisions of the Magnuson Act; or

(d) Any U.S. Coast Guard personnel accompanying and acting under the direction of any person described in paragraph (a) of this definition.

Authorized statistical reporting agent means—

(a) Any person so designated by the Center Director;

(b) Any person so designated by the head of any Federal or State agency which has entered into an agreement with the Secretary to collect fishery data.

Center Director means the Center Director or a designee, Southeast Fisheries Center, National Marine Fisheries Service, 75 Virginia Beach Drive, Miami, Florida 33149; telephone 305–361–5761.

Commercial fisherman means a person who sells, trades, or barters any part of his catch of fish.

Dealer means the person who first receives by way of purchase, barter, or trade fish from a commercial fisherman.

Fish in the snapper-grouper fishery means the following species:

Snappers—Lutjanidae

Black snapper—*Apsilus dentatus*
Queen snapper—*Etelis oculatus*
Mutton snapper—*Lutjanus analis*
Schoolmaster—*Lutjanus apodus*
Blackfin snapper—*Lutjanus buccanella*
Red snapper—*Lutjanus campechanus*
Cubera snapper—*Lutjanus cyanopterus*
Gray snapper—*Lutjanus griseus*
Mahogany snapper—*Lutjanus mahogoni*
Dog snapper—*Lutjanus jocu*
Lane snapper—*Lutjanus synagris*
Silk snapper—*Lutjanus vivanus*
Yellowtail snapper—*Ocyurus chrysurus*
Vermilion snapper—*Rhomboplites aurorubens*

Sea Basses—Serranidae

Bank sea bass—*Centropristis ocyurus*
Rock sea bass—*Centropristis philadelphica*
Black sea bass—*Centropristis striata*

Groupers—Serranidae

Rock hind—*Epinephelus adscensionis*
Graysby—*Epinephelus cruentatus*
Speckled hind—*Epinephelus drummondhayi*
Yellowedge grouper—*Epinephelus flavolimbatus*
Coney—*Epinephelus fulvus*
Red hind—*Epinephelus guttatus*
Jewfish—*Epinephelus itajara*
Red grouper—*Epinephelus morio*
Misty grouper—*Epinephelus mystacinus*
Warsaw grouper—*Epinephelus nigritus*
Snowy grouper—*Epinephelus niveatus*
Nassau grouper—*Epinephelus striatus*
Black grouper—*Mycteroperca bonaci*
Yellowmouth grouper—*Mycteroperca interstitialis*
Gag—*Mycteroperca microlepis*
Scamp—*Mycteroperca phenax*
Tiger grouper—*Mycteroperca tigris*
Yellowfin grouper—*Mycteroperca venenosa*

Porgies—Sparidae

Sheepshead—*Archosargus probatocephalus*
Grass porgy—*Calamus arctifrons*
Jolthead porgy—*Calamus bajondo*
Saucereye porgy—*Calamus calamus*
Whitebone porgy—*Calamus leucosteus*
Knobbed porgy—*Calamus nodosus*
Red porgy—*Pagrus pagrus*
Longspine porgy—*Stenotomus caprinus*
Scup—*Stenotomus chrysops*

Grunts—Haemulidae

Black margate—*Anisotremus surinamensis*
Porkfish—*Anisotremus virginicus*
Margate—*Haemulin album*
Tomtate—*Haemulon aurolineatum*
Smallmouth grunt—*Haemulon chrysargyreum*
French grunt—*Haemulon flavolineatum*
Spanish grunt—*Haemulon macrostomum*
Cottonwick—*Haemulon melanurum*
Sailors choice—*Haemulon parrai*
White grunt—*Haemulon plumieri*
Blue striped grunt—*Haemulon sciurus*

Tilefishes—Malacanthidae

Blueline tilefish—*Caulolatilus microps*

Tilefish (Golden)—*Lopholatilus chamaeleonticeps*
Sand tilefish—*Malacanthus plumieri*

Triggerfishes—Balistidae

Gray triggerfish—*Balistes capriscus*
Queen triggerfish—*Balistes vetula*
Ocean triggerfish—*Canthidermis sufflamen*

Wrasses—Labridae

Hogfish—*Lachnolaimus maximus*
Puddingwife—*Halichoeres radiatus*

Jacks—Carangidae

Yellow jack—*Caranx bartholomaei*
Blue runner—*Caranx crysos*
Crevalle jack—*Caranx hipppos*
Bar jack—*Caranx ruber*
Greater amberjack—*Seriola dumerili*
Almac jack—*Seriola rivoliana*

Fish trap means any trap and the component parts thereof used for or capable of taking finfish, regardless of the construction material, except those traps historically used in the directed fisheries for crustaceans (blue crab, stone crab, and spiny lobster). Fish trap further means those traps used to fish for black sea bass.

Fishery conservation zone (FCZ) means that area adjacent to the United States which, except where modified to accommodate international boundaries, encompasses all waters from the seaward boundary of each of the coastal States to a line on which each point is 200 nautical miles from the baseline from which the territorial sea of the United States is measured.

Fishing means any activity, other than scientific research conducted by a scientific research vessel, which involves—

(a) The catching, taking, or harvesting of fish;

(b) The attempted catching, taking, or harvesting of fish;

(c) Any other activity which can reasonably be expected to result in the catching, taking, or harvesting of fish; or

(d) Any operations at sea in support of, or in preparation for, any activity described in paragraph (a), (b), or (c) of this definition.

Fishing vessel means any vessel, boat, ship, or other craft which is used for, equipped to be used for, or of a type which is normally used for—

(a) Fishing; or

(b) Aiding or assisting one or more vessels at sea in the performance of any activity relating to fishing, including, but not limited to, preparation, supply, storage, refrigeration, transportation, or processing.

Magnuson Act means the Magnuson Fishery Conservation and Management Act, as amended (16 U.S.C. 1801 *et seq.*)

Operator, with respect to any vessel, means the master or other individual on board and in charge of that vessel.

Owner, with respect to any vessel, means—

(a) Any person who owns that vessel in whole or in part;

(b) Any charterer of the vessel, whether bareboat, time or voyage; or

(c) Any person who acts in the capacity of a charterer, including, but not limited to, parties to a management agreement, operating agreement, or other similar arrangement that bestows control over the destination, function, or operation of the vessel; or

(d) Any agent designated as such by any person described in paragraph (a), (b), or (c) of this definition.

Person means any individual (whether or not a citizen of the United States), corporation, partnership, association, or other entity (whether or not organized or existing under the laws of any State), and any Federal, State, local, or foreign government or any entity of any such government.

Powerhead means any device with an explosive charge, usually attached to a speargun, spear, pole, or stick, which fires a projectile upon contact.

Regional Director means the Regional Director, or a designee, Southeast Region, National Marine Fisheries Service, Duval Building, 9450 Koger Boulevard, St. Petersburg, Florida 33702; telephone 813–893–3141.

Secretary means the Secretary of Commerce, or a designee.

South Atlantic means that portion of the FCZ along the Atlantic coastal states south of the Virginia-North Carolina border to the boundary between the Gulf of Mexico and the Altantic Ocean. The boundary between the Gulf of Mexico and the Atlantic Ocean begins at the intersection of the outer boundary of the FCZ and 83° W. longitude, proceeds, north to 24° 35′ N. latitude (Dry Tortugas), east to Marquesas Key, then through the Florida Keys to the mainland.

Total length means the distance from the tip of the head (snout) to the furthermost tip of the tail (caudal fin).

U.S. fish processors means facilities located within the United States for, and vessels of the United States, used for or equipped for, the processing of fish for commercial use or consumption.

U.S.-harvested fish means fish caught, taken, or harvested by vessels of the United States within any foreign or domestic fishery regulated under the Magnuson Act.

Vessel of the United States means—

(a) Any vessel documented under the laws of the United States;

(b) Any vessel numbered in accordance with the Federal Boat Safety Act of 1971 (46 U.S.C. 1400 *et seq.*) and measuring less than five net tons; or

(c) Any vessel numbered under the Federal Boat Safety Act of 1971 (46 U.S.C. 1400 *et seq.*) and used exclusively for pleasure.

§ 646.3 Relationship to other laws.

(a) Persons affected by these regulations should be aware that other Federal and State statutes and regulations may apply to their activities.

(b) Certain responsibilities relating to data collection, issuance of permits, and enforcement may be performed by authorized State personnel under a cooperative agreement entered into by the State, the U.S. Coast Guard, and the Secretary.

(c) These regulations are intended to apply within the FCZ portion of the following National Marine Sanctuaries and National Park unless regulations establishing such Sanctuaries or Park prohibit their application:

(1) Looe Key National Marine Sanctuary (15 CFR Part 937).

(2) Key Largo Coral Reef Marine Sanctuary (15 CFR Part 929).

(3) Biscayne National Park (Title 16 U.S.C. 410gg).

(4) Gray's Reef National Marine Sanctuary (15 CFR Part 938).

(5) Monitor Marine Sanctuary (15 CFR Part 924).

§ 646.4 Catch monitoring.

Data will be collected by authorized statistical reporting agents from a sample of commercial and recreational catch for YPR analysis. Those fishermen and dealers selected by the Center Director must make their fish available for inspection by those agents.

§ 646.5 Gear identification. [Reserved]

§ 646.6 Prohibitions.

It is unlawful for any person to—

(a) Refuse to make fish available for inspection when requested to do so by an authorized statistical reporting agent, as specified in § 646.4.

(b) Pull or tend fish traps except during the hours specified in § 646.20(a);

(c) Tend, open, pull, or otherwise molest or have in one's possession aboard a fishing vessel another person's fish traps except as provided in § 646.20(b);

(d) Possess in or harvest from the FCZ red snapper, yellowtail snapper, red grouper, or Nassau grouper under the minimum size specified in § 646.21(a);

(e) Possess in or harvest from that portion of the FCZ south of 35° 15′ N. latitude (Cape Hatteras, North Carolina)

black sea bass under the minimum size specified in § 646.21(b);

(f) Possess in the FCZ any fish in the snapper-grouper fishery without the heads and fins intact as specified in § 646.21(c);

(g) Land any fish in the snapper-grouper fishery, taken from the FCZ, without the heads and fins intact as specified in § 646.21(c);

(h) Fish for fish in the snapper-grouper fishery with explosives or poisons as provided in § 646.22(a)(1) and (2);

(i) Fish for jewfish with the fishing gear specified in § 646.22(a)(3);

(j) Fish for fish in the snapper-grouper fishery in the FCZ with trawl nets and fish traps except as specified in § 646.20 (a) and (b) or § 646.22(b);

(k) Possess, have custody or control of, ship, transport, offer for sale, sell, purchase, import, land, or export any fish or parts thereof taken or retained in violation of the Magnuson Act, this part, any other regulation or any permit issued to a foreign vessel under the Magnuson Act;

(l) Refuse to permit an authorized officer to board a fishing vessel subject to such person's control for purposes of conducting any search or inspection in connection with the enforcement of the Magnuson Act, this part, or any other regulation or permit issued under the Magnuson Act;

(m) forcibly to assault, resist, oppose, impede, intimidate, threaten, or interfere with any authorized officer in the conduct of any search or inspection described in paragraph (1) of this section;

(n) Resist a lawful arrest for any act prohibited by this part;

(o) Interfere with, delay, or prevent, by any means, the apprehension or arrest of another person, knowing that such other person has committed any act prohibited by this part;

(p) Transfer directly or indirectly, or attempt to so transfer, any U.S.-harvested fish to any foreign fishing vessel, while such foreign vessel is in the FCZ, unless the foreign fishing vessel has been issued a permit under § 204 of the Magnuson Act which authorized the receipt by such vessel of the U.S.-harvested fish of the species concerned.

(q) Violate any other provision of this part, the Magnuson Act, or any regulation or permit issued under the Magnuson Act.

§ 646.7 Facilitation of enforcement.

(a) *General.* The owner or operator of any fishing vessel subject to this part must immediately comply with instructions issued by an authorized officer to facilitate safe boarding and inspection of the vessel, its gear, equipment, logbook, permit, and catch for purposes of enforcing the Magnuson Act and this part.

(b) *Signals.* Upon being approached by a U.S. Coast Guard vessel or aircraft, or other vessel or aircraft authorized to enforce the Magnuson Act, the operator of a fishing vessel must be alert for signals conveying enforcement instructions. The following signals extracted from the International Code of Signals are among those which may be used—

(1) "L" meaning "You should stop your vessel instantly."

(2) "SQ3" meaning "You should stop or heave to; I am going to board you."

(3) "AA AA AA etc." which is the call to an unknown station, to which the signaled vessel should respond by identifying the vessel by radio, visual signals or illuminating the vessel identification number, and

(4) "RY-CY" meaning "You should proceed at slow speed. A boat is coming to you."

(c) *Boarding.* A vessel signaled to stop or heave to for boarding must—

(1) Stop immediately and lay to or maneuver in such a way as to permit the authorized officer and his party to come aboard;

(2) Provide a safe ladder, enough light, and a safety line when necessary or requested by the authorized officer to facilitate the boarding and inspection; and

(3) Take such other actions as necessary to ensure the safety of the authorized officer and his party to facilitate the boarding.

§ 646.8 Penalties.

Any person or fishing vessel found to be in violation of this part will be subject to the civil and criminal penalty provisions and forefeiture provisions of the Magnuson Act, and to 50 CFR Part 620 (Citations), 50 CFR Part 621, and 15 CFR Part 904 (Civil Procedures), and other applicable Federal law.

Subpart B—Management Measures

§ 646.20 Harvest limitations.

(a) Fish traps may be pulled or tended only during the period beginning one hour before official sunrise to one hour after official sunset in the South Atlantic portion of the FCZ south of 28° 24.5' N. latitude (Cape Canaveral, Florida).

(b) Fish traps may be tended or pulled only by persons (other than authorized officers) aboard the fish trap owner's vessel(s), or aboard another vessel if such vessel has on board written consent of the fish trap owner.

§ 646.21 Size limitations.

(a) The minimum size limit for the harvest or possession in the FCZ of red snapper, yellowtail snapper, red grouper, and Nassau grouper is 12 inches total length.

(b) The minimum size for the harvest or possession in the FCZ of black sea bass south of Cape Hatteras, North Carolina is eight inches total length.

(c) All fish in the snapper-grouper fishery subject to minimum size limits specified in this section may be possessed in the FCZ or landed, if harvested from the FCZ, only with the head and fins intact.

§ 646.22 Gear limitations.

(a) (1) Explosives (except explosives in powerheads) may not be used to fish for fish in the snapper-grouper fishery.

(2) Poisons may not be used to fish for fish in the snapper-grouper fishery except as authorized by permit under State or Federal law.

(3) Powerheads, spearguns, pole spears or Hawaiian slings and spears may not be used to fish for jewfish.

(b) (1) Fish traps must have a degradable panel or a door attached with degradable fasteners or material such as jute or sisal twines which normally deteriorate within 42 days. The opening must be at least as large as the entry ports.

(2) Effective (insert date 1 year after effective date of final rule), fish traps must have a minimum mesh size of 1×2 inches or 1.5-inch hexagonal (the distance between parallel sides).

(3) Effective (insert date-1 year after effective date of final rule), trawl nets targeting fish in the snapper-grouper fishery (25 percent or more of the fish on board by weight are fish in the snapper-grouper fishery) must have a minimum stretched mesh size of 4 inches. Shrimp trawls, calico scallop trawls, and rock shrimp trawls are specifically exempt from this requirement.

(4) Fish traps may not be placed shoreward of the 100-foot contour in that portion of the South Atlantic FCZ south of 25° 35.5' N. latitude (Fowey Rocks Light, Florida). Fish traps so deployed will be considered unclaimed or abandoned property and may be disposed of in any appropriate manner by the Secretary (including an authorized officer).

§ 646.23 Specifically authorized activities.

The Secretary may authorize for the acquisition of information and data, activities which are otherwise prohibited by these regulations.

Notices

Federal Register
Vol. 48, No. 113
Friday, June 10, 1983

This section of the FEDERAL REGISTER contains documents other than rules or proposed rules that are applicable to the public. Notices of hearings and investigations, committee meetings, agency decisions and rulings, delegations of authority, filing of petitions and applications and agency statements of organization and functions are examples of documents appearing in this section.

DEPARTMENT OF AGRICULTURE

Forest Service

Pacific Southwest Region; Intent to Reevaluate Roadless Areas in the Pacific Southwest Region

In January 1979, the Forest Service issued a national environmental impact statement documenting the results of a review of 62 million acres of roadless and undeveloped areas within the 190 million acre National Forest system. The purpose of the roadless area review and evaluation (RARE II) was to determine which areas were suitable for wilderness and which should be used for other purposes.

In the Pacific Southwest Region RARE II dealt with over 6 million acres located in California only. About 983,000 acres were recommended for wilderness; 2,643,000 acres were recommended for further planning; and 2,395,000 acres were recommended for nonwilderness.

In 1979 the State of California challenged the adequacy of the National RARE II Environmental Impact Statement as the basis for decisions to manage 46 areas in California for other than wilderness. In October 1982, the United States Court of Appeals for the Ninth Circuit affirmed a lower court decision that the RARE II Environmental Impact Statement was inadequate. Although the decision applied specifically to only the 46 roadless areas in California, it sets binding precedent in any Federal District Court in the Ninth Circuit.

Because of the October 1982 court decision, National Forest roadless areas studied for wilderness potential during RARE II will be reevaluated. The reevaluation will be done as part of the land and resource management plans now being developed for each of the 18 Forests in the Pacific Southwest Region of the USDA-Forest Service. These plans are scheduled for completion by 1985.

This Notice is being issued because, contrary to earlier regulations (issued 9/30/82), a proposed revision to 36 CFR 219.17 (issued 4/18/83) will allow further evaluation of RARE II wilderness and non-wilderness areas during the Forest planning process. We are beginning public participation, data collection, and analysis pending the final rule.

Detailed information on the roadless areas and public involvement in the reevaluation process will be forthcoming from individual National Forests in California.

The responsible official is Zane G. Smith, Jr., Regional Forester of the Pacific Southwest Region.

For further information on this subject, contact: Joyce Muraoka, Regional Forest Planning Coordinator, Pacific Southwest Region, 630 Sansome Street, San Francisco, California 94111, Area Code 415–556–2687.

Dated: June 2, 1983.

Warren Davies,

Deputy Regional Forester, Pacific Southwest Region.

BILLING CODE 3410–11–M

Rural Electrification Administration

Tri-County Electric Association, Inc.; Environmental Impact

AGENCY: Rural Electrification Administration, USDA.

ACTION: Notice of Findings of No Significant Impact.

SUMMARY: Notice is hereby given that the Rural Electrification Administration (REA), pursuant to the National Environmental Policy Act of 1969, the Council on Environmental Quality Regulations (40 CFR Part 1500) and REA's Bulletin 20–21:320–21, Environmental Policies and Procedures, has made Findings of No Significant Impact with respect to the proposed financing assistance to Tri-County Electric Association, Inc., (Tri-County) of Sundance, Wyoming, for the construction of 69 kV transmission facilities in Crook and Campbell Counties, Wyoming and Lawrence County, South Dakota.

FOR FURTHER INFORMATION CONTACT: REA's Findings of No Significant Impact and Environmental Assessments and Tri-County's Borrower's Environmental Report (BER) may be reviewed at or obtained from Mr. William E. Davis, Director, Western Area—Electirc, Room 3304, South Agriculture Building, Washington, D.C. 20250, telephone: (202) 382–6848, or Mr. Waren H. Fraser, Manager, Tri-County Electric Association, Inc., Box 930, Sundance, Wyoming 82729, telephone: (307) 283–3531, during regular business hours.

SUPPLEMENTARY INFORMATION: REA, in connection with a request for financing assistance, has reviewed the BER submitted by Tri-County and has determined that it represeents an accurate assessment of the proposed projects. The proposed projects include: (1) Approximately 48.6 km (30.4 mi) of 69 kV transmission line from the Teckla Substation to the Conoco Uranium Mine site in Campbell County, Wyoming; (2) approximately 45.6 km (28.5 mi) of 69 kV transmission line from north of Gilette to the Gulf Norfolk Coal Mine in Campbell County, Wyoming; (3) approximately 37 km (23 mi) of 69 kV Transmission line from Hulett to Homestake in Crook County, Wyoming, and (4) approximately 31.2 km (19.5 mi) of 69 kV transmission line from Spearfish, to Aladdin in Crook County, Wyoming and Lawrence County, South Dakota.

The BER and Environmental Assessment adequately consider potential impacts of the proposed projects on resources including threatened and endangered species, important farmlands, cultural resources, wetlands, and floodplains.

Alternatives examined include no action, energy conservation, altertnative connecting points, and alternative routes in Crook and Campbell Counties, Wyoming, and alternative substation sites. After reviewing these alternatives, REA determined that the proposed projects are acceptable alternatives because they meet Tri-County's needs with a minimum of adverse impacts.

Based upon the BER and other support documents, REA prepared Environmental Assessments and Findings of No Significant Impact concerning the proposed construction. It is REA's view that the propsed financing assistance would not be a major Federal action that will affect significantly the quality of the human environment.

In accordance with REA's Bulletin 20–21:320–21, dated January 21, 1980, Tri-County advertised the availability of the

BER in local newspapers. Comments were solicited and the public was given 30 days to reply. No comments were received.

BILLING CODE 3410-15-M

Soil Conservation Service

Carey Lake Water-Based Recreation RC&D Measure, Washington; Environmental Impact

AGENCY: Soil Conservation Service, USDA.

ACTION: Notice of a finding of no significant impact.

SUMMARY: Pursuant to Section 102(2)(C) of the National Environmental Policy Act of 1969; the Council on Environmental Quality Guidelines (40 CFR Part 1500); and the Soil Conservation Service Guidelines (7 CFR Part 650); the Soil Conservation Service, U.S. Department of Agriculture, gives notice that an environmental impact statement is not being prepared for the Carey Lake Water-Based Recreation RC&D Measure, Kittitas County, Washington.

FOR FURTHER INFORMATION CONTACT: Mr. Lynn A. Brown, State Conservationist, Soil Conservation Service, Room 360 U.S. Courthouse, Spokane, Washington 99201, telephone 509–456–3711.

SUPPLEMENTARY INFORMATION: The environmental assessment of this Federally assisted action indicates that the project will not cause significant local, regional, or national impacts on the environment. As a result of these findings, Mr. Lynn A. Brown, State Conservationist, has determined that the preparation and review of an environmental impact statement are not needed for this project.

The measure concerns a plan for the installation of basic facilities for a water-based recreation development. The planned works of improvement include a pedestrian trail, parking lot, picnic area with tables, charcoal pits, trash cans, vault-type sanitary facilities, access road, buffer trees, play areas, sand beach area, and raft beaching area.

The Finding of No Significant Impact (FONSI) has been forwarded to the Environmental Protection Agency and to various Federal, State, and local agencies and interested parties. A limited number of copies of the FONSI are available to fill single copy requests at the above address. Basic data developed during the environmental assessment are on file and may be reviewed by contacting Lynn A. Brown.

No administrative action on implementation of the proposal will be taken until 30 days after the data of this publication in the **Federal Register.**

BILLING CODE 3410-16-M

Drainage District #7 RC&D Measure, Butler County, Missouri; Finding of No Significant Impact

AGENCY: Soil Conservation Service, USDA.

ACTION: Notice of a Finding of No Significant Impact.

SUMMARY: Pursuant to Section 102(2)(C) of the National Environmental Policy Act of 1969; the Council on Environmental Quality Guidelines (40 CFR Part 1500); and the Soil Conservation Service Guidelines (7 CFR Part 650); the Soil Conservation Service, U.S. Department of Agriculture, gives notice that an environmental impact statement is not being prepared for Drainage District #7 RC&D Measure, Bulter County, Missouri.

FOR FURTHER INFORMATION CONTACT: Paul F. Larson, State Conservationist, Soil Conservation Service, 555 Vandiver Drive, Columbia, Missouri 65202, telephone number 314/875–5214.

SUPPLEMENTARY INFORMATION: The environmental assessment of this federally assisted action indicates that the project will not cause significant local, regional, or national impacts on the environment. As a result of these findings, Paul F. Larson, State Conservationist, has determined that the preparation and review of an environmental impact statement are not needed for this project. The measure concerns critical area treatment. The planned works of improvement include conservation practices such as grade stabilization structures and associated vegetation.

The Notice of a Finding of No Significant Impact (FONSI) has been forwarded to the Environmental Protection Agency and to various federal, state, and local agencies and interested parties. A limited number of copies of the FONSI are available to fill single copy requests at the above address. Basic data developed during the environmental assessment are on file and may be reviewed by contacting Paul F. Larson.

No administrative action on implementation of the proposal will be taken until 30 days after the date of this publication in the **Federal Register.**

BILLING CODE 3410-16-M

Smelterville Critical Area Treatment RC&D Measure, Idaho; Finding of No Significant Impact

AGENCY: Soil Conservation Service, USDA.

ACTION: Notice of a Finding of No Significant Impact.

FOR FURTHER INFORMATION CONTACT: Stanley N. Hobson, State Conservationist, Soil Conservation Service, Room 345, 304 North Eighth, Boise, Idaho 83702, telephone (208) 334–1601.

NOTICE: Pursuant to Section 102(2)(C) of the National Environmental Policy Act of 1969; the Council on Environmental Service Guidelines (7 CFR Part 650); the Soil Conservation Service, U.S. Department of Agriculture, gives notice that an environmental impact statement is not being prepared for the Smelterville Critical Area Treatment RC&D Measure, Shoshone County, Idaho.

The environmental assessment of this federally assisted action indicates that the project will not cause significant local, regional, or national impacts on the environment. As a result of these findings, Stanley N. Hobson, State Conservationist, has determined that the preparation and review of an environmental impact statement are not needed for this project.

Smelterville Critical Area Treatment RC&D Measure will provide adequate vegetative and structural treatment to the Grouse Creek Watershed severely damaged by air pollution. Planned treatments to control the severe erosion problems include debris basins (sediment trays), stream bank stabilization and grass, legume and tree seedings.

The Notice of a Finding of No Significant Impact (FONSI) has been forwarded to the Environmental Protection Agency. The basic data developed during the environmental assessment are on file and may be reviewed by contacting Mr. Stanley N. Hobson. The FONSI has been sent to various Federal, State and local agencies and interested parties. A limited number of copies of the FONSI are available to fill single copy requests at the address on the first page.

Implementation of the proposal will not be initiated until 30 days after the date of this publication in the **Federal Register**.

Applications for Certificates of Public Convenience and Necessity and Foreign Air Carrier Permits Filed Under Subpart Q of the Board's Procedural Regulations; Week Ended June 3, 1983

Subpart Q Applications (see 14 CFR 302.1701 et seq.)

The due date for answers, conforming application, or motions to modify scope are set forth below for each application. Following the answer period the Board may process the application by expedited procedures. Such procedures may consist of the adoption of a show-cause order, a tentative order, or in appropriate cases a final order without further proceedings.

Date filed	Docket no.	Description
June 2, 1981	41518	Jamaica Air Freighters Ltd., c/o David B. Ortman, 304 Capital Gallery East, 600 Maryland Avenue, S.W., Washington, D.C. 20024. Application of Jamaica Air Freighters Ltd., pursuant to Section 402 of the Act and Subpart Q of the Board's Procedural Regulations requests a foreign air carrier permit to provide irregular non-scheduled air services for property and mail between the terminal points Kingston and Montego Bay, Jamaica and the terminal point Miami, Florida; also to conduct various charters under the Board's Regulations. Answers may be filed by June 30, 1983.
June 2, 1983	41519	Pacific Aerolift, Inc., c/o Stephen L. Gelband, Howes, Morella, Gelband & Lamberton, 1010 Wisconsin Avenue NW., Suite 648, Washington, D.C. 20007. Application of Pacific Aerolift, Inc., pursuant to Section 401 of the Act and Subpart Q of the Board's Procedural Regulations requests issuance of a certificate of public convenience and necessity which will authorize it to engage in scheduled and charter interstate and overseas air transportation of property and mail within and among all States of the United States and all Territories and possessions thereof, including, but not limited to, between points in California and Hawaii and Guam, and between Guam and points in the United States Trust Territories and possessions of the Pacific. Conforming Applications, Motions to Modify Scope and Answers may be filed by June 30, 1983.
June 1, 1983	41433	American Airlines, Inc., c/o Alfred V. J. Prather, Prather Seeger Doolittle & Farmer, 1101 Sixteenth Street NW., Washington, D.C. 20036. Amendment No. 1 to the Application of American Airlines, Inc. for a certificate of public convenience and necessity under Section 401 of the Act. (Spokane-Calgary/Edmonton).
June 3, 1983	41385	Colonial Airlines, Inc., c/o Harry A. Bowen, Bowen and Allen, Suite 350, 2020 K Street NW., Washington, D.C. 20006. Amendment No. 1 to the Application of Colonial Airlines, Inc. for a certificate of public convenience and necessity under Section 401(d)(3) of the Act, for interstate and overseas charter air transportation and all-cargo authority.

DEPARTMENT OF COMMERCE

International Trade Administration

[A–433–064]

Railway Track Maintenance Equipment From Austria; Final Results of Administrative Review of Antidumping Finding

AGENCY: International Trade Administration, Commerce.

ACTION: Notice of Final Results of Administrative Review of Antidumping Finding.

SUMMARY: On March 24, 1983, the Department of Commerce published the preliminary results of its administrative review of the antidumping finding on railway track maintenance equipment from Austria. The review covered the only known exporter of this merchandise to the United States, Plasser and Theurer, GmbH, and the period February 1, 1981 through January 31, 1982.

Interested parties were given an opportunity to submit oral or written comments on the preliminary results. We received no comments. Based on our analysis, the final results of review are unchanged from those presented in the preliminary results of review.

EFFECTIVE DATE: June 10, 1983.

FOR FURTHER INFORMATION CONTACT: Al Jemmott or John Kugelman, Office of Compliance, International Trade Administration, U.S. Department of Commerce, Washington, D.C. 20230, telephone: (202) 377–3534/5496.

SUPPLEMENTARY INFORMATION:

Background

On February 17, 1978, the Treasury Department published in the **Federal Register** (43 FR 6937) an antidumping finding with respect to railway track maintenance equipment from Austria. On March 24, 1983, the Department of Commerce ("the Department") published in the **Federal Register** (48 FR 12415–16) the preliminary results of its last administrative review of the finding. The Department has now completed that administrative review.

Scope of the Review

Imports covered by the review are shipments of ballast regulators and tamping machines, two specific types of railway track maintenance equipment. Other types of equipment used in the maintenance of railway track are excluded from this finding. All railway track maintenance equipment is currently classifiable under item 690.2000 of the Tariff Schedules of the United States Annotated.

The review covers the one known exporter of Austrian railway track maintenance equipment to the United States, Plasser and Theurer, GmbH, and the period February 1, 1981 through January 31, 1982. There were no known shipments of this merchandise to the United States during the period and there are no known unliquidated entries.

Final Results of the Review

Interested parties were invited to comment on the preliminary results. The Department received no written comments or requests for a hearing. Based on our analysis, the final results of our review are the same as those presented in the preliminary results of review.

Because there were no shipments during the period and the margin on the last known shipment of this merchandise to the United States was zero percent, the Department shall not require a cash deposit of estimated antidumping duties, as provided for in section 353.48(b) of the Commerce regulations, on shipments of Austrian railway track maintenance equipment entered, or withdrawn from warehouse, for consumption on or after the date of publication of this notice. This deposit requirement shall remain in effect until publication of the final results of the next administrative review. The Department intends to begin immediately the next administrative review. The Department encourages interested parties to review the public record and submit applications for protective orders, if desired, as early as possible after the Department's receipt of the information during the next administrative review.

This administrative review and notice are in accordance with section 751(a)(1) of the Tariff Act of 1930 (19 U.S.C. 1675(a)(1)) and § 353.53 of the Commerce regulations (19 CFR 353.53).

Dated: June 2, 1983.

Gary N. Horlick,

Deputy Assistant Secretary for Import Administration.

[FR Doc. 83–15624 Filed 6–9–83; 8:45 am]

BILLING CODE 3510–25–M

Minority Business Development Agency

Minority Business Development Center; Solicitation of Applications

AGENCY: Minority Business Development Agency, Commerce.

ACTION: Notice.

SUMMARY: The Minority Business Development Agency (MBDA) announces that it is soliciting applications under its Minority Business Development Center (MBDC) program to operate one project for a 12-month period beginning October 1, 1983 in the Chicago SMSA. The cost of the project is estimated to be $369,600. The maximum Federal participation amount is $314,160. The minimum amount required for non-Federal participation is $55,440. The award number will be 05–10–83007–01.

Applicants shall be required to contribute at least 15% of the total program costs through non-Federal funds. Cost-sharing contributions can be in the form of cash contributions, fee for services or in-kind contributions.

The same applicant cannot be the recipient of more than one Minority Business Development Center (MBDC) award for the Chicago SMSA.

DATE: *Closing date:* July 5, 1983.

ADDRESS: Chicago Regional Office, Minority Business Development Agency, 55 East Monroe, Suite 1440, Chicago, Illinois 60603.

FOR FURTHER INFORMATION CONTACT: Jessie Deloch. Telephone: (312) 353–0182.

SUPPLEMENTARY INFORMATION:

A. Scope and Purpose of this Announcement

Executive Order 11625 authorizes MBDA to fund projects which will provide technical and management assistance to eligible clients in areas related to the establishment and operation of businesses. The MBDC program is specifically designed to

assist those minority businesses that have the highest potential for success. In order to accomplish this, MBDA supports MBDC programs that can: coordinate and broker public and private sector resources on behalf of minority individuals and firms; offer them a full range of management and technical assistance; and serve as a conduit through which information and assistance to and about minority businesses are funneled.

B. Eligible Applicants

Awards shall be open to all individuals, non-profit organizations, for profit firms, local and state governments, American Indian tribes and educational institutions.

C. Evaluation Process

All proposals received as a result of this announcement will be evaluated by MBDA review panel.

D. Evaluation Criteria for Minority Business Development Center Applications

The evaluation criteria is designed to facilitate an objective evaluation of competitive applications for the Minority Business Development Center program.

MBDA reserves the right to reject any or all applications, including the application receiving the highest evaluation, and will exercise this right when it is determined that it is in the best interest of the Government to do so (e.g., the apparent successful applicant has serious unresolved audit issues from current or previous grants, contracts or cooperative agreements with an agency of the Federal Government).

Evaluation of proposals will employ the following criteria.

I. *Capability and Experience of Firm/Staff.*—Provide information that demonstrates the organization's capabilities and prior experience in addressing the needs of minority business individuals and firms. Provide information that demonstrates the staff's cabilities and prior experiences in providing management and technical assistance to minority individuals and firms. Indicate previous experience in MBE community to be served in terms of: inventorying resources and opportunities; the brokering thereof; and providing management and technical assistance.

The following are key factors to be considered in this section:

Firm:

—the organization's receptivity in the MBE community to be served i.e., business contracts in the public and private sector; leadership responsibilities; and experience in assisting MBE business persons and firms. (References from clients assisted are pertinent.)
—background credentials and reference for the owners of the organization and a capability statement of what the organization can do.
—knowledge of the geographic area to be served in terms of the needs of minority businesses and past ongoing relationships with local, public and private—entities that can possibly enhange the BDC program effort—i.e., chambers of commerce, trade associations, venture capital organizations, banks, SBA, HUD, state, city and county government agencies, etc.

Staff

—List personnel to be used. Indicate their salaries, educational level and previous experience. Provide resumes for all professional staff personnel.
—Demonstrate competence among staff to effectuate mergers, acquisitions, spin-offs and joint-ventures.
—Provide organizational chart, job descriptions and qualification standards involving all professional staff persons to be utilized on the project.
—If any contractors are to be utilized, identify and indicate areas and level of experience. *Primary consideration will be given to inhouse capability.*

Note.—All contracting proposed should be in accordance with procurement standards in Attachment O of OMB Circulars A–110 or A–102.

II. *Techniques and Methodology*—specify plans for achieving the goals and objectives of the project. This section should be developed by using the outline of the Work Requirements and the MBDC responsibility as *guides* and will become part of the award document. Include start-up plan and example of work plan format. Fully explain the procedures for: Outreach, screening, assisting and monitoring clients; maintaining the profile inventory of minority businesses; and brokering of new business ownership, market and capital opportunities and prevention of business failures. In summary, address how, when and where work will be done and by whom. Include level of performance.

III. Resources—address technical and administrative resources, i.e., computer facilities, voluntary staff time and space; and financial resources in terms of meeting MBDA's 15% cost-sharing requirement and including a fee for services for assistance provided clients. A fee for services in the amount of 10% of the cost of assistance will be charged to all clients receiving management and technical assistance.

Cost-sharing is that portion of project costs not borne by the Federal Government. The composition and amount of cost-sharing are key factors that will be considered in determining the merit of this section. The cost-sharing requirement can be met through the following order or priority: (1) cash contributions; (2) fee for services; and (3) in-kind contributions.

A. *Cash contribution*—means cash that is contributed or donated by the recipient, and other non-Federal sources, i.e., public agencies and institutions, private organizations, corporations and individuals.

B. *Fee for services*—is a charge to a client for assistance provided by the MBDC for M&TA and/or SCS.

C. *In-Kind contribution*—represents the value of non-cash contributions provided by the recipient and other non-Federal sources. The order of priority for in-kind contributions are: high technology systems to be utilized to achieve program objectives; top level staff personnel and real and personal property donated by other public agencies, institutions and private organizations. Property purchased with Federal funds will not be considered as the recipient's in-kind contribution. Under no circumstances can the in-kind contribution exceed 50% of the total non-Federal contribution.

IV. *Costs*—demonstrate in narrative format the costs being proposed will give the minority business client and the government the most effective program possible in terms of quality, quantity, timeliness and efficiency.

Include the principal costs involved for achieving work plan under Cooperative Agreement by completing Part III—the Budget Information Section of the Request for Application.

Provide cost-sharing plan information in terms of methodology and format for billing the costs of management and technical assistance and specialized consulting services to clients.

Total project cost will be evaluated in terms of:

—Clear explanations of all expenditures proposed, and
—the extent to which the applicant can leverage Federal program funds and operate with *economy* and *efficiency*.

In conclusion, the applicant's schedule for start of the MBDC operation should be included in Part II. Part II will be known as the applicant's plan of operation and will be incorporated into the Cooperative Agreement Award.

A detailed justification of all proposed costs is required for Part III and each item must be fully explained.

The failure to supply information in any given category of the criteria will result in the application being considered non-responsive and dropped from competitive review.

All information submitted is subject to verification by MBDA.

E. Disposition of Proposals.

Notification of awards will be made by the Grants Officer, U.S. Department of Commerce (DOC) Organizations whose proposals are unsuccessful will be advised by MBDA, DOC.

F. Proposal Instructions and Forms.

This program is subject to OMB circular A–95 requirements.

Questions concerning the preceding information, copies of application forms, and applicable regulations can be obtained at the above address.

Nothing in this solicitation shall be construed as committing MBDA to divide available funds among all qualified applicants.

G. A pre-application conference to assist all interested applicants will be held at the Dirksen Federal Building, 219 South Dearborn Street, Room 1220, Chicago, Illinois on June 17, 1983 at 1:00 p.m.

BILLING CODE 3510–22–M

Mid-Atlantic Fishery Management Council and its Scientific and Statistical Committee; Public Meetings

AGENCY: National Marine Fisheries Service, NOAA, Commerce.

SUMMARY: The Mid-Atlantic Fishery Management Council, established by Section 302 of the Magnuson Fishery Conservation and Management Act (Pub. L. 94–265, as amended), has established a Scientific and Statistical Committee (SSC). The Council and its SSC will hold separate public meetings as follows:

Council

Will meet to discuss the Surf Clam/Ocean Quahog Fishery Management Plan (FMP), the Bluefish FMP, status of other FMPs, and discuss other fishery management and administrative matters, convening at approximately 8 a.m., on Wednesday, July 13, 1983, and adjourning at approximately 4 p.m., on Thursday, July 14, 1983.

SSC

Will meet to discuss data needs for FMPs and discuss other fishery management matters, convening at approximately 10 a.m., on Wednesday, July 6, 1983, and adjourning at approximately 4 p.m. The separate Council and SSC meetings will both take place at the Best Western Airport Inn, Philadelphia International Airport, Philadelphia, Pennsylvania. The agendas for the meetings may be rearranged or changed or the meetings lengthened or shortened depending upon progress on the agenda items.

FOR FURTHER INFORMATION CONTACT: Mid-Atlantic Fishery Management Council, Room 2115—Federal Building, 300 South New Street, Dover, Delaware 19901, Telephone: (302) 674–2331.

Dated: June 3, 1983.

Yvonne D. Barnes,

Departmental Committee Management Analyst, Office of the Secretary.

[FR Doc. 83–15825 Filed 6–9–83; 8:45 am]

BILLING CODE 3510–CW–M

[Order No. 41–1; D.O.O. Reference 10–3, 40–1]

Organization and Function Order; International Trade Administration

Effective Date: May 2, 1983.

Part I. Effect on Other Orders

This order supersedes ITA Organization and Function Order 41–1 of February 15, 1982, as amended (47 FR 14205, 47 FR 19570, 47 FR 25885, 47 FR 46124).

Part II. Purpose, Scope, and Principal Organization

Section 1. Purpose.

.01 This order prescribes the internal organization and assignment of functions within the International Trade Administration (ITA). Department

Organization Order 40–1 prescribes the principal organization structure of ITA.

.02 This order also delegates authorities from the Under Secretary for International Trade to the Deputy Under Secretary for International Trade, the Director General of the U.S. and Foreign Commercial Services, and the Assistant Secretaries for Trade Development, Trade Administration and International Economic Policy. Department Organization Order 10–3 prescribes the scope of authority of the Under Secretary.

Section 2. Organization and Line of Authority.

.01 The internal organization structure line of authority of ITA is depicted in the attached chart.[1]

.02 *The Under Secretary for International Trade.*

a. The Under Secretary for International Trade is the head of ITA and determines policy, directs the programs, and is responsible for all activities of ITA. The Under Secretary coordinates all issues and programs concerning trade administration, international trade and commercial policy and trade development; and, in the absence of the Secretary of Commerce, represents the Department on the Trade Policy Committee, as ex-officio member of the Board of the Export-Import Bank of the United States and, as assigned, serves on all other Secretarial-level boards, committees or panels of which the primary focus is international trade.

b. The Under Secretary is assisted by the following officials in carrying out his responsibilities:

The Deputy Under Secretary for International Trade
The Director General of the U.S. and Foreign Commercial Services
The Assistant Secretary for International Economic Policy
The Assistant Secretary for Trade Administration
The Assistant Secretary for Trade Development

Part III. The Deputy Under Secretary for International Trade

Section 1. Delegation of Authority.

.01 Subject to such policies, directives, and delegations of authority as may be issued by the Secretary of Commerce, and the Under Secretary, and in accordance with applicable Department Organization Orders and Department Administrative Orders, the Deputy Under Secretary for International Trade is hereby delegated the authorities of the Under Secretary for International Trade as necessary to provide for all administrative management and public affairs activities and direct such activities for all organizational elements in the International Trade Administration.

.02 Except as otherwise provided, the Deputy Under Secretary for International Trade may redelegate this authority, subject to such conditions in the exercise of such authority as he or she may prescribe.

Section 2. Organization and Functions.

The *Deputy Under Secretary for International Trade* is the principal deputy to the Under Secretary; performs such duties as the Under Secretary may assign; performs the functions of the Under Secretary in the latter's absence; and is responsible for the day-to-day management of ITA.

The Office of the Deputy Under Secretary includes the *Planning and Evaluation Staff* which identifies issues or problems requiring the attention of the Deputy Under Secretary or coordination between program areas; monitors and coordinates the preparation of studies, reports, Congressional testimony and other items addressing these issues; directs, coordinates and monitors ITA participation in interagency staff activity and represents ITA in this activity when appropriate; develops and reviews policy options and recommendations on issues when requested by the Deputy Under Secretary.

The Office of the Deputy Under Secretary also includes the *Congressional Affairs Staff* which provides Congressional liaison for ITA in coordination with the Assistant Secretary for Congressional and Intergovernmental Affairs.

The Deputy Under Secretary carries out these functions through:

.01 The *Director of Administration* who is the principal advisor to the Under Secretary and the Deputy Under Secretary on management policy for the International Trade Administration. The Office of the Director includes the *Information Projects Staff* which manages text processing for ITA; manages the development of an Administrative Management Information System; develops and administers Working Capital Fund Service Agreements; and coordinates ITA participation in the Secretarial SPO process. The Director of Administration directs the following offices:

a. The *Office of Personnel* develops and administers, for Civil Service personnel, personnel management programs including recruitment, placement, employee development, classification, labor-management relations, equal employment opportunity, and employee relations; conducts the ITA security program; performs the safety function for ITA; provides paymaster services; and provides liaison with its counterpart office at the Department level.

b. The *Office of Management and Systems* provides management, organization and systems analysis, including management studies and surveys and organizational planning studies; coordinates ADP systems development; performs the committee management, directives management, records management, forms management, correspondence management and reports management functions for ITA; coordinates GAO and Departmental audits; coordinates activity under the Freedom of Information Act and the Privacy Act of 1974; operates the ITA Secretariat; and provides liaison with its counterpart offices at the Department level and with the Office of Inspector General.

c. The *Office of Budget* formulates, presents, executes, and assesses program effectiveness of the ITA budget; effects financial and budgetary controls; prepares budget reports; and provides liaison with its counterpart office at the Department level.

.02 The *Director, Office of Public Affairs* who advises on all public affairs and information service matters in coordination with the Departmental Director of Public Affairs; provides ITA centralized information services, conducts and is responsible for all publications programs, consonant with the provisions of Department Organization Order 20–9; provides speech writing and scheduling services; coordinates all audiovisual, exhibit, and advertising activities; maintains liaison with its cpunterpart offices at the Department level and with the news and trade media, consonant with provisions of Department Organization Order 15–3; and publishes *Business America* magazine.

Part IV. The Director General of the U.S. and Foreign Commercial Services

Section 1. Delegation of Authority.

.01 Pursuant to the authority delegated to the Under Secretary by the Secretary of Commerce, and subject to such policies and directives as the Under Secretary may prescribe, the Director General of the U.S. and Foreign Commercial Services is hereby delegated the authority of the Under Secretary under:

a. The Act of February 14, 1903, as amended, (15 U.S.C. 1512 *et seq.*; 15

[1] Filed as part of the original document.

U.S.C. 171 *et seq.*) to foster, promote and develop the foreign and domestic commerce of the United States;

b. The trade promotion and commercial functions transferred to the Secretary from the Department of State or the Secretary of State by section 5(b)(1) of Reorganization Plan No. 3 of 1979, and by section 1–104 of Executive Order 12188 of January 2, 1980, as amended;

c. The Foreign Service Act of 1980 (22 U.S.C. 3901 *et seq.*), and such laws the exercise of which are authorized to the Secretary under section 5(b)(2) of Reorganization Plan No. 3 of 1979 and by section 1–104 of Executive Order 12188 of January 2, 1980, as amended;

d. Executive Order 10978 of December 5, 1961, regarding the Presidential "E" Award, "E" Certificate of Service, and "E Star" Award, except final selection of recipients;

e. Chapter 23 of Title 15, United States Code, which pertains to a clearinghouse for technical information, as is necessary to carry out assigned reponsibilities dealing with the preparation and dissemination of business and international economic information; and

f. Section 2(8) of the Small Business Act, as amended (15 U.S.C. 637(e)) relating to obtaining and publishing notices of U.S. government procurement.

.02 Except as otherwise provided, the Director General of the U.S. and Foreign Commercial Services may redelegate the above authorities, subject to such conditions in the exercise of such authorities as he or she may prescribe.

Section 2. Organization and functions.

The Director General of the U.S. and Foreign Commercial Services (the "Director General") serves as visible spokesman for the U.S. and foreign Commercial Services, notably with business, particularly with small and medium-sized firms, and other external constituencies; provides management processes and management support functions for the Foreign Commercial Service (FCS) and the U.S. Commercial Service (USCS); coordinates the appropriate functions with the Assistant Secretary for International Economic Policy (and the regional Deputy Assistant Secretaries) for specific FCS country program and supervisory purposes, with the Assistant Secretary for Trade development (and the Deputy Assistant Secretary for Export Development) for USCS program supervision purposes, and with the Assistant Secretary for Trade Administration (and the appropriate Deputy Assistant Secretaries) for specific program support; develops, in coordination with the Department of State, and administers personnel management programs for Foreign Service and Foreign Service National (FSN) employees of the FCS, including recruitment and placement, employee development, classification, labor-management relations, equal employment opportunity, employee relations, promotions, career planning and separations, and provides liaison with the Department of State on FCS personnel issues; evaluates the performance of senior FCS and USCS personnel (coordinating with the appropriate line deputy Assistant Secretary who evaluats senior personnel for program purposes); develops and implements a unified personnel and post goal-setting and evaluation process which integrates the activities of the two services with each other and the rest of ITA; develops and manages a country planning process in coordination with the relevant regional and trade program Deputy Assistant Secretaries; administers a system of Foreign Commercial Service posts and U.S. Commercial Service District Offices located in commercial centers throughout the world and the United states, respectively; publishes the *Commerce Business Daily* and direct Federal Procurement and Business Development Conferences, the District Export Councils, Associate Office program, liaison with state and local governments, and the development and implementation of a cooperators program for the FCS with participants from manufacturing and service industries; maintains an export reference room containing information on major foreign projects under consideration by international financial institutions and information on projected opportunities reported by FCS Posts and USCS District Offices, including counseling to users of the facility; assists in the resolution of trade disputes between U.S. sellers and foreign purchasers; directs the E Awards and seminar programs; and carries out emergency preparedness functions through District Office Directors in the Uniform Federal Regional Council cities.

The Director General carries out these functions through:

.01 The *Deputy Assistant Secretary for the U.S. and Foreign Commercial Services* who serves as principal Deputy to the Director General; performs such duties as the Director General may assign; and assumes the duties of the Director General in the latter's absence.

.02 The *Office of Foreign Service Personnel* develops, in coordination with the Department of State, and administers personnel management programs for Foreign Service and Foreign Service National (FSN) emloyees of the FCS, including recruitment, selection, classification and assignment of FCS officers and nationals; monitors FCS personnel records and processing; supports the Department's activities on the Board of the Foreign Service and the Board of Examiners of the Foreign Service; maintains liaison with the Department of State on FCS personnel issues; administers FCS grievance, labor-management relations and EEO programs; provides for the movement of personnel, shipment of household goods, and medical coverage for FCS employees; develops and manages career development and education programs for FCS officers and nationals; and develops and administers the FCS Officer Evaluation System and related selection boards.

.03 The *Office of Planning and Management* analyzes FCS post workload plans (PCAP's) USCS District Office program plans, overall accomplishments against those plans; and, in conjunction with the Office of USCS and FCS Operations, recommends long-term staffing and resource allocations and is responsible for fiscal planning and monitoring; monitors the State Department's shared administrative support policies and represents the FCS on the Foreign Affairs Administrative Support Inter-Agency Council; maintains liaison with State and Commerce Department administrative offices to provide for FCS posts and USCS District Offices, including space, negotiation and management of leased quarters, renovation, supply, and local transportation; participates on the Inter-Agency Allowance Committee to determine appropriate overseas allowances; cooperates with Commerce and State Department security offices to provide policy guidance and support to the FCS in the areas of employment and physical security; develops management reports, briefings and conferences; and develops and maintains operations manuals for the FCS and USCS.

.04 The *Office of FCS Operations* is responsible for developing post commercial action plans and maintaining liaison with the Trade Development, Trade Administration, and regional Deputy Assistant Secretaries on behalf of the overseas posts; provides day-to-day operational management of the FCS posts in coordination with the regional Deputy Assistant Secretaries and country offices; regularly monitors accomplishments against the country

plans and mediates workload disputes between FCS posts and trade program Deputy Assistant Secretaries; appraises the performance of senior commercial officers on the non-program critical elements of their performance plans (i.e., (1) counseling for small and medium-sized businesses, (2) major multipliers, and (3) administration, training, management and supervision, and external representation) and reviews, for the Director General, the program performance appraisals provided by the regional Deputy Assistant Secretaries; establishes and maintains liaison with other Government agencies, industry consultative groups, and academe to develop techniques for delivering programs to promote U.S. commercial interests abroad; establishers and monitors the use of small business facilities abroad; provides management oversight of the commercial libraries abroad; proposes overseas staffing levels; and, in conjunction with the Office of Planning and Management, makes recommendations to the Director General for allocating FCS resources.

.05 The *Office of USCS Operations* develops District Office Plans and maintains liaison with the relevant deputy assistant secretaries of Trade Development and Trade Administration in order to provide day-to-day guidance and direction to the USCS District Offices through the Regional Managing Directors in conjunction with the program priorities of the relevant deputy assistant secretaries; monitors program operations and accomplishments against the District Office plans and mediates workload conflicts between the Regional Managing Directors and relevant deputy assistant secretaries; appraises the performance of the Regional Managing Directors on the non-program support elements of the performance plans (i.e., (1) counseling for small and medium-sized business, (2) major multipliers, including state and local governments and their regional or national organizations, (3) administration, training, management and supervision) and reviews, for the Director General, the program performance appraisals provided by the relevant deputy assistant secretaries; establishes and maintains liaison with other Government agencies, industry consultative groups, and academe to develop techniques for more effective program implementation; communicates and interprets matters affecting ITA programs and participates in interdepartmental, interagency and private sector meetings which involve program issues related to field program implementation; establishes and monitors a program activity reporting system for District Offices in consultation with the Office of Planning and Management; coordinates the operation of the District Export Council, Associate Office, Federal-State Relations, Federal Procurement Conference and Business Development Conference programs with the District Offices through the Regional managing Directors; coordinates tasking and activities of the field advisory group and ad hoc task forces; and coordinates the operation of the E Awards and seminar programs.

0.6 The *FCS Overseas,* consistent with the country plan, supports and carries out trade promotion activities; develops marketing and commercial intelligence; facilitates U.S. investment; monitors U.S. rights and opportunities created by trade agreements; supports ITA import and export administration activities; and provides representation to host governments on behalf of U.S. business firms. The senior commercial officer in a country coordinates the activities of all ITA personnel in that country.

.07 The *USCS District Offices,* consistent with plans developed in coordination with the relevant ITA deputy assistant secretaries, offer U.S. firms counseling on overseas marketing, technical export information, and guidance on marketing opportunities and strategies; conduct seminars, workshops and conferences; obtain commercial information from U.S. firms for use in planning and evaluating trade programs; and disseminate to the business community information on trade developments, trade policy issues,and technological developments. District Directors in the ten Uniform Federal Regional Council Cities of Boston, New York, Philadelphia, Atlanta, Chicago, Dallas, Kansas City, Denver, San Francisco and Seattle act as designated Regional Emergency Coordinators in accordance with instructions and guidance issued by the Department through the Director General.

.08 The *Commercial Services Information Center* maintains an export reference facility for the use of Government and the business community which includes information on major foreign projects under consideration by international financial institutions, market research and projected opportunities reported by FCS Posts and USCS District Offices; provides information and technical assistance to the users of the facility, including information and counseling on a wide range of export services available from the Government and the private sector; provides assistance through FCS Posts and USCS District Offices to resolve trade disputes between U.S. sellers and foreign purchasers; designs, tests and evaluates training materials and techniques to assist U.S. businesses; provides training for both FCS and USCS personnel in gathering, accessing and disseminating commercial information to the business community; and manages the publication of the *Commerce Business Daily.*

Part V. Assistant Secretary for International Economic Policy

Section 1. Delegation of Authority.

.01 Pursuant to the authority delegated to the Under Secretary by the Secretary of Commerce, and subject to such policies and directives as the Under Secretary may prescribe, the Assistant Secretary for International Economic Policy is hereby delegated the authority of the Under Secretary under:

a. The Act of February 14, 1903, as amended (15 U.S.C. 1512 *et seq.*; U.S.C. 171 *et seq.*), to foster, promote, and develop the foreign and domestic commerce of the United States, and related provisions;

b. Such portions of the foreign Service Act of 1980 (22 U.S.C. 3901 *et seq.*) and such other laws the exercise of which are authorized to the Secretary under section 5(b)(2) of Reorganization Plan No. 3 of 1979 and by section 1–104 of Executive Order 12188 of January 2, 1980, as amended, as are necessary to carry out the Assistant Secretary's responsibility to supervise the program activities of the Foreign Commercial Service; and

c. The China Trade Act of 1922, as amended (15 U.S.C 141 *et seq.*).

.02 Except as otherwise provided the Assistant Secretary may redelegate the above authorities, subject to such conditions in the exercise of such authorities as he or she may prescribe.

Section 2. Organization and Functions.

The *Assistant Secretary for International Economic Policy* carries out programs to promote world trade and to strengthen the international trade and investment position of the United States; examines and develops trade and investment policy recommendations which are bilateral, regional and multilateral in nature (in consultation with units of Trade Development where significant industry sector or product-specific issues are involved); represents the Department on such matters, as assigned; promotes U.S. trade objectives in particular countries and regions

through supervision of the relevant program support activities of the Foreign Commercial Service posts overseas (through the regional Deputy Assistant Secretaries, and in coordination with the Director General); manages bilateral joint commissions and other institutions; implements and monitors the non-sectoral aspects of the Multilateral Trade Negotiations; and coordinates ITA participation arising in the context of the general Agreement of Tariffs and Trade (GATT) and in international organizations such as the Organization for Economic Cooperation and Development (OECD), the United Nations (UN), the UN Conference on Trade and Development (UNCTAD), and others. The Assistant Secretary carries out these functions through:

.01 The *Deputy Assistant Secretary for International Economic Policy* who serves as the principal deputy to the Assistant Secretary, performs such duties as the Assistant Secretary may assign, and performs the functions of the Assistant Secretary during the latter's absence; develops positions on international economic and trade policy issues which are multilateral in nature (in consultation with Trade Development officials when significant sectoral issues are involved); develops positions on outward investment issues and functional trade policy issues which are not country or sector specific; and ensures effective operations by overseeing, with the director General of the U.S. and Foreign Commercial Services, the regional Deputy Assistant Secretaries in the supervision of the program activities of the Foreign Commercial Service.

The DAS manages two offices:

a. The *Office of Policy Coordination* provides support to the Assistant Secretary and the DAS in ensuring policy and program consistency across the various units of International Economic Policy; manages International Economic Policy issues which are crosscutting in nature, including outward investment issues; and develops uniform policies for supervising the program activities of the Foreign Commercial Service.

b. The *Office of Multilateral Affairs* coordinates the development of ITA's positions on non-sectoral international trade and investment policy issues which arise in a multilateral context, including the GATT, OECD, the UN, and other international organizations; as assigned, provides representation to these organizations, and to interagency bodies working on multilateral non-sectoral issues; provides central secretariat services for ITA participation in these international organizations; implements the non-sectoral aspects of the Multilateral Trade Negotiations (MTN); and develops special studies related to the formulation of U.S. trade and investment policy within a multilateral context, with particular emphasis on the reform of the multilateral system of rights and obligations on trade policy matters.

.02 Four regional Deputy Assistant Secretaries as follows:

a. The *Deputy Assistant Secretary for Europe* directs:

1. The Office of the European Community;
2. The Office of Non-EC Europe; and
3. The Office of USSR and Eastern Europe.

b. The *Deputy Assistant Secretary for the Western Hemisphere* directs:

1. The Office of North America;
2. The Office of Central America; and
3. The Office of South America.

c. The *Deputy Assistant Secretary for East Asia and the Pacific* directs:

1. The Office of Japan;
2. The Office of the PRC and Hong Kong; and
3. The Office of the Pacific Basin.

d. The *Deputy Assistant Secretary for Africa, the Near East, and South Asia* directs:

1. The Office of Africa;
2. The Office of the Near East; and
3. The Office of South Asia.

.03 Each of the regional Deputy Assistant Secretaries, for the region and through the country offices, for the countries within his or her region, analyzes and develops recommendations for international economic, trade, and investment policy strategies and objectives and serves as the focal point within the Department for dealing with bilateral and regional economic, investment, and commercial policy issues; formulates positions on economic and commercial policies affecting the region, including preparation and representation at interagency and international meetings and negotiations on bilateral and regional economic issues; monitors information on economic and commercial developments and maintains in-depth commercial and economic expertise on individual countries and the region; and provides geographic supervision of the Foreign Commercial Service country senior officers overseas, and, jointly with the Director General, appraises their performance. The DAS and his/her country offices are the contact point for communications between ITA and FCS overseas posts on country program issues.

Part VI. Assistant Secretary for Trade Administration

Section 1. Delegation of Authority.

.01 Pursuant to the authority delegated to the Under Secretary by the Secretary of Commerce, and subject to such policies and directives as the Under Secretary may prescribe, the Assistant Secretary for Trade Administration is hereby delegated the authority of the Under Secretary under:

a. The Act of February 14, 1903, as amended (15 U.S.C. 1512 *et seq.*; 15 U.S.C. 171 *et seq.*) to foster, promote, and develop the foreign and domestic commerce of the United States, and related provisions;

b. Section 303 and Title VII (including Section 771(1)) of the Tariff Act of 1930 (17 U.S.C. 1303; 1671 *et seq.*) in accordance with section 5(a)(1)(C) of Reorganization Plan No. 3 of 1979 (44 FR 69273, December 3, 1979), relating to: (1) antidumping and countervailinig duties, except that the authority to make final determinations as "Secretary" or "administering authority" may not be redelegated beyond the Assistant Secretary; and (2) determination, as "administering authority" of subsidies on articles of quota cheese under Section 702 of the Trade Agreements Act of 1979 (93 Stat. 269);

c. Sections 514, 515, and 516 of the tariff Act of 1930 (19 U.S.C. 1514, 1515, and 1516) and section 5(a)(1)(D) of Reorganization Plan No. 3 of 1979, insofar as they relate to any protest, petition, or notice of desire to contest described in section 1002(b)(1) of the Trade Agreements Act of 1979;

d. Sections 318, 502 (a) and (b), and 617 of the Tariff Act of 1930 (19 U.S.C. 1318, 1502 (a) and (b), and 1617) and sections 5(a)(1)(E), 5(a)(1)(F), and 5(a)(1)(G), respectively, of Reorganization Plan No. 3 of 1979, insofar as they relate to antidumping and countervailing duty investigations and the assessment of duties;

e. Section 2632(e) of Title 28 of the United States Code and Section 5(a)(1)(H) of Reorganization Plan No. 3 of 1979, insofar as they related to actions taken by the Secretary reviewable under section 516A of the Tariff Act of 1930 (19 U.S.C. 1516a);

f. Section 402 of the Federal Property and Administrative Services Act of 1949, as amended (40 U.S.C. 512), relating to the importation of foreign excess property;

g. The Educational, Scientific and Cultural Materials Importation Act of 1966 (19 U.S.C. 1201);

h. Headnote 6 of schedule 7, part 2, subpart E of the Tariff Schedules of the

United States (19 U.S.C. 1202) pertaining to the allocation of quotas for duty-free importation into the customs territory of the United States of watches and watch movements;

i. The Foreign-Trade Zones Act of 1934, as amended (19 U.S.C. 81a *et seq.*), and the implementing regulations in 15 CFR Part 400, including authority to act for the Secretary in all Foreign-Trade Zones Board matters except grants of authority to establish new zones;

j. The Defense Production Act of 1950, as amended (50 U.S.C. app. 2061 *et seq.*) conferred on the Secretary under: (1) Executive Order 10480 of August 14, 1953, as amended, including authority to restrict surface transportation and discharge of commodities or to prohibit movement of American carriers to designated destinations, except the authority to create new agencies within the Department of Commerce; and (2) Executive Order 11912 of April 13, 1976;

k. Executive Order 11490 of October 28, 1969, as amended, as it relates to the development, as required for the programs of the Director, Federal Emergency Management Agency, of national emergency plans and preparedness programs covering production and distribution of materials, use of production facilities, control of construction materials, the furnishing of basic industrial services, and regulation and control of exports and imports;

l. The National Security Act of 1947, as amended (50 U.S.C. 401 *et seq.*) and Executive Order 11490 of October 28, 1969, as amended, relating to mobilization preparedness;

m. Executive Order 11179 of September 22, 1964, as amended, with respect to the establishment and training of the National Defense Executive Reserve;

n. Executive Order 10421 of December 31, 1952, providing for the physical security of facilities important to the national defense;

o. Section 1441 of the Public Health Service Act, as amended by the Safe Drinking Water Act (42 U.S.C. 300j) conferred on the Secretary under Executive Order 11879 of September 17, 1975, involving materials allocation of chemicals or substances necessary for treatment of water;

p. Section 232 of the Trade Expansion Act of 1962 (19 U.S.C. 1862) and section 5(a)(1)(B) of Reorganization Plan No. 3 of 1979, relating to the conduct of national security investigations on imports;

q. The Export Administration Act of 1979, as amended (50 U.S.C. app. 2401 *et seq.*), and the authority under that Act conferred on the Secretary under Executive Order 12214 of May 2, 1980, and Executive Order 12002 of July 7, 1977, except that the following power, authority, and discretion shall be reserved to the Secretary:

1. The determination required by Section 12(c) with respect to the publication or disclosure of confidential information obtained under the Act, and

2. The submission of reports to the Congress required by Section 14 of the Act;

r. Executive Order 11958 of January 18, 1977, as it relates to the carrying out, on behalf of the Department of State, of functions under Section 38(e) of the Arms Export Control Act (22 U.S.C. 2751 *et seq.*), as agreed to by the Departments of Commerce and State;

s. Executive Order 11322 of January 5, 1967, and Executive Order 11419 of July 29, 1968, relating to the Rhodesian sanctions with respect to transactions occurring prior to December 16, 1979 (Executive Order 12183 of December 16, 1979, revoked the provisions of Executive Orders 11322 and 11419 with respect to transactions occurring after December 16, 1979);

t. The Nuclear Non-Proliferation Act of 1978 (22 U.S.C. 3201 *et seq.*) and the authority under that Act conferred on the Secretary under Executive Order 12058 of May 11, 1978, pertaining to nuclear exports and related matters; and

u. Sections 103 and 251 of the Energy Policy and Conservation Act (42 U.S.C. 6201 *et seq.*) conferred on the Secretary under Executive Order 11912 of April 13, 1976, relating to: (1) export restrictions of coal, petroleum products, natural gas, or petrochemical feedstocks and supplies of material or equipment necessary to maintain or further exploration, production, refining, or transportation of energy supplies or for the construction or maintenance of energy facilities within the United States; and (2) rules to authorize the export of petroleum and petroleum products as may be necessary for implementation of the obligations of the United States under the International Energy Program.

.02 Except as otherwise provided, the Assistant Secretary may redelegate the above authorities subject to such conditions in the exercise of such authorities as he or she may prescribe.

Section 2. Organization and Functions.

The *Assistant Secretary for Trade Administration* directs the activities of the Deputy Assistant Secretaries for Trade Administration, Import Administration, Export Administration, and Export Enforcement; exercises the functions of the "Secretary" and "administering authority" of U.S. antidumping and countervailing duty laws within the meaning of Section 303 and Title VII of the Tariff Act of 1930, as amended; chairs the Committee of Alternates of the Foreign-Trade Zones Board and acts for the Secretary in all Board matters except grants of authority to establish new zones; and chairs the Advisory Committee on Export Policy.

The Office of the Assistant Secretary includes a *Hearing Commissioner* who conducts hearings, issues initial decisions, and performs other duties with respect to administrative proceedings under the Export Administration Regulations; as requested by the Department of State, serves as presiding official in administrative proceedings under the International Traffic in Arms Regulations; and, as requested, provides administrative support to the Assistant Secretary concerning appeals, except those appeals from initial decisions made by the Hearing Commissioner.

The Assistant Secretary carries out these responsibilities through:

.01 The *Deputy Assistant Secretary for Trade Administration* serves as the principal deputy to the Assistant Secretary; performs such functions as the Assistant Secretary may assign; and assumes the duties of the Assistant Secretary during the latter's absence.

.02 The *Deputy Assistant Secretary for Import Administration* coordinates the formulation and implementation of U.S. antidumping and countervailing duty policies and programs; and administers programs relating to foreign-trade zones, allocation of watch quotas, duty-free entry of scientific instruments, and importation of foreign excess property. The DAS directs the following offices:

a. The *Office of Investigations* evaluates petitions received and conducts investigations under the antidumping and countervailing duty (AD/CVD) laws; performs analyses which will form the basis of recommendations regarding the disposition of individual AD/CVD cases; serves as primary contact point with the U.S. International Trade Commission on matters pertaining to administration of AD/CVD cases, such as determination of the product definition and provision of calculations and analyses which form the basis of determinations reached; and arranges public hearings involving interested parties when requested in the course of investigations.

b. The *Office of Compliance* collects and analyzes data used to determine the amount of antidumping and countervailing duties to be collected yearly on existing antidumping and

countervailing duty orders; monitors negotiated agreements resulting in the suspension of antidumping and countervailing duty investigations; serves as primary contact point with the U.S. Customs Service on matters pertaining to administration of antidumping and countervailing duty laws, such as collection of antidumping and countervailing duties, and development of data required for AD/CVD cases; arranges public hearings when requested regarding the proposed results of annual reviews; and performs analyses necessary to determine the types and amounts of subsidies provided by foreign governments on articles of quota cheese.

c. The *Office of Policy* serves as principal staff to the DAS in the formulation and implementation of policies governing the administration of antidumping and countervailing duty statutes, ensuring that actions taken are consistent with overall U.S. trade policy; in consultation with the Office of General Counsel, ensures the uniform application of statutory and regulatory provisions of AD/CVD laws on a case-by-case basis; participates with the Office of the U.S. Trade Representative in negotiations regarding possible suspension of antidumping or countervailing duty investigations; and acts for the DAS and, as appropriate, the Assistant Secretary for Trade Administration, in representing their views in domestic, interagency, and international forums.

.03 The *Deputy Assistant Secretary for Export Administration* carries out the Department's responsibilities for regulating exports of U.S. goods and technology for purposes of national security, foreign policy, and short supply, and ensuring industrial mobilization and resource administration for the national defense. The DAS directs the following offices:

a. The *Office of Export Administration* administers the programs required to regulate the export of U.S. commodities and technical data under the Export Administration Act of 1979, as amended, for purposes of national security and foreign policy; seeks, in collaboration with other Federal agencies, the adoption by foreign countries of such controls over their exports as will advance the policies of the United States with respect to national security and foreign policy; and provides secretariat and administrative support services to Technical Advisory Committees established under the Export Administration Act and to the Subcommittee on Export Administration of the President's Export Council.

b. The *Office of Industrial Resource Administration* performs national defense and strategic industrial resource functions, including those authorized by the Defense Production Act of 1950, as amended; administers priorities and allocations to assist in achieving an adequate supply of strategic, critical, and other products and materials for defense and defense-supporting activities and essential civilian needs, including the timely completion of current military, atomic energy, and space programs for production, construction, and research and development, and maximizing domestic energy supplies; participates in the development of national plans to assure maximum readiness of the strategic industrial resources of the United States, including the means for administering them, to meet future demands of any national emergency; plans and coordinates ITA's emergency readiness functions; conducts investigations in those instances where imports may threaten to impair the national security; and administers the short supply commodity control regulations and program under the Export Administration Act of 1979, as amended

.04 The *Deputy Assistant Secretary for Export Enforcement* carries out, in consultation with the Office of General Counsel, a compliance program to enforce the Export Administration Regulations relating to foreign boycotts against countries friendly to the United States and to exports of U.S. goods and technology for purposes of national security, foreign policy, and short supply; administers programs for opposing such boycotts. The DAS directs the following offices:

a. The *Office of Export Enforcement*, in consultation with the Office of General Counsel, enforces the Export Administration Regulations relating to exports of U.S. goods and technology for purposes of national security, foreign policy, and short supply.

b. The *Office of Antiboycott Compliance* administers and, in consultation with the Office of General Counsel, enforces the regulations and programs required to carry out responsibilities under the Export Administration Act of 1979 regarding foreign boycotts against countries friendly to the United States; develops and coordinates policies and measures for opposing such boycotts; and operates the automated boycott reporting system to provide statistical summaries and enforcement data.

Part VII. The Assistant Secretary for Trade Development

Section 1. Delegation of Authority.

.01 Pursuant to the authority delegated to the Under Secretary by the Secretary of Commerce, and subject to such policies and directives as the Under Secretary may prescribe, the Assistant Secretary for Trade Development is hereby delegated the authority of the Under Secretary under:

a. The Act of February 14, 1903 as amended (15 U.S.C. 1512 *et seq.*; 15 U.S.C. 171 *et seq.*) to foster, promote, and develop the foreign and domestic commerce of the United States, and related provisions;

b. Section 601(b)(1)) of the Foreign Assistance Act of 1961, as amended (22 U.S.C. 2351(b)(1) conferred on the Secretary under Executive Order 12163 of September 29, 1979, relating to drawing the attention of private enterprise to opportunities for investment and development in less develop friendly countries and areas;

c. The delegation of authority, dated June 25, 1962, from the United States Information Agency under Section 5(e) of Executive Order 11034 of June 25, 1962, as amended by Executive Order 11380 of November 8, 1967, with respect to U.S. participation in trade missions abroad under the Mutual Educational and Cultural Exchange Act of 1961, as amended (22 U.S.C. 2451 *et seq.*);

d. The Act of October 18, 1962, as amended (46 U.S.C. 1122b), which authorized mobile trade fairs;

e. The Act of May 27, 1970 (Pub. L. 91–269, 22 U.S.C. 2801 *et seq.*) relating to U.S. participation in international expositions;

f. Executive Order 11651 of March 3, 1972, as amended by Executive Order 11951 of January 6, 1977, regarding Textile Trade Agreements;

g. Section 104 of the Trade Act of 1974 (19 U.S.C. 2114) and Section 135 of the Trade Act of 1974 as amended by Section 1103 of the Trade Agreements Act of 1979 (19 U.S.C. 2155) and Section 4(d) of Executive Order 11846 of March 27, 1975, relating to the industry consultations program;

h. Executive Order 11858, of May 7, 1975, relating to foreign investment on the United States;

i. Section 4221 of the Internal Revenue Code of 1954 (26 U.S.C. 4221) and Section 309 of the Tariff Act of 1930, as amended (19 U.S.C. 1309), insofar as they relate to findings with respect to exemptions from taxes and import duties on supplies and equipment for aircraft;

j. Section 5(b) and 5(c) of Executive Order 11846 of March 27, 1975, relating to quantitative import restrictions and monitoring of imports under orderly market agreements;

k. Sections 3 and 4 of Executive Order 11961 of January 19, 1977, as amended by Executive Order 12013 of October 7, 1977, which delegates to the Secretary of Commerce the authority of the President under Sections 4(a), 4(b), and 5(c) of the International Investment Survey Act of 1976 (Pub. L. 94–472, 90 Stat. 2059, 22 U.S.C. 3103 (a) and (b), and 3104(c)), and Section 4(e) of the International Investment Survey Act, as amended by Pub. L. 97–33 (95 Stat. 170, to be codified at 22 U.S.C. 3101(e)). The functions thereunder shall be carried out in coordination with the Bureau of Economic Analysis, (DOO 35–1A), including, to the extent feasible, the division or assignment of responsibilities. All regulations established to carry out functions under the Act shall be issued by the Under Secretary for International Trade in consultation with the Director, Bureau of Economic Analysis. All reports to be submitted to the Congress required to be undertaken pursuant to the Act, shall be issued by the Secretary;

l. Title III of Pub. L. 96–481 (15 U.S.C. 649a–649d), relating to making grants (including contracts and cooperative agreements) for small business international marketing programs;

m. The Act of December 29, 1979 (Pub. L. 96–169, 93 Stat. 1281) regarding U.S. participation in the International Energy Exposition to be held in Knoxville, Tennessee in 1982;

n. Chapters 3 and 4 of Title II of the Trade Act of 1974, as amended (19 U.S.C. 2341 *et seq.*, 2371 *et seq.*), pertaining to trade adjustment assistance to firms, industries, and communities, except the provisions of 19 U.S.C. 2354 pertaining to studies and reports and information activities in response to investigations and finding of the International Trade Commission (See Department Organization Order 35–5A). The Assistant Secretary for Economic Development retains this authority through September 30, 1981, with respect to adjustment assistance projects in process prior to September 20, 1981, and thereafter such authority to perform all functions related to the furnishing of adjustment assistance (excluding additional assistance or increasing the Government's liability) with respect to those adjustment assistance projects approved prior to October 1, 1981 (See DOO 10–4);

o. Chapter 23 of Title 15, United States Code, which pertains to a clearinghouse for technical information, as is necessary to carry out assigned responsibilities dealing with the preparation and dissemination of business and international economic information; and

p. Titles I and III of Pub. L. 97–290 (15 U.S.C. 4001 *et seq.*, 4011 *et seq.*), except that the authority to negotiate with and obtain the concurence of the Attorney General under Title III of the Act shall be reserved to the General Counsel.

.02 Except as otherwise provided, the Assistant Secretary may redelegate the above authorities subject to such conditions in the exercise of such authorities as he or she may prescribe.

Section 2. Organization and Functions.

The *Assistant Secretary for Trade Development* advises on international trade and investment policies pertaining to U.S. business sectors and carries out programs to promote world trade and to strengthen the international trade and investment position of the U.S. In carrying out these functions, the Assistant Secretary directs the Department's program for participation in trade fairs, trade missions and other overseas trade promotion events; conducts programs within the U.S. to expand the export-consciousness of American firms, particularly small and medium-sized businesses, and to facilitate their entry into international trade; promotes the formation of export trading companies and issues certificates of review providing a limited exemption from liability under the antitrust laws for specified export conduct; implements and monitors the sectoral aspects of the Multilateral Trade Negotiations (MTN) and provides advice and assistance to U.S. businesses on rights and opportunities resulting from the MTN; carries out special industry activities to promote exports of major projects and high technology products; examines and develops trade and investment policy recommendations which are industry sector or product-specific in nature (in consultation with appropriate units of International Economic Policy, where significant country or regional issues are involved); represents the Department on such matters, as assigned; obtains private sector views with respect to international economic and commercial policy issues; conducts programs aimed at assistance to industries faced with import competition; and manages ITA's trade-related information and research gathering and dissemination functions. The Assistant Secretary advises Departmental and ITA officials on policies and programs relating to these functions and serves as the National Export Expansion Coordinator.

The Office of the Assistant Secretary includes the *Office of Planning and Coordination* which provides the Assistant Secretary with support for carrying out his responsibilities by identifying major international trade issues; formulating appropriate responses to these issues or coordinating their review and analysis by other program areas; assisting in the development, inplementation and coordination of program plans, priorities, goals, and objectives; ensuring policy and program consistency across the various units of Trade Development; acting as liaison with program areas outside of Trade Development; monitoring, preparing, or coordinating studies, background and briefing papers, correspondence, and other materials for the Assistant Secretary; and representing the Assistant Secretary as requested. Specifically, the Office evaluates and analyzes U.S. and foreign export incentives and disincentives; develops options related to international trade issues; formulates positions and recommends alternatives to improve U.S. trade performance; carries out special studies and projects on international trade issues of interest to the Assistant Secretary; provides staff support to the President's Export Council (PEC) and Departmental officials participating in PEC activities; communicates the President's Export Council recommendations through the Secretary of Commerce to the President; advises the Assistant Secretary in his capacity as coordinator of the National Coal Export Program; maintains liaison with the coal industry and state and local government organizations involved in coal export trade development; monitors trade and domestic economic situations which affect coal trade development; and coordinates and proposes federal government programs to stimulate and facilitate coal exports.

The Assistant Secretary carries out these responsibilities through:

.01 The *Deputy Assistant Secretary for Trade Development* serves as the principal deputy to the Assistant Secretary; performs such functions as the Assistant Secretary may assign; and assumes the duties of the Assistant Secretary during the latter's absence.

.02 *The Deputy Assistant Secretary for Export Development* develops domestic and overseas programs designed to stimulate the expansion of U.S. exports, including activities to foster an export consciousness among U.S. manufacturing and service industries, particularly small and medium-sized businesses, and evaluates the effectiveness of these programs;

promotes the formation of export trading companies and issues certificates of review providing a limited exemption from liability under the antitrust laws for specified export conduct; develops programs to improve the access of U.S. products and services to foreign markets, including identifying barriers and surveying U.S. laws and practices affecting international trade; directs the delivery of export development programs relevant; directs the delivery of export development programs relevant to field support implementation through the Regional Managing Directors of the U.S. Commercial Service; provides Departmental recognition of domestic and foreign trade promotion events; and directs overseas event scheduling, including exhibitor recruitment, resource management, and staging of the Department's trade promotion events. The Office of the DAS contains the *International Expositions Staff* which is responsible for Federal recognition of and participation in international expositions to be held in the United States and the *USCS Liaison Staff* which directs the delivery of export development programs relevant to field support emplementation through the Regional Managing Directors of the U.S. Commercial Service and administers the Small Business Export Development Assistance Program. The DAS directs the following offices:

a. The *Office of Event Management and Support Services* provides direction for facilitating and executing overseas activities arising from the work of other Offices reporting to the DAS for Export Development or agreements with other agencies and Departmental operating units; manages the certification of domestic and foreign trade promotion events and activities; directs event scheduling coordination activities; stimulates and arranges vists to U.S. exhibitions and industrial facilities for foreign business people and government officials; manages contract and other efforts to increase private sector assumption of all appropriate export promotion activities; coordinates and develops, promotional literature to support export development programs; develops recruits and manages the staging overseas of catalog and video-catalog exhibitions; and serves as the central point for managing the administrative resources of the Offices reporting to the DAS for Export Development.

b. The *Offices of Consumer Goods, Transportation and Industrial Components Industries; Capital Goods Industries; and Service Industries* develop programs designed to foster an export consciousness in United States industries and stimulate export marketing in all segments of the domestic economy which have the capability to export. Each office carries out specified export development functions with regard to industries assigned; advises Department officials on U.S. Government actions which would increase the chances for, or present major obstacles to, successful U.S. competition for export sales abroad; conducts recruitment campaigns to attract U.S. industry to participate in overseas exhibitions; maintains information on U.S. technological developments and marketing trends in selected industry segments with respect to foreign markets and exporting; works with the USCS District Offices to assist export expansion activities of State, regional, and local agencies and works directly or through the District Offices to provide information and counseling to U.S. exporters on the mechanics of exporting; facilitates foreign direct capital investments, joint ventures and licensing by foreign firms in the U.S.; develops and plans trade promotion techniques including operating trade and seminar mission programs and special export promotional events; encourages U.S. firms to export to their full potential and works with the export community to support private sector program initiatives and to develop joint programs.

c. In addition to the functions identified in Section 2.02b, the *Office of Service Industries* provides policy guidance and program recommendations to foster the international operations of U.S. service industries (such as insurance, accounting, engineering and construction, advertising, computer and telecommunications services, leasing, franchising, and air and marine shipping); and develops and implements policies relating to U.S. and foreign taxation of international service and other business operations, international technology transfer, international business practices, international aspects of antitrust, international standardization, patent and copyright protection, and related matters arising from the international commercial and investment operations of U.S. firms.

d. The *Office of Export Trading Company Affairs* promotes, in cooperation with the Director General of the U.S. and Foreign Commercial Services, the formation of export trade associations and export trading companies; facilitates, in consultation with the Deputy Assistant Secretary for Trade Information and Analysis, contact between producers of exportable goods and services and firms offering export trade services, and issues certificates of review providing a limited exemption from liability under the antitrust laws for specified export conduct.

.03 The *Deputy Assistant Secretary for Industry Projects* examines and develops trade policy recommendations which are industry sector or product-specific in nature (in consultation with units of International Economic Policy, where significant country or regional issues are involved); obtains private sector views with respect to international economic and commercial policy issues; implements, monitors, and participates in international consultation and renegotiation of MTN tariff, non-traiff and other agreements for non-agricultural industries and services and develops and provides U.S. business with information and assistance on new U.S. rights and opportunities under the MTN codes and other agreements; represents the Department in international finance and development assistance affairs; provides representation on or staff support to Departmental representatives on committees or other groups dealing with export finance, export guarantees, credit insurance and related issues; and conducts a program to assist U.S. companies to compete for major infrastructure and industrial systems contracts abroad. The DAS directs the following offices:

a. The *Office of International Sector Policy* develops and inplements policies relating to international sectoral issues, including trade problems and opportunities of individual industries, safeguard issues, product-specific trade legislation, import relief cases and Orderly Marketing Agreements (OMA's); provides staff support for the OECD Steel Committee and, as appropriate, other interagency and international meetings on industry-specific trade policy matters; develops foreign country industry-specific trade policy negotiating goals and objectives; and coordinates private sector participation in the international industry sector and trade policy development process, including the provision of information and advice to the private sector concerning rights and opportunities created by U.S. trade agreements and operation of the Industry Consultation Program.

b. The *Office of Major Projects* serves as the focal point in the Department for providing Government-wide assistance to U.S. firms on major international business transactions; indentifies foreign capital projects with major

export potential which should be brought to the attention of U.S. industry or which are likely to require special U.S. Government assistance for successful participation by American firms; informs U.S. firms of specific large-scale projects with significant potential for exports of U.S. goods and services; and assists them on a case-by-case basis in competing for such projects, coordinating support from other areas of ITA and other Federal agencies, as necessary. The office communicates directly with other Federal agencies, international financial institutions, and with U.S. Missions abroad including FCS post and is responsible for advising senior Department officials on U.S. Government actions which would increase the chances for major U.S. contract awards to U.S. businesses, or on major obstacles to the successful U.S. competition for major contracts abroad.

c. The *Office of International Finance* identifies key issues and develops policies relating to international finance and monetary affairs; represents the Department on the National Advisory Council on International Monetary and Financial Policies (NAC) and other bodies dealing with export financing, export and investment guarantees, credit insurance, foreign lending and assistance activities of U.S. and international agencies, and balance of payments measures; and provides analytical and staff support for the Secretary's participation as a member of the Export-Import Bank Board and as Chairman of the Export Expansion Advisory Committee of the Export Expansion Facility Administered by the Export-Import Bank. The Office actively supports measures to obtain adequate and competitive financing for U.S. firms competing for major infrastructure and industrial systems contracts abroad.

.04 The *Deputy Assistant Secretary for Trade Information and Analysis* manages the development and dissemination of international trade and economic data, research and analysis for use by ITA policy makers, other U.S. government agencies and external users; directs a program to analyze and report on international investment; manages the development and dissemination of timely international trade information of commercial use to exporters, including the development of appropriate ADP and user fee systems and procedures; and provides user support to other units in Trade Development and ITA for the automation of trade information. The DAS directs the following offices:

a. The *Office of Trade and Investment Analysis* develops and implements policies relating to foreign direct investment in the U.S.; directs the accomplishment of analysis and reporting requirements in accordance with the International Investment Survey Act of 1976 and Executive Orders 11858 and 11961; conducts statistical and analytical studies of trade between the U.S. and foreign economies and related trade issues and policies; and maintains a program providing trade and trade-related data to both government and private sector users.

b. The *Office of Trade Information Services* gathers and disseminates commercial trade-related information to users in business and government; develops trade information products and services in response to user needs and changes in the U.S. international trade position; develops and implements user fee objectives and procedures which aim to recover costs associated with providing such information; provides services and support to the U.S. and Foreign Commercial Services and other ITA units relating to dissemination of trade information through the Automated Information Transfer System (AITS) or other methods; and undertakes a program of research to identify the mix of industries, products and foreign markets that represent an optimum focus for trade development programs.

c. The *Office of Program Information Management* directs the design, development amd maintenance of computer-assisted information systems for the management and use of trade information; develops and manages a planning system to assure the long-range effectiveness of trade program information management throughout Trade Development; builds the computer literacy of executives, managers, and other personnel; locates, defines, evaluates and implements user applications; has direct management responsibility for the Trade Policy Information System, the Automated Information Transfer System and other systems in the Office of Program Information Management; and has advisory management responsibility for other trade information management systems elsewhere in the International Trade Administration.

.05 The *Deputy Assistant Secretary for Textiles and Apparel* directs the development of the Department's position on international textile agreements and relations and the domestic textile and apparel industries; chairs the Committee for the Implementation of Textile Agreements, the Management-Labor Textile Advisory Committee, the Importers and Retailers' Textile Advisory Committee, and the Exporters' Textile Advisory Committee; and directs the following office:

a. The *Office of Textiles and Apparel* participates in and provides analytical support for international textile negotiations in consultation with the appropriate regional Deputy Assistant Secretary; provides studies and analyses of domestic and foreign fiber, textile, and apparel industries; monitors textile and apparel imports; develops and coordinates domestic trade and export expansion programs; develops, as resources permit, initiatives to improve domestic textile and apparel industries' productivity and marketing; provides legislative comment and serves as liaison with industry, trade groups, and foreign government officials; provides appropriate administrative support to the committees mentioned above.

.06 The *Deputy Assistant Secretary for Trade Adjustment Assistance* directs the trade adjustment assistance program, including the development of policies to implement the program, and directs the following office:

a. The *Office of Trade Adjustment Assistance* certifies firms as eligible to apply for assistance and provides technical and financial assistance to certified firms; provides trade adjustment assistance to industries and communities adversely affected by imports; develops a monitoring program to assure that firms comply with the terms of their adjustment proposals and any agreements pertaining to the adjustment assistance received; maintains reserves against outstanding loan guarantees as authorized by Section 255(f) of the Trade Act of 1974; establishes procedures for dealing with delinquent firms; evaluates the performance of firms which have received trade adjustment assistance; coordinates the trade adjustment assistance program with other Federal agencies, including the Department of Labor, the International Trade Commission, and the Office of the United States Trade Representative (USTR); and provides representation for the Commerce Labor Adjustment Action Committee (CLAAC).

Lionel H. Olmer,

Under Secretary for International Trade.

BILLING CODE 3510-25-M

COMMITTEE FOR THE IMPLEMENTATION OF TEXTILE AGREEMENTS

Adjusting the Import Restraint Level for Certain Man-Made Fiber Textile Products from Romania

June 7, 1983.

AGENCY: Committee for the Implementation of Textile Agreements.

ACTION: Reducing to account for carryforward used during 1982 the level established for man-made fiber suits in Category 643/644 pt. (only T.S.U.S.A. numbers 379.3160, 379.6976, 379.9560, 379.9565, 383.2230, 383.5382, and 383.9060) from 28,092 dozen to 24,811 dozen. This adjustment applies to goods produced or manufactured in Romania and exported during the twelve-month period which began on January 1, 1983.

A description of the textile categories in terms of T.S.U.S.A numbers was published in the **Federal Register** on December 13, 1982 (47 FR 55709), as amended on April 7, 1983 (48 FR 15175) and May 3, 1983 (48 FR 19924)

SUMMARY: The Bilateral Wool and Man-Made Fiber Textile Agreement of September 3 and November 3, 1980, as amended, between the Governments of the United States and the Socialist Republic of Romania provides for the borrowing of yardage from the succeeding year's level (carryforward) with the amount used being deducted from the level in the succeeding year. Pursuant to the terms of the bilateral agreement, as amended, the level of restraint established for Category 643/644 pt. is being reduced for the twelve-month period which began on January 1, 1983 to account for carryforward used during 1982.

EFFECTIVE DATE: June 14, 1983.

FOR FURTHER INFORMATION CONTACT: Diana Bass, International Trade Specialist, Office of Textiles and Apparel, U.S. Department of Commerce, Washington, D.C. 20230 (202/377–4212).

SUPPLEMENTARY INFORMATION: On February 28, 1983, there was published in the **Federal Register** (48 FR 8325) a letter dated February 22, 1983 from the Chairman of the Committee for the Implementation of Textile Agreements to the Commissioner of Customs, which established levels of restraint for certain specified categories of wool and man-made fiber textile products, including Category 643/644 pt., produced or manufactured in Romania, which may be entered into the United States for consumption, or withdrawn from warehouse for consumption, during the twelve-month period which began on January 1, 1983 and extends through December 31, 1983. In the letter published below, the Chairman of the Committee for the Implementation of Textile Agreements directs the Commissioner of Customs to reduce the level of restraint established for Category 643/644 pt. to the designated amount.

Walter C. Lenahan

Chairman, Committee for the Implementation of Textile Agreements.

June 7, 1983.

Commissioner of Customs,
Department of the Treasury, Washington, D.C.

Dear Mr. Commissioner: On February 22, 1983, the Chairman, Committee for the Implementation of Textile Agreements, directed you to prohibit entry during the twelve-month period beginning on January 1, 1983 and extending through December 31, 1983 of wool and man-made fiber textile products, produced or manufactured in Romania, in excess of designated levels of restraint. The Chairman further advised you that the levels of restraint are subject to adjustment. [1]

Effective on June 14, 1983 paragraph 1 of the directive of February 22, 1983 is amended to include an adjusted level of restraint of 24,811 dozen [2] for man-made fiber textile products in Category 643/644 pt. [3] produced or manufactured in Romania and exported during the twelve-month period which began on January 1, 1983 and extends through December 31, 1983.

The action taken with respect to the Government of the Socialist Republic of Romania and with respect to imports of man-made fiber textile products from Romania has been determined by the committee for the Implementation of Textile Agreements to involve foreign affairs functions of the United States. Therefore, this direction to the Commissioner of Customs, which is necessary for the implementation of such action, falls within the foreign affairs exception to the rule-making provisions of 5 U.S.C. 553. This letter will be published in the **Federal Register.**

[1] The term "adjustment" refers to those provisions of the Bilateral Wool and Man-Made Fiber Textile Agreement of September 3 and November 3, 1980, as amended, between the Governments of the United Staes and the Socialist Republic of Romania, which provide, in part, that: (1) specific levels of restraint may be increased for carryover and carryforward up to 11 percent of the applicable category limit; (2) consultations may be held to adjust levels of restraint for categories not subject to specific limits; and (3) administrative arrangements or adjustments may be made to resolve problems arising under these provisions of the agreement.

[2] The level of restraint has not been adjusted to reflect any imports after December 31, 1982.

[3] In Category 643/644, only T.S.U.S.A. numbers 379.3160, 379.6976, 379.9560, 379.9565, 383.2230, 383.5382, and 383.9060.

Sincerely,
Walter C. Lenahan,
Chairman, Committee for the Implementation of Textile Agreements.

[FR Doc. 83–15622 Filed 6–9–83; 8:45 am]
BILLING CODE 3510-25-M

Adjusting the Level of Restraint for Certain Wool and Man-Made Fiber Apparel Products Exported From the Polish People's Republic

June 7, 1983.

AGENCY: Committee for the Implementation of Textile Agreements.

ACTION: Increasing the level of restraint established for wool and man-made fiber suits in Category 443/643/644 from 15,150 dozen to 16,059 dozen, produced or manufactured in Poland and exported during the agreement year which began on January 1, 1983 by the application of carryforward. The sublimit for Category 443/643/644 pt. (except leisure suits in T.S.U.S.A. numbers 379.8351, 379.8352 379.8920, and 379.9560) is being similarly adjusted for the same agreement period from 12,473 to 13,269 dozen.

A description of the textile categories in terms of T.S.U.S.A. numbers was published in the **Federal Register** on December 13, 1982 (47 FR 55709), as amended on April 7, 1983 (48 FR 15175) and May 3, 1983 (48 FR 19924).

SUMMARY: The Bilateral Cotton, Wool, and Man-Made Fiber Textile Agreement of September 15, 1980 and March 21, 1981, as amended, between the Governments of the United States and the Polish People's Republic provides, among other things, for the borrowing of yardage in certain categories from the succeeding year's level with the amount used being deducted from the level in the following year (carryforward).

Under the terms of the bilateral agreement, and at the request of the Government of the Polish People's Republic, the import restraint levels for Category 443/643/644 and its sublimit are being increased for the twelve-month period which began on January 1, 1983.

EFFECTIVE DATE: June 14, 1983.

SUPPLEMENTARY INFORMATION: On December 23, 1982, there was published in the **Federal Register** (47 FR 57322) a letter dated December 17, 1982 from the Chairman of the Committee for the Implementation of Textile Agreements to the Commissioner of Customs which established levels of restraint for certain cotton, wool, and man-made fiber textile products, including Category 443/643/644, produced or manufactured in Poland, which may be entered into the

United States for consumption, or withdrawn from warehouse for consumption, during the twelve-month period which began on January 1, 1983 and extends through December 31, 1983.

In the letter published below the Chairman of the Committee for the Implementation of Textile Agreements directs the Commissioner of Customs to permit entry for consumption and withdrawal from warehouse for consumption of wool and man-made fiber textile products in Category 443/643/644 and its sublimit, produced or manufactured in Poland, at the designated, increased levels during the agreement year which began on January 1, 1983.

Walter C. Lenahan,

Chairman, Committee for the Implementation of Textile Agreements.

June 7, 1983.

Commissioner of Customs,
Department of the Treasury, Washington, D.C.

Dear Mr. Commissioner: On December 17, 1982, the Chairman, Committee for the Implementation of Textile Agreements, directed you to prohibit entry during the twelve-month period beginning on January 1, 1983 and extending through December 31, 1983 of cotton, wool, and man-made fiber textile products in certain specific categories, produced or manufactured in Poland, in excess of designated levels of restraint. The Chairman further advised you that the levels of restraint are subject to adjustment.[1]

Under the terms of Section 204 of the Agricultural Act of 1956, as amended (7 U.S.C. 1854), and the Arrangement Regarding International Trade in Textiles done at Geneva on December 20, 1973, as extended on December 15, 1977 and December 22, 1981; pursuant to the Bilateral Cotton, Wool, and Man-Made Fiber Textile Agreement of September 15, 1980 and March 21, 1981, as amended, between the Governments of the United States and the Polish People's Republic; and in accordance with the provisions of Executive Order 11651 of March 3, 1972, as amended by Executive Order 11951 of January 6, 1977, you are directed, effective on June 14, 1983, to increase the twelve-month level of restraint for Category 443/643/644 of the following:

Category	Amended 12-month level of restraint [1]
443/643/644	16,059 dozen of which not more than 13,269 dozen shall be applied to all T.S.U.S.A. numbers in these categories except 379.8351, 379.8352, 379.8920, and 379.9560.

[1] These levels have not been adjusted to reflect any imports after December 31, 1982.

The action taken with respect to the Government of the Polish People's Republic and with respect to imports of wool and man-made fiber textile products from Poland has been determined by the Committee for the Implementation of Textile Agreements to involve foreign affairs functions of the United States. Therefore, these directions to the Commissioner of Customs, which are necessary for the implementation of such actions, fall within the foreign affairs exception to the rule-making provisions of 5 U.S.C. 553. This letter will be published in the **Federal Register**.

Sincerely,

Walter C. Lenahan,

Chairman, Committee for the Implementation of Textile Agreements.

[FR Doc. 83-15823 Filed 6-9-83; 8:45 am]

BILLING CODE 3510-25-M

[1] The term "adjustment" refers to those provisions of the Bilateral Cotton, Wool, and Man-Made Fiber Textile Agreement of September 15, 1980 and March 21, 1981, as amended, between the Governments of the United States and the Polish People's Republic which provide, in part, that: (1) within the aggregate and applicable group limits of the agreement, specific levels of restraint may be exceeded by designated percentages; (2) these same levels may be increased for carryover and carryforward; and (3) administrative arrangements or adjustments may be made to resolve minor problems arising in the implementation of the agreement.

Changes in Officials of the Government of India Authorized To Issue Export Visas and Exempt Certifications for Certain Cotton, Wool and Man-Made Fiber Products From India

June 7, 1983.

AGENCY: Committee for the Implementation of Textile Agreements.

ACTION: Announcing changes in the officials of the Government of India authorized to issue export visas and certifications for exempt cotton, wool and man-made fiber textile products from India.

SUMMARY: The Government of India has notified the United States Government that Mr. N. Radhakrishnan is authorized to issue export visas and certifications for exempt textile products exported to the United States, replacing Mr. P.R. Sreedharan, who will no longer issue and sign these documents.

EFFECTIVE DATE: June 11, 1983.

FOR FURTHER INFORMATION CONTACT: Ross Arnold, International Trade Specialist, Office of Textiles and Apparel, U.S. Department of Commerce, Washington, D.C. 20230 (20/377-4212).

SUPPLEMENTARY INFORMATION: On November 29, 1979, a letter to the Commissioner of Customs from the Chairman of the Committee for the Implementation of Textile Agreements was published in the **Federal Register** (44 FR 68504, which established a new export visa requirement and certification for exemption of certain cotton, wool and man-made fiber textile products, produced or manufactured in India and exported to the United States. One of the requirements is that the visas and certifications for exemption must be signed by an official authorized by the Government of India. The Government of India has added Mr. N. Radhakrishnan to replace Mr. P.R. Sreedharan who is no longer authorized to issue export visas and certifications for exemption.

Walter C. Lenahan,

Chairman, Committee for the Implementation of Textile Agreements.

BILLING CODE 3510-25-M

COMMITTEE FOR PURCHASE FROM THE BLIND AND OTHER SEVERELY HANDICAPPED

Procurement List 1983; Addition and Deletions

AGENCY: Committee for Purchase from the Blind and Other Severely Handicapped.

ACTION: Addition to and Deletions from Procurement list.

SUMMARY: This action adds to and deletes from Procurement List 1983 commodities to be produced by and services to be provided by workshops for the blind and other severely handicapped.

EFFECTIVE DATE: June 10, 1983.

ADDRESS: Committee for Purchase from the Blind and Other Severely Handicapped, Crystal Square 5, Suite 1107, 1755 Jefferson Davis Highway, Arlington, Virginia 22202.

FOR FURTHER INFORMATION CONTACT: C. W. Fletcher, (703) 557-1145.

SUPPLEMENTARY INFORMATION: On April 1, and April 15, 1983, the Committee for Purchase from the Blind and Other Severely Handicapped published notices (48 FR 14021 and 48 FR 16313) of proposed addition to and deletions from Procurement List 1983, November 18, 1982 (47 FR 52101).

Addition

After consideration of the relevant matter presented, the Committee has determined that the service listed below is suitable for procurement by the Federal Government under 41 U.S.C. 46-48c, 85 Stat. 77.

I certify that the following action will not have a significant impact on a substantial number of small entities. The major factors considered were:

a. The action will not result in any additional reporting, recordkeeping or other compliance requirement.

b. The action will not have a serious economic impact on any contractor for the service listed.

c. The action will result in authorizing a small entity to provide a service procured by the Government.

Accordingly, the following service is hereby added to Procurement List 1983:

SIC 9199

Administrative Services, Environmental Protection Agency, 6th and Walnut Streets, Philadelphia, Pennsylvania

Deletions

After consideration of the relevant matter presented, the Committee has determined that the commodities and service listed below are no longer suitable for procurement by the Federal Government under 41 U.S.C. 46–48c, 85 Stat. 77.

Accordingly, the following commodities and service are hereby deleted from Procurement List 1983:

Class 7510

Portfolio
7510–00–616–7241
7510–00–551–9813
7510–00–616–7239
7510–00–558–1571
7510–00–995–4857
7510–00–995–4854
7510–00–995–4853
7510–00–995–4850

SIC 7399

Assembly, Food Packet, Isolated Site (8 Menus)

BILLING CODE 6820–33–M

Procurement List 1983; Proposed Additions

AGENCY: Committee for Purchase from the Blind and Other Severely Handicapped.

ACTION: Proposed Additions to Procurement List.

SUMMARY: The Committee has received proposals to add to Procurement List 1983 a commodity to be produced by and a service to be provided by workshops for the blind and other severely handicapped.

Comments must be received on or before: July 13, 1983.

ADDRESS: Committee for Purchase from the Blind and Other Severely Handicapped, Crystal Square 5, Suite 1107, 1755 Jefferson Davis Highway, Arlington, Virginia 22202.

FOR FURTHER INFORMATION CONTACT: C. W. Fletcher, (703) 557–1145.

SUPPLEMENTARY INFORMATION: This notice is published pursuant to 41 U.S.C. 47(a)(2), 85 Stat. 77. Its purpose is to provide interested persons an opportunity to submit comments on the possible impact of the proposed actions

If the the Committee approves the proposed additions, all entities of the Federal Government will be required to procure the commodity and service listed below from workshops for the blind or other severly handicapped.

It is proposed to add the following commodity and service to Procurement List 1983, November 18, 1982 (47 FR 52101):

Class 7510

Clip, Paper, Binder, Small
7510–00–282–8201

SIC 7369

Commissary Shelf Stocking, Naval Submarine Base, Bangor, Washington

DEPARTMENT OF DEFENSE

DOD Advisory Group on Electron Devices; Advisory Committee Meeting

Working Group B (Mainly Low Power Devices) of the DOD Advisory Group on Electron Devices (AGED) will meet in closed session on 22–23 June 1983 at Hanscom AFB, Massachusetts, Conference Room Building 1128.

The mission of the Advisory Group is to provide the Under Secretary of Defense for Research and Engineering, the Director, Defense Advanced Research Projects Agency, and the Military Departments with technical advice on the conduct of economical and effective research and development programs in the area of electron devices.

The Working Group B meeting will be limited to review of research and development programs which the military propose to initiate with industry, universities or in their laboratories. The low power device area includes such programs as integrated circuits, charge coupled devices and memories. The review will include classified program details throughout.

In accordance with Section 10(d) of Pub. L. 92–463, as amended (5 U.S.C. App. 1 section 10(d) (1976)), it has been determined that this Advisory Group meeting concerns matters listed in 5 U.S.C. 552b(c)(1) (1976), and that accordingly, this meeting will be closed to the public.

M. S. Healy,

OSD Federal Register Liaison Officer, Department of Defense.

June 7, 1983.

DEPARTMENT OF EDUCATION

Executive Committee of the Intergovernmental Advisory Council on Education; Closed Meeting

SUMMARY: This notice sets forth the schedule and proposed agenda of the Executive Committee of the Intergovernmental Advisory Council on Education meeting. Notice of this meeting is required under Section 10(a)(2) of the Federal Advisory Committee Act.

DATE: June 12, 1983.

ADDRESS: The O'Hare Hilton, O'Hare International Airport, Room 2042, Chicago, Illinois 60666.

FOR FURTHER INFORMATION CONTACT: Laverne Johnson, Office of the Deputy Under Secretary for Intergovernmental and Interagency Affairs, Department of Education, 400 Maryland Avenue SW., Washington, D.C. 20202; (202) 472–6464.

SUPPLEMENTARY INFORMATION: The Executive Committee meeting will be closed to the public to interview applicants for the position of Executive Director of the Intergovernmental Advisory Council on Education. The meeting will be closed under the authority of Section 10(d) of the Federal Advisory Committee Act (Pub. L. 92–463; 5 U.S.C. Appendix 1) and under exemption (6) contained in the Government in the Sunshine Act (Pub. L. 94–409; 5 U.S.C. 552b(c)(6)). Discussion will include consideration of the qualifications and fitness of the applicants and will touch upon matters that would disclose information of a personal nature, which disclosure would constitute a clearly unwarranted invasion of personal privacy if conducted in open session. This meeting is a continuation of the Executive Committee meeting as announced on Monday, May 16, 1983, FR 21987.

If it is necessary to conduct additional interviews, the Executive Committee will meet in closed session on June 22 at Stouffer's Cincinnati Towers, 141 West 6th Street, Cincinnati, Ohio, from approximately 2 p.m. to 5 p.m.

The summary of the activities at the closed session or sessions and related matters which are informative to the public consistent with the policy of Title 5 U.S.C. 552b(c) will be available to the public within 14 days of the meeting.

Signed at Washington, D.C. on June 7, 1983.

Gary L. Jones,

Under Secretary.

BILLING CODE 4000–01–M

DEPARTMENT OF ENERGY

Federal Energy Regulatory Commission

[Docket No. CP83–356–000]

Columbia Gas Transmission Corp.; Application

June 6, 1983.

Take notice that on May 31, 1983, Columbia Gas Transmission Corporation (Applicant), 1700 MacCorkle Avenue, S.E., Charleston, West Virginia 25314, filed in Docket No. CP83–356–000 an application pursuant to Section 7(c) of the Natural Gas Act for a certificate of public convenience and necessity authorizing the transportation of natural gas for West Virginia Wesleyan College (Wesleyan), all as more fully set forth in the application which is on file with the Commission and open to public inspection.

Applicant proposes to transport up to 500 dt equivalent of natural gas per day on a best-efforts basis for two years and year to year thereafter. Applicant proposes to receive the gas from Wesleyan's own wells at an existing point of receipt on Applicant's Line 8000 in Belington, West Virginia. Applicant further proposes to redeliver quantities at existing points of delivery to Columbia Gas of West Virginia, Inc., which would deliver said gas to Wesleyan at its campus in Buckhannon, West Virginia. It is stated that the gas to transported would be produced from wells located in Glade and Barker Districts, Barbour County, West Virginia.

It is further stated that Applicant's transportation charge for the proposed service is its average system-wide unit storage and transmission costs, exclusive of company-use and unaccounted-for gas, as reflected in Applicant's rate filings, which charge is presently 40.11 cents per dt equivalent with retainage for company-use and unaccounted-for gas of 2.85 percent of the total quantity of gas received for Wesleyan. Applicant states that its transportation charge is subject to adjustment to reflect revised average system-wide unit storage and transmission costs, exclusive of company-use and unaccounted-for gas, contained in its future rate filings. Further, Applicant states that the treatment of revenues would be subject to the determination of its ongoing rate proceeding in Docket No. RP82–120–000. Additionally, all gas transported would be subject to the General R&D Funding Unit of the Gas Research Institute.

Any person desiring to be heard or to make any protest with reference to said application should on or before June 20, 1983, file with the Federal Energy Regulatory Commission, Washington, D.C. 20426, a motion to intervene or a protest in accordance with the requirements of the Commission's Rules of Practice and Procedure (18 CFR 385.214 or 385.211) and the Regulations under the Natural Gas Act (18 CFR 157.10). All protests filed with the Commission will be considered by it in determining the appropriate action to be taken but will not serve to make the protestants parties to the proceeding. Any person wishing to become a party to a proceeding or to participate as a party in any hearing therein must file a motion to intervene in accordance with the Commission's Rules.

Take further notice that, pursuant to the authority contained in and subject to jurisdiction conferred upon the Federal Energy Regulatory Commission by Sections 7 and 15 of the Natural Gas Act and the Commission's Rules of Practice and Procedure, a hearing will be held without further notice before the Commission of its designee on this application if no motion to intervene is filed within the time required herein, if the Commission on its own review of the matter finds that a grant of the certificate is required by the public convenience and necessity. If a motion for leave to intervene is timely filed, or if the Commission on its own motion believes that a formal hearing is required, further notice of such hearing will be duly given.

Under the procedure herein provided for, unless otherwise advised, it will be unnecessary for Applicant to appear or be represented at the hearing.

Kenneth F. Plumb,

Secretary.

[FR Doc. 83–15522 Filed 6–9–83; 8:45 am]

BILLING CODE 6717–01–M

[Docket No. RP83–82–000]

Consolidated Gas Supply Corp.; Proposed Changes in FERC Gas Tariff

June 6, 1983.

Take notice that Consolidated Gas Supply Corporation (Consolidated), on May 27, 1983, tendered for filing the following proposed changes in its FERC

Gas Tariff, Original Volume No. 2, to be effective March 1, 1983: First Revised Sheet No. 292.

This tariff sheet reflects an amendment to Consolidated's Rate Schedule X–9, an exchange agreement between Consolidated and Cabot Corporation. This amendment provides for conversion of the exchange agreement from a gravity-adjusted volumetric measurement basis to a heating value measurement basis.

A copy of this filing was served on Cabot Corporation.

Any person desiring to be heard or to protest said filing should file a petition to intervene or protest with the Federal Energy Regulatory Commission, 825 North Capitol Street NE., Washington, D.C. 20426, in accordance with Rules 211 and 214 of the Commission's Rules of Practice and Procedures. All such petitions or protests should be filed on or before June 17, 1983. Protests will be considered by the Commission in determining the appropriate action to be taken, but will not serve to make protestants parties to the proceeding. Any person wishing to become a party must file a petition to intervene. Copies of this filing are on file with the Commission and are available for public inspection.

Kenneth F. Plumb,

Secretary.

[FR Doc. 83–15523 Filed 6–9–83; 8:45 am]

BILLING CODE 6717–01–M

[Docket No. CP77–216–009]

Distrigas of Massachusetts Corp.; Petition To Amend

June 6, 1983.

Take notice that on May 17, 1983, Distrigas of Massachusetts Corporation (DOMAC), 125 High Street, Boston, Massachusetts 02110, filed in Docket No. CP77–216–009 a petition to amend the order issued on December 28, 1978, in Docket No. CP77–216 pursuant to Section 7(c) of the Natural Gas Act so as to authorize changes in the amount of gas to be delivered to its customers, all as more fully set forth in the amendment to the application which is on file with the Commission and open to public inspection.

DOMAC requests that its certificate be amended to reflect certain changes in its supplemental LNG supply and peak-shaving project. The manner in which the modification would be effected are summarized as follows:

(A) Authorization to sell up to an additional 8.5 trillion Btu of LNG as option cargoes;

(B) Adjustments in customers' annual contract quantities (ACQ). These adjustments are as follows:

Customer	ACQ (BBtu's)		
	Present ACQ	Reduction by Apr. 1, 1987	Adjusted ACQ
Boston Gas Co	13,746	3,410	10,336
Connecticut Gas Co	1,450	143	1,307
Valley Gas Co	348	17	331

DOMAC also seeks authority to increase the ACQs of The Brooklyn Union Gas Company, Bay State Gas Company, Haverhill Gas Company and New Jersey Natural Gas Company.

In addition, DOMAC submits the following changes:

(1) A change in DOMAC's Rate Schedule TS–1 in its FERC Gas Tariff, First Revised Volume No. 1, Original Sheet No. 16, to provide that the take-or-pay obligation of DOMAC's customers during the winter period (October 1 through March 31) be the equivalent of nine full cargoes of LNG of a ship with a capacity of approximately 125,000 cubic meters and that the take-or-pay obligation in the summer period (April 1 through September 30) be the equivalent of five full cargoes of a ship with a capacity of approximately 125,000 cubic meters;

(2) A new DOMAC Rate Schedule GS-Option which allows participating customers to elect delivery of the equivalent of up to three additional cargoes of approximately 125,000 cubic meters per contract year;

(3) A new DOMAC Rate Schedule TS-Option which provides for the terminalling and delivery of cargoes elected under Rate Schedule GS-Option.

(4) A change in the level of the customer's maximum daily call-out quantity. Paragraphs 6.1 and 6.2, Original Sheet No. 44, First Revised Volume No. 1 also are to be revised to reflect a change in billing procedures.

These modifications would, it is stated, enable DOMAC's customers to match their purchases of supplemental LNG more closely to the current needs of their particular markets. It is asserted that approval of this application would assist in equating the service rendered by DOMAC to a predominately winter-heating service.

Any person desiring to be heard or to make any protest with reference to said petition to amend should on or before June 24, 1983, file with the Federal Energy Regulatory Commission, Washington, D.C. 20426, a motion to intervene or a protest in accordance with the requirements of the Commission's Rules of Practice and Procedure (18 CFR 385.211 or 385.214). All protests filed with the Commission will be considered by it in determining the appropriate action to be taken but will not serve to make the protestants parties to the proceeding. Any person wishing to become a party to a proceeding or to participate as a party in any hearing therein must file a motion to intervene in accordance with the Commission's Rules.

Kenneth F. Plumb,

Secretary.

[FR Doc. 83–15524 Filed 6–9–83; 8:45 am]

BILLING CODE 6717–01–M

[Docket No. TA83–2–13–001]

Gas Gathering Corp.; Proposed Change in Rates Under Purchased Gas Adjustment Clause Provision

June 6, 1983.

Take notice that on May 24, 1983, Gas Gathering Corporation (GGC) tendered for filing proposed changes in its FERC Gas Tariff providing for decreased charges to Transcontinental Gas Pipe Line Corporation (Transco), its sole jurisdictional customer, under GGC's PGA clause. The proposed changes would decrease the rate charged Transco by 0.62258 cents per MMBtu from those rates presently in effect. The proposed changes are proposed to be made effective July 1, 1983. GGC states that the filing is made to allow it to recover increased current costs of purchased gas, and to reduce the balance of its Unrecovered Purchased Gas Cost as of March 31, 1983 through a six-month surcharge.

A copy of the filing has been served upon Transco.

Any person desiring to be heard or to protest said filing should file a petition to intervene or protest with the Federal Energy Regulatory Commission, 825 North Capitol Street, N.E., Washington, D.C. 20426, in accordance with Rules 211 and 214 of the Commission's Rules of Practice and Procedure (18 CFR 385.211, 385.214). All such petitions or protests should be filed on or before June 17, 1983. Protests will be considered by the Commission in determining the appropriate action to be taken, but will not serve to make protestants parties to the proceeding. Any person wishing to become a party must file a petition to intervene. Copies of this filing are on file

with the Commission and are available for public inspection.

Kenneth F. Plumb,

Secretary.

[FR Doc. 83-15525 Filed 6-9-83; 8:45 am]

BILLING CODE 6717-01-M

[Docket No. TA83-2-4-001, (PGA 83-4, IPR83-2)]

Granite State Gas Transmission, Inc.; Proposed Changes in Rates Pursuant to Purchased Gas Cost Adjustment Provisions

June 6, 1983.

Take notice that Granite State Gas Transmission, Inc. (Granite State), 120 Royall Street, Canton, Massachusetts 02021, on May 31, 1983, tendered for filing Fifth Revised Sheet No. 7 and Third Revised Sheet No. 9 in its FERC Gas Tariff, First Revised Volume No. 1, containing proposed changes in rates for effectiveness on July 1, 1983.

According to Granite State, the instant rate adjustments reflect a decrease in its cost of gas purchased from Tennessee Gas Pipeline Company, a Division of Tenneco Inc. (Tennessee) which Tennessee proposes to make effective July 1, 1983, and the amortization of Unrecovered Purchased Gas Costs. It is stated that Granite State's filing is made pursuant to the purchase gas cost adjustment provision in section XIX of the General Terms and Conditions of its tariff.

Granite State further states that its rate adjustments are applicable to its wholesale sales to its two affiliated distribution company customers: Bay State Gas Company and Northern Utilities, Inc. According to Granite State, the effect of the proposed rates in its filing is a decrease of approximately $2,386,700 annually in the cost gas purchased by its customers, based on purchases and sales for the twelve months ended March 31, 1983.

According to Granite State, copies of the filing were served upon its customers and the regulatory commissions of the States of Maine, Massachusetts and New Hampshire.

Any person desiring to be heard or to protest said filing should file a motion to intervene or protest with the Federal Energy Regulatory Commission, 825 North Capitol Street, N.E., Washington, D.C. 20426, in accordance with Sections 211 and 214 of the Commission's Rules of Practice and Procedure (18 CFR 385.211, 385.214). All such motions or protests should be filed on or before June 17, 1983. Protests will be considered by the Commission in determining the appropriate action to be taken, but will not serve to make protestants parties to the proceeding. Any person wishing to become a party must file a motion to intervene. Copies of this filing are on file with the Commission and are available for public inspection.

Kenneth F. Plumb,

Secretary.

[FR Doc. 83-15526 Filed 6-9-83; 8:45 am]

BILLING CODE 6717-01-M

[Docket No. TA83-2-48-002]

Michigan Wisconsin Pipe Line Co.; Proposed Changes in FERC Gas Tariff

June 6, 1983.

Take notice that on June 1, 1983, Michigan Wisconsin Pipe Line Company (Michigan Wisconsin) tendered for filing as part of its F.E.R.C. Gas Tariff, Original Volume No. 1, Second Substitute Eighteenth Revised Sheet No. 7, which reflects decreases in Michigan Wisconsin's one-part rate for SGS-1 customers of 2.64¢ per dekatherm (dth) and for LVS-1 customers of 4.59¢ per dth and the commodity component of its two-part rate of 6.03 cents per dth, and an increase in the demand component of its two-part rate of 30.2 cents per dth.

Also, Michigan Wisconsin submitted Original Volume No. 1, Nineteenth Revised Sheet No. 7, as part of F.E.R.C. Gas Tariff, which reflects decreases in Michigan Wisconsin's one-part rate and the commodity component of its two-part rate of 9.86 cents per dth.

Michigan Wisconsin has also filed Eighth Revised Sheet No. 7a which reflects the fact that since there were zero MSAC's reported by Michigan Wisconsin's customers, there is no PGA reduction.

Copies of this filing were served upon Michigan Wisconsin's customers and interested state commissions.

Any person desiring to be heard or to protest said filing should file a petition to intervene or protest with the Federal Energy Regulatory Commission, 825 North Capitol Street, NE., Washington, D.C. 20426, in accordance with §§ 385.211 and 385.214 of the Commission's Rules of Practice and Procedure (18 CFR 385.211, 385.214). All such petitions or protests should be filed on or before June 17, 1983. Protests will be considered by the Commission in determining the appropriate action to be taken, but will not serve to make protestants parties to the proceeding. Any person wishing to become a party must file a petition to intervene. Copies of this filing are on file with the Commission and are available for public inspection.

Kenneth F. Plumb,

Secretary.

[FR Doc. 83-15527 Filed 6-9-83; 8:45]

BILLING CODE 6717-01-M

[Docket No. TA83-2-5-002 (PGA83-4, IPR83-2)]

Midwestern Gas Transmission Co.; Rate Filing Pursuant to Tariff Rate Adjustment Provisions

June 6, 1983.

Take notice that on May 31, 1983, Midwestern Gas Transmission Company (Midwestern) tendered for filing the following tariff sheets to its FERC Gas Tariff, Original Volume No. 1 to be effective July 1, 1983:

Seventh Revised Sheet No. 5
Eighth Revised Sheet No. 6
Fifth Revised Sheet Nos. 7 and 8

Midwestern states that the sole purpose of the revised tariff sheets is to reflect adjustments to its rates pursuant to rate adjustment provisions of the General Terms and Conditions of its tariff as follows:

(1) PGA Rate Adjustments for the Southern System pursuant to Sections 2 and 3 of Article XVII:

(2) A PGA Adjustment for the Northern System pursuant to Section 3 of Article XVIII;

(3) Estimated Incremental Pricing Surcharges for the Southern System pursuant to Section 2 of Article XXII; and

(4) Estimated Incremental Pricing Surcharges for the Northern System pursuant to Section 2 of Article XXIII.

Midwestern states that copies of the filing have been mailed to all of its jurisdictional customers and affected state regulatory commissions.

Any person desiring to be heard or to protest said filing should file a petition to intervene or protest witht the Federal Energy Regulatory Commission, 825 North Capitol Street, N.E., Washington, D.C. 20426, in accordance with Rules 211 and 214 of the Commission's Rules of Practice and Procedure. All such petitions or protests should be filed on or before June 17, 1983. Protests will be considered by the Commission in determining the appropriate action to be taken, but will not serve to make protestants parties to the proceeding.

Any person wishing to become a party must file a petition to intervene. Copies of this filing are on file with the Commission and are available for public inspection.

BILLING CODE 6717-01-M

[Docket No. TA83-2-8-000]

South Georgia Natural Gas Co.; Rate Filing

June 6, 1983.

Take notice that on May 27, 1983, South Georgia Natural Gas Company tendered for filing Twenty-Second Revised Sheet No. 4 to First Revised Volume No. 1 of its FPC Gas Tariff to be effective June 1, 1983.

South Georgia states that the sole purposes of the revised tariff sheet is to simultaneously change its rates to reflect the reduced rates charged to South Georgia by its supplier, Southern Natural Gas Company, to be effective June 1, 1983, as approved by the Commission in Docket Nos. RP82-116-000 and TA83-2-7-000. South Georgia requests waiver to make the filing effective as proposed and states that copies of the filing have been mailed to all of its jurisdictional customers and affected state regulatory commissions.

Any person desiring to be heard or to protest said filing should file a petition to intervene or protest with the Federal Energy Regulatory Commission, 825 North Capitol Street NE., Washington, D.C. 20426, in accordance with Rules 211 and 214 of the Commission's Rules of Practice and Procedure. All such petitions or protests should be filed on or before June 17, 1983. Protests will be considered by the Commission in determining the appropriate action to be taken, but will not serve to making protestants parties to the proceeding. Any person wishing to become a party must file a petition to intervene. Copies of this filing are on file with the Commission and are available for public inspection.

BILLING CODE 6717-01-M

[Docket No. TA83-2-8-001]

South Georgia Natural Gas Co.; Revision to Tariff

June 6, 1983.

Take notice that on May 31, 1983, South Georgia Natural Gas Company (South Georgia) tendered for filing Twenty-Third Revised Sheet No. 4 to its FPC Gas Tariff, First Revised Volume No. 1. This tariff sheet and supporting information is being filed 30 days before the effective date of July 1, 1983, pursuant to the purchased gas adjustment provisions set out in Section 14 of South Georgia's Tariff. South Georgia states that its Twenty-Third Revised Sheet No. 4 reflects no change in the cost of gas from its May 27, 1983 out of cycle PGA rate decrease filing which flows through to South Georgia's customers to benefits of an interim rate reduction made by its supplier, Southern Natural Gas Company (Southern), which will be effective on June 1, 1983. The only change reflected on Twenty-Third Revised Sheet No. 4 is the recomputation of the surcharge adjustment as provided for by § 14.3 of the General Terms and Conditions of South Georgia's Tariff to recover the debit balance of $787,539 in the

Unrecovered Purchased Gas Cost Account to be amortized over the estimated sales over the 6-month period commencing July 1, 1983. The surcharge adjustment rate is 9.93¢ per MMBtu.

Any person desiring to heard or to protest said filing should file a petition to intervene or protest with the Federal Energy Regulatory Commission, 825 North Capitol Street, NE., Washington, D.C. 20426, in accordance with Rules 211 and 214 of the Commission's Rules of Practice and Procedure. All such petitions or protests should be filed on or before June 17, 1983. Protests will be considered by the Commission in determining the appropriate action to be taken, but will not serve to make protestants parties to the proceeding. Any person wishing to become a party must file a petition to intervene. Copies of this filing are on file with the Commission and are available for public inspection.

Kenneth F. Plumb,

Secretary.

BILLING CODE 6717-01-M

[Docket Nos. CP75-23-015 and CP75-120-008]

Tennessee Gas Pipeline Company, a Division of Tenneco Inc.; Petition To Amend

June 6, 1983.

Take notice that on May 2, 1983, Tennessee Gas Pipeline Company, a Division of Tenneco Inc. (Petitioner), P.O. Box 2511, Houston, Texas 77001, filed in Docket Nos. CP75-23-015 and CP75-120-008 a petition to amend the order issued on March 7, 1977,[1] in Docket Nos. CP75-23 and CP75-120, as amended, pursuant to Section 7(c) of the Natural Gas Act so as to authorize the establishment of new natural gas receipt points for the transportation of natural gas for Tenneco Oil Company (TOC) all as more fully set forth in the petition to amend which is on file with the Commission and open to public inspection.

Petitioner proposes herein to receive gas from TOC at Cocodrie, Terrebonne Parish, Louisiana, and at Katy, Waller County, Texas, which gas is from TOC's San Juan Basin reserves located in New Mexico. In addition, Petitioner requests that the end-use restriction currently in force in the authorization in Docket Nos. CP75-23 and CP75-120 be eliminated with respect to the transportation of gas from these new receipt points.

Petitioner explains that by order issued March 7, 1977, in Docket Nos. CP75-23-015 and CP75-120-008, it was authorized to transport natural gas for TOC from specified receipt points to a point of interconnection with Creole Gas Pipeline Corporation near Ysclosky, Louisiana, for further delivery to Air Products and Chemicals, Inc. and for delivery to TOC's Chalmette refinery.

Any person desiring to be heard or to make any protest with reference to said petition to amend should on or before June 24, 1983, file with the Federal Energy Regulatory Commission, Washington, D.C. 20426, a motion to intervene or a protest in accordance with the requirements of the Commission's Rules of Practice and Procedure (18 CFR 385.214 or 385.211) and the Regulations under the Natural Gas Act (18 CFR 157.10). All protests filed with the Commission will be considered by it in determining the appropriate action to be taken but will not serve to make the protestants parties to the proceeding. Any person wishing to become a party to a proceeding or to participate as a party in any hearing therein must file a motion to intervene in accordance with the Commission's Rules.

Kenneth F. Plumb,

Secretary.

[FR Doc. 83-15535 Filed 6-9-83; 8:45 am]

BILLING CODE 6717-01-M

[Docket No. CP75-23-016]

Tennessee Gas Pipeline Co., a Division of Tenneco Inc.; Petition To Amend

June 6, 1983.

Take notice that on May 2, 1983, Tennessee Gas Pipeline Company, a Division of Tenneco Inc. (Petitioner), P.O. Box 2511, Houston, Texas 77001, filed in Docket No. CP75-23-016, a petition to amend the order of March 7, 1977, in Docket No. CP75-23 [1] issuing a cetificate of public convenience and necessity pursuant to Section 7(c) of the Natural Gas Act so as to authorize the transportation of natural gas with no end-use restriction upon gas transported, all as more fully set forth in the petition to amend which is on file with the Commission and open to public inspection.

It is asserted that by order issued March 7, 1977, in Docket No. CP75-23, Petitioner was authorized to transport certain sources of natural gas on behalf of Tenneco Oil Company from certain receipt points onshore and certain other receipt points in the Outer Continental Shelf for ultimate delivery to Air Products and Chemicals, Inc., for use at its New Orleans Louisiana, plant. It is stated that the order restricted the use of the gas for feedstock or process use only. Petitioner states that in Opinion No. 10, issued March 20, 1978 (2 FERC ¶ 71,247), the Commission granted rehearing of Opinion No. 789 and amended the certificate in this docket so as to eliminate authorization for the transportation of gas from the Outer Continental Shelf on the ground that natural gas from the offshore federal domain should be sold to interstate pipelines or local distributors for system supply. Further, it is asserted that in Opinion No. 10-B issued December 23, 1982 (21 FERC ¶ 61,320), the Commission adhered to its former ruling with respect to the offshore applications before it but denied those applications without prejudice stating that it would apply a different policy to future applications to transport offshore supplies, and, additionally, the Commission stated that it was revising the former end-use policy. Petitioner, therefore, requests elimination of the end-use restrictions previously applied. Petitioner does not propose any change in volumes of gas transported, receipt points, or other terms of the authorization previously issued.

Any person desiring to be heard or to make any protest with reference to said petition to amend should on or before June 24, 1983, file with the Federal Energy Regulatory Commission, Washington, D.C. 20426, a motion to intervene or a protest in accordance with the requirements of the Commission's Rules of Practice and Procedure (18 CFR 385.214 or 385.211) and the Regulations under the Natural Gas Act (18 CFR 157.10). All protests filed with the Commission will be considered by it in determining the appropriate action to be taken but will not serve to make the protestants parties to the proceeding. Any person wishing to become a party to a proceeding or to participate as a party in any hearing therein must file a motion to intervene in accordance with the Commission's Rules.

[1] This proceeding was commenced before the FPC. By joint regulation of October 1, 1977 (10 CFR 1000.1), it was transferred to the Commission.

[Docket No. TA83-2-10-001 (PGA83-2)]

Tennessee Natural Gas Lines, Inc.; PGA Tariff Filing

June 6, 1983.

Take notice that on May 31, 1983, Tennessee Natural Gas Lines, Inc. ("TNGL"), tendered for filing a rate change, pursuant to the purchased gas cost adjustment ("PGA") provisions of its F.E.R.C. Gas Tariff, First Revised Volume No. 1, consisting of the following tariff sheets:

Forty-Third Revised Sheet No. PGA-1
Seventh Revised Sheet No. PGA-1-A

TNGL requests that such tariff sheets be allowed to become effective on July 1, 1983.

TNGL states that the purposes of its filing are: to reflect in its rates the changed rates of its sole supplier Tennessee Gas Pipeline Company, a Division of Tenneco, Inc. ("TGP"), which will become effective on July 1, 1983.

TNGL states that copies of the filing were served upon its jurisdictional customer, the interested state regulatory commission, its non-jurisdictional customers estimated to be billed for NGPA incremental pricing surcharges, and are available for public inspection at TNGL's offices in Nashville, Tennessee.

Any person desiring to be heard or to protest said filing should file a petition to intervene or protest with the Federal Energy Regulatory Commission, 825 North Capitol Street, Washington, D.C. 20426, in accordance with Sections 211 and 214 of the Commission's Rules of Practice and Procedure (18 CFR 385.211, 385.214). All such petitions or protests should be filed on or before June 17, 1983. Protests will be considered by the Commission in determining the appropriate action to be taken, but will not serve to make protestants parties to the proceedings. Any person wishing to become a party must file a petition to intervene. Copies of this filing are on file with the Commission and available for public inspection.

Kenneth F. Plumb,

Secretary.

[FR Doc. 83-15536 Filed 6-9-83; 8:45 am]

BILLING CODE 6717-01-M

[Docket No. CP79-364-005]

Texas Eastern Transmission Corp.; Petition To Amend

June 6, 1983.

Take notice that on May 16, 1983, Texas Eastern Transmission Corporation, (Tetco), P.O. Box 2521, Houston, Texas 77252, filed in Docket No. CP79-364-005 a petition to amend the order issued December 3, 1979, in Docket No. CP79-364-000 pursuant to Section 7(c) of the Natural Gas Act so as to authorize the transportation of natural gas for Northern Natural Gas Company, a Division of InterNorth, Inc. (Northern), to two additional delivery points and to extend the term of the transportation service to December 31, 1983, all as more fully set forth in the petition to amend which is on file with the Commission and open to public inspection.

Tetco states that by order issued December 3, 1979, it was authorized to transport up to 100,000 dt equivalent of natural gas per day on a firm basis and up to 50,000 dt equivalent of natural gas per day on an interruptible basis for Northern from Calcasieu Parish, Louisiana, to Chambers County, Texas. Tetco proposes herein to transport gas to United Gas Pipe Line Company, for Northern's account, at two existing points in Beauregard Parish, Louisiana, and Jackson County, Texas. It is stated that the additional delivery points would utilize existing facilities and no construction would be required in this proceeding. Tetco states that the amended transportation agreement reflects Tetco's currently effective transportation rate pursuant to its TS-2 Rate Schedule, with a monthly charge to Northern of $829,267.83 for the firm service and 27.82¢ per dth for the interruptible volumes.

Tetco further proposes the transportation of gas for Northern for a period terminating December 31, 1983, pursuant to an amendment to the gas transportation agreement dated April 12, 1983.

Any person desiring to be heard or to make any protest with reference to said petition to amend should on or before June 24, 1983, file with the Federal Energy Regulatory Commission, Washington, D.C. 20426, a motion to intervene or a protest in accordance with the requirements of the Commission's Rules of Practice and Procedure (18 CFR 385.214 or 385.211) and the Regulations under the Natural Gas Act (18 CFR 157.10). All protests filed with the Commission will be considered by it in determining the appropriate action to be taken but will not serve to make the protestants parties to the proceeding. Any person wishing to become a party to a proceeding or to participate as a party in any hearing therein must file a motion to intervene in accordance with the Commission's Rules.

Kenneth F. Plumb,

Secretary.

[FR Doc. 83-15515 Filed 6-9-83; 8:45 am]

BILLING CODE 6717-01-M

[Docket No. CP82-046-002]

Transcontinental Gas Pipe Line Corp., et al.; Amendment

June 6, 1983.

Take notice that on May 2, 1983, Transcontinental Gas Pipe Line Corporation (Transco), Post Office Box 1396, Houston, Texas 77251, Algonquin Gas Transmission Company (Algonquin), 1284 Soldiers Field Road, Boston, Massachusetts 02135, and Texas Eastern Transmission Corporation (TETCO), P.O. Box 2521, Houston, Texas 77252, filed in Docket No. CP82-046-002 an amendment to their pending application filed in Docket No. CP82-046-000 pursuant to Section 3 of the Natural Gas Act for authorization to import natural gas from Canada so as to reflect changes in this proposal resulting from the export decision of the National Energy Board of Canada (NEB), all as more fully set forth in the amendment which is on file with the Commission and open to public inspection.

The purpose of the instant amendment is to conform the original application to the omnibus export decision of the NEB, Issued January 27, 1983. Applicants state that the decision reduced by 50 percent the maximum daily quantities of gas available to Transco, Algonquin and TETCO from their supplier, Pan-Alberta Gas Ltd. (Pan-Alberta) and provided for a twelve-year export license, with 25 percent reductions in quantities in each of the last three years, rather than the approximately fifteen-year initial term which had been originally requested.

Applicants assert the NEB issued a license to Pan-Alberta for a term of twelve years commencing November 1, 1984, for exportation at Niagara Falls, Ontario, of a total quantity of approximately 586,000,000 Mcf of natural gas with reduction in the last three contract years, as follows:

Period	Daily quantities (Mcf)	Annual quantities (Mcf)
Nov. 1, 1984, to Oct. 31, 1993	152,937	55,900,000
Nov. 1, 1993, to Oct. 31, 1994	114,703	41,900,000
Nov. 1, 1994, to Oct. 31, 1995	76,469	27,900,000
Nov. 1, 1995, to Oct. 31, 1996	38,234	14,000,000

In view of the NEB's export license to Pan-Alberta, the application of Transco,

Algonquin and TETCO is herein amended to conform to the daily, annual, and total quantities for the term of the NEB's export license.

Any person desiring to be heard or to make any protest with reference to said amendment should on or before June 24, 1983, file with the Federal Energy Regulatory Commission, Washington, D.C. 20426, a motion to intervene or a protest in accordance with the requirements of the Commission's Rules of Practice and Procedure (18 CFR 385.214 or 385.211). All protests filed with the Commission will be considered by it in determining the appropriate action to be taken but will not serve to make the protestants parties to the proceeding. Any person wishing to become a party to a proceeding or to participate as a party in any hearing therein must file a motion to intervene in accordance with the Commission's Rules. All persons who have heretofore filed need not file again.

Kenneth F. Plumb,

Secretary.

[FR Doc. 83-15518 Filed 6-9-83; 8:45 am]

BILLING CODE 6717-01-M

[Docket No. CP83-314-000]

Transcontinental Gas Pipe Line Corp.; Application

June 6, 1983.

Take notice that on May 4, 1983, Transcontinental Gas Pipe Line Corporation (Transco), P.O. Box 1396, Houston, Texas 77251, filed in Docket No. CP83-314-000 an application pursuant to Section 3 of the Natural Gas Act for authorization to import up to 150,000 Mcf of natural gas per day from Canada, and with respect to certain storage arrangements, to export to Canada up to 150,000 Mcf of gas per day, and to import into the United States up to 300,000 Mcf of natural gas per day, all as more fully set forth in the application which is on file with the Commission and open to public inspection.

It is stated that on December 18, 1981, Transco filed an application in Docket No. CP82-125-000 for authorization under Section 3 of the Natural Gas Act to import 300,000 Mcf of natural gas per day purchased from TransCanada PipeLines Limited (TransCanada), to export to Canada up to 300,000 Mcf per day and to reimport into the United States up to 600,000 Mcf per day related to a new storage service. Transco proposes herein to reduce the quantities of gas to be imported which was necessitated by the January 27, 1983, decision of the National Energy Board of Canada (NEB).

It is stated that the NEB authorized TransCanada to export up to 150,000 Mcf per day for sale to Transco. It is asserted that the sale to Transco would be made pursuant to the terms of the April, 14, 1981, precedent agreement, as amended, and subject to the NEB's limitations in the export license as to daily quantities and terms. It is stated that the two export points authorized by the NEB are Emerson, Manitoba, and Niagara Falls, Ontario. It is further stated that the twelve-year term of the export license commences with the November 1, 1984, anticipated date of initial deliveries. It is explained that the total authorized export quantities are approximately 576,000,000 Mcf and there are annual reductions in authorized daily and annual quantities during the last three contract years, as follows:

Period	Daily quantities (Mcf)	Annual quantities (Mcf)
Nov. 1, 1984, to Oct. 3, 1993	150,000	54,800,000
Nov. 1, 1993, to Oct. 31, 1994	112,500	41,200,000
Nov. 1, 1994, to Oct. 31, 1995	75,000	27,500,000
Nov. 1, 1995, to Oct. 31, 1996	37,500	13,700,000

Transco proposes to undertake storage arrangements of up to 20,000,000 Mcf annually of the natural gas to be purchased from TransCanada. It is stated that the gas is to be stored at two locations: up to 10,000,000 Mcf at ANR storage Company's (ANR) storage facilities in Grand Traverse County, Michigan, and up to 10,000,000 Mcf at Union Gas Limited's (Union) storage facilities near Dawn, Ontario. It is stated that the gas to be injected into storage would be imported at an existing point of interconnection between the facilities of Great Lakes Gas Transmission Company (Great Lakes) and TransCanada near Emerson, Manitoba. Great Lakes, it is asserted, would deliver the gas to ANR's facilities in Crawford County, Michigan, and the balance of the storage quantities would be transported to the existing point of interconnection between the facilities of Great Lakes and TransCanada near St. Clair, Michigan. TransCanada would deliver these quantities to Union's system for storage for Transco's account near Dawn, Ontario, it is submitted.

Storage withdrawals from ANR would be transported by Michigan Consolidated Gas Company and Great Lakes to the St. Clair export point and would then be transported by TransCanada to Union's system and added to storage quantities withdrawn from Union's system for delivery to TransCanada near Kirkwall, Ontario, it is explained. The storage quantities would then be delivered by TransCanada for Transco's account at the Niagara Falls import point, Transco asserts.

Any person desiring to be heard or to make any protest with reference to said application should on or before June 24, 1983, file with the Federal Energy Regulatory Commission, Washington, D.C. 20426, a motion to intervene or a protest in accordance with the requirements of the Commission's Rules of Practice and Procedure (18 CFR 385.214 or 385.211). All protests filed with the Commission will be considered by it in determining the appropriate action to be taken but will not serve to make the protestants parties to the proceeding. Any person wishing to become a party to a proceeding or to participate as a party in any hearing therein must file a motion to intervene in accordance with the Commission's Rules.

Kenneth F. Plumb,

Secretary.

BILLING CODE 6717-01-M

[Docket No. TA83-2-1-002]

Alabama-Tennessee Natural Gas Co.; Proposed PGA Rate Adjustment

June 7, 1983.

Take notice that on June 1, 1983, Alabama-Tennessee Natural Gas Company (Alabama-Tennessee), Post Office Box 918, Florence, Alabama 35631, tendered for filing as part of its FPC Gas Tariff, Third Revised Volume No. 1, the following tariff sheets:

Forty-Second Revised Sheet No. 3-A
and
Sixth Revised Sheet No. 3-B

These tariff sheets are proposed to become effective July 1, 1983. Alabama-Tennessee states that the purpose of this filing is to adjust its rates to conform to the rates of its suppliers, Tennessee Gas Pipeline Company (Tennessee), a Division of Tenneco Inc., and Sun Exploration and Production Company. Tennessee, on June 1, 1983, filed with the Commission a PGA filing providing for adjustments in its rates which are also proposed to become effective July 1, 1983. Alabama-Tennessee states that the changes in its rates have been made in conformity with the PGA and related provisions of its tariff.

The tariff sheets submitted herewith provide for the following rates:

Rate schedule	Rates after current adjustment
G-1:	
Demand	56.17
Commodity	342.50
SG-1:	
Commodity	401.65
I-1:	
Commodity	370.02

Alabama-Tennessee states that copies of the tariff filing have been mailed to all of its jurisdictional customers and affected State Regulatory Commissions.

Any person desiring to be heard or to protest such filing should file a petition to intervene or protest with the Federal Energy Regulatory Commission, 825 North Capitol Street NE., Washington, D.C. 20426, in accordance with Rules 211 and 214 of the Commission's Rules of Practice and Procedure (18 CFR 385.211, 385.214). All such petitions or protests should be filed on or before June 17, 1983. Protests will be considered by the Commission in determining the appropriate action to be taken, but will not serve to make the protestants parties to the proceeding. Any person wishing to become a party must file a petition to intervene. Copies of this filing are on file with the Commission and are available for public inspection.

Arbutus Corp.; Application for Commission Certification of Qualifying Status of a Small Power Production Facility

June 8, 1983.

On May 16, 1983, The Arbutus Corporation, 230-4041 MacArthur Blvd., Newport Beach, California 92660, filed with the Federal Energy Regulatory Commission (Commission) an application for certification of a facility as a qualifying small power production facility pursuant to § 292.207 of the Commission's rules.

The wind powered facility will be located in Tehachapi, California. The electric power production capacity of the facility will be 22.5 megawatts.

Any person desiring to be heard or objecting to the granting of qualifying status should file a petition to intervene or protest with the Federal Energy Regulatory Commission, 825 North Capitol Street, NE., Washington, D.C. 20426, in accordance with rules 211 and 214 of the Commission's Rules of Practice and Procedure. All such petitions or protests must be filed within 30 days after the date of publication of this notice and must be served on the applicant. Protests will be considered by the Commission in determining the appropriate action to be taken, but will not serve to make protestants parties to the proceeding. Any person wishing to become a party must file a petition to intervene. Copies of this filing are on file with the Commission and are available for public inspection.

Kenneth F. Plumb,

Secretary.

BILLING CODE 6717-01-M

[Docket No. ER83-528-000]

Bangor Hydro-Electric Co.; Filing

June 7, 1983.

The filing Company submits the following:

Take notice that on May 27, 1983, Bangor Hydro-Electric Company (Bangor) tendered for filing a Sales Agreement (Agreement) made as of May 1, 1983 between Bangor and Public Service Company of New Hampshire (PSNH) for the sale of unit power by Bangor to PSNH.

Bangor states that the Agreement provides for a unit sale of 40,000 kilowatts from Bangor's entitlement in the Mystic Unit No. 7, owned and operated by the Boston Edison Company (Boston), to PSNH. Bangor has such entitlement under contract for the proposed term of the Agreement from Boston. Such contract has been accepted for filing as Boston's Rate Schedule FPC No. 106. The Agreement provides that PSNH pay for the capacity at the rate of $20 per kilowatt per year and for their pro-rata share of the actual energy costs.

Bangor requests an effective date of May 1, 1983, and therefore requests waiver of the Commission's notice requirements.

Copies of the filing have been mailed to PSNH.

Any person desiring to be heard or to protest said filing should file a motion to intervene or protest with the Federal Energy Regulatory Commission, 825 North Capitol Street NE., Washington, D.C. 20426, in accordance with Rules 211 and 214 of the Commission's Rules of Practice and Procedure (18 CFR 385.211, 385.214). All such motions or protests should be filed on or before June 22, 1983. Protests will be considered by the Commission in determining the appropriate action to be taken, but will not serve to make protestants parties to the proceeding. Any person wishing to become a party must file a motion to intervene. Copies of this filing are on file with the Commission and are available for public inspection.

[Docket No. ER83-526-000]

Centel Corp.; Filing

June 7, 1983.

The filing Company submits the following:

Take notice that Centel Corporation (Centel) on May 25, 1983, tendered for filing a proposed Appendix No. 1 to Service Schedule P (Participation Power Service) and Appendix 1 to Service Schedule J (Displacement Power Service), both as a part of the Electric Interconnection and Interchange Agreement between Centel Corporation and Sunflower Electric Cooperative, Inc., dated June 3, 1980. These Appendixes contain the rate determination calculations for the contract year beginning June 1, 1983 and ending May 31, 1984.

Centel proposes an effective date of June 1, 1983, and therefore requests waiver of the Commission's notice requirements.

Any person desiring to be heard or to protest said filing should file a motion to intervene or protest with the Federal Energy Regulatory Commission, 825 North Capitol Street NE., Washington, D.C. 20426, in accordance with Rules 211 and 214 of the Commission's Rules of Practice and Procedure (18 CFR 385.211, 385.214). All such motions or protests should be filed on or before June 22, 1983. Protests will be considered by the Commission in determining the appropriate action to be taken, but will not serve to make protestants parties to the proceeding. Any person wishing to become a party must file a motion to intervene. Copies of this filing are on file with the Commission and are available for public inspection.

[Docket No. TA83-2-2-002 (PGA83-3, IPR83-2)]

East Tennessee Natural Gas Co.; Rate Filing Pursuant to Tariff Rate Adjustment Provisions

June 7, 1983.

Take notice that on May 31, 1983, East Tennessee Natural Gas Company (East Tennessee) tendered for filing Seventh Revised Sheet No. 4 and Fifth Revised Sheet Nos. 5 and 6 to Original Volume No. 1 of its FERC Gas Tariff to be effective July 1, 1983.

East Tennessee states that the purpose of these tariff sheets is to reflect various rate adjustments pursuant to the General Terms and Conditions of its tariff as follows:

(1) A PGA Rate Adjustment pursuant to Section 22;

(2) Estimated Incremental Pricing Surcharges pursuant to Section 26.

East Tennessee states that copies of this filing have been mailed to all affected customers and affected state regulatory commissions.

Any person desiring to be heard or to protest said filing should file a petition to intervene or protest with the Federal Energy Regulatory Commission, 825 North Capitol Street NE., Washington, D.C. 20426, in accordance with Rules 211 and 214 of the Commission's Rules of Practice and Procedure (18 CFR 385.211 and 385.214). All such petitions or protests should be filed on or before June 17, 1983. Protests will be considered by the Commission in determining the appropriate action to be taken, but will not serve to make protestants parties to the proceeding. Any person wishing to become a party must file a petition to intervene. Copies of this filing are on file with the Commission and are available for public inspection.

[Docket No. RP83-94-000]

Eastern Shore Natural Gas Co.; Filing Supporting Restatement of Base Tariff Rates

June 7, 1983.

Take notice that on May 31, 1983, Eastern Shore Natural Gas Company (Eastern Shore) tendered for filing a restatement of its Base Tariff Rates effective June 1, 1983, on Third Revised Substitute Twenty-second Revised Sheets No. 5 and 6 and a supporting cost study, pursuant to § 154.38(d)(4)(vi) of the Commission's Regulations. Eastern Shore states that this filing reflects no change in the level of Eastern Shore's jurisdictional rates but is being made for the sole purpose of justifying such rates, as required by the 36 month review procedures contained in the Commission's Regulations governing PGA clauses.

Eastern Shore states its agreement that as of June 1, 1983, the expiration date of the 36-month period prescribed in the Regulations, the restated Base Tariff Rates are automatically subject to refund as provided by § 154.38(d)(4)(vi) (a) and (c) of the Regulations.

Any person desiring to be heard or to protest said filing should file a petition to intervene or protest with the Federal Energy Regulatory Commission, 825 North Capitol Street NE., Washington, D.C. 20426, in accordance with Rules 211 and 214 of the Commission's Rules of Practice and Procedure (18 CFR 385.211, 385.214). All such petitions or protests should be filed on or before June 17, 1983. Protests will be considered by the Commission in determining the appropriate action to be taken, but will not serve to make protestants parties to the proceeding. Any person wishing to become a party must file a petition to intervene. Copies of this filing are on file with the Commission and are available for public inspection.

[Docket No. CP68-179-001]

Florida Gas Transmission Co.; Informal Conference

June 7, 1983.

At the informal conference convened on June 1, 1983, in the above-styled proceeding, the parties and the Commission Staff explored the possibility of arriving at a settlement of all of the issues raised in Florida Gas Transmission Company's abbreviated application filed on November 12, 1981 in Docket No. CP68-179-001. In view of the progress that was made relative to this matter at that conference, the parties requested that the conference by reconvened on June 22, 1983, for the purpose of continuing their endeavors to arrive at a settlement of all of the issues in the instant proceeding.

In view of the above, an informal conference will be convened on June 22, 1983 at 10:00 a.m. for the purpose of further settlement discussions.

This informal conference will be held at the offices of the FERC at 825 North Capitol Street NE., Washington, D.C. 20426. All interested parties are invited to attend this conference.

BILLING CODE 6717-01-M

[Docket No. ER83-527-000]

Kansas Gas and Electric Co.; Filing

June 7, 1983.

The filing Company submits the following:

Take notice that on May 27, 1983, the Kansas Gas and Electric Company (KG&E) tendered for filing proposed changes in its FERC Electric Service Tariff No. 93 and proposed cancellation of FERC Electric Service Tariff No. 150.

KG&E states that the filing substitutes transmission service for full requirements firm power service previously provided to four delivery points of the Kansas Power and Light Company (KPL).

KG&E states that the filing is necessary because KPL desires to directly serve four delivery points not contiguous with its main system. As the intermediate utility, it is KG&E which is best suited to provide transmission service for KPL to the delivery points. The substitution in service would be phased in by delivery point over a two year period by mutual agreement between KG&E and KPL.

KG&E requests waiver of the Commission's notice requirement to allow an effective date of June 1, 1983 for two delivery points, June 1, 1984 for a third delivery point, and June 1, 1985 for the fourth delivery point.

Copies of the filing were served upon KPL and the Kansas Corporation Commission.

Any person desiring to be heard or to protest said filing should file a motion to intervene or protest with the Federal Energy Regulatory Commission, 825 North Capitol Street NE., Washington, D.C. 20426, in accordance with Rules 211 and 214 of the Commission's Rules of Practice and Procedure (18 CFR 385.211, 385.214). All such motions or protests should be filed on or before June 22, 1983. Protests will be considered by the Commission in determining the appropriate action to be taken, but will not serve to make protestants parties to the proceeding. Any person wishing to become a party must file a motion to intervene. Copies of this filing are on file

with the Commission and are available for public inspection.

Kenneth F. Plumb,

Secretary.

BILLING CODE 6717-01-M

[Docket No. CP83-317-000]

Northern Natural Gas Co., Division of InterNorth, Inc.; Application

June 1, 1983.

Take notice that on May 10, 1983, Northern Natural Gas Company, Division of InterNorth, Inc. (Applicant), 2223 Dodge Street, Omaha, Nebraska 68102, filed in Docket No. CP83-317-000 an application pursuant to Section 7(b) of the Natural Gas Act for permission and approval to abandon an exchange of natural gas with Tennessee Gas Pipeline Company, a Division of Tenneco Inc. (Tennessee), all as more fully set forth in the application which is on file with the Commission and open to public inspection.

It is stated that Northern and Tennessee are currently authorized to exchange natural gas imported from Canada by Midwestern Gas Transmission Company (Midwestern), sold to Tennessee and delivered to Applicant for Tennessee's account by Midwestern in the state of Minnesota in exchange for volumes delivered to Tennessee in southern Louisiana by Applicant.

Applicant states that in accordance with the provisions of the exchange agreement with Tennessee, Tennessee gave notice to Applicant that it wishes to cancel their exchange agreement . dated June 30, 1977, effective August 1982.

Applicant further states that the abandonment of the natural gas exchange proposed hearing would not have significant impact on its pipeline system or any of its customers.

It is explained that Tennessee has notified MIdwestern of its wish to cancel its interim gas sales agreement with Midwestern because it currently has no need for this interruptible supply of natural gas.

Any person desiring to be heard or to make any protest with reference to said application should on or before June 22, 1983, file with the Federal Energy Regulatory Commission, Washington, D.C. 20426, a motion to intervene or a protest in accordance with the requirements of the Commission's Rules of Practice and Procedure (18 CFR 385.214 or 385.211) and the Regulations under the Natural Gas Act (18 CFR 157.10). All protests filed with the Commission will be considered by it in determining the appropriate action to be taken but will not serve to make the protestants parties to the proceeding. Any person wishing to become a party to a proceeding or to participate as a party in any hearing therein must file a motion to intervene in accordance with the Commission's Rules.

Take further notice that, pursuant to the authority contained in and subject to the jurisdiction conferred upon the Federal Energy Regulatory Commission by Sections 7 and 15 of the Natural Gas Act and the Commission's Rules of Practice and Procedure, a hearing will be held without further notice before the Commission or its designee on this application if no motion to intervene is filed within the time required herein, if the Commission on its own review of the matter finds that permission and approval for the proposed abandonment are required by the public convenience and necessity. If a motion for leave to intervene is timely filed, or if the Commission on its own motion believes that a formal hearing is required, further notice of such hearing will be duly given.

Under the procedure herein provided for, unless otherwise advised, it will be unnecessary for applicant to appear or be represented at the hearing.

Kenneth F. Plumb,

Secretary.

BILLING CODE 6717-01-M

[Docket No. ER83-525-000]

Pacific Power & Light Co.; Filing

June 7, 1983.

The filing Company submits the following:

Take notice that on May 24, 1983, Pacific Power & Light Company (PP&L) tendered for filing in accordance with § 35.13a(d)(5) of the Commission's Regulations, Pacific's Revised Appendix 1 for the state of Idaho. The Revised Appendix 1 calculates an average system cost for the state of Idaho applicable to the exchange of power between Bonneville Power Administration (Bonneville) and Pacific.

Pacific requests an effective date of January 1, 1983, and therefore requests waiver of the Commission's notice requirements.

Copies of the filing were supplied to Bonneville, the Idaho Public Utilities Commission and Bonneville's Direct Service Industrial Customers.

Any person desiring to be heard or to protest said filing should file a motion to intervene or protest with the Federal Energy Regulatory Commission, 825 North Capitol Street NE., Washington, D.C. 20426, in accordance with Rules 211 and 214 of the Commission's Rules of Practice and Procedure (18 CFR 385.211, 385.214). All such motions or protests should be filed on or before June 22, 1983. Protests will be considered by the Commission in determining the appropriate action to be taken, but will not serve to make protestants parties to the proceeding. Any person wishing to become a party must file a motion to intervene. Copies of this filing are on file with the Commission and are available for public inspection.

Secretary.

[FR Doc. 83-15642 Filed 6-9-83; 8:45 am]

BILLING CODE 6717-01-M

[Docket No. CP83-343-000]

Panhandle Eastern Pipe Line Co.; Application

June 7, 1983.

Take notice that on May 26, 1983, Panhandle Eastern Pipe Line Company (Applicant), P.O. Box 1642, Houston, Texas 77001, filed in Docket No. CP83-343-000 an application pursuant to Section 7(c) of the Natural Gas Act for a certificate of public convenience and necessity authorizing Applicant to provide comprehensive transportation service to PanMark Gas Company (PanMark), a subsidiary of Applicant and an affiliate of Trunkline Gas Company (Trunkline). This transportation service would enable PanMark to offer a new sales service to existing customers of Trunkline and Applicant under PanMark's Load Retention Program, all as more fully set forth in the instant application and the application filed by PanMark on May 23, 1983, in Docket No. CP83-333-000, which are on file with the Commission and open to public inspection.

Applicant requests authorization for a period of 19 months, June 1983 through December 1984. Applicant states that it would receive gas from Trunkline or from wells connected to Applicant's facilities, transport, and redeliver such natural gas owned by PanMark either to Trunkline at an existing point of interconnection or to PanMark purchasers that are customers of Applicant at existing points of delivery. It is asserted that the natural gas to be transported by Applicant would be purchased by PanMark from volumes released from domestic producer contracts of Trunkline and Applicant and then resold by PanMark to the customers of Trunkline and Applicant

that have load subject to displacement by the installed capability to use residual fuel oil.

Applicant states that this transportation service is pursuant to a transportation agreement between Applicant and PanMark dated May 25, 1983. The rate proposed for such service is 67 cents per each MMBtu delivered by Applicant to one of PanMark's customers at an existing point of delivery. Applicant assets that the proposed rate is the portion of the effective commodity charges designed to recover the fixed costs allocated to Applicant's commodity rate schedule as reflected in Applicant's proposed rates being collected subject to refund in Docket No. RP82–58–000.

Applicant also requests authority to waive the applicable requirements of its FERC Gas Tariff to permit PanMark sales service to be provided to Applicant's purchasers under Rate Schedules G and SG for General Service and Small General Service.

Any person desiring to be heard or to make any protest with reference to said application should on or before June 24, 1983, file with the Federal Energy Regulatory Commission, Washington, D.C. 20426, a motion to intervene or a protest in accordance with the requirements of the Commission's Rules of Practice and Procedure (18 CFR 385.214 or 385.211) and the Regulations under the Natural Gas Act (18 CFR 157.10). All protests filed with the Commission will be considered by it in determining the appropriate action to be taken but will not serve to make the protestants parties to the proceeding. Any person wishing to become a party to a proceeding or to participate as a party in any hearing therein must file a motion to intervene in accordance with the Commission's Rules.

Take further notice that, pursuant to the authority contained in and subject to jurisdiction conferred upon the Federal Energy Regulatory Commission by Sections 7 and 15 of the Natural Gas Act and the Commission's Rules of Practice and Procedure, a hearing will be held without further notice before the Commission or its designee on this application if no motion to intervene is filed within the time required herein, if the Commission on its own review of the matter finds that a grant of the certificate is required by the public convenience and necessity. If a motion for leave to intervene is timely filed, or if the Commission on its own motion believes that a formal hearing is required, further notice of such hearing will be duly given.

Under the procedure herein provided for, unless otherwise advised, it will be unnecessary for Applicant to appear or be represented at the hearing.

Kenneth F. Plumb,

Secretary.

[FR Doc. 83–15843 Filed 6–9–83; 8:45 am]

BILLING CODE 6717–01–M

[Docket No. CP83–333–000]

PanMark Gas Co.; Application

June 7, 1983.

Take notice that on May 23, 1983, PanMark Gas Company (Applicant), P.O. Box 1642, Houston, Texas 77001, filed in Docket No. CP83–333–000 an application pursuant to Section 7(c) of the Natural Gas Act for a certificate of public convenience and necessity authorizing Applicant to provide a new sales service for existing customers of Panhandle Eastern Pipe Line Company (Panhandle) and Trunkline Gas Company (Trunkline), all as more fully set forth in the application which is on file with the Commission and open for public inspection.

Applicant requests authorization for a period of 19 months, June 1983 through December 1984, to implement a Load Retention Program (Program) for Panhandle and Trunkline Applicant states that it is a subsidiary of Panhandle and asserts that the proposed Program should enable Applicant to offer lower gas rates to the present jurisdictional customers of Panhandle and Trunkline, under specified limited conditions, than the rates currently charged under Panhandle's and Trunkline's existing rate schedules. It is stated that the purpose of the new service is to enable the present jurisdictional customers to regain load loss of natural gas sales and to avoid further load loss due to price competition from residual fuel oil.

As proposed, the service would only be available to those existing jurisdictional customers of Panhandle and Trunkline that have load with the installed capability to replace natural gas with residual fuel oil. Service to jurisdictional customers would be within the limits of the annual and daily contract quantities which have previously been authorized by the Commission for Panhandle and Trunkline, it is explained. Applicant states that the gas supply would be provided by the existing domestic producer-suppliers of Panhandle and Trunkline which have agreed to contractual reliefs requested by Panhandle and Trunkline. This relief consists of a 50 percent reduction of contract purchase quantities for gas priced at or above the Natural Gas Policy Act of 1978's Section 103 maximum lawful price and (for Trunkline only) a 20 percent reduction of the contract purchase quantities for all other supplies. Applicant states further that the transportation and delivery of the sales volumes would be provided by Panhandle and Trunkline and is the subject of the requested authorizations in their respective Docket Nos. CP83–343–000 and CP83–342–000.

Applicant states that end-users, subject to certain conditions, would certify each month to their distribution company their "Eligible Volume" subject to displacement with residual fuel oil and the "Competitive Price" to residual fuel oil. It is submitted that the distribution company would then certify to Applicant its aggregate "Eligible Volume" requirement and needed city-gate "Load Retention Price" that is the weighted average of the "Competitive Prices" of its end-users. Applicant explains that it would compute the corresponding net-back wellhead prices, seek to purchase the customer's requirements at that price, and then sell the available supplies on a fully interruptible basis at each customer's "Load Retention Price". The "Load Retention Price", Applicant states, contains three components: (1) the uniform, fixed-cost charge proposed to be paid by Applicant to Panhandle or Trunkline for transportation, currently at 67 cents or 29 cents per MMBtu respectively, (2) a nominal out-of-pocket charge, proposed at one cent per MMBtu for Applicant's administrative costs and (3) the net-back wellhead price per MMBtu paid by Applicant to producers supplying the natural gas. In the event the net-back wellhead price is greater than the maximum lawful price in which producers can sell the gas to Applicant, then the difference between the total cost of the lower maximum lawful prices charged to Applicant and revenues received from the higher wellhead net-back price component included in Applicant's rate will be paid to Panhandle or Trunkline which will then be credited to their respective Account 191 (Unrecovered Purchased Gas Costs), it is asserted.

Applicant states that it will operate two pools of markets. Panhandle's suppliers will be matched to Panhandle's customers and Trunkline's suppliers and customers will be similarly matched. Each pool will have its separate net-back wellhead prices for the supplies released from Panhandle or Trunkline contracts. In the event one market requires additional supplies that are available from the other's market then the supplier with the "excess" gas

will be offered by Applicant to make sales to the market requiring additional volumes at the separate net-back price for the market seeking the additional purchases.

In order to implement the above program Applicant specifically requests to be found a natural gas company under the Natural Gas Act; to receive authority to make sales for resale to the distribution companies which have an executed service agreement with Applicant, as detailed in the application, and to any other existing customer of Panhandle or Trunkline that has load subject to displacement by installed capability to use residual fuel oil; waiver of the requirements of Section 4(d) of the Natural Gas Act; and acceptance for filing and effectiveness of the *pro forma* tariff submitted in the application.

Any person desiring to be heard or to make any protest with reference to said application should on or before June 24, 1983, file with the Federal Energy Regulatory Commission, Washington, D.C. 20426, a motion to intervene or a protest in accordance with the requirements of the Commission's Rules of Practice and Procedure (18 CFR 385.214 or 385.211) and the Regulations under the Natural Gas Act (18 CFR 157.10). All protests filed with the Commission will be considered by it in determining the appropriate action to be taken but will not serve to make the protestants parties to the proceeding. Any person wishing to become a party to a proceeding or to participate as a party in any hearing therein must file a motion to intervene in accordance with the Commission's Rules.

Take further notice that, pursuant to the authority contained in and subject to jurisdiction conferred upon the Federal Energy Regulatory Commission by Sections 7 and 15 of the Natural Gas Act and the Commission's Rules of Practice and Procedure, a hearing will be held without further notice before the Commission or its designee on this application if no motion to intervene is filed within the time required herein, if the Commission on its own review of the matter finds that a grant of the certificate is required by the public convenience and necessity. If a motion for leave to intervene is timely filed, or if the Commission on its own motion believes that a formal hearing is required, further notice of such hearing will be duly given.

Under the procedure herein provided for, unless otherwise advised, it will be unnecessary for applicant to appear or be represented at the hearing.

Kenneth F. Plumb,

Secretary.

[FR Doc. 83-15644 Filed 6-9-83; 8:45 am]

BILLING CODE 6717-01-M

[Docket No. CP83-355-000]

Producer-Suppliers of Panhandle Eastern Pipe Line Co.; Application

June 7, 1983.

Take notice that on May 31, 1983, Panhandle Eastern Pipe Line Company (Panhandle), P.O. Box 1642, Houston, Texas, 77001, and PanMark Gas Company (PanMark), P.O. Box 1647, Houston, Texas 77001, filed in Docket No. CP83-355-000 an application, on behalf of producer-suppliers currently selling gas to Panhandle, pursuant to Sections 7(b) and 7(c) of the Natural Gas Act for (1) blanket authority for partial abandonment of certificated sales to Panhandle and (2) a blanket limited-term certificate of public convenience and necessity authorizing the sale in interstate commerce of such partially abandoned reserves to PanMark, all as more fully set forth in the instant application and the application filed by PanMark on May 23, 1983 in Docket No. CP83-333-000 which are on file with the Commission and open for public inspection.

In Docket No. CP83-333-000, PanMark filed an application seeking Commission authorization to implement a temporary Load Retention Program (LRP) designed to enable existing customers of Panhandle, its parent company, and Trunkline, its pipeline affiliate, to regain or retain load that now competes with residual fuel oil. The gas supply for the LRP will be provided by existing domestic producer-suppliers of Panhandle and Trunkline who have agreed to the contractual relief requested by Panhandle and Trunkline, [1] it is asserted.

It is stated that, the blanket authorization requested in Docket No. CP83-355-000 on behalf of Panhandle's producer-suppliers is for partial abandonment of certificated producer sales to Panhandle for the quantities of gas which the producers elect to sell directly to PanMark under the LRP programs from June 1983 through December 1984, or to other markets for certain high price gas, specifically Natural Gas Policy Act of 1978 Sections 102(d), 107(c)(5) and 108 gas for the same term. In addition limited-term certificate authority is sought for the term of the LRP program to allow Panhandle's producers to make sales directly to PanMark.

It is asserted, that PanMark, pursuant to the *pro forma* tariff sheets filed in Docket No. Cp83-333-000, will submit monthly to the Commission, reports which will provide information required by §§ 157.24, 157.25 and 157.30 of the Commission's Regulations. It is therefore requested that the Commission grant a waiver of the requirements for §§ 157.24, 157.25 and 157.30 in Docket No. CP83-355-000.

Any person desiring to be heard or to make any protest with reference to said application should on or before June 24, 1983, file with the Federal Energy Regulatory Commission, Washington, D.C. 20426, a motion to intervene or a protest in accordance with the requirements of the Commission's Rules of Practice and Procedure (18 CFR 385.214 or 385.211) and the Regulations under the Natural Gas Act (18 CFR 157.10). All protests filed with the Commission will be considered by it in determining the appropriate action to be taken but will not serve to make the protestants parties to the proceeding. Any person wishing to become a party to a proceeding or to participate as a party in any hearing therein must file a motion to intervene in accordance with the Commission's Rules.

Take further notice that, pursuant to the authority contained in and subject to jurisdiction conferred upon the Federal Energy Regulatory Commission by Sections 7 and 15 of the Natural Gas Act and the Commission's Rules of Practice and Procedure, a hearing will be held without further notice before the Commission or its designee on this application if no motion to intervene is filed within the time required herein, if the Commission on its own review of the matter finds that a grant of the certificate and permission and approval for the proposed abandonment are required by the public convenience and necessity. If a motion for leave to intervene is timely filed, or if the Commission on its own motion believes that a formal hearing is required, further notice of such hearing will be duly given.

Under the procedure herein provided for, unless otherwise advised, it will be unnecessary for producer-suppliers of

[1] Trunkline filed on behalf of its producer-suppliers for such relief in Docket No. CP83-354-000.

Panhandle to appear or be represented at the hearing.

Kenneth F. Plumb,

Secretary.

[FR Doc. 83-15845 Filed 6-9-83; 8:45 am]

BILLING CODE 6717-01-M

[Docket No. CP83-354-000]

Producer-Suppliers of Trunkline Gas Co.; Application

June 7, 1983.

Take notice that on May 31, 1983, Trunkline Gas Company (Trunkline), P.O. Box 1642, Houston, Texas, 77001, and PanMark Gas Company (PanMark), P.O. Box 1647, Houston, Texas, 77001, filed Docket No. CP83-354-000 an application, on behalf of producer-suppliers currently selling gas to Trunkline, pursuant to Sections 7(b) and 7(c) of the Natural Gas Act for (1) blanket authority for parital abandonment of certificated sales to Trunkline and (2) a blanket limited-term certificate of public convenience and necessity authorizing the sale in interstate commerce of such partially abandoned reserves to PanMark, all as more fully set forth in the instant application and the application filed by PanMark on May 23, 1983 in Docket No. CP83-333-000 which are on file with the Commission and open for public inspection.

In Docket No. CP83-333-000, PanMark filed an application seeking Commission authorization to implement a temporary Load Retention Program (LRP) designed to enable existing customers of Trunkline, its pipeline affiliate, and Panhandle Eastern Pipe Line Company (Panhandle), its parent company to regain or retain load that now competes with residual fuel oil. The gas supply for the LRP will be provided by existing domestic producer-suppliers of Trunkline and Panhandle who have agreed to the contractual relief requested by Trunkline and Panhandle,[1] it is asserted.

It is stated that, the blanket authorization requested on behalf of Trunkline's producer-suppliers is for partial abandonment of certificated producer sales to Trunkline for the quantities of gas which the producers elect to sell directly to PanMark under the LRP programs from June 1983 through December 1984, or to other markets for certain high price gas, specifically Natural Gas Policy Act of 1978 Sections 102(d), 107(c)(5) and 108 gas for the same term. In addition limited-term certificate authority is sought for the term of the LRP program to allow Trunkline's producers to make sales directly to PanMark.

It is asserted, that PanMark, pursuant to the *pro forma* tariff sheets filed in Docket No. CP83-333-000, will submit monthly to the Commission, reports which will provide information required by §§ 157.24, 157.25 and 157.30 of the Commission's Regulations. It is therefore requested that the Commission grant a waiver of the requirements for §§ 157.24, 157.25 and 157.30 in Docket No. CP83-354-000.

Any person desiring to be heard or to make any protest with reference to said application should on or before June 24, 1983, file with the Federal Energy Regulatory Commission, Washington, D.C. 20426, a motion to intervene or a protest in accordance with the requirements of the Commission's Rules of Practice and Procedure (18 CFR 385.214 or 385.211) and the Regulations under the Natural Gas Act (18 CFR 157.10). All protests filed with the Commission will be considered by it in determining the appropriate action to be taken but will not serve to make the protestants parties to the proceeding. Any person wishing to become a party to a proceeding or to participate as a party in any hearing therein must file a motion to intervene in accordance with the Commission's Rules.

Take further notice that, pursuant to the authority contained in and subject to jurisdiction conferred upon the Federal Energy Regulatory Commission by Sections 7 and 15 of the Natural Gas Act and the Commission's Rules of Practice and Procedure, a hearing will be held without further notice before the Commission or its designee on this application if no motion to intervene is filed within the time required herein, if the Commission on its own review of the matter finds that a grant of the certificate and permission and approval for the proposed abandonment are required by the public convenience and necessity. If a motion for leave to intervene is timely filed, or if the Commission on its own motion believes that a formal hearing is required, further notice of such hearing will be duly given.

Under the procedure herein provided for, unless otherwise advised, it will be unnecessary for producer-suppliers of Trunkline to appear or be represented at the hearing.

Kenneth F. Plumb,

Secretary.

[FR Doc. 83-15846 Filed 6-9-83; 8:45 am]

BILLING CODE 6717-01-M

[Docket No. CS77-174-001, et al.]

Royal Resources Exploration, Incorporated, of Colorado et al.; Applications for "Small Producer" Certificates [1]

June 7, 1983.

Take notice that each of the Applicants listed herein has filed an application pursuant to Section 7(c) of the Natural Gas Act and § 157.40 of the Regulations thereunder for a "small producer" certificate of public convenience and necessity authorizing the sale for resale and delivery of natural gas in interstate commerce, all as more fully set forth in the applications which are on file with the Commission and open to public inspection.

Any person desiring to be heard or to make any protests with reference to said applications should on or before June 22, 1983, file with the Federal Energy Regulatory Commission, Washington, D.C. 20426, petitions to intervene or protests in accordance with the requirements of the Commission's Rules of Practice and Procedure (18 CFR 385.211, 214). All protests filed with the Commission will be considered by it in determining the appropriate action to be taken but will not serve to make the protestants parties to the proceeding. Persons wishing to become parties to a proceeding or to participate as a party in any hearing therein must file petitions to intervene in accordance with the Commission's Rules.

Take further notice that, pursuant to the authority contained in and subject to the jurisdiction conferred upon the Federal Energy Regulatory Commission by Sections 7 and 15 of the Natural Gas Act and the Commission's Rules of Practice and Procedure, a hearing will be held without further notice before the Commission on all applications in which no petition to intervene is filed within the time required herein if the Commission on its own review of the matter believes that a grant of the certificates is required by the public convenience and necessity. Where a petition for leave to intervene is timely filed, or where the Commission on its own motion believes that a formal hearing is required, further notice of such hearing will be duly given.

Under the procedure herein provided for, unless otherwise advised, it will be

[1] Panhandle filed on behalf of its producer-suppliers for such relief in Docket No. CP83-355-000.

[1] This notice does not provide for consolidation for hearing of the several matters covered herein.

unnecessary for Applicants to appear or be represented at the hearing.

Kenneth F. Plumb,

Secretary.

BILLING CODE 6717-01-M

[Docket No. TA83-2-6-002]

Sea Robin Pipeline Co., Filing of Revised Tariff Sheets

June 7, 1983.

Take notice that on May 31, 1983, Sea Robin Pipeline Company (Sea Robin) tendered for filing Thirty-fifth Revised Sheet No. 4 to its FERC Gas Tariff, Original Volume No. 1. This tariff sheet and supporting information is being filed pursuant to the Purchased Gas Cost Adjustment provision set out in Sections 1 and 3 of Sea Robin's Tariff with a proposed effective date of July 1, 1983. In addition, Sea Robin submits Fifteenth Revised Sheet No. 4–A to become effective July 1, 1983, in compliance with Federal Energy Regulatory Commission (Commission) orders issued May 11, 1978, and July 12, 1978, at Docket No. RP77–6; and Second Revised Sheet No. 4–B which reflects the estimated incremental pricing surcharges for the period July 1, 1983 through December 31, 1983.

Sea Robin states that these revised tariff sheets and supporting data are being mailed to Sea Robin's jurisdictional customers and interested state commission.

Any person desiring to be heard or to protest said filing should file a petition to intervene or protest with the Federal Energy Regulatory Commission, 825 North Capitol Street, N.E., Washington, D.C. 20426, in accordance with Rules 211 and 214 of the Commission's Rules of Practice and Procedure (18 CFR 385.211, 385.214). All such petitions or protests should be filed on or before June 17, 1983. Protests will be considered by the Commission in determining the appropriate action to be taken, but will not serve to make protestants parties to the proceeding. Any person wishing to become a party must file a petition to intervene. Copies of this filing are on file with the Commission and are available for public inspection.

Kenneth F. Plumb,

Secretary.

BILLING CODE 6717-01-M

[Docket Nos. TA83-2-9-001]

Tennessee Gas Pipeline Company, a Division of Tenneco, Inc.; Rate Change Under Tariff Rate Adjustment Provisions

June 7, 1983.

Take notice that on May 31, 1983, Tennessee Gas Pipeline Company, a Division of Tenneco Inc. (Tennessee) tendered for filing Sixth Revised Sheet Nos. 23 through 30 and Ninth Revised Sheet No. 21 to Original Volume No. 1 of its FERC Gas Tariff to be effective July 1, 1983.

Tennessee states that the purpose of the revised tariff sheets is to adjust Tennessee's rates pursuant to Articles XXIII and XXIX of the General Terms and Conditions of its FERC Gas Tariff, consisting of a PGA rate adjustment and Estimated Incremental Pricing Surcharges.

Tennessee states that copies of the filing have been mailed to all of its customers and affected state regulatory commissions.

Any persons desiring to be heard or to protest said filing should file a petition to intervene or protest with the Federal Energy Regulatory Commission, 825 North Capitol Street, NE., Washington, D.C. 20426, in accordance with Rules 208 and 214 of the Commission's Rules of Practice and Procedure. All such petitions or protests should be filed on or before June 17, 1983. Protests will be considered by the Commission in determining the appropriate action to be taken, but will not serve to make protestants parties to the proceeding. Any person wishing to become a party must file a petition to intervene; provided, however, that any prson who has previously filed a petition to intervene in this proceeding is not required to file a further petition. Copies of this filng are on file with the Commission and are available for public inspection.

Kenneth F. Plumb,

Secretary.

BILLING CODE 6717-01-M

[Docket No. RP83-91-000]

Texas Gas Transmission Corp.; Proposed Changes in FERC Gas Tariff

June 7, 1983.

Take notice that on May 31, 1983 Texas Gas Transmission Corporation (Texas Gas) tendered for filing proposed changes to its FERC Gas Tariff, Third Revised Volume No. 1 and Original Volume No. 2. The proposed changes would increase revenues from jurisdictional sales and services by approximately $35,948,000 based on the 12-month period ended January 31, 1983, as adjusted, compared with the rates set forth in Appendix A to the Stipulation and Agreement in Docket No. RP82–74 currently pending before the Commission, plus the current purchased gas adjustment effective February 1, 1983.

Texas Gas states that the increased costs are attributable to: (1) A substantial decrease in sales volumes; (2) increases in operating expenses; (3) increase in rate base and in related costs; and, (4) an increase in rate of return and related taxes.

Texas Gas requests an effective date of July 1, 1983, for the proposed Revised Sheets. Texas Gas further states that it served copies of this filing upon the company's jurisdictional customers and interested state commissions.

Any person desiring to be heard or to protest said filing should file a petition to intervene or protest with the Federal Energy Regulatory Commission, 825 North Capitol Street N.E., Washington, D.C. 20426, in accordance with Rule 2.14 and 2.11 of the Commission's Rules of Practice and Procedure (18 CFR 385.211 and 385.214). All such petitions or protests should be filed on or before June 17, 1983. Protests will be considered by the Commission in determining the appropriate action to be taken, but will not serve to make protestants parties to the proceeding.

Any person wishing to become a party must file a petition to intervene. Copies of this filing are on file with the Commission and are available for public inspection.

Kenneth F. Plumb,

Secretary.

[FR Doc. 83-15080 Filed 6-9-83; 8:45 am]

BILLING CODE 6717-01-M

[Docket No. CP83-342-000]

Trunkline Gas Co.; Application

June 7, 1983.

Take notice that on May 26, 1983, Trunkline Gas Company (Applicant), P.O. Box 1642, Houston, Texas 77001, filed in Docket No. CP83-342-000 an application pursuant to Section 7(c) of the Natural Gas Act for a certificate of public convenience and necessity and a request for a temporary certificate authorizing Applicant to provide comprehensive transportation service to PanMark Gas Company (PanMark), a subsidiary of Panhandle Eastern Pipe Line Company (Panhandle) and an affiliate of Applicant. This transportation service will enable PanMark to offer a new sales service to existing customers of Panhandle and Applicant under PanMark's Load Retention Program, all as more fully set forth in the instant application and the application filed by PanMark on May 23, 1983, in Docket No. CP83-333-000, which are on file with the Commission and open for public inspection.

Specifically, Applicant requests authorization for a period of 19 months, June 1983 through December 1984, for the receipt of natural gas from wells connected to Applicant, transportation, and redelivery of such natural gas owned by PanMark either to Panhandle at an existing point of interconnection or to PanMark purchasers that are customers of Applicant at existing points of delivery. It is asserted that the natural gas to be transported by Applicant will be purchased by PanMark from volumes released from domestic producer contracts of Panhandle and Applicant and then resold by PanMark to the customers of Panhandle and Applicant that have load subject to displacement by the installed capability to use residual fuel oil. This transportation service is pursuant to a transportation agreement between Applicant and PanMark dated as of May 25, 1983. The rate proposed for such service is 29 cents per each MMBtu delivered by Applicant to one of PanMark's customers at an existing point of delivery. Applicant states the proposed transportation rate is the portion of the effective commodity charges designed to recover the fixed costs allocated to Applicant's commodity rate schedule as reflected in Applicant's settlement rates in the minimum bill proceeding before the Commission in Docket Nos. RP81-103-000 and RP82-130-000.

Applicant also requests authority to waive the applicable requirements of its FERC Gas Tariff to permit PanMark sales service to be provided to Applicant's purchasers under the Rate Schedules G and SG for General Service and Small General Service.

Any person desiring to be heard or to make any protest with reference to said application should on or before June 24, 1983, file with the Federal Energy Regulatory Commission, Washington, D.C. 20426, a motion to intervene or a protest in accordance with the requirements of the Commission's Rules of Practice and Procedure (18 CFR 385.214 or 385.211) and the Regulations under the Natural Gas Act (18 CFR 157.10). All protests filed with the Commission will be considered by it in determining the appropriate action to be taken but will not serve to make the protestants parties to the proceeding. Any person wishing to become a party to a proceeding or to participate as a party in any hearing therein must file a motion to intervene in accordance with the Commission's Rules.

Take further notice that, pursuant to the authority contained in and subject to jurisdiction conferred upon the Federal Energy Regulatory Commission by Sections 7 and 15 of the Natural Gas Act and the Commission's Rules of Practice and Procedure, a hearing will be held without further notice before the Commission or its designee on this application if no motion to intervene is filed within the time required herein, if the Commission on its own review of the matter finds that a grant of the certificate is required by the public convenience and necessity. If a motion for leave to intervene is timely filed, or if the Commission on its own motion believes that a formal hearing is required, further notice of such hearing will be duly given.

Under the procedure herein provided for, unless otherwise advised, it will be unnecessary for Applicant to appear or be represented at the hearing.

Kenneth F. Plumb,

Secretary.

[FR Doc. 83-15082 Filed 6-9-83; 8:45 am]

BILLING CODE 6717-01-M

[Docket No. RP83-83-000]

Trunkline Gas Co.; Proposed Changes

June 7, 1983.

Take notice that on May 31, 1983, Trunkline Gas Company (Trunkline) tendered for filing proposed changes in the revised tariff sheets as listed on the attached Appendix A.

These revised tariff sheets implement a general rate increase to Trunkline's jurisdictional sales of $33.5 million annually based on test year ending February 28, 1983, adjusted for changes known and measurable to November 30, 1983.

Trunkline states that the increased rates are necessitated by increased costs at all levels including operating costs, increased capital costs, and increased costs associated with new facilities. The proposed effective date of the tendered sheets is July 1, 1983.

Trunkline states that in response to the current marketing difficulties which it and its customers are experiencing, the instant rate filing reflects a rate design patterned on the so-called *Seaboard* method which allocates 50% of fixed costs to the commodity portion of Trunkline's two part demand/commodity rates. This rate design methodology will result in lower commodity rates to Trunkline's customers than would otherwise be obtained under existing rate design and thus will assist in creating more stable and marketable gas pricing on the Trunkline system.

The rate increase filing also reflects revenue requirements which have been computed on the assumption that the Settlement Agreement pending before the Commission in Docket Nos. RP81-103 and RP82-130 will be approved prior to the date the rates herein are permitted to be placed into effect. The Settlement Agreement temporarily suspends the annual commodity minimum bill in Trunkline's P-1 and P-2 rate schedules and implements an agreed upon Interim Minimum Bill. If the new rates proposed herein are placed into effect without prior Commission approval of the Settlement Agreement, Trunkline will continue service under the terms of its current tariff until such time as the Commission shall approve the Settlement, if at all.

Copies of this filing were served on Trunkline's jurisdictional customers and interested state commissions.

Any person desiring to be heard or to protest said filing should file a petition to intervene or protest with the Federal Energy Regulatory Commission, 825 North Capitol Street, N.E., Washington, D.C. 20426, in accordance with Rules 211

and 214 of the Commission's Rules of Practice and Procedures (18 CFR 385.211, 385.214). All such petitions or protests should be filed on or before June 17, 1983. Protests will be considered by the Commission in determining the appropriate action to be taken, but will not serve to make protestants parties to the proceeding. Any person wishing to become a party must file a petition to intervene. Copies of this filing are on file with the Commission and are available for public inspection.

Kenneth F. Plumb,

Secretary.

United Gas Pipe Line Co.; Filing of Revised Tariff Sheets

June 7, 1983.

Take notice that on May 31, 1983, United Gas Pipe Line Company (United) tendered for filing Substitute Revised Sixty-first Revised Sheet No. 4, Seventh Revised Sheet Nos. 4–A and 4–B, and Revised Ninth Revised Sheet No. 4–C to its FERC Gas Tariff, First Revised Volume No. 1. These tariff sheets and supporting information are being filed pursuant to the Purchased Gas Cost Adjustment provisions set out in Sections 19, 21, 23 and 24 of United's Tariff.

Seventh Revised Sheet Nos. 4–A and 4–B are being filed to reflect the estimated incremental pricing surcharges as required by Commission Order No. 49 issued September 28, 1979.

Revised Ninth Revised Sheet No. 4–C is being filed in compliance with the letter order issued by the Office of Pipeline and Producer Regulation dated January 27, 1982, and reflects the FERC-approved changes to the transportation rate schedules.

United requests a June 1, 1983 effective date for the adjustments in its rates filed herein and a one-time waiver of the provisions of its Tariff which otherwise provide for a July 1 effective date.

United also requests that it be allowed to split the adjustment attributable to the Alaskan Natural Gas Transportation System into two separate parts in order to synchonrize this adjustment with the change in United's base rates which will occur September 1, 1983.

Copies of the proposed tariff sheets and supporting data are being mailed to United's jurisdictional customers and interested state commission.

Any person desiring to be heard or to protest said filing should file a petition to intervene or protest with the Federal Energy Regulatory Commission, 825 North Capitol Street, NE., Washington, D.C. 20426, in accordance with Rules 211 and 214 of the Commission's Rules of Practice and Procedure (18 CFR 385.211, 385.214). All such petitions or protests should be filed on or before June 17, 1983. Protests will be considered by the Commission in determining the appropriate action to be taken, but will not serve to make protestants parties to the proceeding. Any person wishing to become a party must file a petition to intervene. Copies of this filing are on file with the Commission and are available for public inspection.

[Docket No. EF83–5021–000]

Western Area Power Administration; Filing

June 7, 1983.

The filing agency submits the following:

Take notice that on April 25, 1983, the Assistant Secretary for Conservation and Renewable Energy of the Department of Energy, by Rate Order No. WAPA–19, did confirm and approve, on an interim basis, to be effective with the June 1983 billing period, new rate schedules SP–F2 (Schedule of Rates for Wholesale Firm Power Service), SP–FP2 (Schedule of Rates for Wholesale Peaking Power Service), SP–FT1 (Schedule of Rates for Firm Transmission Service), and SP–NFT1 (Schedule of Rates for Nonfirm Transmission Service) for the Western Area Power Administration's Colorado River Storage Project.

The new rates will be in effect pending the Commission's approval of them, or substitute rates, on a final basis, or until they are superseded. The Assistant Secretary states that the rate schedules are submitted for confirmation and approval on a final basis pursuant to authority vested in the Commission by Delegation Order No. 0204–33.

Any person desiring to be heard or to protest said filing should file a motion to intervene or protest with the Federal

Energy Regulatory Commission, 825 North Capitol Street, N.E., Washington, D.C. 20426, in accordance with Rules 211 and 214 of the Commission's Rules of Practice and Procedure (18 CFR 385.211, 385.214). All such petitions or protests should be filed onor before June 28, 1983. Protests will be considered by the Commission in determining the appropriate action to be taken, but will not serve to make protestants parties to the proceeding. Any person wishing to become a party must file a motion to intervene. Copies of this filing are on file with the Commission and are available for public inspection.

Office of Hearings and Appeals

Objection to Modified Remedial Order Filed

On May 2, 1983, Tugalo Gas Company, 302 West Currahee Street, Toccoa, Georgia 30577 filed a document entitled "Notice of Objection to Modified Remedial Order" with the Office of Hearings and Appeals of the Department of Energy, Case No. HRA-0006. The Economic Regulatory Administration (ERA) issued the Modified Remedial Order to the firm on April 5, 1983. In the Modified Remedial Order, the ERA found that during the period October 12, 1973 through May 25, 1974, Tugalo did not determine its selling prices for propane in accordance with the requirements of 10 CFR 212.93. According to the Modified Remedial Order, the Tugalo violation resulted in $82,829.34 of overcharges.

Any person who wishes to participate in the proceeding the Department of Energy will conduct concerning this Modified Remedial Order must file a request to participate pursuant to 10 CFR 205.194 within 20 days after publication of this notice. The Office of Hearings and Appeals will then determine those persons who may participate on an active basis in the proceeding and will prepare an official service list, which it will mail to all persons who filed requests to participate. Persons may also be placed on the official service list as non-participants for good cause shown.

All requests to participate in this proceeding should be filed with the Office of Hearings and Appeals, Department of Energy, 12th Street and Pennsylvania Avenue NW., Washington, D.C. 20461.

George B. Breznay,

Director, Office of Hearings and Appeals.

June 6, 1983.

DATE: The corrections to the title are effective May 6, 1983.

FOR FURTHER INFORMATION CONTACT:

Walter M. Bowers, Chief, Division of Power Marketing, Southwestern Power Administration, Department of Energy, P.O. Box Drawer 1619, Tulsa, Oklahoma 74101, (918) 581-7529

Fred A. Sheap, Office of Power Marketing Coordination, Department of Energy, Federal Building, 12th Street and Pennsylvania Avenue, NW., Washington, D.C. 20585, (202) 633-6336

SUPPLEMENTARY INFORMATION: The corrections are as follows:

Title: Notice of Submission of Increased Power Rate to the Federal Energy Regulatory Commission.

Issued in Washington, D.C., June 3, 1983.

Howard S. Coleman,

Principal Deputy Assistant Secretary, Conservation and Renewable Energy.

[FR Doc. 83-15666 Filed 6-9-83; 8:45 am]

BILLING CODE 6450-01-M

ENVIRONMENTAL PROTECTION AGENCY

[OPTS-59128; TSH-FRL 2379-6]

Certain Chemicals; Premanufacture Exemption Applications; Metal Oxide, et al.

AGENCY: Environmental Protection Agency (EPA).

ACTION: Notice.

SUMMARY: EPA may upon application exempt any person from the premanufacturing notification requirements of section 5 (a) or (b) of the Toxic Substances Control Act (TSCA) to permit the person to manufacture or process a chemical for test marketing purposes under section 5(h)(1) of TSCA. Requirements for test marketing exemption (TME) applications, which must either be approved or denied within 45 days of receipt, are discussed in EPA's revised statement of interim policy published in the **Federal Register** of November 7, 1980 (45 FR 74378). This notice, issued under section 5(h)(6) of TSCA, announces receipt of two applications for exemptions, provides a summary, and requests comments on the appropriateness of granting each of the exemptions.

DATE: Written comments by: June 27 1983.

ADDRESS: Written comments, identified by the document control number "[OPTS-59128]" and the specific TME number should be sent to: Document Control Officer (TS-793), Management Support Division, Office of Toxic Substances, Office of Pesticides and Toxic Substances, Environmental Protection Agency, Rm. E-409, 401 M Street, SW, Washington, DC 20460.

FOR FURTHER INFORMATION CONTACT:

Theodore Jones, Acting Chief, Notice Review Branch, Chemical Control Division (TS-794), Office of Toxic Substances, Office of Pesticides and Toxic Substances, Environmental Protection Agency, Rm. E-216, 401 M Street, SW, Washington, DC 20460.

SUPPLEMENTARY INFORMATION: The following notice contains information extracted from the non-confidential version of the submission provided by the manufacturer on the TME received by EPA. The complete non-confidential document is available in the Public Reading Room E-107.

TME 83-57

Close of Review Period. July 15, 1983.

Manufacturer. Confidential.

Chemical. (G) Metal oxide.

Use/Production. (G) Energy converter. Prod. range: Confidential.

Toxicity Data. No data on the TME substance submitted.

Exposure. Manufacture, processing and use: dermal and inhalation, a total of 5 workers, up to 2 hrs/da, up to 260 da/yr.

Environmental Release/Disposal. No release.

TME 83-58

Close of Review Period. July 15, 1983.

Manufacturer. Sun Alert Incorporate.

Chemical. (S) 3'-(p-(dimethylamino)phenyl)Spiro-(flourene-9,4'-oxazolidine-2',5'dione.

Use/Production. (S) Site-limited raw material for Sun dosimeter. Prod. range: 1–11 kg/yr.

Toxicity Data. Acute oral: Not toxic; Acute dermal: Not toxic; Irritation: Skin—Not irritant; Inhalation: Not a potential sensitizer; Ames Test: Direct acting base substitution mutagen.

Exposure. Manufacture and disposal: airborne, a total of 8 workers, up to 8 hrs/da, up to 35 da/yr.

Environmental release/Disposal. 10 kg/yr released to air, water and land. Disposal by publicly owned treatment works (POTW), and private septic.

Dated: June 6, 1983.

Ronald A. Stanley,

Acting Director, Management Support Division.

[FR Doc. 83-15434 Filed 6-9-83; 8:45 am]

BILLING CODE 6560-50-M

[OPTS-51470; TSH FRL 2379-7]

Certain Chemicals; Premanufacture Notices; Substituted Heteromonocycle Sulfonyl Aniline, et al.

AGENCY: Environmental Protection Agency (EPA).

ACTION: Notice.

SUMMARY: Section 5(a)(1) to the Toxic Substances Control Act (TSCA) requires any person who intends to manufacture or import a new chemical substance to submit a premanufacture notice (PMN) to EPA at least 90 days before manufacture or import commences. Statutory requirements for section 5(a)(1) premanufacture notices are dicussed in EPA statements of interim policy published in the **Federal Register** of May 15, 1979 (44 FR 28558) and November 7, 1980 (45 FR 74378). This notice announces receipt of twenty-nine PMNs and provides a summary of each.

DATES: Close of review period: PMN 83–784, 83–785, 83–786, 83–787, 83–788, 83–789, 83–790, 83–791, 83–792, 83–793 and 83–794, August 24, 1983.

PMN 83–795, August 28, 1983.

PMN 83–796, 83–797, 83–798, 83–799, 83–800, 83–801, 83–802, 83–803, 83–804, 83–805 and 83–806, August 29, 1983.

PMN 83–807, 83–808, 83–809, 83–810, 83–811 and 83–812, August 30, 1983.

Written comments by: PMN 83–784, 83–785, 83–786, 83–787, 83–788, 83–789, 83–790, 83–791, 83–792, 83–793 and 83–794, July 25, 1983.

PMN 83–795, July 29, 1983.

PMN 83–796, 83–797, 83–798, 83–799, 83–800, 83–801, 83–802, 83–803, 83–804, 83–805 and 83–806, July 30, 1983.

PMN 83–807, 83–808, 83–809, 83–810, 83–811 and 83–812, July 31, 1983.

ADDRESS: Written comments, identified by the document control number "[OPTS-51470]" and the specific PMN number should be sent to: Document Control Officer (TS-793), Office of Toxic Substances, Office of Pesticides and Toxic Substances, Environmental Protection Agency, RM. E-409, 401 M St., SW., Washington, DC 20460, (202–382–3532).

FOR FURTHER INFORMATION CONTACT: Theodore Jones, Acting Chief, Notice Review Branch Chemical Control Division (TS-794), Office of Toxic Substances, Environmental Protection Agency, Rm. E-216, 401 M St., SW., Washington, DC 20460, (202–382–3729).

SUPPLEMENTARY INFORMATION: The following notice contains information extracted from the non-confidential version of the submission provided by the manufacturer on the PMNs received by EPA. The complete non-confidential document is available in the Public Reading Room E-107.

PMN 83–784

Manufacturer. Confidential.

Chemical. (G) Substituted heteromonocycle sulfonyl aniline.

Use/Production. (S) Site-limited and industrial intermediate. Prod. range: Condidential.

Toxicity Data. No data submitted.

Exposure. Manufacture and use: dermal, a total of 32 workers, up to 4 hrs/da, up to 5 da/yr.

Environmental Release/Disposal. No release.

PMN 83–785

Manufacturer. Confidential.

Chemical. (G) Substituted heteromonocycle sulfonylphenyl azo substituted naphthalenesulfonic acid, salt.

Use/Production. (S) Industrial dye. Prod. range: Confidential.

Toxicity Data. No data submitted.

Exposure. Manufacture: dermal, a total of 14 workers, up to 4 hrs/da, up to 11 da/yr.

Environmental Release/Disposal. No release.

PMN 83–786

Manufacturer. Confidential.

Chemical. (G) Ester of a substituted phenol and an inorganic acid.

Use/Production. (G) Lubricant additive. Prod. range: Confidential.

Toxicity data. No data submitted.

Exposure. Confidential

Environmental Release/Disposal. Confidential.

PMN 83–787

Manufacturer. Confidential.

Chemical. (G) Salt of diester of phosphordithioic acid.

Use/Production. Confidential. Prod. Range: Confidential.

Toxicity data. Acute oral: >200 mg/kg; Irritation: Skin—7.0, Eye—70.7

Exposure. Confidential.

Environmental Release/Disposal. Confidential.

PMN 83–788

Manufacturer. Confidential.

Chemical. (G) Reaction product of fatty alkene amine and isocyanate.

Use/Production. (S) Thickening agent in greases intended to be used as lubricants in mechanical devices. Prod. range: Confidential.

Toxicity data. No data submitted.

Exposure. Manufacture: dermal, a total of 6 workers, up to 8 hrs/da, up to 5 da/yr.

Environmental Release/Disposal. No release.

PMN 83–789

Manufacturer. Confidential.

Chemical. (G) Reaction product of a fatty alkene amine, aromatic amine and isocvanate.

Use/Production. (S) Thickening agent in greases intended to be used as lubricants in mechanical devices. Prod. range: Confidential.

Toxicity data. No data submitted.

Exposure. Manufacture: dermal, a total of 6 workers, up to 8 hrs/da, up to 5 da/yr.

Environmental Release/Disposal. No release.

PMN 83–790

Manufacturer. American Cyanamid Company.

Chemical. (G) Heterocyclic carboxylic acid.

Use/Production. (G) Captive intermediate. Prod. range: Confidential.

Toxicity data. Acute oral: >500 mg/kg; Acute dermal: >200 mg/kg; Irritation: Skin—Negative, Eye—Positive; Ames Test: Negative.

Exposure. Confidential.

Environmental Release/Disposal. Confidential.

PMN 83–791

Manufacturer. Confidential.

Chemical. (G) Vegetable oil polyamide resin.

Use/Production. (S) Industrial polymeric component for inks and coatings. Prod. range Confidential.

Toxicity data. No date submitted.

Exposure. Manufacture and processing: dermal, a total of 11 workers, up to 4 hrs/da, up to 65 da/yr.

Environmental Release/Disposal. Less than 10 to 10,000 kg/yr released to land. Disposal by publicly owned treatment works (POTW) and landfill.

PMN 83-792

Manufacturer. Confidential.
Chemical. (G) Alkylamine salt of polyakylpolycyclic sulfonic acid.
Use/Production. (G) Contained use. Prod. range: Confidential.
Toxicity data. No data submitted.
Exposure. Manufacture and processing: dermal. a total of 18 workers, up to 1 hr/da, up to 20 da/yr.
Environmental Release/Disposal. Less than 10 kg/yr released to air, water and land.

PMN 83-793

Manufacturer. Confidential.
Chemical. (G) 2-chloro-4(N,N-diethylamino)-5-substituted aryloxydiazonium tetrafluroborate.
Use/Production. Confidential. Prod. range: Confidential.
Toxicity Date. No data submitted.
Exposure. Use and disposal: dermal and inhalation, a total of 16 workers, up to 8 hrs/da, up to 36 da/yr.
Environmental Release/Disposal. Less than 10 kg/yr released to air and land. Disposal by landfill.

PMN 83-794

Manufacturer. Confidential
Chemical. (G) Lignosulfonate, reaction product with an alkenoic acid.
Use/Production. (G) Open use. Prod. range: Confidential.
Toxicity Data. No data on the PMN substance submitted.
Exposure. Confidential.
Environmental Release/Disposal. Confidential.

PMN 83-795

Manufacturer. Hach Company.
*Chemical. (S) 4-Methylumbelliferyl-*B-D-glucuronide.
Use/Production. (S) Consumer microbiological detection of E. coli. Prod. range: .050–1.000 kg/yr.
Toxicity Data. No data submitted.
Exposure. Manufacture, processing and disposal: oral/dermal, a total of 2 workers.
Environmental Release/Disposal. Less than 10 kg/yr released to air and water. Disposal by POTW.

PMN 83-796

Manufacturer. Confidential.
Chemical. (G) Aminomethylphosphonic acid.
Use/Production. (G) Chemical intermediate. Prod. range: Confidential.
Toxicity Data. No data submitted.
Exposure. Confidential.
Environmental Release/Disposal. Release is negligible. Disposal by POTW and Resource Conservation and Recovery Act (RCRA).

PMN 83-797

Manufacturer. Confidential.
Chemical. (G) Aminomethylene phosphonic acid.
Use/Production. (G) Chemical intermediate. Prod. range: Confidential.
Toxicity Data. No data submitted
Exposure. Confidential.
Environmental Release/Disposal. Release is negligible. Disposal by POTW and RCRA.

PMN 83-798

Manufacturer. Essex Specialty Products.
Chemical. (G) Blocked polyurethane prepolymer.
Use/Production. (S) Polyurethane polymer for use in compounded sealants and coatings. Prod. range: 20,000–250,000 kg/yr.
Toxicity Data. No data submitted.
Exposure. Manufacture, processing and use: dermal, a total of 4 workers, up to 8 hrs/da.
Environmental Release/Disposal. No release.

PMN 83-799

Manufacturer. Phillips Chemical Company.
Chemical. (S) N,N-dimethyl-S-benzyldithiocarbamate.
Use/Production. (G) Industrial usage. Prod. range: Confidential.
Toxicity Data. No data submitted.
Exposure. Manufacture: dermal and inhalation, a total of 6 workers, up to 8 hrs/da, up to 5 da/wk.
Environmental Release/Disposal. Confidential.

PMN 83-800

Manufacturer. McWhorter, Incorporated.
Chemical. (S) Polymer of: coconut oil, coconut fatty acid, glycerin, phthalic anhydride, and maleic anhydride.
Use/Production. (S) Industrial coconut alkyd for use in lacquers and thermoset systems. Prod. range: 7,500–30,200 kg/yr.
Toxicity Data. No data submitted.
Exposure. Manufacture: dermal.
Environmental Release/Disposal. Release to water. Disposal by landfill.

PMN 83-801

Manufacturer. McWhorter, Incorporated.
Chemical. (S) Polymer of: tall oil fatty acids, isophthalic acid, phthalic anhydride, pentaerythritol, dipentaerythritol, trimethylpentane diol, trimellitic anhydride.
Use/Production. (S) Industrial water soluble resin for use in protective coatings. Prod. range: 25,000–125,000 kg/yr.
Toxicity Data. No data submitted.
Exposure. Manufacture: dermal.
Environmental Release/Disposal. Release to water. Disposal by landfill.

PMN 83-802

Manufacturer. Confidential.
Chemical. (G) Polymer of mixed fatty acids, unsubstituted aromatic and aliphatic dicarboxylic acids, an alkyl-substituted triol, and substituted alkyl diols.
Use/Production. (S) Industrial thermoset polymer for coating metallic surfaces. Prod. range: 20,000–120,000 kg/yr.
Toxicity Data. No data submitted.
Exposure. Manufacture, processing, use and disposal: dermal, a total of 14 workers, up to 10 hrs/da, up to 40 da/yr.
Environmental Release/Disposal. 10–100 kg/yr released to land. Disposal by biological treatment system and approved landfill.

PMN 83-803

Manufacturer. Confidential.
Chemical. (G) Prepolymerized halogenated silicon magnesium aluminum oxotitanate.
Use/Production. (S) Industrial catalyst. Prod. range: Confidential.
Toxicity Data. No data submitted.
Exposure. Manufacture and use: dermal, a total of 2 workers, up to 2 hrs/da, up to 200 da/yr.
Environmental Release/Disposal. 10–100 kg/yr released to water. Disposal by POTW and incineration.

PMN 83-804

Manufacturer. Sun Alert, Incorporated.
Chemical. (S) 3'-(p-(dimethylamino) phenyl) Spiro-(flourene-9,4'-oxazolidine)-2',5' dione.
Use/Production. (S) Site-limited raw material for sun dosimeter. Prod. range: 1–11 kg/yr.
Toxicity Data. Acute oral: Non-toxic; Acute dermal: Non-toxic; Irritation: Skin—Non-irritant; Ames Test: Direct acting base substitution mutagen; Skin sensitization: Non-sensitizer.
Exposure. Manufacture and disposal: airborne, a total of 8 workers, up to 8 hrs/da, up to 35 da/yr.
Environmental Release/Disposal. Less than 10 kg/yr released to air, water and land. Disposal by POTW.

PMN 83-805

Manufacturer. Lilly Industrial Coatings, Incorporated.

Chemical (G) Saturated polyester resin.

Use/Production. Confidential. Prod. range: Confidential.

Toxicity Data. No data submitted.

Exposure. Manufacture, processing, use and disposal: dermal and inhalation, a total of 186 workers, up to 12 hrs/da, up to 100 da/yr.

Environmental Release/Disposal. 10–100 kg/yr released to air and water with 1,000–10,000 kg/yr to land. Disposal by POTW and landfill.

PMN 83–806

Manufacturer. Confidential.

Chemical. (G) Metal oxide.

Use/Production. (G) Energy converter. Prod. range: Confidential.

Toxicity Data. No data submitted.

Exposure. Manufacture, processing and disposal: a total of 5 workers, up to 2 hrs/da, up to 260 da/yr.

Environmental Release/Disposal. No release.

PMN 83–807

Manufacturer. Confidential.

Chemical. (G) Substituted azo substituted benzenesulfonic acid.

Use/Production. Confidential. Prod. range: Confidential.

Toxicity Data. No data on the PMN substance submitted.

Exposure. Manufacture: a total of 2 workers, up to 20 hrs/person, up to 80 manhours/yr.

Environmental Release/Disposal. No release.

PMN 83–808

Manufacturer. SCM Organic Chemicals.

Chemical. (S) 2-,3-, and 4-pinanol mixture.

Use/Production. (S) Odor masking agent and oil drilling solvent. Prod. range: 0–125,000 kg/yr.

Toxicity Data. No data on the PMN substance submitted.

Exposure. Manufacture, processing and use: dermal and inhalation, a total of 7 workers, up to 2 hrs/da, up to 260 da/yr.

Environmental Release/Disposal. Less than 10 kg/yr released to air.

PMN 83–809

Manufacturer. Confidential.

Chemical. (G) Saturated polyester.

Use/Production. (S) Industrial polymer for metal coating. Prod. range: 500–46,000 kg/yr.

Toxicity Data. No data submitted.

Exposure. Manufacture, processing and use: dermal, a total of 12 workers, up to 4 hrs/da, up to 250 da/yr.

Environmental Release/Disposal. No release. Disposal by POTW, incineration, and RCRA.

PMN 83–810

Manufacturer. Confidential.

Chemical. (G) Cyclo alkyl acrylate.

Use/Production. (G) Industrial ink component. Prod. range: Confidential.

Toxicity Data. Acute oral: 2.3 g/kg; Irritation: Skin—Moderate, Eye—Severe; Ames Test: Non-mutagenic.

Exposure. Confidential.

Environmental Release/Disposal. Confidential.

PMN 83–811

Manufacturer. Confidential.

Chemical. (G) Aliphatic alkyl acrylate.

Use/Production. (G) Industrial ink component. Prod. range: Confidential.

Toxicity Data. Acute oral: 1,150 g/kg; Irritation: Skin—Moderate, Eye—Severe; Ames Test: Non-mutagenic.

Exposure. Confidential.

Environmental Release/Disposal. Confidential.

PMN 83–812

Manufacturer. Essex Specialty Products.

Chemical. (G) Blocked polyurethane prepolymer.

Use/Production. (S) Polyurethane polymer for use in compounded sealants and coatings. Prod. range: 5,000–50,000 kg/yr.

Toxicity Data. No data submitted.

Exposure. Manufacture, processing and use: dermal, a total of 4 workers, up to 8 hrs/da.

Environmental Release/Disposal. No release.

Dated: June 6, 1983.

BILLING CODE 6560-50-M

FEDERAL RESERVE SYSTEM

Acquisition of Bank Shares by a Bank Holding Company; Southeastern Banking Corp.

The company listed in this notice has applied for the Board's approval under section 3(a)(3) of the Bank Holding Company Act (12 U.S.C. 1842(a)(3)) to acquire voting shares or assets of a bank. The factors that are considered in acting on the application are set forth in section 3(c) of the Act (12 U.S.C. 1842(c)).

The application may be inspected at the offices of the Board of Governors, or at the Federal Reserve Bank indicated. With respect to the application, interested persons may express their views in writing to the address indicated. Any comment on the application that requests a hearing must include a statement of why a written presentation would not suffice in lieu of a hearing, identifying specifically any questions of fact that are in dispute and summarizing the evidence that would be presented at a hearing.

A. **Federal Reserve Bank of Atlanta** (Robert E. Heck, Vice President) 104 Marietta Street, N.W., Atlanta, Georgia 30303:

1. *Southeastern Banking Corporation,* Folkston, Georgia; to acquire 100 percent of the voting shares or assets of The Darien Bank, Darien, Georgia. Comments on this application must be received not later than July 1, 1983.

Board of Governors of the Federal Reserve System, June 6, 1983.

James McAfee,

Associate Secretary of the Board.

[FR Doc. 83-15513 Filed 6-9-83; 8:45 am]

BILLING CODE 6210-01-M

BankAmerica Corporation

BankAmerica Corporation, San Francisco, California has applied, pursuant to section 4(c)(8) of the Bank Holding Company Act (12 U.S.C. 1843(c)(8)) and § 225.4(b)(2) of the Board's Regulation Y (12 CFR 225.4(b)(2)), for permission to expand the activities of its existing subsidiary, BA Appraisals, Inc., Walnut Creek, California, to include the activity of construction analysis services, which consists of appraisals of real property in connection with construction projects and servicing of construction loans in accordance with 12 CFR 225.4(a)(3) and (a)(14).

These activities would be performed from offices of Applicant's subsidiary in Walnut Creek, California; El Monte, California; Miami, Florida; New York, New York; and Houston, Texas, serving the United States. Such activities have been specified by the Board in § 225.4(a) of Regulation Y as permissible for bank holding companies, subject to Board approval of individual proposals in accordance with the procedures of § 225.4(b).

Interested persons may express their views on the question whether consummation of the proposal can "reasonably be expected to produce benefits to the public, such as greater convenience, increased competition, or gains in efficiency, that outweigh possible adverse effects, such as undue concentration of resources, decreased or unfair competition, conflicts of interests, or unsound banking practices." Any request for a hearing on this question must be accompanied by a statement of the reasons a written presentation would not suffice in lieu of a hearing, identifying specifically any questions of fact that are in dispute, summarizing the evidence that would be presented at a hearing, and indicating how the party commenting would be aggrieved by approval of the proposal.

The application may be inspected at the offices of the Board of Governors or at the Federal Reserve Bank of San Francisco.

Any views or requests for hearing should be submitted in writing and received by the Secretary, Board of Governors of the Federal Reserve System, Washington, D.C. 20551, not later than July 1, 1983.

Board of Governors of the Federal Reserve System, June 6, 1983.

James McAfee,

Associate Secretary of the Board.

BILLING CODE 6210-01-M

DEPARTMENT OF HEALTH AND HUMAN SERVICES

Food and Drug Administration

Advisory Committees; Notice of Meetings

AGENCY: Food and Drug Administration.

ACTION: Notice.

SUMMARY: This notice announces forthcoming meetings of public advisory committees of the Food and Drug

Administration (FDA). This notice also sets forth a summary of the procedures governing committee meetings and methods by which interested persons may participate in open public hearings conducted by the committees and is issued under section 10(a) (1) and (2) of the Federal Advisory Committee Act (Pub. L. 92-463, 86 Stat. 770-776 (5 U.S.C. App. I), and FDA regulations (21 CFR Part 14) relating to advisory committees. The following advisory committee meetings are announced:

Radiologic Devices Panel

Date, time, and place. July 6 and 7, 9 a.m., Rm. T-416, 12720 Twinbrook Parkway, Rockville, MD.

Type of meeting and executive secretary. Open public hearing, July 6, 9 a.m. to 10 a.m.; open committee discussion, 10 a.m. to 4:30 p.m.; open committee discussion, July 7, 9 a.m. to 4 p.m.; Robert Phillips, National Center for Devices and Radiological Health (HFX-460), Food and Drug Administration, 12720 Twinbrook Parkway, Rockville, MD 20857, 301-443-3426.

General function of the committee. The committee reviews and evaluates effectiveness of devices currently in use and makes recommendations for their regulation. The committee also reviews data on new devices and makes recommendations regarding their safety and effectiveness and their suitability for marketing.

Agenda—Open public hearing. Interested persons may present data, information, or views, orally or in writing, on issues pending before the committee. Those desiring to make formal presentations should notify the executive secretary before June 24 and submit a brief statement of the general nature of the evidence or arguments they wish to present, the names and addresses of proposed participants, and an indication of the approximate time required to make their comments.

Open committee discussion. The committee will discuss premarket approval application 82M0509 for an RF Microwave Hyperthermia Device and premarket approval applications 82M1502, 82M1404, and 83M0104 for Nuclear Magnetic Resonance Imaging Devices.

Orthopedic and Rehabilitation Device Section of the Surgical and Rehabilitation Devices Panel

Date, time, and place. July 11, 1 p.m. Rm. 503A-529A, 200 Independence Ave. SW., Washington, DC.

Type of meeting and panel section leader. Open public hearing, 1 p.m. to 2 p.m.; open committee discussion, 2 p.m. to 5 p.m.; Robert E. Mansell, National Center for Devices and Radiological Health (HFK-410), Food and Drug Administration, 8757 Georgia Ave., Silver Spring, MD 20910, 301-427-7238.

General function of the committee. The committee reviews and evaluates available data on the safety and effectiveness of devices and makes recommendations for their regulation.

Agenda—Open public hearing. Interested persons may present data, information, or views, orally or in writing, on issues pending before the committee. Those desiring to make formal presentations should notify the panel section leader before July 5 and submit a brief statement of the general nature of the evidence or arguments they wish to present, the names and addresses of proposed participants, and an indication of the approximate time required to make their comments.

Open committee discussion. The committee will discuss a premarket approval application for a polymethylmethacrylate bone cement containing an antibiotic.

Microbiology Device Section of the Immunology and Microbiology Devices Panel

Date, time, and place. July 28 and 29, 9 a.m., Rm. 1207, 8757 Georgia Ave., Silver Spring, MD.

Type of meeting and panel section leader. Open public hearing, July 28, 9 a.m. to 10 a.m.; open committee discussion, 10 a.m. to 5 p.m.; open public hearing, July 29, 9 a.m. to 10 a.m.; open committee discussion, 10 a.m. to 5 p.m.; Thomas M. Tsakeris, National Center for Devices and Radiological Health (HFK-440), Food and Drug Administration, 8757 Georgia Ave., Silver Spring, MD 20910, 301-427-7550.

General function of the committee. The committee reviews and evaluates available data on the safety and effectiveness of devices and makes recommendations for their regulation.

Agenda—Open public hearing. Interested persons may present data, information, or views, orally or in writing, on issues pending before the committee. Those desiring to make formal presentations should notify the panel section leader before July 14 and submit a brief statement of the general nature of the evidence or arguments they wish to present, the names and addresses of proposed participants, and an indication of the approximate time required to make their comments.

Open committee discussion. The committee will discuss premarket approval applications for hepatitis A and B virus in vitro diagnostic products, and a premarket approval application for an in vitro diagnostic product for the determination of the minimum inhibitory concentration of antimicrobic agents.

FDA public advisory committee meetings may have as many as four separable portions: (1) An open public hearing, (2) an open committee discussion, (3) a closed presentation of data, and (4) a closed committee deliberation. Every advisory committee meeting shall have an open public hearing portion. Whether or not it also includes any of the other three portions will depend upon the specific meeting involved. There are no closed portions for the meetings announced in this notice. The dates and times reserved for the open portions of each committee meeting are listed above.

The open public hearing portion of each meeting shall be at least 1 hour long unless public participation does not last that long. It is emphasized, however, that the 1 hour time limit for an open public hearing represents a minimum rather than a maximum time for public participation, and an open public hearing may last for whatever longer period the committee chairman determines will facilitate the committee's work.

Meetings of advisory committees shall be conducted, insofar as is practical, in accordance with the agenda published in this **Federal Register** notice. Changes in the agenda will be announced at the beginning of the open portion of a meeting.

Any interested person who wishes to be assured of the right to make an oral presentation at the open public hearing portion of a meeting shall inform the contact person listed above, either orally or in writing, prior to the meeting. Any person attending the hearing who does not in advance of the meeting request an opportunity to speak will be allowed to make an oral presentation at the hearing's conclusion, if time permits, at the chairman's discretion.

Persons interested in specific agenda items to be discussed in open session may ascertain from the contact person the approximate time of discussion.

A list of committee members and summary minutes of meetings may be requested from the Dockets Management Branch (HFA-305), Food and Drug Administration, Rm. 4-62, 5600 Fishers Lane, Rockville, MD 20857, between 9 a.m. and 4 p.m., Monday through Friday. The FDA regulations relating to public advisory committees may be found in 21 CFR Part 14.

Dated: June 2, 1983

William F. Randolph,

Acting Associate Commissioner for Regulatory Affairs.

BILLING CODE 4160-01-M

[Docket No. 82D-0350]

General Principles of Process Validation; Current Good Manufacturing Practice Draft Guideline; Extension of Comment Period

AGENCY: Food and Drug Administration.

ACTION: Notice; extension of comment period.

SUMMARY: The Food and Drug Administration (FDA) is extending to July 31, 1983, the comment period for the notice announcing the availability of a draft guideline entitled "Guideline on General Principles of Process Validation," which outlines general principles of process validation the agency views as acceptable parts of a process validation program for preparing human and animal drug products and medical devices. FDA is taking this action in response to a request for an extension of the comment period.

DATE: Comments by July 31, 1983.

ADDRESSES: Requests for a copy of the draft guideline and written comments regarding the draft guideline to the Dockets Management Branch (HFA-305), Food and Drug Administration, Rm. 4-62, 5600 Fishers Lane, Rockville, MD 20857.

FOR FURTHER INFORMATION CONTACT:

For Human and Animal Drug Products: Clifford G. Broker, National Center for Drugs and Biologics (HFN-323), Food and Drug Administration, 5600 Fishers Lane, Rockville, MD 20857, 301-443-5307.

For Medical Devices: Edward J. McDonnell, National Center for Devices and Radiological Health (HFK-130), Food and Drug Administration, 8757 Georgia Ave., Silver Spring, MD 20910, 301-427-7122.

SUPPLEMENTARY INFORMATION: In the **Federal Register** of March 29, 1983 (48 FR 13096), FDA issued a notice announcing the availability of a draft guideline entitled "Guideline on General Principles of Process Validation," which outlines general principles of process validation the agency views as acceptable parts of a process validation program for preparing human and animal drug products and medical devices. The draft guideline is intended to inform interested persons of these acceptable principles to facilitate complicance with the current good manufacturing practice (CGMP) regulations and was made available for public comment to provide the agency with views to be considered in its development of a final guideline. Interested persons were given to May 31, 1983, to comment on the draft guideline.

In response to the notice, Bayer AG has requested a 60-day extension of the comment period. Bayer AG states that the **Federal Register** notice announcing the availability of the draft guideline is not available to foreign manufacturers until 5 weeks after publication in the United States and consequently, the 60-day comment period specified in the notice is unreasonable for foreign manufacturers. Bayer AG also stated that foreign manufacturers who supply drugs to the United States are as equally affected as domestic firms and should be given the same opportunity to review the guideline and to prepare thoughtful comments. Bayer AG pointed out that members of foreign organizations such as the Federation Internationale Pharmaceutique and the Pharmaceutical Inspection Convention have an active interest in the process validation area and should be given the opportunity to update their views based on recent practical experience.

FDA has carefully considered the request. The agency does not accept the argument that the 60-day period provided in this instance for the submission of comments has been insufficient to provide interested persons outside the United States an opportunity to express their views. Firms that may not receive **Federal Register** announcements in a timely manner through the mails are responsible for taking steps to assure that they more promptly receive such announcements if they wish to participate in agency rulemaking matters. However, in this matter, the agency has determined that its schedule for issuing the guideline in final form will permit a general extension of the comment period to July 31, 1983, as requested, and that such an extension to receive pertinent comments is in the public interest. Accordingly, the comment period for submissions by any interested person is extended to July 31, 1983.

Interested persons may, on or before July 31, 1983, submit written comments on the draft guideline to the Dockets Management Branch (address above). These comments will be considered in determining whether further amendments to, or revisions of, the draft guideline are warranted. Comments should be in two copies (except that individuals may submit single copies), identified with the docket number found in brackets in the heading of this document. The draft guideline and received comments may be seen in the Dockets Management Branch between 9 a.m. and 4 p.m., Monday through Friday. Requests for a single copy of the draft giudeline should be sent to the Dockets Management Branch.

Dated: June 2, 1983.

William F. Randolph,

Acting Associate Commissioner for Regulatory Affairs.

[FR Doc. 83-15280 Filed 6-9-83; 1:35 pm]

BILLING CODE 4160-01-M

[Docket No. 83M-0173]

Ryder International Corp.; Premarket Approval of Kestrel No. 695 Heater

AGENCY: Food and Drug Administration.

ACTION: Notice.

SUMMARY: Food and Drug Administration (FDA) is announcing its approval of the application for premarket approval under the Medical Device Amendments of 1976 of the Kestrel No. 695 Heater sponsored by Ryder International Corp., Arab, AL. After reviewing the recommendation of the Ophthalmic Device Section of the Ophthalmic; Ear, Nose, and Throat; and Dental Devices Panel, FDA notified the sponsor that the application was approved because the device had been shown to be safe and effective for use as recommended in the submitted labeling.

DATE: Petitions for administrative review by July 11, 1983.

ADDRESS: Requests for copies of the summary of safety and effectiveness data and petitions for administrative review may be sent to the Dockets Management Branch (HFA-305), Food and Drug Administration, Rm 4-62, 5600 Fishers Lane, Rockville MD 20857.

FOR FURTHER INFORMATION CONTACT: Charles H. Kyper, National Center for Devices and Radiological Health (HFK-402), Food and Drug Administration, 8757 Georgia Ave., Silver Spring, MD 20910, 301-427-7445.

SUPPLEMENTARY INFORMATION: On December 22, 1982, Ryder International Corp., Arab, AL, submitted to FDA an application for premarket approval of the Kestrel No. 695 Heater for use with all heat (thermal) disinfected soft (hydrophilic) contact lenses. The application was reviewed by the Ophthalmic Device Section of the Ophthalmic; Ear, Nose, and Throat; and Dental Devices Panel, an FDA advisory

committee, which recommended approval of the application. On May 17, 1983, FDA approved the application by letter to the sponsor from the Associate Director for Device Evaluation of the Office of Medical Devices.

Before enactment of the Medical Device Amendments of 1976 (the amendments) (Pub. L. 94–295, 90 Stat. 539–583), soft contact lens accessories were regulated as new drugs. Because the amendments broadened the definition of the term "device" in section 201(h) of the Federal Food, Drug, and Cosmetic Act (the act (21 U.S.C. 321(h)), soft contact lens accessories are now regulated as class III devices (premarket approval).

As FDA explained in a notice published in the **Federal Register** of December 16, 1977 (42 FR 63472), the amendments provide transitional provisions to ensure continuation of premarket approval requirements for class III devices formerly regulated as new drugs. Furthermore, FDA requires, as a condition to approval, that sponsors of applications for premarket approval of soft contact lenses or accessories comply with the records and reports provisions of Part 310 (21 CFR Part 310), Subpart D, until these provisions are replaced by similar requirements under the amendments.

A summary of the safety and effectiveness data on which FDA's approval is based is on file with the Dockets Management Branch (address above) and is available upon request from that office. A copy of all approved draft labeling is available for public inspection at the Office of Medical Devices—contact Charles H. Kyper (HFK–402), address above. Requests should be identified with the name of the device and the docket number found in brackets in the heading of this document.

Opportunity for Administrative Review

Section 515(d)(3) of the act (21 U.S.C. 360e(d)(3)) authorizes any interested person to petition, under section 515(g) of the act (21 U.S.C. 360e(g)), for administrative review of FDA's decision to approve this application. A petitioner may request either a formal hearing under Part 12 (21 CFR Part 12) of FDA's administrative practices and procedures regulations or a review of the application and FDA's action by an independent advisory committee of experts. A petition is to be in the form of a petition for reconsideration of FDA action under § 10.33(b) (21 CFR 10.33(b)). A petitioner shall identify the form of review requested (hearing or independent advisory committee) and shall submit with the petition supporting data and information showing that there is genuine and substantial issue of material fact for resolution through administrative review. After reviewing the petition, FDA will decide whether to grant or deny the petition and will publish a notice of its decision in the **Federal Register**. If FDA grants the petition, the notice will state the issues to be reviewed, the form of review to be used, the persons who may participate in the review, the time and place where the review will occur, and other details.

Petitioners may, at any time on or before July 11, 1983, file with the Dockets Management Branch (address above) two copies of each petition and supporting data and information, identified with the name of the device and the docket number found in brackets in the heading of this document. Received petitions may be seen in the office above between 9 a.m. and 4 p.m., Monday through Friday.

Dated: June 2, 1983.

William F. Randolph,

Acting Associate Commissioner for Regulatory Affairs.

BILLING CODE 4160–01–M

[Docket No. 83F–0134]

Ciba-Geigy Corp.; Filing of Food Additive Petition

AGENCY: Food and Drug Administration.

ACTION: Notice.

SUMMARY: Food and Drug Administration (FDA) is announcing that Ciba-Geigy Corp. has filed a petition proposing that the food additive regulations be amended to provide for the safe use of poly [[6-[(1,1,3,3-tetramethylbutyl) amino]-s-triazine-2,4-diyl] [(2,2,6,6-tetramethyl-4-piperidyl)imino]hexamethylene [2,2,6,6-tetramethyl-4-piperidyl) imino]] as a light stabilizer in polypropylene and high-density polyethylene.

FOR FURTHER INFORMATION CONTACT: Julius Smith, Bureau of Foods (HFF–334), Food and Drug Administration, 200 C St. SW., Washington, DC 20204, 202–472–5690.

SUPPLEMENTARY INFORMATION: Under the Federal Food, Drug, and Cosmetc Act sec. 409(b)(5), 72 Stat. 1786 (21 U.S.C. 348) (b)(5))), notice is given that a petition (FAP 3B3716) has been filed by Ciba-Geigy Corp., Three Skyline Dr., Hawthorne, NY 10532, proposing that § 178.2010 *Antioxidants and/or stabilizers for polymers* (21 CFR 178.2010) be amended to provide for the safe use of poly [[6-[(1,1,3,3-tetramethylbutyl) amino]-s-triazine-2,4-diyl] [(2,2,6,6-tetramethyl-4-piperidyl)imino]hexamethylene [2,2,6,6-tetramethyl-4-piperidyl) imino]] as a light stabilizer in polypropylene and high-density polyethylene complying with 21 CFR 177–1520.

The potential environmental impact of this action is being reviewed. If the agency finds that an environmental impact statement is not required and this petition results in a regulation, the notice of availability of the agency's finding of no significant impact and the evidence supporting that finding will be published with the regulation in the **Federal Register** in accordance with 21 CFR 25.40(c) (proposed December 11, 1979; 44 FR 71742).

Dated: June 2, 1983.

Richard J. Ronk,

Acting Director, Bureau of Foods.

BILLING CODE 4160–01–M

J. L. Keistler's Sarcoptic Mange Remedy; Withdrawal of Approval of NADA

AGENCY: Food and Drug Administration.

ACTION: Notice.

SUMMARY: The Food and Drug Administration (FDA) is withdrawing approval of a new animal drug application (NADA) sponsored by J. L. Keistler providing for use of Keistler's Sarcoptic Mange Remedy. The sponsor requested the withdrawal of approval.

EFFECTIVE DATE: June 20, 1983.

FOR FURTHER INFORMATION CONTACT: David N. Scarr, Bureau of Veterinary Medicine (HFV–214), Food and Drug Administration, 5600 Fishers Lane, Rockville, MD 20857, 301–443–3183.

SUPPLEMENTARY INFORMATION: J. L. Keistler, 320 Tuskaseegee Rd., Charlotte, NC 28208, is the sponsor of NADA 1–443 which provides for use of Keistler's Sarcoptic Mange Remedy. The product was originally approved September 22, 1939. In their letter of February 2, 1983, the sponsor stated the product was no longer being manufactured or marketed and requested withdrawal of approval under § 514.115 (21 CFR 514.115). Approval of this NADA has not been codified in the Code of Federal Regulations.

Therefore, under the Federal Food, Drug, and Cosmetic Act (sec. 512(e), 82 Stat. 345–347 (21 U.S.C. 360b(e))) and under authority delegated to the Commissioner of Food and Drugs (21 CFR 5.10) and redelegated to the Bureau of Veterinary Medicine (21 CFR 5.84),

and in accordance with § 514.115 *Withdrawal of approval of applications*, notice is given that approval of NADA 1–443 and all supplements for J. L. Keistler's Sarcoptic Mange Remedy is hereby withdrawn, effective June 20, 1983.

Dated: May 31, 1983.

Lester M. Crawford,

Director, Bureau of Veterinary Medicine.

[FR Doc. 83–15540 Filed 6–9–83; 8:45 am]

BILLING CODE 4160–01–M

Health Care Financing Administration

Medicare Program; Continuation of the Current Part B Monthly Premium Rate

AGENCY: Health Care Financing Administration (HCFA), HHS.

ACTION: General Notice.

SUMMARY: This notice announces the rescission of the increase in the monthly Medicare Supplementary Medical Insurance (SMI) premium for the aged (age 65 or over) and disabled (under age 65) that was scheduled to become effective on July 1, 1983.

EFFECTIVE DATE: July 1, 1983.

FOR FURTHER INFORMATION CONTACT: Joseph N. Romano, Supervisory Actuary, Division of Medicare Cost Estimates, 1–C–11, Oak Meadows Building, Baltimore, Maryland 21235, Telephone: (301) 594–1023.

SUPPLEMENTARY INFORMATION: Section 1831 of the Social Security Act establishes a voluntary Supplementary Medical Insurance (SMI) program (Part B of Medicare) for aged and disabled individuals who elect to enroll under Part B. Coverage of the benefits under Part B is subject to the payment of a monthly SMI premium.

The Secretary of Health and Human Services published a notice in the **Federal Register** (see 47 FR 58366) on December 30, 1982, announcing that the monthly SMI premium rate would increase to $13.50 beginning July 1, 1983. Subsequently, section 606(c) of the Social Security Amendments of 1983 (Pub. L. 98–21) rescinded the scheduled premium increase and required that the monthly premium remain at the current amount of $12.20 through December 31, 1983. Accordingly, the scheduled premium of increase to $13.50 is rescinded and the current premium $12.20 remains in effect through the end of calendar year 1983.

Prior to amendment by section 606 of the Social Security Amendments of 1983, section 1839(c)(3) of the Act required the Secretary to determine and publish, during the last quarter of each calendar year, the amount of the monthly SMI premium rate to be paid by aged and disabled enrollees for the 12-month period beginning with the following July 1. Section 1839(c)(3) of the Act as amended by section 606(a)(1) of the Social Security Amendments of 1983 requires the Secretary to determine and publish, during the next to last quarter of each calendar year, the amount of the monthly SMI premium to be paid by aged and disabled enrollees for the following calendar year. The Secretary will publish a separate notice by September 30, 1983, announcing the monthly premium amount that will apply to calendar year 1984.

(Sec. 606(c) of the Social Security Amendments of 1983, Pub. L. 98–21, 97 Stat. 171)

(Catalog of Federal Domestic Assistance Program No. 13.774, Medicare/Supplementary Medical Insurance)

Date June 6, 1983

Carolyne K. Davis,

Administrator, Health Care Financing Administration.

BILLING CODE 4120–03–M

Medicare Program; Continuation of the Current Premium Rate for the Uninsured Aged

AGENCY: Health Care Financing Administration (HCFA), HHS.

ACTION: General Notice.

SUMMARY: This notice announces the rescission of the increase in the monthly Medicare hospital insurance premium for the uninsured aged that was scheduled to become effective on July 1, 1983.

EFFECTIVE DATE: July 1, 1983.

FOR FURTHER INFORMATION CONTACT: Sol Mussey, Supervisory Actuary, Office of Financial and Actuarial Analysis, 1–C–11 Oak Meadows Building, Baltimore, Maryland 21207, Telephone: (301) 594–1024.

SUPPLEMENTARY INFORMATION: Section 1818 of the Social Security Act (Act) provides for voluntary enrollment in the hospital insurance program (Part A of Medicare), subject to payment of a monthly premium, of certain persons age 65 and older who are uninsured for social security or railroad retirement benefits and do not otherwise meet the requirements for entitlement to hospital insurance. (Persons insured under the Social Security or Railroad Retirement Acts need not pay premiums for hospital insurance.)

The Secretary of Health and Human Services published a notice in the **Federal Register** (see 47 FR 57574) on December 27, 1982 announcing that the monthly Medicare hospital insurance premium for the uninsured aged would increase from $113 to $132 beginning July 1, 1983. Subsequently, section 606(c) of the Social Security Amendments of 1983 (Pub. L. 98–21) rescinded the scheduled premium increase and required that the monthly premium remain at the current amount of $113 through December 31, 1983. Accordingly, the scheduled premium increase to $132 is rescinded and the current premium of $113 remains in effect through the end of calendar year 1983.

Prior to amendment by section 606 of the Social Security Amendments of 1983, section 1818(d)(2) of the Act required the Secretary to determine and publish, during the last quarter of each calendar year, the amount of the monthly Part A premium for voluntary enrollment for the 12-month period beginning with the following July 1. Section 1818(d)(2) of the Act, as amended by section 606(b) of the Social Security Amendments of 1983, requires the Secretary to determine and publish, during the next to last quarter of each calendar year, the amount of the monthly Part A premium for voluntary enrollment for the following calendar year. The Secretary will publish a separate notice by September 30, 1983, announcing the monthly premium amount that will apply to calendar year 1984.

(Sec. 606(c) of the Social Security Amendments of 1983, Pub. L. 98–21, 97 Stat. 171)

Office of the Secretary

Agency Forms Submitted to the Office of Management and Budget for Clearance

Each Friday the Department of Health and Human Services (HHS) publishes a list of information collection packages it has submitted to the Office of Management and Budget (OMB) for clearance in compliance with the Paperwork Reduction Act (44 U.S.C. Chapter 35). The following are those packages submitted to OMB since the last list was published on June 3.

Public Health Service

Health Resources and Services Administration

Subject: Health Education Assistance Loan Program School Recordkeeping Requirements—New
Respondents: Educational institutions
Subject: National Sample Survey of Licensed Practical/Vocational Nurses—New
Respondents: Licensed practical and vocational nurses
OMB Desk Officer: Fay S. Iudicello

Social Security Administration

Subject: Survey of Employment Service Programs for Refugees—New
Respondents: Local employment programs for refugees
Subject: Monthly "Flash" Report of Selected AFDC Program Data (0960–0152 (SSA–3645))—REVISION
Respondents: State Aid for Dependent Children program offices
Subject: Declaration of Citizenship by Social Security Beneficiary Outside the United States (SSA–487TC and 490TC)—New
Respondents: Social Security beneficiaries residing outside the United States
OMB Desk Officer: Milo Sunderhauf.

Copies of the above information collection clearance packages can be obtained by calling the HHS Reports Clearance Officer on 202–245–6511.

Written comments and recommendations for the proposed information collections should be sent directly to the appropriate OMB Desk Officer designated above at the following address: OMB Reports Management Branch, New Executive Office Building, Room 3208, Washington, D.C. 20503. Attn: (name of OMB Desk Officer).

Dated: June 3, 1983.

Dale W. Sopper,

Assistant Secretary for Management and Budget.

BILLING CODE 4150–04–M

Public Health Service

Privacy Act of 1974; Addition to Routine Use

AGENCY: Public Health Service, Health and Human Services Department.

ACTION: Notification of a proposal to add a routine use to an existing system of records: 09–30–0034, "Professional Development Program Registries of the National Training System for Substance Abuse Services," HHS/ADAMHA/NIDA.

SUMMARY: In accordance with the requirements of the Privacy Act, the Public Health Service (PHS) is publishing a notice of a proposal to add a routine use to the system of records 09–30–0034, "Professional Development Program Registries of the National Training System for Substance Abuse Services," HHS/ADAMHA/NIDA, in the Alcohol, Drug Abuse, and Mental Health Administration (ADAMHA), National Institute on Drug Abuse (NIDA). This new routine use will permit ADAMHA to transfer the records now in NIDA's possession to a non-Federal successor organization, the American Council on Education (ACE). ACE will assume all responsibility for the operation of the registries. PHS invites interested parties to submit comments on the proposed routine use on or before July 11, 1983.

DATE: PHS will adopt the new routine use without further notice 30 days after the date of publication, unless comments are received which would result in a contrary determination. Upon adoption, ADAMHA will transfer the records to ACE. At that time, ADAMHA will terminate this system of records.

ADDRESS: Please address comments to: Privacy Act Officer, NIDA, Office of Science, Extramural Policy and Project Review, 5600 Fishers Lane, Room 10–42, Rockville, Maryland 20857.

Comments received will be available for inspection at the same address, from 8:00 a.m. to 4:00 p.m., Monday through Thursday.

FOR FURTHER INFORMATION CONTACT: Avraham Forman, Division of Training, National Institute on Drug Abuse, 5600 Fishers Lane, Room 10–A–37, Rockville, Maryland 20857, Telephone: (301) 443–6720. This is not a toll-free number.

Any individual who wishes to have his or her record(s) deleted from this system of records prior to the transfer of the records to the non-Federal successor organization, ACE, thereby eliminating his or her participation in the National Training System (NTS) network, should notify the official listed above. This request must reach the above-listed official within the stipulated 30-day comment period. The request to delete the record should include the following information: Notarized signature, full name at the time of training, and, if known, location and date when training was provided, course name, and name of instructor/trainer and/or sponsoring organization. Any records which are not transferred will be sent to the subject-individual, if requested, or destroyed when the other records are transferred.

SUPPLEMENTARY INFORMATION: NIDA established NTS in 1973 to serve as the network for providing substance abuse services training. It is a combination of national, regional, State and local training and human resource development services contractors, grantees, and affiliates of NIDA, ADAMHA. The purpose of this system of records is retrieval of data on persons providing or receiving substance abuse-related training. The system of records enables individuals to obtain confirmation of their successful completion of substance abuse training courses provided within NTS. Training is conducted under NTS auspices and information about that training is used to establish substance-abuse worker credentials, to promote career mobility, and to assist in the attainment of academic credit. The records are also used to certify the competence of the trainers of NTS-developed courses.

With reduced Federal funding, NIDA can no longer support the components of NTS. States, however, will continue to operate and coordinate training programs for substance-abuse treatment workers. States view the registries as an important tool in enabling trainers and trainees to verify academic credit(s) in this area. Therefore, the need to continue the operation of the registries of NTS still exists. NIDA has consulted with NTS components and decided to transfer the registries from a NIDA contractor to a non-Federal successor organization, ACE. ACE will operate the registries on a fee-for-service basis and will continue to operate the registries in a manner similar to the current procedures.

Adding the new routine use will permit the transfer of these records to ACE. Once the records from this system are transferred, assuming no objection within the 30-day public comment period which would result in a contrary determination, NIDA will no longer have responsibility for the records. The transferred records will not be maintained on behalf of NIDA and therefore will no longer be subject to the Privacy Act.

The new routine use will read as follows:

"4. NIDA will disclose all records in the system to a non-Federal successor organization, the American Council on Education, DuPont Circle, Washington, D.C. The American Council on Education will assume all responsibility for the registries and operate them on a fee-for-service basis with an assurance of confidentiality safeguards. This transfer will terminate all Federal Government responsibility for this system of records."

ACE has agreed, in writing, to maintain the confidentiality of the records. ACE's assurance of confidentiality is that the release of information from a record of an individual will require a verifiable, signed release from the subject-individual. The only exception to this policy would be for a request from a court in the form of a court order or a subpoena.

Due to the reduction in funds and the pending transfer of the system to a non-Federal successor organization, NIDA no longer needs the first and third routine uses listed in the existing system notice. Therefore, we are deleting them at this time. The remaining routine use (number two below) is effective until the transfer or destruction of the records shortly after the expiration of the 30-day public comment period for the new, fourth, routine use. The three existing routine uses read as follows:

"1. The Department contemplates that it will contract with a private firm for the purpose of collating, analyzing, aggregating, or otherwise refining the records in this system. Relevant records will be disclosed to such a contractor. The contractor shall be required to maintain Privacy Act safeguards with respect to such records."

"2. Disclosure may be made to a congressional office from the record of an individual in response to a verified inquiry from the congressional office made at the written request of that individual."

"3. Disclosure may be made to members of the Professional Development Program Standards Committee (PDPSC) to enable them to carry out their responsibilities for certification of instructors/trainers and confirmation of trainees' participation in courses."

We are not changing the language in any of the other categories in the system notice because this information is correct and effective until 30 days after publication of the new routine use in the **Federal Register**, when the system will be terminated.

The transfer of the function of the registries to ACE is compatible with the purpose of the system of records, as ACE will continue to perform the tasks performed by the NIDA contractor, and will continue to verify successful completion of substance abuse services training.

In addition to this publication in the **Federal Register**, we are making more direct efforts to notify individuals in this system of records about the proposed transfer of the records to ACE and the procedures to follow if they wish to have their records deleted from the system prior to the transfer. Specifically, we will inform State training officers, who through State workshops in the substance abuse training area and State newsletters, will notify participants in this system of records of the proposed record transfer.

The system notice was last published in the **Federal Register**, October 13, 1982, (47 FR 45458–45459). We are republishing the notice in its entirety below to incorporate the proposed changes.

Dated: June 3, 1983.

Wilford J. Forbush,

Deputy Assistant Secretary for Health Operation and Director, Office of Management.

SYSTEM NAME:

09–30–0034

Professional Development Program Registries of the National Training System for Substance Abuse Services, HHS/ADAMHA/NIDA.

SECURITY CLASSIFICATION:

None.

SYSTEM LOCATION:

Division of Training, National Institute on Drug Abuse, Alcohol, Drug Abuse, and Mental Health Administration, Room 10A–46, Parklawn Building, 5600 Fishers Lane, Rockville, Mayland 20857.

Health Control Systems, Inc., 11325 Seven Locks Road, Potomac, Maryland 20854.

Washington National Records Center, 4205 Suitland Road, Washington, D.C. 20409.

CATEGORIES OF INDIVIDUALS COVERED BY THE SYSTEM:

Persons who have participated in National Training System (NTS) courses either as trainees or as instructors/trainers. The term "trainees" encompasses all categories of persons who are students in NTS courses, whether or not they have experience yet in the substance abuse services and/or training fields. "Instructors" are persons qualified to teach one or several aspects of a NTS course, but not qualified in all aspects of teaching techniques and not authorized within the NTS to validate another person's qualifications for training others to teach the course content. "Trainers" are persons who are qualified through NTS-recognized academic or specialized preparation in all aspects of a NTS course, and are certified by NTS to teach the course, train and supervise other persons to teach it, and validate other persons' qualifications to teach it for NTS. An individual's status can vary from course to course. Persons who have participated in substance abuse-related training activities that meet NTS standards but are provided by non-NTS organizations are also included in the registries at the participants' option.

CATEGORIES OF RECORDS IN THE SYSTEM:

Course records which include: name, birthdate, sex, address, employment, length of time employed in the field of substance abuse services training, name and version of course, course completion records, date of course, name of instructor/trainer or trainees as appropriate, and training sponsor.

AUTHORITY FOR MAINTENANCE OF THE SYSTEM:

Drug Abuse Prevention, Treatment and Rehabilitation Act, Sections 410 and 501 (21 U.S.C. 1177 and 1191); Public Health Service Act, Section 301 (42 U.S.C. 241(a)).

PURPOSE(S):

The registries which constitute this system of records enable individuals to obtain confirmation of their successful completion of substance abuse training courses. This in turn enables them to obtain the certification of academic credit necessary to verify their qualifications for employment in the substance abuse training or services fields. Disclosures for this purpose are made only to subject individuals or others as the subject individual permits in writing, such as academic institutions and potential employers.

Individually identified information will not be otherwise disclosed to persons or organizations either within or outside the DHHS except as provided by the routine uses set forth below and as otherwise provided by Section 3(b) of the Privacy Act (5 U.S.C. 552a(b)). The nonindividually identified aggregate data will be analyzed by the National Institute on Drug Abuse (NIDA) for quality control and will be available to the public for purposes of identifying drug abuse services training trends.

ROUTINE USES OF RECORDS MAINTAINED IN THE SYSTEM, INCLUDING CATEGORIES OF USERS AND THE PURPOSES OF SUCH USES:

2. Disclosure may be made to a congressional office from the record of an individual in response to a verified inquiry from the congressional office made at the written request of that individual.

4. NIDA will disclose all records in the system to a non-Federal successor organization, the American Council on Education, DuPont Circle, Washington, D.C. The American Council on

Education will assume all responsibility for the registries and operate them on a fee-for-service basis with an assurance of confidentiality safeguards. This transfer will terminate all Federal Government responsibility for this system of records.

POLICIES AND PRACTICES FOR STORING, RETRIEVING, ACCESSING, RETAINING AND DISPOSING OF RECORDS IN THE SYSTEM:

STORAGE:

Batch control sheets, individual registration forms (automated and nonautomated), keypunch cards, computer tapes and disks are utilized. Individually identifiable information on original forms are stored in locked cabinets.

RETRIEVABILITY:

The system is filed by the name of the trainee of instructor/trainer.

SAFEGUARDS:

Records are kept in premises with accessibility to contractor staff, NIDA project officers, and his/her support staff. Individually identifiable information in paper media (batch control sheets, registration forms, and keypunch cards) are stored in locked cabinets. For computerized records, safeguards established in accordance with the National Bureau of Standards guidelines and HHS's System Manual. Part 6, "ADP System Security", are utilized. Specifically, premises are secured in accordance with existing security systems for safeguarding records at the Federal Government computer center in the Parklawn Building, Rockville, Maryland, Security personnel patrol the premises there 24 hours a day. Computer systems are secured through locked magnetic disk libraries as well as password access computer system.

These safeguards are in accordance with DHHS Chapter 45–13 and supplementary Chapter PHS.hf: 45–13 in the General Administration Manual.

NOTE: NIDA contracts with non-Federal parties shall stipulate agreement to the above procedures on the part of the contractor.

RETENTION AND DISPOSAL:

The current NTS standard requires that NTS instructors/trainers teach a course every 18 months in order to be recertified. Most States and academic institutions similarly require their staffs to periodically update their knowledge and skills through continuing education courses. If individuals discontinue their participation in NTS or NTS-approved training, supporting records of their participation become obsolete rather rapidly for purposes of verifying qualifications. Therefore, records on an individual are retained for only three years following the individual's most recent completion of course requirements for earning academic credit and/or meeting employment qualifications. After three years with no further reported activity, only information of an individual's date(s) of certification(s) as instructor/trainer in NTS course(s) is retained indefinitely.

Records may be retired to a Federal Records Center and subsequently disposed of in accordance with the ADAMHA Records Control Schedule. The records control schedule and disposal standard for these records may be obtained by writing to the System Manager at the address below.

SYSTEM MANAGER(S) AND ADDRESS:

Registrar, Professional Development Program, Division of Training, NIDA, Alcohol, Drug Abuse, and Mental Health Administration, Room 10A–46, Parklawn Building, 5600 Fishers Lane, Rockville, Maryland 20857.

NOTIFICATION PROCEDURE:

To determine if a record exists, write to the System Manager at the address above. An individual may learn if a record exists about himself or herself upon written request with notarized signature. The following information should be provided: full name at the time of training and, if known, location and date when training was provided, course name, and name of instructor/trainer and/or sponsoring organization.

Your Social Security number would be helpful for record locating purposes, but it is not required.

RECORD ACCESS PROCEDURES

Same as Notification Procedures. Requesters should also reasonably specify the record contents being sought.

CONTESTING RECORD PROCEDURES:

Contact the Official at the address specified under Notification Procedures above, and reasonably identify the record, specify the information to be contested, and state the corrective action sought, with supporting justification.

RECORD SOURCE CATEGORIES:

Trainee registration form for each trainee in a course, containing personal and professional background information and course completion validation; and "batch control" sheet for each course, identifying instructor(s)/trainer(s) and trainees. For instructors/trainers, sources also include reports from national, State, and regional certification authorities; NTS national workshop recommendations; and equivalent sources upon which the Professional Development Program Standards Committee (PDPSC) will base decisions on certification of instructors/trainers.

SYSTEMS EXEMPTED FROM CERTAIN PROVISIONS OF THE ACT:

None.

BILLING CODE 4160–20–M

DEPARTMENT OF HOUSING AND URBAN DEVELOPMENT

[Docket No. D–83–700]

Authority Delegation; Designation of Privacy Act Officer

AGENCY: Office of the Regional Administrator, Region X, Seattle Regional Office, HUD.

ACTION: Designation of Privacy Act Officer.

SUMMARY: The Regional Administrator of Region X (Seattle Regional Office) is designating the Regional Counsel to serve as Privacy Act Officer for the Seattle Regional Office of HUD.

EFFECTIVE DATE: June 6, 1983.

FOR FURTHER INFORMATION CONTACT: Terence R. Duvernay, Deputy Regional Administrator, Seattle Regional Office, Department of Housing and Urban Development, 1321 Second Avenue, Seattle, Washington 98101, (206) 442–5330. This is not a toll-free number.

SUPPLEMENTARY INFORMATION: 24 CFR Part 16 prescribes the policies and procedures for implementing the Privacy Act of 1974, 5 U.S.C. 552a Section 16.2(b)(2) provides that the Privacy Act Officer for a particular HUD office is the official identified in Appendix A to Part 16, or his designee. For the Seattle Regional Office, the official identified in Appendix A is the Regional Administrator. The Regional Administrator wishes to designate the Regional Counsel as Privacy Act Officer, to serve in his place.

Accordingly, the Regional Counsel for Region X is hereby designated to serve, in place of the Regional Administrator, as Privacy Act Officer for the Seattle Regional Office of HUD, to perform the duties specified in 24 CFR Part 16.

Authority: 24 CFR 16.2(b)(2) and Appendix A to Part 16.

Dated: June 1, 1983.

William Y. Nishimura,

Regional Administrator, Seattle Regional Office.

[Docket No. N-83-1250]

Submission of Proposed Information Collections to OMB

AGENCY: Office of Administration, HUD.

ACTION: Notice.

SUMMARY: The proposed information collection requirements described below have been submitted to the Office of Management and Budget (OMB) for review, as required by the Paperwork Reduction Act. The Department is soliciting public comments on the subject proposals.

ADDRESS: Interested persons are invited to submit comments regarding these proposals. Comments should refer to the proposal by name and should be sent to: Robert Neal, OMB Desk Officer, Office of Management and Budget, New Executive Office Building, Washington, D.C. 20503.

FOR FURTHER INFORMATION CONTACT: David S. Cristy, Acting Reports Management Officer, Department of Housing and Urban Development, 451 7th Street SW., Washington, D.C. 20410, telephone (202) 755-5310. This is not a toll-free number.

SUPPLEMENTARY INFORMATION: The Department has submitted the proposals described below for the collection of information to OMB for review, as required by the Paperwork Reduction Act (44 U.S.C. Chapter 35).

The Notice lists the following information: (1) The title of the information collection proposal; (2) the office of the agency to collect the information; (3) the agency form number, if applicable; (4) how frequently information submissions will be required; (5) what members of the public will be affected by the proposal; (6) an estimate of the total number of hours needed to prepare the information submission; (7) whether the proposal is new or an extension or reinstatement of an information collection requirement; and (8) the names and telephone numbers of an agency official familiar with the proposal and of the OMB Desk Officer for the Department.

Copies of the proposed forms and other available documents submitted to OMB may be obtained from David S. Cristy, Acting Reports Management Officer for the Department. His address and telephone number are listed above.

Comments regarding the proposals should be sent to the OMB Desk Officer at the address listed above.

The proposed information collection requirements are described as follows:

Submission of Proposed Information Collection to OMB

Proposal: Fiscal information—Military acquisition
Office: Administration
Form number: HUD-2706
Frequency of submission: On occasion
Affected public: Businesses or other institutions (except farms)
Estimated burden hours: 250
Status: Extension
Contact: Betty Belin, HUD, (202) 755-5747; Robert Neal, OMB, (202) 395-7316

Authority: Sec. 3507 of the Paperwork Reduction Act, 44 U.S.C. 3507; Sec. 7(d) of the Department of Housing and Urban Development Act, 42 U.S.C. 3535(d).

Dated: May 24, 1983.

Proposal: Broker's accounting reports
Office: Administration
Form number: HUD-2700, HUD-2700a, HUD-2700b, HUD-2749, HUD-2750, and HUD-2751
Frequency of submission: Monthly/quarterly
Affected public: Businesses or other for-profit and small businesses or organizations
Estimated burden hours: 24,688
Status: Reinstatement
Contact: Betty Belin, HUD, (202) 755-5747; Robert Neal, OMB, (202) 395-7316

Authority: Sec. 3507 of the Paperwork Reduction Act, 44 U.S.C. 3507; Sec. 7(d) of the Department of Housing and Urban Development Act, 42 U.S.C. 3535(d).

Dated: May 24, 1983.

Proposal: Mortgagee's application for insurance benefits (multifamily mortgage)
Office: Administration
Form number: HUD-2747
Frequency of submission: On occasion
Affected public: Businesses or other institutions (except farms)
Estimated burden hours: 25
Status: Extension
Contact: Betty Belin, HUD, (202) 755-5747; Robert Neal, OMB, (202) 395-7316

Authority: Sec. 3507 of the Paperwork Reduction Act, 44 U.S.C. 3507; Sec. 7(d) of the Department of Housing and Urban Development Act, 42 U.S.C. 3535(d).

Dated: May 24, 1983.

Proposal: Preliminary site report by Public Housing Agency
Office: Housing
Form number: HUD-52651
Frequency of submission: On occasion
Affected public: State or local governments
Estimated burden hours: 1,500
Status: Extension
Contact: Raymond Hamilton, HUD, (202) 426-0938; Robert Neal, OMB, (202) 395-7316

Authority: Sec. 3507 of the Paperwork Reduction Act, 44 U.S.C. 3507; Sec. 7(d) of the Department of Housing and Urban Development Act, 42 U.S.C. 3535(d).

Dated: May 24, 1983.

Proposal: Title I transfer of mobile home loans to GNMA pool
Office: Administration
Form number: HUD-676
Frequency of submission: On occasion
Affected public: Businesses or other institutions (except farms)
Estimated burden hours: 2,500
Status: Extension
Contact: Betty Belin, HUD, (202) 755-5747; Robert Neal, OMB, (202) 395-7316

Authority: Sec. 3507 of the Paperwork Reduction Act, 44 U.S.C. 3507; Sec. 7(d) of the Department of Housing and Urban Development Act, 42 U.S.C. 3535(d).

Dated: May 24, 1983.

BILLING CODE 4210–01–M

DEPARTMENT OF THE INTERIOR

Bureau of Land Management

[AA–50379–5]

Alaska Native Claims Selection

In accordance with Departmental regulation 43 CFR 2650.7(d), notice is hereby given that a decision to issue conveyance under the provisions of section 14 of the Alaska Native Claims Settlement Act of December 18, 1971 (43 U.S.C. 1601, 1613 (1976) (ANCSA)) and section 1430 of the Alaska National Interest Lands Conservation Act of December 2, 1980 (94 Stat. 2371, 2531), will be issued to Chugach Natives, Inc., for approximately 46,724 acres. The lands involved are within:

Copper River Meridian, Alaska

T. 16 S., R. 7 E., (Unsurveyed)
T. 17 S., R. 7 E., (Partially surveyed)
T. 16 S., R. 8 E., (Partially surveyed)
T. 17 S., R. 8 E., (Partially surveyed)
T. 16 S., R. 9 E., (Surveyed)
T. 17 S., R. 9 E., (Partially surveyed)

The decision to issue conveyance will be published once a week, for four (4) consecutive weeks, in the CORDOVA TIMES upon issuance of the decision. For information on how to obtain copies,

contact the Bureau of Land Management, Alaska State Office, 701 C Street, Box 13, Anchorage, Alaska 99513.

Any party claiming a property interest in lands affected by this decision, an agency of the Federal Government, or regional corporation may appeal the decision to the Interior Board of Land Appeals, Office of Hearing and Appeals, in accordance with the regulations in Title 43 Code of Federal Regulations Part 4, Subpart E, as revised.

If an appeal is taken, the notice of appeal must be filed in the Bureau of Land Management, Alaska State Office, Division of ANCSA and State Conveyances (960), 701 C Street, Box 13, Anchorage, Alaska 99513. Do not send the appeal directly to the Interior Board of Land Appeals. The appeal and copies of pertinent case files will be sent to the Board from this office. A copy of the appeal must be served upon the Regional Solicitor, 701 C Street, Box 34, Anchorage, Alaska 99513.

The time limits for filing an appeal are:

1. Parties receiving service of the decision by personal service or certified mail, return receipt requested, shall have thirty days from the receipt of the decision to file an appeal.

2. Unknown parties, parties unable to be located after reasonable efforts have been expended to locate, parties who failed or refused to sign their return receipt, and parties who received a copy of the decision by regular mail which is not certified, return receipt requested, shall have until July 11, 1983 to file an appeal.

Any party known or unknown who is adversely affected by the decision shall be deemed to have waived those rights which were adversely affected unless an appeal is timely filed with the Bureau of Land Management, Alaska State Office, Division of ANCSA and State Conveyances.

To avoid summary dismissal of the appeal, there must be strict compliance with the regulations governing such appeal. Further information on the manner of and requirements for filing an appeal may be obtained from the Bureau of Land Management, 701 C Street, Box 13, Anchorage, Alaska 99513.

If an appeal is taken, the party to be served with a copy of the notice of appeal is: Chugach Natives, Inc., 903 West Northern Lights Boulevard, Suite 201, Anchorage, Alaska 99503.

Linda A. Brooks,

Acting Section Chief, Branch of ANCSA Adjudication.

BILLING CODE 4310-84-M

[AA-8096-4 and AA-12432]

Alaska Native Claims Selections

In accordance with Departmental regulation 43 CFR 2650.7(d), notice is hereby given that a decision to issue conveyance under the provisions of section 14 of the Alaska Native Claims Settlement Act of December 18, 1971 (43 U.S.C. 1601, 1613 (1976) (ANCSA)) and sections 1429 and 1430 of the Alaska National Interest Lands Conservation Act of December 2, 1980 (94 Stat. 2371, 2530 and 2531), will be issued to Chugach Natives, Inc., for approximately 26,583 acres. The lands involved are within:

Copper River Meridian, Alaska

T. 16 S., R. 9 E. (Surveyed)
T. 17 S., R. 9 E. (Partially Surveyed)

The decision to issue conveyance will be published once a week, for four (4) consecutive weeks, in the CORDOVA TIMES upon issuance of the decision. For information on how to obtain copies, contact the Bureau of Land Management, Alaska State Office, 701 C Street, Box 13, Anchorage, Alaska 99513.

Any party claiming a property interest in lands affected by this decision, an agency of the Federal Government, or regional corporation may appeal the decision to the Interior Board of Land Appeals, Office of Hearings and Appeals, in accordance with the regulations in Title 43 Code of Federal Regulations, Part 4, Subpart E, as revised.

If an appeal is taken, the notice of appeal must be filed in the Bureau of Land Management, Alaska State Office, Division of ANCSA and State Conveyances (960), 701 C Street, Box 13, Anchorage, Alaska 99513. Do not send the appeal directly to the Interior Board of Land Appeals. The appeal and copies of pertinent case files will be sent to the Board from this office. A copy of the appeal must be served upon the Regional Solicitor, 701 C Street, Box 34, Anchorage, Alaska 99513.

The time limits for filing an appeal are:

1. Parties receiving service of the decision by personal service or certified mail, return receipt requested, shall have thirty days from the receipt of the decision to file an appeal.

2. Unknown parties, parties unable to be located after reasonable efforts have been expended to locate, parties who failed or refused to sign their return receipt, and parties who received a copy of the decision by regular mail which is not certified, return receipt requested, shall have until July 11, 1983 to file an appeal.

Any party known or unknown who is adversely affected by the decision shall be deemed to have waived those rights which were adversely affected unless an appeal is timely filed with the Bureau of Land Management, Alaska State Office, Division of ANCSA and State Conveyances.

To avoid summary dismissal of the appeal, there must be strict compliance with the regulations governing such appeal. Further information on the manner of and requirements for filing an appeal may be obtained from the Bureau of Land Management, Alaska State Office, 701 C Street, Box 13, Anchorage, Alaska 99513.

If an appeal is taken, the party to be served with a copy of the notice of appeal is: Chugach Natives, Inc., 903 West Northern Lights Boulevard, Suite 201, Anchorage, Alaska 99503.

Linda A. Brooks,

Acting Section Chief, Branch of ANCSA Adjudication.

Colorado; Order Opening Lands Withdrawn for Power Projects 347 and 418

Correction

In FR Doc. FR 83-13421 beginning on page 22645 in the issue of Thursday, May 19, 1983, make the following corrections.

1. On page 22645, second column, under **"Project No. 347"**, the line reading *"Sixth Principal Meridian"* should have read "1. *Sixth Principal Meridian*"; and the line reading *"Roosevelt National Forest"* should have read "2. *Roosevelt National Forest*".

2. On the same page, third column, under **"Project No. 418"**, the line reading *"Roosevelt National Forest"* should have read "3. *Roosevelt National Forest*".

BILLING CODE 1505-01-M

Competitive Coal Leasing—Fort Union Federal Coal Production Region; Qualified Surface Owner Consents

AGENCY: Bureau of Land Management, Interior.

ACTION: Filing deadline for qualified surface owner consents, Fort Union Federal Coal Production Region.

SUMMARY: The Federal coal management regulations at 43 CFR Part 3427 require that a deadline be established for the submission of

qualified surface owner consents prior to Federal coal lease sales for lands to which the consents apply. In accordance with this requirement, the public is hereby notified that the deadline for filing consents for lands recommended for competitive coal lease sale in the Fort Union Federal Coal Production Region on July 28, 1983, or April 25, 1984, is July 1, 1983.

DATE: Consents must be filed on or before July 1, 1983.

ADDRESS: Consent must be filed with the Bureau of Land Management, Montana State Office, 222 N. 32nd Street, P.O. Box 30157, Billings, Montana 59107.

FOR FURTHER INFORMATION CONTACT: Jeanette Bejot or Lloyd Emmons, Montana State Office at the address listed above—(406) 657–6291.

SUPPLEMENTARY INFORMATION: The Federal coal management regulations at 43 CFR Part 3427 require qualified surface owner consents for surface-minable split estate lands offered for competitive coal lease sale to be filed with the appropriate Bureau of Land Management State Office prior to the lease sale for the lands to which the consents apply.

The Bureau of Land Management, through its regional coal team, has recommended to the Secretary of the Interior that the following tracts in the Fort Union Coal Production Region be offered for competitive lease sale:

Antelope	Renner
North Beulah	Sakakawea
Bloomfield	Schoolhouse
Center	Truax
Dunn Center	Underwood
Garrison	Werner
Glenharold	

Qualified surface owner consents for lands subject to consent within the above tracts must be filed with the Bureau of Land Management, Montana State Office on or before July 1, 1983, to receive consideration. Any required consents filed after July 1, 1983, will be accepted but will not be acted upon before the lease sale. Any tracts containing lands covered by consents filed after the deadline will be withdrawn from the lease sale.

Further information on the tracts to be offered for lease sale in the Fort Union Region or on the surface owner consent requirements on those tracts may be obtained from the Montana State Office at the address listed above.

Dated: June 3, 1983.

Kannon Richards,

Acting State Director.

BILLING CODE 4310-84-M

Arizona; Cerbat-Black Mountain Planning Area and Phoenix Resource Area Wilderness Environmental Impact Statement

AGENCY: Bureau of Land Management (BLM), Interior.

ACTION: Notice of Intent to Prepare an Environmental Impact Statement (EIS) for Cerbat-Black Mountain Planning Area, Kingman Resource Area, and for Phoenix Resource Area. These areas are part of the Phoenix District, Arizona and lie in Mohave, Yavapai, Maricopa, Pinal, and Pima Counties, Arizona.

SUPPLEMENTARY INFORMATION: The Federal Land Policy and Management Act of 1976 (FLPMA) requires that the Secretary of the Interior review those public lands with roadless areas of 5,000 acres or more having wilderness characteristics and determines the suitability or nonsuitability of each such area for wilderness preservation. The Bureau of Land Management's Phoenix District will prepare an environmental impact statement for the wilderness study areas in the Cerbat-Black Mountain Planning Area and the Phoenix Resource Area. The draft statement will be made available to the public for review in the spring of 1984.

For information concerning the wilderness EIS, contact Bill Carter, Environmental Impact Statement Team Leader, Division of Planning and Environmental Assistance, Phoenix District Office, 2933 West Indian School Road, Phoenix, Arizona 85017, Telephone (602) 241–2852.

Dated: June 2, 1983.

BILLING CODE 4310-84-M

Arizona; Lower Gila South Planning Area Resource Management Plan; Environmental Impact Statement

AGENCY: Bureau of Land Management (BLM), Interior.

ACTION: Notice of Intent to Prepare an Environmental Impact Statement on the Resource Management Plan (RMP) for the Lower Gila South Planning Area of the Phoenix District, Arizona. The area is in Maricopa Pinal, Pima, Yuma, and La Paz Counties, Arizona.

SUPPLEMENTARY INFORMATION: The Federal Land Policy and Management Act of 1976 (FLPMA) states that the Secretary of the Interior shall develop and maintain land use plans for the use of public lands. The RMP addresses the issues identified through public workshops and meetings. The issues identified are wilderness study proposals, rangeland livestock use, land tenure adjustments (sales or exchanges of public lands), and identification of utility corridors. Alternatives to be analyzed have been developed, and an environmental impact statment will be prepared analyzing the impacts of the proposal and alternatives.

For information concerning the environmental impact statement, contact Bill Carter, Environmental Impact Statement Team Leader, Division of Planning and Environmental Assistance, Phoenix District Office, 2933 West Indian School Road, Phoenix, Arizona 85017, Telephone (602) 241–2852.

Dated: June 2, 1983.

Arizona; Exchange of Mineral Estates

May 31, 1983.

1. In an exchange made under the provisions of Section 206 of the Federal Land Policy and Management Act of 1976, 90 Stat. 2756; 43 U.S.C. 1716, the mineral estate in the following described State-owned land has been transferred to the State of Arizona;

Gila and Salt River Meridian, Arizona

T. 26 N., R. 4 E.
Section 14, NW¼, S½.
T. 26 N. R. 5 E.,
Section 8, All;
Section 20, All.
T. 27 N., R. 4 E.,
Section 14, All;
Section 30, lots 1–4, E½W½, E½,
Comprising 3040.28 acres.

2. The mineral estate in the following described land has been reconveyed to the United States:

T. 25 N., R. 8 E.,
Section 3, lots 1–4, S½N½, S½;
Section 10, All;
Section 11, All;
Section 14, All;
Section 15, N½, N½SW¼, S½SE¼,
Comprising 3,040.80 acres.

3. Of the lands described in paragraph 2, 2871.81 acres are situated within the boundaries of the Wupatki National Monument subject to jurisdiction of the National Park Service. The following described lands are under the jurisdiction of the Bureau of Land Management:

T. 25 N., R. 8 E.,

Section 3, U.S. 89 right-of-way and the SW¼SW¼;
Section 10, that portion lying west of the east right-of-way boundary of U.S. 89;
Section 15, that portion lying west of the east right-of-way boundary of U.S. 89.
Comprising approximately 168.99 acres.

None of the reconveyed mineral estate will be subject to appropriation under the mining or mineral leasing laws unless and until an appropriate opening order is issued by the Bureau of Land Management authorized officer.

The purpose of this notice is to inform the public and interested State and local governmental officials of the exchange of mineral interests.

Mario L. Lopez,

Chief, Branch of Lands and Minerals Operations.

BILLING CODE 4310-84-M

[Realty Action M59023—Competitive]

Competitive Sale of Public Lands; Mountrail County, North Dakota

SUMMARY: The following described lands have been examined and identified as suitable for disposal by sale under Section 203 of the Federal Land Policy and Management Act of 1976 (90 Stat. 2750; 43 U.S.C. 1713), at no less than the appraised fair market value of $5,175.00.

5th Principal Meridan, North Dakota

T. 155 N., R. 91 W., Section 5: Lot 3.
Containing 39.83 acres.

The land will be offered for sale by a combination of sealed and oral bidding. Sale date is August 22, 1983 at 11:00 a.m. in the Mountrail County Courthouse, Stanley, North Dakota. Sealed bids will be considered only if received at the place of sale prior to 11:00 a.m., August 22, 1983.

This tract is located 2½ miles south of Stanley, North Dakota. There is legal access. Legal access is along the north side of Section 5 from a gravel road. There is no established road on this section line. This land is being sold because it is a small isolated tract without legal access. It does not contain significant resource values that would justify retention. It is a great distance from the District Office. Proper management would be difficult and uneconomical. It is not suitable for management by another federal agency.

The proposed action was discussed with the local and state government officials. It was also discussed with the adjacent landowner.

The proposed sale is consistent with the Bureau's planning system. Mountrail County government officials have been notified of the sale. The transfer of the tract into private ownership will benefit the public interest and provide for more efficient land management.

Terms and Conditions of the Sale are:

1. All minerals will be reserved to the United States together with the right to explore, prospect for, mine and remove same under applicable law and regulations, (43 U.S.C. 1719.)

2. A right-of-way for ditches or canals will be reserved to the United States in accordance with 43 U.S.C. 945.

3. The sale of these lands will be subject to all valid and existing rights and reservations of record.

DATES: For a period of 45 days from the date of this notice, interested parties may submit comments to the District Manager, Bureau of Land Management, 204 Sims Street, P.O. Box 1229, Dickinson, North Dakota.

Any adverse comments will be evaluated by the BLM Montana State Director, who may vacate or modify this realty action and issue a final determination of the Department of the Interior. In the absence of any action by the State Director, this realty action will become a final determination of the Department of the Interior.

FOR FURTHER INFORMATION CONTACT: Information related to this sale, including the environmental assessment and record of public discussions, is available for review at the Dickinson District Office, 204 Sims Street, Dickinson, North Dakota.

SUPPLEMENTARY INFORMATION: The bidder must be a citizen of the United States or in the case of a corporation subject to the laws of any state or the United States. A state, state instrumentality or political subdivision submitting a bid must be authorized to hold property. Any other entity submitting a bid must be legally capable of holding and conveying lands or interests therein under the laws of the State of North Dakota. Bids must be made by the principal or his agent.

Bid Standards

No bid will be accepted for less than the appraised value of $5,175.00.

Method of Bidding

The land will be sold by a combination of sealed and oral bids. Each bid must be accompanied by a certified check, postal money order, bank draft, or cashiers check made payable to the Bureau of Land Management for not less than one-fifth of the amount bid. The sealed bid envelope must be marked in the lower left-hand corner as follows:

Public land sale in T155N, R91W, Section 5.
Date: August 22, 1983.

If two or more envelopes containing valid bids of the same amount are received and not subsequently raised by an oral bid, the determination of which is to be considered the highest bid shall be by drawing. The drawing, if required, shall be held immediately following the opening of the sealed bids if no oral bid is received to raise the tie bid. The highest qualifying bid shall then be publicly declared.

Competitive Bidding

This is a competitive bid sale. The land will be offered to the highest qualified bidder. The designated bidder must submit a bid of at least the fair market value prior to the sale date in order to be considered under the modified bidding provisions. If he meets the highest bid, the land will be sold to him, and the other bid will be returned. His refusal to meet the highest bid or to submit any bid at all prior to the sale date shall constitute a waiver of such bidding provisions.

Final Details

Once a high bid is accepted, the successful bidder shall submit the remainder of the full bid price prior to the expiration of 30 days from the date of the sale. Failure to submit the required amount within the allotted time will result in cancellation of the sale and the deposit will be forfeited. All bids will either be returned, accepted or rejected within 60 days of the sale date.

Dated: June 1, 1983.

Kenneth H. Burke,

Acting District Manager.

Illinois; Realty Action Competitive Sale of Public Land in Ogle County

The following described islands have been identified as suitable for disposal by sale under the provisions of Section 203 of the Federal Land Policy and Management Act of 1976 (90 Stat. 2750; 43 U.S.C. 1713), at no less than the appraised fair market value:

FOURTH PRINCIPAL MERIDIAN, ILLINOIS

Parcel	Legal description	Acreage	Appraised value
	T. 25 N., R. 11 E		
A	Sec. 11: Lot 2	3.15	$3,400
B	Sec. 14: Lot 1 and Sec. 15: Lot 1.	5.73	4,300
C	Sec. 15: Lot 2	[illegible]	[illegible]000
D	Sec. 20: Lot 1 and Sec. 29: Lot 1.	5.54	4,200
E	Sec. 29: Lot 2	.53	200
F	Sec. 29: Lot 3	.23	200
G	Sec. 31: Lot 1	6.37	4,800
H	Sec. 31: Lot 2	.43	500
I	Sec. 31: Lot 3	1.64	1,200
J	Sec. 31: Lot 4	[illegible]6	500

The land will be sold by competitive bidding.

Bidding Information and Instructions:

The Federal Land Policy and Management Act (90 Stat. 2757; 43 U.S.C. 1717) and regulations promulgated thereunder require that bidders be citizens of the United States, 18 years of age or over, or, in the case of a corporation, be subject to the laws of any state of the United States. Bids may be made by a principal (the one desiring to purchase the land) or his duly authorized agent. Agents will be required to submit proof of power of attorney.

Method of Bidding

Each bid must be for all the land in a specified parcel. Sealed bids must be submitted to the Eastern States Office, Bureau of Land Management, 350 South Pickett Street, Alexandria, Virginia 22304. Such bids will only be considered if received at the above address prior to 1:00 p.m., August 26, 1983. No oral bids will be accepted. Sealed bids, accompanied by a certified check, postal money order, bank draft, or cashiers check made payable to the Bureau of Land Management for not less than one fifth of the amount of the bid must be in a separate sealed envelope, within the transmittal envelope. The sealed envelopes must be marked in the lower lefthand corner, "Sealed Bid, Parcel ——, Public Land Sale ES 32194." All sealed bids will be opened at 1:00 p.m. on August 26, 1983.

The successful high bidder will be required to submit the remainder of the payment by cash, certified check, bank draft, money order, or combination thereof, within thrity (30) days after receipt of the decision accepting the highest bid. If final payment is not received with the specified 30 day period, the bid will be rejected, the deposit forfeited, and the parcel offered to the next highest bidder. All unsuccessful sealed bids will be returned within 30 days of the sale.

A patent for the land, when issued, will contain the following reservations;

1. All minerals will be reserved to the United States. Said mineral reservation will include the right to explore, prospect for, mine, and remove same under applicable law and regulations promulgated thereunder, as prescribed by the Secretary of the Interior.

2. A restriction which consitutues a covenant running with the land, that the subject parcels, all of which are situated within a floodplain, are subject to any use restrictions as set forth in State, county, or local laws or regulations relating to floodplain development as well as any restriction contained in the Ogle County Zoning Regulations, Article 6, Section 6-103B (1-4); which essentially calls for low intensity agricultural or recreational use. This restriction is included pursuant to the authority in section 3(d) of Executive Order 11988 of May 24, 1977, and section 208 of the Federal Land Policy and Management Act of 1976 (90 Stat. 2757; 43 U.S.C. 1718).

Publication of this Notice will segregate the lands from all appropriations under the public land laws, but not the mineral leasing laws. This segregation will teminate upon the issuance of apatent, or 2 years from the date of this Notice, or upon publication of a notice of termination.

Dtailed information concerning the sale can be obtained by contacting Robert Gausman at (703) 235-2855, or at the following address. For a period of 45 days from the date of this Notice, interested parties may submit comments to the Eastern States Director, Bureau of Land Management, 350 South Pickett Street, Alexandria, Virginia 22304. Any adverse comments will be evaluated by the Eastern States Director, who may vacate or modify this Notice of Realty Action and issue a final determination. In the absence of any action by the Eastern States Director, this realty action will become the final determination of the Department of the Interior.

G. Curtis Jones, Jr.,

Eastern States Director.

BILLING CODE 4310-84-M

Intent To Prepare a Management Framework Plan Amendment; Las Cruces District, New Mexico

AGENCY: Bureau of Land Management, Las Cruces District, New Mexico.

ACTION: Notice of Intent To Prepare a Management Framework Plan Amendment/Environmental Assessment (MFPA/EA) and Availability of Issues and Planning Criteria.

Description of Proposed Planning Action

The U.S. Department of the Interior, Bureau of Land Management, Las Cruces District, New Mexico, will prepare a Management Framework Plan Amendment including an Environmental Assessment which proposes to withdraw the public land and Federal subsurface mineral estate in the New Mexico Department of Game and Fish Redrock Wildlife Experimental Area from all forms of appropriation under the public land laws including the mining laws but not including the mineral leasing laws. The purpose of the proposed action is to protect breeding habitat of the desert bighorn sheep.

Identification of the Geographic Area To Be Planned

The Redrock Wildlife experimental Area is located in T. 18 S., R. 18 W.,

NMPM, Grant Country, New Mexico, and encompasses 312.16 acres of public land and 712.16 acres of Federal subsurface mineral estate.

The General Types of Issues Anticipated

The withdrawal of the Experimental Area is the only issue to be addressed.

Criteria To Guide Development of the Planning Action

As new information becomes available during the planning process or from public participation, additional criteria may be developed for future guidance of this planning effort. The more detailed planning criteria are available for public review and comment at the Las Cruces District Office.

The Disciplines To Be Represented on the Interdisciplinary Team

The MFPA/EA will be prepared by an interdisciplinary team consisting of an environmental coordinator, a writer-editor, a geologist, a realty specialist, a wildlife biologist, and an archaeologist.

The Kind and Extent of Public Participation Activities To Be Provided

Public comment generally favoring protection of the area for propagation of game animals was expressed during preparation of the Gila MFP. This notice and 3press releases to various newspapers in New Mexico and neighboring Arizona and Texas give interested parties 30 days in which to submit comments to the below signed official.

The Times, Dates, and Locations Scheduled for Public Meetings

Depending on the nature and degree of interest expressed during the 30 days following publication of this notice, meetings may be scheduled or additional comments may be solicited.

The Name, Title, Address, and Telephone Number of Responsible BLM Official

Ed Webb, Environmental Coordinator, Las Cruces District Office, P.O. Box 1420, Las Cruces, NM 88004, Telephone: (505) 524–8551; FTS 571–8312

The Location and Availability of Document Relevant to the Planning Process

Pertinent information is available at the BLM Office at 317 North Main Street, Las Cruces, New Mexico 88004 and are subject to public review on weekdays from 7:45 a.m. to 4:30 p.m.

Dated: June 2, 1983.

Daniel C. B. Rathbun,

District Manager.

[FR Doc. 83–15567 Filed 6–9–83; 8:45 am]

BILLING CODE 4310–84–M

[Realty Action M58024—Modified Competitive]

Modified Competitive Sale of Public Lands; Mountrail County, North Dakota

SUMMARY: The following described lands have been examined and identified as suitable for disposal by sale under Section 203 of the Federal Land Policy and Management Act of 1976 (90 Stat. 2750; 43 U.S.C. 1713): at no less than the appraised fair market value $4,800.00.

5th Principal Meridan, North Dakota

T157N, R91W, Section 13: SE¼NW¼

Containing 40.00 acres.

The land will be offered for sale by a combination of sealed and oral bidding. Sale date is August 22, 1983 at 11:00 a.m. in the Mountrail County Courthouse, Stanley, North Dakota. Sealed bids will be considered only if received at the place of sale prior to 11:00 a.m., August 22, 1983.

This tract is located about 8 miles north of Stanley, North Dakota. There is no legal access. Physical access is over adjacent private land. This land is being sold because it is a small isolated tract without legal access. It does not contain significant resource values that would justify retention. It is a great distance from the District Office. Proper management would be difficult and uneconomical. It is not suitable for management by another federal agency.

The proposed action was discussed with the local and state government officials. It was also discussed with the adjacent landowner.

The proposed sale is consistent with the Bureau's planning system. Mountrail County government officials have been notified of the sale. The transfer of the tract into private ownership will benefit the public interest and provide for more efficient land management.

Terms and Conditions of the Sale are:

1. All minerals will be reserved to the United States together with the right to explore, prospect for, mine and remove same under applicable law and regulations. (43 U.S.C. 1719)

2. A right-of-way for ditches or canals will be reserved to the United States in accordance with 43 U.S.C. 945.

3. The sale of these lands will be subject to all valid and existing rights and reservations of record.

DATES: For a period of 45 days from the date of this notice, interested parties may submit comments to the District Manager, Bureau of Land Management, 204 Sims Street, P.O. Box 1229, Dickinson, North Dakota.

Any adverse comments will be evaluated by the BLM Montana State Director, who may vacate or modify this realty action and issue a final determination of the Department of Interior. In the absence of any action by the State Director, this realty action will become a final determination of the Department of the Interior.

FOR FURTHER INFORMATION CONTACT: Information related to this sale, including the environmental assessment and record of public discussions is available for review at the Dickinson District Office, 204 Sims Street, Dickinson, North Dakota.

SUPPLEMENTARY INFORMATION: The bidder must be a citizen of the United States or in the case of a corporation subject to the laws of any state or the United States. A state, state instrumentality or political subdivision submitting a bid must be authorized to hold property. Any other entity submitting a bid must be legally capable of holding and conveying lands or interests therein under the laws of the State of North Dakota. Bids must be made by the principal or his agent.

Bid Standards

No bid will be accepted for less than the appraised value of $4,800.00.

Method of Bidding

The land will be sold by a combination of sealed and oral bids. Each bid must be accompanied by a certified check, postal money order, bank draft, or cashiers check made payable to the Bureau of Land Management for not less than one-fifth of the amount bid. The sealed bid envelope must be marked in the lower left-hand corner as follows:

Public land sale in T157N, R91W, Section 13.

Dated: August 22, 1983.

If two or more envelopes contain valid bids of the same amount are received and not subsequently raised by an oral bid, the determination of which is to be considered the highest bid shall be by drawing. The drawing, if required, shall be held immediately following the opening of the sealed bids if no oral bid is received to raise the tie bid. The highest qualifying bid shall then be publicly declared.

Modified Bidding

For a period of 30 days following the date of sale, Laverne and Murray Eliason, the designated bidder, will be offered the right to meet the highest qualifying bid. The designated bidder must submit a bid of at least the fair market value prior to the sale date in order to be considered under the modified bidding provisions. If he meets the highest bid, the land will be sold to him, and the order bid will be returned. His refusal to meet the highest bid or to submit any bid at all prior to the sale date shall constitute a waiver of such bidding provisions.

Final Details

Once a high bid is accepted, the successful bidder shall submit the remainder of the full bid price prior to the expiration of 30 days for the date of the sale. Failure to submit the required amount within the alloted time will result in cancellation of the sale and the deposit will be forfeited. All bids will either be returned, accepted or rejected within 60 days of the sale date.

Dated: June 1, 1983.

Kenneth H. Burke,

Acting District Manager.

BILLING CODE 4310-84-M

[U-50120]

Issuance of Sale Conveyance Document; Uintah County, Utah

1. The United States issued a land sale document to Deseret Generation and Transmission Cooperation on May 26, 1983, Patent No. 43-83-0006 for the following described lands (surface estate only) pursuant to Section 203 of the Act of October 21, 1976 (90 Stat. 2750; 43 U.S.C. 1713):

Salt Lake Meridian, Utah

T. 8 S., R. 23 E.,
Sec. 23, S½S½S½NE¼, SE¼;
Sec. 24, S½SW¼SW¼NE¼, S½S½SE¼NW¼, SW¼, W½W½SE¼;
Sec. 25, W½W½NE¼, W½, W½W½SE¼;
Sec. 26, E½;
Sec. 35, E½.
T. 9 S., R. 23 E.,
Sec. 1, lots 3, 4.

Containing 1,507.15 acres.

2. The lands were conveyed to the Deseret Generation and Transmission Cooperation for a coal-fired electrical generation plant. The public interest was well served through completion of this direct sale.

3. The value of the Federal land was appraised at $151,000 and payment was received for this amount to the United States.

Dated: June 2, 1983.

Darrell C. Barnes,

Chief, Lands and Mining Claims Adjudication Section.

[FR Doc. 83-15588 Filed 6-9-83; 8:45 am]

BILLING CODE 4310-84-M

[M-57793]

Montana; Exchange of Public and Private Lands

AGENCY: Bureau of Land Management, Lewistown District Office, Interior.

ACTION: Notice of realty action M-57793, exchange of public and private lands in Carbon and Phillips Counties, Montana.

SUMMARY: The following described lands have been determined to be suitable for disposal by exchange under Section 206 of the Federal Land Policy and Management Act of 1976, 43 U.S.C. 1716:

Principal Meridian, Montana

T. 28 N., R. 31 E.
Sec. 25: N½
T. 28 N., R. 32 E.
Sec. 8: SE¼NE¼
T. 29 N., R. 28 E.
Sec. 3: Lots 3 & 4, S½NW¼
T. 30 N., R. 28 E.
Sec. 10: NE¼
T. 31 N., R. 29 E.
Sec. 10: E½

Containing 1,011.20 acres of public land.

In exchange for these lands, the United States Government will acquire the surface estate in the following described lands:

Principal Meridian, Montana

T. 8 S., R. 26 E.
Sections 5, 8, 9: Parts within Homestead Entry Survey #169

Containing 159.96 acres.

DATES: For a period of 45 days from the date of first publication of this notice, interested parties may submit comments to the District Manager, Bureau of Land Management, Airport Road, Lewistown, Montana 59457. Any adverse comments will be evaluated by the State Director who may vacate or modify this realty action and issue a final determination. In the absence of any action by the State Director, this realty action will become the final determination of this Department.

FOR FURTHER INFORMATION CONTACT: Information related to this exchange, including the environmental assessment and land report, is available for review at the Lewistown District Office, Airport Road, Lewistown, Montana 59457.

SUPPLEMENTARY INFORMATION: The purpose of this exchange is to acquire a parcel of privately-owned land within the Custer National Forest. This land will be transferred to the Forest Service to support a multiple use Federal program and the economy. The multiple use values include, but are not limited to water quality, recreation, wildlife habitat and cultural resources.

The exchange is consistent with the Bureau's planning for the lands inolved and has been discussed with State and local officials. The public interest will be well served by making the exchange. The publication of this notice segregates the public lands described above from settlement, sale, location, and entry under the public land laws, including the mining laws, but not from exchange pursuant to Section 206 of the Federal Land Policy and Management Act of 1976.

The exchange will be made subject to:

1. A reservation to the United States of a right-of-way for ditches or canals constructed by the authority of the United States in accordance with 43 U.S.C. 945, for lands being transferred out of Federal ownership.

2. The reservation to the United States of all minerals in the lands being transferred out of Federal ownership.

3. All valid existing rights (e.g. rights-of-way, easements, and leases of record).

4. Value equalization by cash payment or acreage adjustment.

5. The exchange must meet the requirements of 43 CFR 4110.4-2(b).

Dated: June 1, 1983.

Glenn W. Freeman,

District Manager.

[FR Doc. 83-15589 Filed 6-9-83; 8:45 am]

BILLING CODE 4310-84-M

Montana Off-Road Vehicle Designations

AGENCY: Bureau of Land Management, Interior.

ACTION: Notice of off-road vehicle designation decision.

Decision: Notice is hereby given that an emergency off-road vehicle travel closure is being implemented pursuant to 43 CFR 8341.2 at the Holter Lake Recreation Site.

The specific site affected is located in Lots 6 and 7, Section 4, T. 14 N., R. 3 W., Principal Meridian, Montana. The closure applies to the entire 80 acre site with the exception of the county road and developed campground road system. It is being implemented in order to protect visual and recreation

resources and prevent erosion and safety hazards on steep slopes due to the use of trail bikes and four-wheel-drive vehicles.

This designation becomes effective immediately and will remain in effect until rescinded or modified by the authorized officer.

FOR FURTHER INFORMATION CONTACT: District Manager, Butte District Office, P.O. Box 3388, 106 North Parkmont, Butte, Montana 59702, (406) 494–5059; Area Manager, Headwaters Resource Area, P.O. Box 3388, 106 North Parkmont, Butte, Montana 59702, (406) 494–5059.

Dated: June 1, 1983.

Kannon Richards,

Acting State Director.

[FR Doc. 83–15586 Filed 6–9–83: 8:45 am]

BILLING CODE 4310–84–M

Wyoming and Montana, Casper District Office, Wyoming; Intent to Prepare a Regional Environmental Impact Statement (EIS) for Proposed Leasing of Federal Coal in the Powder River Coal Region

AGENCY: Bureau of Land Management, Interior.

ACTION: Notice of Intent to Prepare an EIS.

SUMMARY: This notice advises the public that the Bureau of Land Management (BLM) intends to prepare an EIS addressing coal leasing in the Powder River Basin Coal Region in 1984. Public involvement to determine the scope and significant issues to be analyzed is invited. Public participation was sought in public scoping meetings in Gillette, and Sheridan, Wyoming, and Ashland, Montana during May. In response to public request an additional meeting will be held in Hardin, Montana on July 12, 1983.

FOR FURTHER INFORMATION CONTACT: Charles F. Wilkie, Special Projects Team Leader, Casper District Office, Bureau of Land Management, 951 Rancho Road, Casper, Wyoming 82601, (307) 261–5598.

SUPPLEMENTARY INFORMATION: Notice is hereby given in accordance with the National Environmental Policy Act and the Council on Environmental Quality regulations (43 CFR 1508.22) that the Bureau of Land Management (BLM) will prepare an EIS to address potential effects of new competitive coal leasing in the Powder River Region of Wyoming and Montana.

This proposed leasing is needed to meet a Department of the Interior Federal coal leasing level, in accordance with the Federal Coal Management Program as announced by the Secretary of the Interior (43 CFR Part 3400).

Potential lease tracts have been delineated from land found acceptable for further consideration for coal development during BLM land-use planning. The Casper District of BLM identified acceptable areas for Wyoming in supplements and amendments to the Eastern Powder River Basin Management Framework Plans for the Western Powder River, Recluse, Gillette and Highlight review areas in Sheridan, Johnson, and Campbell counties. The U.S. Forest Service (USFS) (Supervisor's Office) applied the unsuitability criteria and identified acceptable areas on the Thunder Basin National Grasslands in southern Campbell County. The Miles City District BLM identified acceptable areas in Montana in updates of the South Rosebud, Coalwood, and Decker-Birney Management Framework Plans covering parts of Powder River, Big Horn and Rosebud counties.

Preparation of the EIS is scheduled to begin in May 1983. A draft EIS should be available for public review and comment in December 1983. A final EIS is to be filed with the Environmental Protection Agency in April 1984. The Secretary of the Interior is tentatively scheduled to make the leasing decision in June 1984. A lease sale is scheduled for August 1984.

The proposed action is the leasing of a combination of tracts within the Powder River Region to meet a regional leasing level. Alternatives to the proposed action include leasing different combinations of tracts and no additional Federal coal leasing (No Action). Prior to the preparation of the EIS, the tracts identified in accordance with the Federal coal management regulations (43 CFR 3420.4) will be ranked, selected and scheduled by the Powder River Regional Coal Team.

Public involvement is invited to determine the scope and significant issues to be analyzed in the EIS. Public participation will be sought by direct contact and mailings to interested and affected parties, announcements in local media, and review of the EIS and decision documents.

The additional public scoping meeting will be held in the County Commissioner's room of the County Building in Hardin, Montana on July 12, 1983 at 7:00 p.m. Notice of date, time and location will be published in local newspapers and will be announced at the Regional Coal Team meeting in Billings, Montana on June 21, 1983.

Any individual company, group or agency who wishes to be included in the mailing list for notification to submit information that would be useful in preparing the EIS, or to provide comments and suggestions should contact the BLM District Manager, Casper District Office, 951 Rancho Road, Casper, Wyoming 82601. Telephone inquiries should be directed to Charles F. Wilkie, EIS Team Leader at the following numbers: (307) 261–5598 (commercial phone) or 328–5598 (Federal Telecommunications System).

Nyles L. Humphrey,

Acting State Director.

BILLING CODE 4310–84–M

[Colorado 36378]

Colorado; Realty Action Non-Competitive Sale of Public Lands in Grand County

The following described land has been examined and identified as suitable for disposal by sale under Section 203 of the Federal Land Policy and Management Act of 1976 (90 Stat. 2750, 43 U.S.C. 1713), at no less than the appraised fair market value ($5,500).

Sixth Principal Meridian, Colorado

T. 3 N., R. 77 W.,
Section 20: N½NW¼NW¼NE¼SW¼

The tract described contains approximately 1.19 acres in Grand County, Colorado.

The sale of this land will be held on approximately the day of August 15, 1983.

The lands are being offered as a direct non-competitive sale to Gerald and Charlene Bourland, owners of an adjoining tract and a a small recreational cabin which occupies the tract of public land proposed for sale. During the summer of 1980, Bureau of Land Management did resurveys in Township 3 North, Range 77 West, of the Sixth Principal Meridian, Colorado. At this time, the cabin owned by Mr. and Mrs. Bourland was found to be on public lands administered by BLM. The unauthorized occupancy was unintentional; the sale will resolve this unauthorized use situation and avoid an undue hardship to the Bourlands.

The cabin is a 14' x 16' primitive log cabin between Colorado State Highway 125 and Willow Creek. The primary existing land use of the area is recreational; centering on the surrounding Arapaho National Forest land. The sale of the 1.19 acre tract would not change the existing use pattern or environmental character of the area.

The parcel meets the disposal criteria outlined in the Federal Land Policy and Management Act and the BLM Kremmling Draft Resource Management

Plan. The Grand County Commissioners have not objected to sale of the land.

The terms and conditions applicable to the sale are:

1. The patent will contain a reservation of a right-of-way for ditches and canals constructed by the authority of the United States in accordance with 43 U.S.C. 945.

2. All mineral rights will be reserved to the United States.

3. The sale of this land will be subject to all valid existing rights; including the right-of-way for Colorado State Highway 125, as approved by Bureau of Land Management decision under Serial No. C–04686.

4. The landowner, to whom title of this land will be transferred, will apply to Grand County for an outright subdivision exemption following the issuance of patent.

Detailed information concerning the sale, including environmental assessment report and land report, is available for review at the Bureau of Land Management, Kremmling Resource Area Office, P.O. Box 68, 1116 Park Avenue, Kremmling, Colorado 80459.

For a period of 45 days from date of this notice, interested parties may submit comments to District Manager, Bureau of Land Management, Craig District Office, 455 Emerson Street, Craig, Colorado 81625.

Dated: June 2, 1983.

Frances E. Noll,

Acting District Manager.

BILLING CODE 4310–84–M

[A–13390]

Arizona National Guard, Florence Target and Military Range; Proposed Modification and Continuance of Withdrawal; Opportunity for Public Hearing

June 1, 1983.

As a result of the review made pursuant to Section 204(1) of the Federal Land Policy and Management Act of 1976, 90 Stat. 2754; 43 U.S.C. 1714, the Bureau of Land Management, Department of the Interior, proposes to continue the subject withdrawal for a period of 20 years rather than for an indefinite term.

The existing withdrawal, made by Executive Order No. 1633 of October 28, 1912, segregates the land from operation of the public land laws, including the mining and mineral leasing laws. It is proposed to modify the withdrawal to open the land to operation of the mineral leasing laws.

No other change in the segregative effect of the withdrawal or use of the land is proposed.

The following described land is included in the proposed modification and continuance:

Gila and Salt River Meridian, Arizona

T. 4 S., R. 9 E.,
- Sec. 1, all;
- Sec. 12, all;
- Sec. 13, N½, N½S½, portions of SE¼
- Sec. 24, portions of W½NE¼, and S½SW¼;
- Sec. 25, N½NW¼.

T. 4 S., R. 10 E.,
- Sec. 4, all;
- Sec. 5, all;
- Sec. 6, all;
- Sec. 7, all;
- Sec. 8, N½, SW¼;
- Sec. 18, lots 1, 2, 3 and 4, E½W½, NE¼;
- Sec. 19, lot 1.

The areas described aggregate 5,710.40 acres in Pinal County.

Notice is hereby given that an opportunity for a public hearing is afforded in connection with the proposed action. All interested persons who desire to be heard on the proposal must submit a written request for a hearing to the undersigned on or before 90 days from date of this publication. Upon determination by the State Director, Bureau of Land Management, that a public hearing will be held, a notice will be published in the **Federal Register** giving the time and place of such hearing. In lieu of or in addition to attendance at a scheduled public hearing, written comments or objections to the proposed action may be filed with the undersigned officer on or before the above designated date.

The authorized officer of the bureau of Land Management will undertake such investigations as are necessary to determine the existing and potential demand for the land and its resources, and will review the withdrawal rejustification to ensure that continuation would be consistent with the statutory objectives of the programs for which the land is dedicated; the area involved is the minimum essential to meet the desired needs; the maximum concurrent utilization of the land is provided for and an agreement is reached on the concurrent management of the land and its resources. The authorized Officer will also prepare a report for consideration by the Secretary of the Interior, the President, and Congress, who will determine whether or not the withdrawal will be continued or modified, and if so, for how long. The final determination will be published in the **Federal Register**. The existing withdrawal will continue until such final determinal is made.

All communications in connection with this proposed action should be addressed to the undersigned officer, Bureau of Land Management, Department of the Interior, 2400 Valley Bank Center, Phoenix, Arizona, 85073.

Mario L. Lopez,

Chief, Branch of Lands and Minerals Operations.

BILLING CODE 4310–84–M

[A–13011]

Arizona National Guard, Papago Facility; Proposed Modification and Continuance of Withdrawal; Opportunity for Public Hearing

June 1, 1983.

As a result of the review made pursuant to Section 204(1) of the Federal Land Policy and Management Act of 1976, 90 Stat. 2754; 43 U.S.C. 1714, the Bureau of Land Management, Department of the Interior, proposes to continue the subject withdrawal for a period of 20 years, rather than for an indefinite term.

The existing withdrawal, made by the Act of Congress of April 7, 1930, segregates the land from operation of the public land laws, including the mining and mineral leasing laws. It is proposed to modify the withdrawal to open the land to operation of the mineral leasing laws.

No other change in the segregative effect of the withdrawal or use of the land is proposed.

The following described land is included in the proposed modification:

Gila and Salt River Meridian, Arizona

T. 1 N., R. 4 E.,
- Sec. 4, N½NW¼;
- Sec. 5, N½NE¼.

T. 2 N., R. 4 E.,
- Sec. 32, SE¼;
- Sec. 33, SW¼.

The areas described aggregate 484.09 acres in Maricopa County.

Notice is hereby given that an opportunity for a public hearing is afforded in connection with the proposed action. All interested persons who desire to be hard on the proposal must submit a written request for a hearing to the undersigned on or before 90 days from date of this publication. Upon determination by the State Director, Bureau of Land Management, that a public hearing will be held, a notice will be published in the **Federal Register** giving the time and place of such hearing. In lieu of or in addition to attendance at a scheduled public hearing, written comments or objections

to the proposed action may be filed with the undersigned officer on or before the above designated date.

The authorized officer of the Bureau of Land Management will undertake such investigations as are necessary to determine the existing and potential demand for the land and its resources, and will review the withdrawal rejustification to ensure that continuation or modification would be consistent with the statutory objectives of the programs for which the land is dedicated; the area involved is the minimum essential to meet the desired needs; the maximum concurrent utilization of the land is provided for and an agreement is reached on the concurrent management of the land and its resources. The authorized officer will also prepare a report for consideration by the Secretary of the Interior, the President, and Congress, who will determine whether or not the withdrawal will be continued or modified, and if so, for how long. The final determination will be published in the **Federal Register**. The existing withdrawal will continue until such final determination is made.

All communications in connection with this proposed action should be addressed to the undersigned officer, Bureau of Land Management, Department of the Interior, 2400 Valley Bank Center, Phoenix, Arizona, 85073.

BILLING CODE 4310-84-M

[A-13386]

Arizona; Douglas National Guard Rifle Range; Proposed Partial Continuance of Withdrawal; Opportunity for Public Hearing

June 1, 1983.

As a result of the review made pursuant to Section 204(1) of the Federal Land Policy and Management Act of 1976, 90 Stat. 2754; 43 U.S.C. 1714, the Bureau of Land Management, Department of the Interior, proposes to continue the subject withdrawal on 625 acres for a period of 20 years, rather than for an indefinite term, and to revoke the withdrawal on 15 acres.

The existing withdrawal, made by Executive Order 2138 of February 19, 1915, segregates the land from operation of the public land laws, including the mining laws but not the mineral leasing laws.

The following described land is included in the proposed continuation:

Gila and Salt River Meridian, Arizona

T. 24 S., R. 28 E.,
Sec. 10, N½, N½SW¼, E½SW¼SW¼, N½NW¼SW¼SW¼, SE¼SW¼, SE¼.

The areas described aggregate 625 acres in Cochise County.

The withdrawal would be revoked on the following land:

T. 24 S., R. 28 E.,
Sec. 10, S½NW¼SW¼SW¼, SW¼SW¼SW¼.

Comprising 15 acres.

Notice is hereby given that an opportunity for a public hearing is afforded in connection with the proposed action. All interested persons who desire to be heard on the proposal must submit a written request for a hearing to the undersigned on or before 90 days from date of this publication. Upon determination by the State Director, Bureau of Land Management, that a public hearing will be held, a notice will be published in the **Federal Register** giving the time and place of such hearing. In lieu of or in addition to attendance at a scheduled public hearing, written comments or objections to the proposed action may be filed with the undersigned officer on or before the above designated date.

The authorized officer of the Bureau of Land Management will undertake such investigations as are necessary to determine the existing and potential demand for the land and its resources, and will review the withdrawal rejustification to ensure that continuation or modification would be consistent with the statutory objectives of the programs for which the land is

dedicated; the area involved is the minimum essential to meet the desired needs; the maximum concurrent utilization of the land is provided for and an agreement is reached on the concurrent management of the land and its resources. The authorized officer will also prepare a report for consideration by the Secretary of the Interior, the President, and Congress, who will determine whether or not the withdrawal will be continued or modified, and if so, for how long. The final determination will be published in the **Federal Register**. The existing withdrawal will continue until such final determination is made.

All communications in connection with this proposed action should be addressed to the undersigned officer, Bureau of Land Management, Department of the Interior, 2400 Valley Bank Center, Phoenix, Arizona 85073.

BILLING CODE 4310-84-M

[N-37242]

Nevada; Notice of Realty Action—Non-Competitive Sale of Public Lands in Elko County, Nevada

June 2, 1983.

The following land has been examined and identified as suitable for disposal by direct sale under Section 203 of the Federal Land Policy and Management Act of 1976 (90 Stat. 2750; 43 U.S.C. 1713) at no less than fair market value:

Mount Diablo Meridan

T. 34 N., R. 55 E.
Sec. 8, W½NW¼NE¼NE¼.

The above-described land comprising five (5) acres, is being offered as a direct sale to Sierra Pacific Power Company. The power company has constructed a substation on the parcel under the authority of right-of-way grant N-34115. However, they prefer to have fee title to the land on which they have made a substantial financial investment.

The sale is consistent with the Bureau's planning system. The land is not needed for any resource program and is not suitable for management by the Bureau or another Federal department or agency. The proposal has been reviewed and approved by the Elko County Planning Commission.

The patent, when issued, will contain the following reservations to the United States:

1. A right-of-way thereon for ditches and canals constructed by the authority of the United States, Act of August 30, 1890, 26 Stat. 391; 43 U.S.C. 945.

2. All mineral deposits in the land so patented, and to it, or persons authorized by it, the right to prospect, mine, and remove such deposits from the same under applicable law and such regulations as the Secretary of the Interior may prescribe.

And will be subject to:

1. Those rights for powerline purposes which have been granted to Nevada Power Company, its successors or assigns, by Permit No. Nev-067051, under the Act of February 15, 1901, 31 Stat. 790, 43 U.S.C. 959.

2. Those rights for powerline purposes which have been granted to Sierra Pacific Power Company, its successors or assigns, by Permit No. N-34115, under the Act of October 21, 1976, 90 Stat. 2776, 43 U.S.C. 1761.

3. Those rights granted by oil and gas lease, N-17935, made under Section 29 of the Act of February 25, 1920, 41 Stat. 437 and the Act of March 4, 1933, 47 Stat. 1570. This patent is issued subject to the right of the prior permittee or lessee to use so much of the surface of said land as is required for oil and gas exploration and development operations, without compensation to the patentee for damages resulting from proper oil and gas operations, for the duration of oil and gas lease, N-17935, and any authorized extension of that lease. Upon termination or relinquishment of said oil and gas lease, this reservation shall terminate.

4. An easement 30 feet in width along the south boundary for road and public utilities purposes to insure continued ingress and egress to adjacent lands.

Detailed information concerning the sale is available for review at the Elko District Office, Bureau of Land Management, 2002 Idaho Street, Elko, Nevada 89801. For a period of 45 days from the date of publication in the **Federal Register**, interested parties may submit comments to the State Director at P.O. Box 12000, Reno, Nevada 89520. Any adverse comments will be evaluated by the State Director, who may vacate or modify this realty action and issue a final determination. If no action is taken by the State Director, this realty action will become a final determination of the Department of the Interior.

Wm. J. Malencik,

Deputy State Director, Operations.

Rescheduling of Sale; Modified Competitive Sale of Public Lands; Johnson County, Wyoming

A "Notice of Realty Action" was published on September 30, 1982 at 47 FR 43201 in the **Federal Register** and concerned and modified competitive sale of public land in Wyoming. A postponement of said notice was published on November 9, 1982 at 47 FR 50763. Notice is hereby given, that this sale in Johnson County, Wyoming is rescheduled to take place on August 12, 1983.

The methods and procedures set out in the original "Notice of Realty Action" on September 30, 1982 will still apply with the following exceptions:

1. The appraised value of the property is now $30,000.

2. The public sale will be held on Friday, August 12, 1983.

3. No bid will be accepted for less than the appraised value of $30,000.

4. The sealed bid envelope must be marked in the lower left-hand corner of the front of the envelope with the words "Public Land Sale W-80910, August 12, 1983—Sealed Bid."

Paul Arrasmith,

District Manager.

BILLING CODE 4310-84-M

[W-80909]

Wyoming: Realty Action; Proposed Noncompetitive Sale of Public Lands in Johnson County, Wyoming

The following described lands have been examined and identified as suitable for disposal by direct sale

under Section 203 of the Federal Land Policy and Management Act of 1976 (90 Stat. 2750; 43 U.S.C. 1713) at no less than fair market value:

Sixth Principal Meridian

T. 45 N., R. 78 W.,
Sec. 34, SW¼NE¼SE¼.

The area described contains 10 acres.

The fair market is $2500.00

The land is proposed for disposal by direct sale to Edwin J. Streeter who is currently authorized to occupy the land by a temporary use permit. Prior to the issuance of the temporary use permit, Mr. Streeter lived on the land for approximately 17 years in an unintentional occupancy trespass which has been settled. The value of the improvements Mr. Streeter has placed on the land is approximately $58,200.00 of which the major investment is his home. He is the authorized range user and co-owner of the adjoining private land. The grazing preference will not be affected by this proposed sale. The authorized officer has determined public interest would be best served by the proposed direct sale in order to recognize and protect Mr. Streeter's equities and the unintentional nature of the trespass.

The proposed sale has been analyzed according to 43 CFR 1601.8(c). The co-owner of the adjacent private lands and the local government officials are in support of the sale. The subject-lands are not essential to any Bureau program and are not suitable for management by another federal agency.

The land will not be offered for sale until 60 days after the date of this notice.

The proposed sale will be subject to the following:

1. Reservation of right-of-way for ditches and canals to the United States pursuant to 43 U.S.C. 945;
2. Reservation to the United States mineral deposits in the lands so patented, and to it, or persons authorized by it, the right to prospect, mine, and remove such deposits from the same under applicable law and such regulations as the Secretary of the Department of Interior may prescribe;
3. All valid existing rights and reservations of record.

Detailed information concerning the proposed sale is available for review at the Bureau of Land Management, Buffalo Resource Area, 300 Spruce St., P.O. Box 670, Buffalo, Wyoming 82834.

For a period of 45 days from the date of this notice, interested parties may submit comments to the Casper District Manager, Casper District Office, Bureau of Land Management, 951 Rancho Road, 82601. Any adverse comments will be evaluated by the district manager who may vacate or modify this realty action.

In absence of any action by the district manager this realty action will become a final determination of the Department of the Interior.

Paul W. Arrasmith,

District Manager.

BILLING CODE 4310-84-M

Minerals Management Service

Oil and Gas and Sulphur Operations in the Outer Continental Shelf

AGENCY: Minerals Management Service, Interior.

ACTION: Notice of the receipt of a proposed development and production plan.

SUMMARY: Notice is hereby given that ODECO Oil and Gas Company has submitted a Development and Production Plan describing the activities it proposes to conduct on Lease OCS-G 3393, Block 102, Vermilion Area, offshore Louisiana.

The purpose of this Notice is to inform the public, pursuant to Section 25 of the OCS Lands Act Amendments of 1978, that the Minerals Management Service is considering approval of the Plan and that it is available for public review at the Office of the Regional Manager, Gulf of Mexico OCS Region, Minerals Management Service, 3301 North Causeway Blvd., Room 147, Metairie, Louisiana 70002.

FOR FURTHER INFORMATION CONTACT: Minerals Management Service, Public Records, Room 147, open weekdays 9 a.m. to 3:30 p.m., 3301 North Causeway Blvd., Metairie, Louisiana 70002, Phone (504) 837-4720, Ext. 226.

SUPPLEMENTARY INFORMATION: Revised rules governing practices and procedures under which the Minerals Management Service makes information contained in Development and Production Plans available to affected States, executives of affected local governments, and other interested parties became effective December 13, 1979 (44 FR 53685). Those practices and procedures are set out in a revised § 250.34 of Title 30 of the Code of Federal Regulations.

Dated: June 1, 1983.

John L. Rankin,

Acting Regional Manager, Gulf of Mexico OCS Region.

BILLING CODE 4310-MR-M

National Park Service

Intention to Negotiate Concession Permit; Alternative, Inc., et al.

Pursuant to the provisions of Section 5 of the Act of October 9, 1965 (79 Stat. 969; 16 U.S.C. 20), public notice is hereby given that sixty (60) days after the date of publication of this notice, the Department of the Interior, through the Regional Director, Southeast Region, National Park Service, proposes to negotiate concession permits with Alternative, Inc., Alois Amrein, Caribbean Sea Adventures, Monica H. Gelardi, Magton, Ltd., Milemark, Inc., Francis Smilowitz, Southern Seas, Inc., Teroro, Inc., and Llewelyn Westerman, hereinafter referred to as Concessioners, authorizing each of them to continue to provide excursion boat transportation and related services within Buck Island Reef National Monument for a period of approximately five years from date of execution, through April 30, 1988.

This proposal has been determined to be categorically excluded from the procedural provisions of the National Environmental Policy Act and no environmental document will be prepared.

The foregoing Concessioners have performed their obligations to the satisfaction of the Secretary under their existing permits which expire by limitation of time on April 30, 1983, and, therefore, pursuant to the Act of October 9, 1965, as cited above, are entitled to be given preference in the negotiation of new concession permits. This provision, in effect, grants each of the Concessioners, the opportunity to meet the terms and conditions of any other proposal submitted which the Secretary may consider better than a proposal submitted by an individual Concessioner. If the individual Concessioner amends its individual proposal and the amended proposal is substantially equal to the better offer, then the new permit will be negotiated with the existing individual Concessioner.

The Secretary will consider and evaluate all proposals received as a result of this notice. Any proposal, including that of the existing Concessioners, must be postmarked or hand delivered on or before the sixtieth (60th) day following publication of this notice to be considered and evaluated.

Interested parties should contact the Regional Director, Southeast Region, National Park Service, 75 Spring Street, S.W., Atlanta, Georgia 30303, or the Superintendent, Virgin Islands National Park Box 7789, Charlotte Amalie, St.

Thomas, U.S.V.I. 00801, for information as to the requirements of the proposed permits.

Dated June 1, 1983.

C. W. Ogle,

Acting Regional Director, Southeast Region.

BILLING CODE 4310-70-M

Intention to Negotiate Concession Contract; Harbor Carriers, Inc.

Pursuant to the provisions of Section 5 of the Act of October 9, 1965 (79 Stat. 969; 16 U.S.C. 20 et seq.), public notice is hereby given that sixty (60) days after the date of publication of this notice, the Department of the Interior, through the Director of the National Park Service, proposes to negotiate a concession contract with Harbor Carriers, Inc., authorizing it to continue to provide boat transportation facilities and services for the public at Golden Gate National Recreation Area, California, for a period of approximately fifteen (15) years from January 1, 1984.

"This proposed contract requires a construction and improvement program. The construction and improvement program required was previously addresed in the General Management Plan/Environmental Analysis, September 1980, that was prepared in conjunction with the General Management Plan for Golden Gate National Recreation Area."

The foregoing concessioner has performed its obligations to the satisfaction of the Secretary under an existing contract which expires by limitation of time on December 31, 1983, and therefore, pursuant to the Act of October 9, 1965, as cited above, is entitled to be given preference in the renewal of the contract and in the negotiation of a new contract. This provision, in effect, grants Harbor Carriers, Inc., the opportunity to meet the terms and conditions of any other proposal submitted in response to this notice which the Secretary may consider better than the proposal submitted by Harbor Carriers, Inc. If Habor Carriers, Inc., amends its proposal, and the amended proposal is substantially equal to the better offer, then the proposed new contract will be negotiated with Harbor Carriers, Inc.

The Secretary will consider and evaluate all proposals received as a result of this notice. Any proposal, including that of the existing concessioner, must be postmarked or hand-delivered on or before the sixtieth (60th) day following publication of this notice to be considered and evaluated.

Interested parties should contact the Superintendent, Golden Gate National Recreation Area, Fort Mason, California 94123, for information as to the requirements of the proposed contract.

Dated: June 6, 1983.

Howard H. Chapman,

regional Director, Western Region.

BILLING CODE 4310-70-M

Upper Delaware Citizens Advisory Council; Meeting

AGENCY: National Park Service Upper Delaware Citizens Advisory Council Interior.

ACTION: Notice of meeting.

SUMMARY: This notice sets forth the date of the forthcoming meeting of the Upper Delaware Citizens Advisory Council. Notice of this meeting is required under the Federal Advisory Committee Act.

DATE: June 24, 1983, 7 p.m.

ADDRESS: Town of Tusten Hall, Narrowburg, New York.

FOR FURTHER INFORMATION CONTACT: John T. Hutzky, Superintendent, Upper Delaware National Scenic and Recreational River, Drawer C, Narrowsburg, N.Y. 12764-0159 (717) 729-7135.

SUPPLEMENTARY INFORMATION: The Advisory Council was established under section 704(f) of the National Parks and Recreation Act of 1978, Pub. L. 95-625, 16 U.S.C. 1274 note, to encourage maximum public involvement in the development and implementation of the plans and programs authorized by the Act. The Council is to meet and report to the Delaware River Basin Commission, the Secretary of the Interior, and the Governors of New York and Pennsylvania in the preparation of a management plan and on programs which relate to land and water use in the Upper Delaware region. The agenda for the meeting will include discussion of Draft Management Plan.

The meeting will be open to the public. Any member of the public may file with the Council a written statement concerning agenda items. The statement should be addressed to the Council c/o Upper Delaware National Scenic and Recreational River, Drawer C, Narrowsburg, N.Y. 12764-0159. Minutes of the meeting will be available for inspection four weeks after the meeting at the permanent headquarters of the Upper Delaware National Scenic and Recreational River, River Road, 1¾ miles north of Narrowsburg, N.Y., Damascus Township, Pennsylvania.

Dated: May 31, 1983.

James W. Coleman, Jr.,

Regional Director, Mid-Atlantic Region.

BILLING CODE 4310-70-M

Office of the Secretary

New Mexico; Amendment of Wilderness Inventory Decisions

AGENCY: Office of the Secretary of Interior.

ACTION: Amendment of Wilderness Inventory Decisions.

SUMMARY: This notice designates 16 areas totaling 48,658 acres for wilderness consideration pursuant to Section 202 of the Federal Land Policy and Management Act of 1976 or for consideration for other forms of protective management. This notice also amends previous wilderness inventory decisions by the Bureau of Land Management for lands in New Mexico, deleting all or part of 17 wilderness study areas. The total area deleted from wilderness study area status under Section 603 of the Act by this decision is 121,012 acres.

EFFECTIVE DATE: June 10, 1983.

FOR FURTHER INFORMATION CONTACT: New Mexico State Director, Bureau of Land Management, Post Office Box 1449, Joseph Montoya Federal Building, South Federal Place, Santa Fe, New Mexico 87501, telephone (505) 988-6227.

Amendment of Wilderness Inventory Decisions

This notice completes the action necessary with respect to Bureau of Land Management wilderness study areas in New Mexico to bring the Bureau's wilderness review into compliance with recent decisions of the Interior Board of Land Appeals. Previous action on this subject was published in the **Federal Register** on December 30, 1982 (47 FR 58372).

Section 1. Consideration for Protective Management

The 16 areas listed in Table 1, totaling 48,658 acres, have been designated for wilderness consideration pursuant to Section 202 of the Federal Land Policy and Management Act of 1976 or for consideration for other forms of protective management. These areas were formerly identified as wilderness study areas under Section 603 of the Act. They were either deleted from that category on December 30, 1982, or they are being deleted by Sections 2 and 3 of this decision.

Section 2. Areas Under 5,000 Acres

The following wilderness study area is modified to delete a roadless area smaller than 5,000 acres, effective upon publication of this decision in the **Federal Register**. This roadless area was improperly identified as part of a wilderness study area under Section 603 of the Federal Land Policy and Management Act of 1976. Only the acreage listed below as "acres deleted" is deleted from wilderness study; the remainder of the wilderness study area remains under wilderness study, and the deletion does not affect the Bureau of Land Management's previously adopted conclusions as to the presence of wilderness characteristics in the remaining wilderness study area.

Wilderness Study Area Name: Brokeoff Mountains
Number: NM–030–112
Old Wilderness Study Area Acreage: 28,600
Acres Deleted (Unit B): 220
Revised Wilderness Study Area Acreage: 28,380
County: Otero

Section 3. Split-Estate Lands

A. "Split-estate" lands are lands where the Federal Government owns the surface but where the subsurface mineral estate is nonfederally owned. Split-estate lands were improperly identified for wilderness study under Section 603 of the Federal Land Policy and Managment Act of 1976. That error is corrected by this decision.

B. The lands listed as "split-estate" in Table 2 are deleted from wilderness study area status, effective upon publication of this decision in the **Federal Register**. These are scattered tracts located within the listed wilderness study areas. Only the indicated acreage of split-estate land is deleted from wilderness study; the remainder of the wilderness study area remains under wilderness study, and the boundary of the wilderness study area has not been changed. The deletions do not affect the Bureau of Land Management's previously adopted conclusions as to the presence of wilderness characteristics.

C. The boundaries and acreages of the wilderness study areas listed in Table 3 are modified, effective upon publication of this Secision in the **Federal Register**, to delete split-estate lands and certain other public lands. The deleted lands consist of: (1) scattered tracts of split estate located within wilderness study areas, (2) tracts of split estate located on the periphery of wilderness study areas, and (3) tracts that are not split estate but are isolated from the main body of the wilderness study area by deletion of the split estate and no longer qualify for wilderness study under section 603 because they are smaller than 5,000 acres. Only the indicated acreage is deleted from wilderness study. The remainder of the wilderness study area remains under wilderness study, and the boundary change does not affect the Bureau of Land Management's previously adopted conclusions as to the presence of wilderness characteristics in the remaining wilderness study area.

Section 4. Management of Deleted Lands

All lands in New Mexico deleted from wilderness study status by this decision in Sections 2 and 3 and by the decision issued on December 30, 1982 (47 FR 58372), and not designated for further wilderness consideration in Table 1 of this notice are hereby released from management restrictions to protect their wilderness suitability. Of these lands, 43,138 acres are being considered for designation as areas of critical environmental concern, natural areas, national natural landmarks, or scenic areas or for nomination to the National Register of Historic Places and will be managed to protect the identified natural, cultural, or recreational values. The remaining 171,605 acres will be managed for the full range of multiple uses other than wilderness and in conformance with existing land use plans and regulations for those areas.

This is a final decision of the Department of the Interior and is not subject to appeal under 43 CFR Part 4.

Garrey E. Carruthers,
Assistant Secretary.
June 2, 1983.

TABLE 1.—AREAS BEING CONSIDERED FOR PROTECTIVE MANAGEMENT

Area name	Number	Acreage	County	Category [1]
Bisti	NM–010–057	[4] 3,520	San Juan	Wilderness.
Manzano	NM–010–092	645	Torrance	ACEC, NA, SA.
Ignacio Chavez	NM–010–020	22,290	McKinley	ACEC, NA.
Chamisa	NM–010–021	11,091	Sandoval	Do.
Rimrock	NM–020–007		Valencia	
Lobo tract		800		ACEC, NRHP.
Cebollita Spring tract		160		Do.
Narrows tract		320		Do.
National Arch tract		1,200		ACEC, NA.
Sand Canyon	NM–020–006		Valencia	
Promontory tract		[2] 640		ACEC, NRHP.
Homestead/Armijo tract		[3] 1,440		Do.
Little Rimrock	NM–020–009		Valencia	
Cebolla Spring tract		[4] 80		Do.
Penole tract		320		Do.
Eagle Peak (Zuni Salt Lake tract)	NM–020–019	1,800	Catron	NNL.
Big Hatchet Mountains	NM–020–035C	2,000	Hidalgo	Wilderness.
Guadalupe Canyon	(5)	494	Hidalgo	NA.
Lonesome Ridge	NM–060–801	1,808	Eddy	NA, SA.
Total (16 areas)		48,696		

[1] In this table the following abbreviations are used: Wilderness means wilderness consideration under Section 202 of the Federal Land Policy and Management Act of 1976; ACEC means consideration for areas of critical environmental concern; NA means consideration for natural areas; NNL means consideration for national natural landmarks; NRHP means consideration for nomination to the National Register of Historic Places; and SA means consideration for scenic areas.
[2] The Promontory tract consists of 640 acres from the former wilderness study area and 160 additional acres of public land.
[3] The Homestead/Armijo tract consists of 640 acres from the Sand Canyon former wilderness study area, 800 acres from the Pinon former wilderness study area (NM–020–010), and 160 additional acres of public land.
[4] The Cebolla Spring tract consists of 80 acres from the former wilderness study area and 80 additional acres of public land.
[5] This area has no number. It is contiguous to the existing Guadalupe Canyon Natural Area, which is under wilderness review as an "instant study area" pursuant to Section 603 of the Federal Land Policy and Management Act of 1976.
[6] The acreage of the Bisti area recently has been recalculated by more accurate methods as 3,968 acres. However, the figure 3,520 acres has been used in this table to be consistent with the figure used in the decision of December 30, 1982. Henceforth, the area under wilderness consideration will be considered to contain 3,968 acres.

TABLE 2.—MODIFIED WILDERNESS STUDY AREAS—SPLIT ESTATE DELETED

Wilderness study area name	Number	Old wilderness study area acreage	Acres split estate	Revised wilderness study area acreage	County
Sierra Ladrones	NM–020–016	36,868	560	36,308	Socorro.
West Potrillo Mountains	NM–030–052(6)	7,400	640	6,760	Dona Ana.
Robledo Mountains	NM–030–063	12,946	135	12,811	Dona Ana.
Total (3 areas)			1,335		

TABLE 3.—MODIFIED WILDERNESS STUDY AREAS—BOUNDARY CHANGED TO DELETE SPLIT ESTATE

Wilderness study area name	Number	Old wilderness study area acreage	Acres split estate	Acres non-split estate deleted	Revised wilderness study area acreage	County
De-na-zin	NM-010-004	19,922	855	513	18,554	San Juan.
Ignacio Chavez	NM-010-020	32,263	21,500	802	9,961	McKinley.
Cabezon	NM-010-022	8,112	74	0	8,038	Sandoval.
Empedrado	NM-010-063	9,454	44	0	9,410	Sandoval.
Mesita Blanca	NM-020-018	19,414	2,985	0	16,429	Catron.
Eagle Peak	NM-020-019	43,960	11,000	212	32,748	Catron.
Big Hatchet Mountains	NM-030-035A, B	60,710	4,573	2,499	53,638	Hidalgo.
Alamo Hueco Mountains	NM-030-038	16,512	2,726	3,040	10,746	Hidalgo.
West Potrillo Mountains	NM-303-052(A)	143,145	1,440	0	141,705	Luna/Dona Ana.
Aden Lava Flow	NM-030-053	25,287	1,430	0	23,857	Dona Ana.
Organ Mountains	NM-030-074	7,283	139	0	7,144	Dona Ana.
El Malpais	(1)	73,640	54,551	10,620	8,469	Cibola.
Guadalupe Canyon	(2)	454	454	0	0	Hidalgo.
Total (13 areas)			101,771	17,686		

[1] This area has no number. The area under wilderness study in the El Malpais area consists of 84,000 acres of formally designated Natural Area, which is under wilderness review as an "instant study area" pursuant to Section 603 of the Federal Land Policy and Management Act of 1976, and 73,000 acres of contiguous roadless area. All public lands within the formally designated Natural Area remain under wilderness review, as well as the 8,469 acres of contiguous lands shown in Table 3.

[2] This area has no number. It is contiguous to the Guadalupe Canyon Natural Area, which is under wilderness review as an "instant study area" pursuant to Section 603 of the Federal Land Policy and Management Act of 1976. All public lands within the formally designated Natural Area, totaling 3,691 acres, remain under wilderness review.

Pleadings should refer to No. MC–F–15159.

Under 49 U.S.C. 11343(e), the Interstate Commerce Commission exempts from the requirement of prior review and approval under 49 U.S.C. 11343(a), the purchase by Frank Potter Trucking Co., (Potter) (MC–124393), of a portion of the operating rights of Nebraska Carriers, Inc., (Nebraska), i.e., Certificate No. MC–153207 (Sub-No. 2) which authorizes the irregular-route transportation of such commodities as are dealt in or used by building material and home improvement stores nationally, between the facilities used by Payless Cashways, Inc.

[No. MC–F–15203]

Presto Transportation Inc.—Purchase Exemption—Spector Red Ball, Inc. (Debtor-in-Possession)

ADDRESSES: Send pleadings to:

(1) Motor Section, Room 2139, Interstate Commerce Commission, Washington, DC 20423
and
(2) Petitioner's representative, Raymond Bradfield, P.O. Box 469, Peru, Ill. 61354

Pleadings should refer to No. MC–F–15203.

Under 49 U.S.C. 11343(e), the Interstate Commerce Commission exempts from the requirement of prior review and approval under 49 U.S.C. 11343(a)(2), the purchase by Presto Transportation, Inc., of those operating rights of spector Red Ball, Inc. (Debtor-in-Possession) contained in Certificate Nos. MC–2229 Sub-Nos. 208, 241, 244, 256, and 275, and specified portions of Sub-No. 250, 251, 252, 253, 254, 257, 258, 259, 260, 261, 264, 265, 266, 267, 268, 273, and 274X.

BILLING CODE 7035–01–M

Motor Carriers; Decision Notice; Finance Applications

As indicated by the findings below, the Commission has approved the following applications filed under 49 U.S.C. 10924, 10926, 10931 and 10932.

We find:

Each transaction is exempt from section 11343 of the Interstate Commerce Act, and complies with the appropriate transfer rules.

This decision is neither a major Federal action significantly affecting the quality of the human environment nor a major regulatory action under the Energy Policy and Conservation Act of 1975.

Petitions seeking reconsideration must be filed within 20 days from the date of this publication. Replies must be filed within 20 days after the final date for filing petitions for reconsideration; any interested person may file and serve a reply upon the parties to the proceeding. Petitions which do not comply with the relevant transfer rules at 49 CFR 1181.4 may be rejected.

If petitions for reconsideration are not timely filed, and applicants satisfy the conditions, if any, which have been imposed, the application is granted and they will receive an effective notice. The notice will recite the compliance requirements which must be met before the transferee may commence operations.

Applicants must comply with any conditions set forth in the following decision-notices within 20 days after publication, or within any approved extension period. Otherwise, the decision-notice shall have no further effect.

It is ordered:

The following applications are approved, subject to the conditions stated in the publication, and further subject to the administrative requirements stated in the effective notice to be issued hereafter.

Agatha L. Mergenovich,
Secretary.

Please direct status inquiries to Team 1, (202) 275–7992.

Volume No. OP1–FC–206

By the Commission, Review Board No. 2, Members Carleton, Williams, and Ewing. (Member Williams not participating.)

MC–FC–81471. By decision of May 27, 1983, issued under 49 U.S.C. 10926 and the transfer rules at 49 CFR Part 1181, Review Board Number 2 approved the transfer to RICH LEHMANN, DOING BUSINESS AS RICH LEHMAN TRUCKING, 2205 Rosewyn Lane, Billings, MT 59102, of Permit No. MC–163831, issued January 27, 1983, to RAIL-TRAIL CO., Suite 301, 3203 Third Avenue North, Billings, MT 59101, authorizing the transportation of general commodities (except classes A and B explosives, household goods and commodities in bulk), between points in MT and WY, under continuing contract(s) with Burlington Northern Railroad Company.

Volume No. OP1–FC–207

By the Commission, Review Board Members Krock, Williams, and Dowell.

MC–FC–81492. By decision of June 2, 1983 issued under 49 U.S.C. 10926 and the transfer rules at 49 CFR Part 1181, the Review Board approved the transfer to METROPOLITAN STORAGE & MOVING CO., INC., New York, NY, of Certificate Nos. MC–13780, and MC–13780 (Sub-No. 2), issued December 6, 1951 and April 22, 1949, respectively, to SOFIA BROTHERS, INC., New York, NY, authorizing the transportation of household goods, between New York, NY, on the one hand, and, on the other, points in CT, DE, FL, GA, MA, ME, MD, NH, NJ, NY, NC, PA, RI, SC, VT, VA, WV, and DC. Representative: Alvin Altman, 888 Seventh Avenue, New York, NY.

BILLING CODE 7035-01-M

Motor Carriers; Permanent Authority Decisions; Decision-Notice

Motor Common and Contract Carriers of Property (fitness-only); Motor Common Carriers of Passengers (fitness-only); Motor Contract Carriers of Passengers; Property Brokers (other than household goods). The following applications for motor common or contract carriage of property and for a broker of property (other than household goods) are governed by Subpart A of Part 1160 of the Commission's General Rules of Practice. See 49 CFR Part 1160, Subpart A, published in the **Federal Register** on November 1, 1982, at 47 FR 49583, which redesignated the regulations at 49 CFR 1100.251, published in the **Federal Register** on December 31, 1980. For compliance procedures, see 49 CFR 1160.19. Persons wishing to oppose an application must follow the rules under 49 CFR Part 1160, Subpart B.

The following applications for motor common or contract carriage of passengers filed on or after November 19, 1982, are governed by Subpart D of the Commission's Rules of Practice. See 49 CFR Part 1160, Subpart D, published in the **Federal Register** on November 24, 1982, at 49 FR 53271. For compliance procedures, see 49 CFR 1160.86. Persons wishing to oppose an application must follow the rules under 49 CFR Part 1160, Subpart E.

These applications may be protested *only* on the grounds that applicant is not fit, willing, and able to provide the transportation service or to comply with the appropriate statutes and Commission regulations.

Applicant's representative is required to mail a copy of an application, including all supporting evidence, within three days of a request and upon payment to applicant's representative of $10.00.

Amendments to the request for authority are not allowed. Some of the applications may have been modified prior to publication to conform to the Commission's policy of simplifying grants of operating authority.

Findings

With the exception of those applications involving duly noted problems (e.g., unresolved common control, fitness, or jurisdictional questions) we find, preliminarily, that each applicant has demonstrated that it is fit, willing, and able to perform the service proposed, and to conform to the requirements of Title 49, Subtitle IV, United States Code, and the Commission's regulations. This presumption shall not be deemed to exist where the application is opposed. Except where noted, this decision is neither a major Federal action significantly affecting the quality of the human environment nor a major regulatory action under the Energy Policy and Conservation Act of 1975.

In the absence of legally sufficient opposition in the form of verified statements filed on or before 45 days from date of publication (or if the application later becomes unopposed), appropriate authorizing documents will be issued to applicants with regulated operations (except those with duly noted problems) and will remain in full effect only as long as the applicant maintains appropriate compliance. The unopposed applications involving new entrants will be subject to the issuance of an effective notice setting forth the compliance requirements which must be satisfied before the authority will be issued. Once this compliance is met, the authority will be issued.

Within 60 days after publication an applicant may file a verified statement in rebuttal to any statement in opposition.

To the extent that any of the authority granted may duplicate an applicant's other authority, the duplication shall be construed as conferring only a single operating right.

Agatha L Mergenovich,

Secretary.

Note.—All applications are for authority to operate as a motor common carrier in interstate or foreign commerce, over irregular routes unless noted otherwise. Applications for motor contract carrier authority are those where service is for a named shipper "under contract."

For the following, please direct status calls to Team 4 at 202-275-7669.

Volume No. OP4-344

Decided: June 3, 1983.

By the Commission, Review Board No. 1, Members Parker, Chandler, and Fortier.

MC 166116, filed February 7, 1983, previously noticed in the **Federal Register** of February 28, 1983. Applicant: QUALITY TRANSPORTATION BROKERS, INCORPORATED, 234 Fifth Ave., New York, NY 10001. Representative: John L. Alfano, 550 Mamaroneck Ave., Harrison, NY 10528, (914) 835-4411. As a *broker of general commodities* (except household goods), between points in the U.S. (except AK and HI).

Note.—The purpose of this republication is to show the authority is for a motor carrier broker, erroneously omitted from the previous publication.

For the following, please direct status calls to Team 1 at 202-275-7992.

Volume No. OP1-202

Decided: June 1, 1983.

By the Commission, Review Board Members Fortier, Krock, and Williams.

MC 168131, filed May 18, 1983. Applicant: SAMSON TOURS INC., 2050 West Mercer Ave., College Park, GA 30337. Representative: Wilhelm M. Sambdman, Jr. (same address as applicant), (404) 761-9770. Transporting *passengers,* in charter and special operations, beginning and ending at points in GA, and extending to points in the U.S. (including AK, but excluding HI).

Note.—Applicant seeks to provide privately-funded charter and special transportation.

MC 168161, filed May 19, 1983. Applicant: G. L. MAYS d.b.a. BUNNY TRUCKING, P.O. Box 20201, 136 Dubose Dr., San Antonio, TX 78220. Representative: G. L. Mays (same address as applicant), (512) 649-1718. Transporting *food and other edible products and byproducts intended for human consumption* (except alcoholic beverages and drugs), *agricultural limestone and fertilizers, and other soil conditioners* by the owner of the motor vehicle in such vehicle, between points in the U.S. (except AK and HI).

MC 168191, filed May 20, 1983. Applicant: ROSS E. HALL, d.b.a. WEE-HAUL TRUCKING, R.D. 1, Box 436C, Long Lane, York Haven, PA 17370. Representative: Dixie C. Newhouse, 1329 Pennsylvania Ave., P.O. Box 1417, Hagerstown, MD 21740, (301)-797-6060. Transporting (1) *food and other edible products and by-products intended for human consumption* (except alcoholic beverages and drugs), *agricultural limestone and fertilizer, and other soil conditioners* by the owner of the motor vehicle in such vehicle, between points in the U.S. (except AK and HI), and (2) for or on behalf of the U.S. Government, *general commodities* (except used household goods, hazardous or secret materials, and sensitive materials, and sensitive weapons and munitions), between points in the U.S. (except AK and HI).

Spence (same address as applicant), 301–624–7820. Transporting *passengers*, in charter and special operations, between points in the U.S. (except AK and HI).

Note.—Applicant seeks to provide privately-funded charter and special transportation.

MC 166163, filed May 19, 1983. Applicant: RICHARD CHARLTON, d.b.a. R.C. SERVICES, 2312 N. Rosewood, Santa Ana, CA 92706. Representative: Donald R. Hedrick, P.O. Box 4334, Santa Ana, CA 92702. As a *broker* of *general commodities* (except household goods), between points in the U.S.

[FR Doc. 83–15562 Filed 6–9–83; 8:45 am]
BILLING CODE 7035–01–M

Motor Carriers; Permanent Authority Decisions; Decision-Notice

Motor Common and Contract Carriers of Property (except fitness-only); Motor Common Carriers of Passengers (public interest); Freight Forwarders; Water Carriers; Household Goods Brokers. The following applications for motor common or contract carriers of property, water carriage, freight forwarders, and household goods brokers are governed by Subpart A of Part 1160 of the Commission's General Rules of Practice. See 49 CFR Part 1160, Subpart A, published in the **Federal Register** on November 1, 1982, at 47 FR 49583, which redesignated the regulations at 49 CFR 1100.251, published in the **Federal Register** December 31, 1980. For compliance procedures, see 49 CFR Part 1160.19. Persons wishing to oppose an application must follow the rules under 49 CFR 1160, Subpart B.

The following applications for motor common carriage of passengers, filed on or after November 19, 1982, are governed by Subpart D of 49 CFR Part 1160, published in the **Federal Register** on November 24, 1982 at 47 FR 53271. For compliance procedures, see 49 CFR 1160.86. Carriers operating pursuant to an intrastate certificate also must comply with 49 U.S.C. 10922(c)(2)(E). Persons wishing to oppose an application must follow the rules under 49 CFR Part 1160, Subpart E. In addition to fitness grounds, these applications may be opposed on the grounds that the transportation to be authorized is not consistent with the public interest.

Applicant's representative is required to mail a copy of an application, including all supporting evidence, within three days of a request and upon payment to applicant's representative of $10.00.

Amendments to the request for authority are not allowed. Some of the applications may have been modified prior to publication to conform to the Commission's policy of simplifying grants of operating authority.

Findings

With the exception of those applications involving duly noted problems (e.g., unresolved common control, fitness, water carrier dual operations, or jurisdictional questions) we find, preliminarily, that each applicant has demonstrated that it is fit, willing, and able to perform the service proposed, and to conform to the requirements of Title 49, Subtitle IV, United States Code, and the Commission's regulations.

We make an additional preliminary finding with respect to each of the following types of applications as indicated: common carrier of property—that the service proposed will serve a useful public purpose, responsive to a public demand or need; water common carrier—that the transportation to be provided under the certificate is or will be required by the public convenience and necessity; water contract carrier, motor contract carrier of property, freight forwarder, apd household goods broker—that the transportation will be consistent with the public interest and the transportation policy of section 10101 of chapter 101 of Title 49 of the United States Code.

These presumptions shall not be deemed to exist where the application is opposed. Except where noted, this decision is neither a major Federal action significantly affecting the quality of the human environment nor a major regulatory action under the Energy Policy and Conservation Act of 1975.

In the absence of legally sufficient opposition in the form of verified statements filed on or before 45 days from date of publication (or, if the application later becomes unopposed), appropriate authorizing documents will be issued to applicants with regulated operations (except those with duly

noted problems) and will remain in full effect only as long as the applicant maintains appropriate compliance. The unopposed applications involving new entrants will be subject to the issuance of an effective notice setting forth the compliance requirements which must be satisfied before the authority will be issued. Once this compliance is met, the authority will be issued.

Within 60 days after publication an applicant may file a verified statement in rebuttal to any statement in opposition.

To the extent that any of the authority granted may duplicate an applicant's other authority, the duplication shall be construed as conferring only a single operating right.

Agatha L. Mergenovich,

Secretary.

Note.—All applications are for authority to operate as a motor common carrier in interstate or foreign commerce over irregular routes, unless noted otherwise. Applications for motor contract carrier authority are those where service is for a named shipper "under contract." Applications filed under 49 U.S.C. 10922(c)(2)(B) to operate in intrastate commerce over regular routes as a motor common carrier of passengers are duly.

Please direct status inquiries to Team Two at (202) 275–7293.

Volume No. OP2–256

Decided: June 2, 1983.

By the Commission, Review Board Members Carleton, Parker, and Fortier.

MC 52022 (Sub-20), filed May 10, 1983. Applicant: SANTINI BROS., INC., d.b.a. THE SEVEN BROTHERS AND THE SEVEN SANTINI BROTHERS, Seven Brothers Square, Bronx, NY 10452. Representative: Robert J. Gallagher, 1000 Connecticut Ave., N.W., Suite 1200, Washington, DC 20423, 202–785–0024. Transporting *household goods,* (1) between points in AZ, CA, ID, MT, NE, NV, NM, OR, SD, UT, WA, and WY, (2) between points in AZ, CA, ID, MT, NE, NV, NM, OR, SD, UT, WA, and WY, on the one hand, and, on the other, points in AL, AR, CO, CT, DE, FL, GA, IL, IN, IA, KS, KY, LA, ME, MD, MA, MI, MN, MS, MO, NH, NJ, NY, NC, ND, OH, OK, PA, RI, SC, TN, TX, VT, VA, WV, WI, and DC. Condition: The person or persons who appear to be engaged in common control of another regulated carrier must either file an application under 49 U.S.C. 11343(a), submit an affidavit indicating why such approval is unnecessary, or file a petition seeking exemption under 49 U.S.C. 11343(e). In order to expedite issuance of any authority please submit a copy of the petition for exemption, the affidavit, or proof of filing the application(s) for common control to Team 2, Room 2379.

MC 110053 (Sub-3), filed May 12, 1983. Applicant: ILLINOIS STATE MOTOR SERVICE, INC., 1800 W. 31st St., Chicago, IL 60608. Representative: James R. Madler, 120 W. Madison St., Chicago, IL 60602, (312) 726–6525. Transporting *metal products, machinery, and building materials,* between points in the U.S. (except AK and HI).

BILLING CODE 7035–01–M

Motor Carriers; Permanent Authority Decisions; Restriction Removals; Decision-Notice

The following restriction removal applications are governed by 49 CFR Part 1165. Part 1165 was published in the **Federal Register** of December 31, 1980, at 45 FR 86747 and redesignated at 47 FR 49590, November 1, 1982.

Persons wishing to file a comment to an application must follow the rules under 49 CFR 1165.12. A copy of any application can be obtained from any applicant upon request and payment to applicant of $10.00

Amendments to the restriction removal applications are not allowed.

Some of the applications may have been modified prior to publication to conform to the special provisions applicable to restriction removal.

Findings

We find, preliminarily, that each applicant has demonstrated that its requested removal of restrictions or broadening of unduly narrow authority is consistent with the criteria set forth in 49 U.S.C. 10922(h).

In the absence of comments filed within 25 days of publication of this decision-notice, appropriate reformed authority will be issued to each applicant. Prior to beginning operations under the newly issued authority, compliance mut be made with the normal statutory and regulatory requirements for common and contract carriers.

Agatha L. Mergenovich,
Secretary.

Please direct status inquiries to Team 1, at (202) 275–7992.

Volume No. OP1–204

Decided: June 1, 1983.

By the Commission, Review Board Members Carleton, Parker, and Joyce.

MC 95840 (Sub–3X), filed May 11, 1983. Applicant: V R L CORPORATION, P.O. Box 801, Traverse City, MI 49685–0801. Representative: William B. Elmer (same address as applicant), (616) 941–5313. Sub 2 certificate, broaden (1) wrecked and disabled automobiles, trucks, trailers, and buses, in truckaway service, and used tractors or used trailers to be used as replacements for wrecked or disabled tractors or trailers, in truckaway service and wrecked, disabled, and repossessed motor vehicles, by use of wrecker equipment to "transportation equipment", (2) that part of OH within 100 miles of Detroit to "points in that part of OH on and north of a line beginning at the OH–IN State line and extending along U.S. Hwy 30 to junction OH Hwy 44, then along OH Hwy 44 to the OH–Lake Erie boundary", (3) remove the Madison, WI exception, and (4) remove restriction against the transportation of trailers designed to be drawn by passenger automobiles.

Edwards Transfer & Storage Co.—Purchase Exemption—Blue Ridge Transportation Co.

Edwards Transfer & Storage Co. (Edwards), a motor carrier (MC–38799), is controlled by United Transport Industries, Inc. (UTI), a non-carrier holding company which also controls two other motor common carriers. UTI, in turn, is controlled by John J. Brutvan, a non-carrier individual. Edwards seeks an exemption from the requirement under section 11343 of prior regulatory approval for its purchase of that portion of the interstate operating rights of Blue Ridge Transportation Co. contained in Route No. (I)(1)(A)(a) of Certificate No. MC–159222, Sheet No. 2, which authorizes the motor common carrier transportation of general commodities (except articles of size or weight that makes handling by motor vehicle impractical, bank bills, coins, currency, drafts, notes, or other valuable papers, precious metals, or articles manufactured therefrom, classes A and B explosives, liquid bulk commodities, and household goods), between Toledo, OH and Detroit, MI: from Toledo over US Highway 24 to Detroit, and return over the same route, serving Toledo, OH for purposes of joinder only, and serving the intermediate and off-route points of Monroe, Dearborn, Ecorse, Hamtramck, River Rouge, Blissfield and Wyandotte, MI.

Send comments to: (1) Motor Section, Room 2139, Interstate Commerce Commission, Washington, DC 20423; and

(2) A. Charles Tell, 100 East Broad Street, Columbus, OH 43215.

Comments should refer to No. MC–F–15249.

[OP2–258; OP2–258–MCF–15304]

Husband, Inc., Husband International Transport (Ontario) Limited, Provincial Tankers Limited, Cronin Transport Limited and Canadian National Railway Company

Husband, Inc., Husband International Transport (Ontario) Limited, Provincial Tankers Limited, Cronin Transport Limited, are all common carriers. Canadian National Transportation Limited (CNTL) owns all of the outstanding common and preferred shares of Transport Route Canada, Inc. CNTL is a motor common carrier operating in Canada and is a wholly owned subsidiary of Canadian National Railway Company (CN Rail). CN Rail provides rail transportation service throughout Canada. These parties seek an exemption from the requirements under section 11343 of prior regulatory approval for the merger of Husband, Husband International, Provincial, and Cronin, into Transport Route Canada, Inc.

Send comments to: (1) Motor Section, Room 2379, Interstate Commerce Commission, Washington, DC 20423.

(2) Petitioner's Representative, Mr. John Guandolo, 1090 Vermont Ave. NW., Washington, DC 20005.

Comments should refer to No. MC–F–15304.

[Docket No. AB-2 (Sub-No. 44)

Rail Carriers; Louisville and Nashville Railroad Company—Abandonment—In McMinn and Monroe Counties, TN; Findings

The Commission has found that the public convenience and necessity permit Louisville and Nashville Railroad Company to abandon its rail line between milepost KB-326.7 near Englewood, McMinn County, TN, and milepost KB-341.5 at Tellico Plains, Monroe County, TN, a total distance of 14.8 miles, subject to conditions. A certificate will be issued authorizing abandonment unless within 15 days after this publication the Commission also finds that: (1) A financially responsible person has offered financial assistance (through subsidy or purchase) to enable the rail service to be continued; and (2) it is likely that the assistance would fully compensate the railroad.

Any financial assistance offer must be filed with the Commission and served concurrently on the applicant, with copies to Mr. Louis E. Gitomer, Room 5417, Interstate Commerce Commission, Washington, DC, 20423, no later than 10 days from publication of this Notice. Any offer previously made must be resubmitted within this 10-day period.

Information and procedures regarding financial assistance for continued rail service are set forth at 49 U.S.C. 10905 and 49 CFR 1152.27.

Proposed Consent Order In Action Alleging Violations of State and Federal Regulations Applicable to the Transportation, Storage and Disposal; of Hazardous Wastes

In accordance with Departmental Policy, 28 CFR 50.7, 38 FR 19029, notice is hereby given that in June 3, 1983 a proposed consent judgment in *United States* v. *Monochem, Inc., et al.*, Civil Action No. 8-81-64, was lodged with the United States District Court for the Southern District of Texas, Brownsville Division. The proposed consent order provides for injunctive relief and a monetary penalty with respect to alleged violations of state and federal regulations applicable to the storage of hazardous waste by a commercial warehouse facility located in Hidalgo, Texas.

The Department of Justice will receive for thirty (30) days from the date of publication of this notice, written comments relating to the proposed judgment. Comments should be addressed to F. Henry Habicht, II, Acting Assistant Attorney General, Land and Natural Resources Division, U.S. Department of Justice, Washington, D.C. 20530, and refer to *United States* v.

Monochem, Inc., et al., D.J. Ref. 90-7-1-194.

The proposed consent order may be examined at the Office of the United States Attorney, Room 1200, United States Courthouse, 515 Rusk Street, Houston, Texas 77002; at the Region VI Office of the Environmental Protection Agency, Office of Regional Counsel, 28th Floor, 1201 Elm Street, Dallas, Texas 75270; and at the Environmental Enforcement Section, Land and Natural Resources Division, U.S. Department of Justice (Room 1521), Ninth Street and Pennsylvania Avenue, NW. Washington, D.C. 20530. A copy of the proposed consent order may be obtained in person or by mail from the Environmental Enforcement Section, Land and Natural Resources Division, U.S. Department of Justice.

Henry Habicht II,

Acting Assistant Attorney General, Land and Natural Resources Division.

BILLING CODE 4410-01-M

DEPARTMENT OF LABOR

Employment and Training Administration

Federal-State Unemployment Compensation Program; Extended Benefits; Ending of Extended Benefit Periods in the States of Alabama and Montana

This notice announces the ending of the Extended Benefit Periods in the States of Alabama and Montana, effective on June 4, 1983.

Background

The Federal-State Extended Unemployment Compensation Act of 1970 (26 U.S.C. 3304 note) established the Extended Benefit Program as a part of the Federal-State Unemployment Compensation Program. The Extended Benefit Program taskes effect during periods of high unemployment in a State, to furnish up to 13 weeks of extended unemployment benefits to eligible individuals who have exhausted their rights to regular unemployment benefits permanent State and Federal unemployment compensation laws. The Act is implemented by State unemployment compensation laws and by Part 615 of Title 20 of the Code of Federal Regulations (20 CFR Part 615).

Extended Benefits are payable in a State during an Extended Benefit Period, which is triggered "on" when the rate of insured unemployment in the State reaches the State trigger rate set in the Act and the State law. During an Extended Benefit Period individuals are eligible for a maximum of up to 13 weeks of benefits, but the total of Extended Benefits and regular benefits together may not exceed 39 weeks.

The Act and the State unemployment compensation laws also provide that an Extended Benefit Period in a State will trigger "off" when the rate of insured unemployment in the State is no longer at the trigger rate set in the law. A benefit period actually terminates at the end of the third week after the week for which there is an off indicator, but not less than 13 weeks after the benefit period began.

Extended Benefit Periods commenced in the State of Alabama on Octobr 31, 1982 and in the State of Montana on January 23, 1983, and have now triggered off.

Determination of "off" indicator

The heads of the employment security agencies of the States named above have determined that the rate of insured unemployment in each State for the period consisting of the week ending on May 14, 1983, and the immediately preceding twelve weeks, fell below the State trigger rate, so that for that week there was an "off" indicator in each State.

Therefore, the Extended Benefit Periods in these States terminated with the week ending on June 4, 1983.

Information for Claimants

Each State employment security agency will furnish a written notice to each individual who is filing claims for Extended Benefits of the end of the Extended Benefit Period and its effect on the individual's right to Extended Benefits. 20 CFR 651.31(d)(3).

Persons who wish information about their rights to Extended Benefits in the States named above should contact the nearest State employment service office or unemployment compensation claims office in their locality.

Signed at Washington, D.C. on June 3, 1983.

Albert Angrisani,

Assistant Secretary of Labor.

BILLING CODE 4510-30-M

[TA-W-13,413,13,413A]

Hanna Mining Co., Hanna Nickel Smelting Co., Riddle, Oreg.; Notice of Negative Determination on Reconsideration

On April 13, 1983, the Department issued an Affirmative Determination Regarding Application for Reconsideration for former workers of the Hanna Mining Company and the Hanna Nickel Smelting Company in Riddle, Oregon. This determination was published in the **Federal Register** on April 22, 1983 (48 FR 17,419).

The United Steelworkers claim in their application for reconsideration that since Hanna operates the only domestic nickel mine in the U.S., any amount of imported nickel directly affects the workers at Hanna. It also claims that the closing of Hanna's mining operation in Oregon occurred simultaneously with the opening of a new mine and smelter in Columbia, South America by Hanna.

The Department's review showed that the worker petiton did not meet the "contributed importantly" test of Section 222 of the Trade Act in either 1981 or 1982. All of the nickel ore mined by the Hanna Mining Company went to the smelter at Hanna Nickel Smelting Company which did not import nickel ore. Further, the Department of Labor survey of major customers of Hanna Nickel Smelting showed that the respondents reduced their reliance on imported nickel in 1981 compared to 1980. The aggregate purchases of imported nickel by surveyed customers declined in 1981 compared to 1980 and in the January through July 1982 period compared to the same period in 1981. U.S. imports of nickel ore and ferronickel declined in 1982 compared to 1981 in both absolute terms and as a proportion of domestic consumption.

With respect to the union's claim concerning imports from Hanna's operation in Columbia, South America, findings in the investigative file show that Hanna was a limited partner in that operation and did not import any nickel, ferronickel or nickel ore into the United States during the period applicable to the petition.

Conclusion

After reconsideration, I reaffirm the original denial of eligibility to apply for adjustment assistance to former workers of the Hanna Mining Company and the Hanna Nickel Smelting Company, Riddle, Oregon.

Signed at Washington, D.C. this 1st day of June 1983.

Robert O. Deslongchamps,

Director, Office of Legislation and Actuarial Services, UIS.

High Unemployment Area Classifications; Notice of Additions to List of High Unemployment Areas

AGENCY: Employment and Training Administration, Labor.

ACTION: Notice.

DATE: The additions to the list are effective on June 1, 1983.

SUMMARY: The purpose of this notice is to announce additions to the list of high unemployment areas.

FOR FURTHER INFORMATION CONTACT: James W. Wiggins, U.S. Employment Service (Attention: TEEPA), 601 D Street, NW., Washington, D.C. 20213 Telephone: 202-376-6700

SUPPLEMENTARY INFORMATION:

Section 101(a)(3) of Pub. L. 98-8, Stat. 13 (March 24, 1983), (the "Act") requires the Assistant Secretary for Employment and Training, United States Department of Labor, to classify civil jurisdictions as having high unemployment and to publish a list of these jurisdictions together with descriptions thereof no later than 30 days after enactment of the Act. That list was published on April 22, 1983 (48 FR 17456).

The Act also requires that the list of high unemployment areas be updated on a monthly basis thereafter, by adding civil jurisdictions that the Assistant Secretary deems to meet the criteria necessary for classification. The areas described below have been classified by the Assistant Secretary as high unemployment areas and are added to the list of high unemployment areas, effective June 1, 1983.

Signed at Washington, D.C. on June 1, 1983.

Albert Angrisani,

Assistant Secretary of Labor.

Additions to the List of High Unemployment Areas

June 1, 1983.

BILLING CODE 4510-30-M

Investigations Regarding Certifications of Eligibility To Apply for Worker Adjustment Assistance

Petitions have been filed with the Secretary of Labor under Section 221(a) of the Trade Act of 1974 ("the Act") and are identified in the Appendix to this notice. Upon receipt of these petitions, the Director of the Office of Trade Adjustment Assistance, Employment and Training Administration, has instituted investigations pursuant to Section 221(a) of the Act.

The purpose of each of the investigations is to determine whehter the workers are eligible to apply for adjustment assistance under Title II, Chapter 2, of the Act. The investigations will further relate, as appropriate, to the determination of the date on which total or partial separations began or threatened to begin and the subdivision of the firm involved.

The petitioners or any other persons showing a substantial interest in the subject matter of the investigations may request a public hearing, provided such request is filed in writing with the Director, Office of Trade Adjustment Assistance, at the address shown below, not later than June 20, 1983.

Interested persons are invited to submit written comments regarding the subject matter of the investigations to the Director, Office of Trade Adjustment Assistance, at the address shown below, not later than June 20, 1983.

The petitions filed in this case are available for inspection at the Office of the Director, Office of Trade Adjustment Assistance, Employment and Training Administration, U.S. Department of Labor, 601 D Street, NW., Washington, D.C. 20213.

Signed at Washington, D.C. this 31st day of May 1983.

Marvin M. Fooks,

Director, Office of Trade Adjustment Assistance.

Bendix Corp.; Heavy Vehicle Systems Group Elyria, Ohio; Amended Certification Regarding Eligibility To Apply for Worker Adjustment Assistance; Correction

This document corrects the amended certification quotation published April 26, 1983 (48 FR 18940) in FR Doc. 83-11126 in which the Department of Labor inadvertently left out the product identification. The Corrected Amended Certification should read as follows:

"All workers of the Elyria, Ohio plant of the Bendix Corporation, Heavy Vehicle System Group, engaged in employment related to the production of air compressors and crankshafts who became totally or partially separated from employment on or after August 1, 1981 are eligible to apply for adjustment assistance under Section 223 of the Trade Act of 1974."

Signed at Washington, D.C. this June 3, 1983.

Robert A. Schaerfl,

Director, Office of Program Management, Unemployment Insurance Service.

[FR Doc. 83-15659 Filed 6-9-83; 8:45 am]
BILLING CODE 4510-30-M

Job Training Partnership Act (Pub. L. 97-300); Final Allotment Methodology for Distribution of Funds to the Territories Under Tile II, Part A, Section 201(a); Training Services for the Disadvantaged; Adult and Youth Programs

AGENCY: Employment and Training Administraton, Labor.

SUMMARY: This notice announces the final formula for distributing funds to Guam, the Virgin Islands, American Samoa, the Trust Territory of the Pacific Islands, and the Commonwealth of Northern Mariana Islands for programs under Title II-A, Section 201(a) of the Job Training Partnership Act (JTPA).

FOR FURTHER INFORMATION CONTACT: Robert Colombo, Acting Director, Office of Employment and Training Programs, 601 D Street, NW., Room 6402, Washington, D.C., 20213, telephone number: (202) 376-6093.

SUPPLEMENTARY INFORMATION: In the Friday March 11, 1983, notice the Department proposed that funds under the Job Training Partnership Act (JTPA) to be distributed to Guam, American Samoa, Trust Territory of the Pacific Islands, Commonwealth of the Northern Mariana Islands, and the Virgin Islands be distributed according to the following formula.

Funds would be allotted based on the relative percent of the population for each area, except that no area would receive less than 90 percent of the allotment percentage it received during the previous fiscal year. For Fiscal Year 1984 the 90 percent would be applied to each area's Fiscal Year 1983 funding level, except that summer youth funds would not be included in the base. The Department requested comments on the proposed formula.

Four of the jurisdictions involved provided comments to the Department. The comments basically rejected using only population as the basis for the allotment of funds. The comments suggested that unempoyment data be utilized, that the precent of JTPA eligible participants in the population be utilized and that a minimum allocation level be established.

The Department has carefully considered all comments. While the Department would prefer to use unemployment data for allotment purposes, the Bureau of Labor Statistics has indicated that such data are not available for the areas listed above and will not be available for the forseeable future. The Department has incorporated unemployment data provided by the Bureau of Census into the formula. Likewise there are no data available on the number of JTPA eligible participants within the populations of the above jurisdictions. The Department has accepted the suggestion that a minimum allocation be established.

Therefore, the Department hereby establishes the following formula for allotting funds to the above jurisdictions. This formula is effective immediately.

The 1980 Bureau of the Census unemployment data are used as the basis for the allotments. These data will be adjusted annually according to relative shifts in the population of the jurisdictions involved. (The Bureau of Labor Statistics has advised that it does not have and will not have any verifiable unemployment data for the above jurisdictions.) The formula retains the 90 percent relative share hold harmless provision and a minimum allocation of $125,000 is established.

In accordance with the above formula, the proposed allocations for Fiscal Year 1984 for the above jurisdictions will be as follows:

Virgin Islands	$1,979,810
Trust Territory of the Pacific Islands	887,120
American Samoa	388,917
Guam	1,619,153
Commonwealth of the Northern Mariana Islands	125,000

As indicated in the April 29, 1983, **Federal Register** Notice announcing the initial proposed Fiscal Year 1984 allotments for these areas, these allotments are subject to change as a result of any difference between the President's Fiscal Year 1984 budget request, upon which the allotments are based, and the final Fiscal Year 1984 appropriation. These proposed

allotments may also be impacted by more recent population data.

Signed this 7th day of June 1983.

Joyce Kaiser,

Associate Assistant Secretary for Employment and Training.

BILLING CODE 4510-30-M

Office of the Secretary

Agency Forms Under Review by the Office of Management and Budget (OMB)

Background

The Department of Labor, in carrying out its responsibility under the Paperwork Reduction Act (44 U.S.C. Chapter 35), considers comments on the proposed forms and recordkeeping requirements that will affect the public.

List of Forms Under Review: On each Tuesday and/or Friday, as necessary, the Department of Labor will publish a list of the Agency forms under review by the Office of Management and Budget (OMB) since the last list was published. The list will have all entries grouped into new forms, revisions, extensions (burden change), extensions (no change), or reinstatements. The Departmental Clearance Officer will, upon request, be able to advise members of the public of the nature of any particular revision they are interested in.

Each entry will contain the following information:

The Agency of the Department issuing this form.

The title of the form.

The Agency form number, if applicable.

How often the form must be filled out.

Who will be required to or asked to report.

Whether small business or organizations are affected.

The standard industrial classification (SIC) codes, referring to specific respondent groups that are affected.

An estimate of the number of responses.

An estimate of the total number of hours needed to fill out the form.

The number of forms in the request for approval.

An abstract describing the need for and uses of the information collection.

Comments and Questions

Copies of the proposed forms and supporting documents may be obtained by calling the Departmental Clearance Officer, Paul E. Larson, Telephone 202-523-6331. Comments and questions about the items on this list should be directed to Mr. Larson, Office of Information Management, U.S. Department of Labor, 200 Constitution Avenue, NW., Room S-5526, Washington, D.C. 20210. Comments should also be sent to the OMB reviewer, Arnold Strasser, Telephone 202-395-6880, Office of Information and Regulatory Affairs, Office of Management and Budget, Room 3208, NEOB, Washington, D.C. 20503.

Any member of the public who wants to comment on a form which has been submitted to OMB should advise Mr. Larson of this intent at the earliest possible date.

Extension (no change)

Bureau of Labor Statistics
Annual OSHA Survey and Prenotification of Recordkeeping Requirements
OSHA 200S, OSHA 200 PRE
Annually
State or local governments, farms, businesses or other for-profit, non-profit institutions, small businesses or organizations
Small business or organization
SIC: Multiple
280,000 responses; 70,000 hours, 2 forms

Section 8(c) of the Occupational Safety and Health Act (29 U.S.C. 657, 673) legislates the Secretary of Labor to require employers to maintain records of occupational injuries and illinesses and to submit periodic reports. Uses of the data: indicates industries needing safety and health attention; guidance in administering Federal and State programs; and used by Labor and management.

Extension (Adjustment to Burden Only)

Mine Safety and Health Administration
Certificate of Electrical/Noise Training
MSHA Form 5000-1
When need arises
Businesses or other institutions
Small business or organization
SIC: 111 and 121
24,000 responses; 480 hours

MSHA certifies miners as qualified to perform certain duties in mines. Form 5000-1 is used by course instructors to report to MSHA for certification the names of those miners who have satisfactorily completed electrical and noise training programs.

Signed at Washington, D.C. this 7th day of June, 1983.

Paul E. Larson,

Departmental Clearance Officer.

NATIONAL AERONAUTICS AND SPACE ADMINISTRATION

[Notice 83-57]

NASA Advisory Council; Meeting

AGENCY: National Aeronautics and Space Administration.

ACTION: Notice of meeting.

SUMMARY: In accordance with the Federal Advisory Committee Act, Pub. L. 92-463, as amended, the National Aeronautics and Space Administration announces a forthcoming meeting of the NASA Advisory Council, Informal Task Force for the Study of Effective Shuttle Utilization.

DATE AND TIME: June 28-29, 1983, 8:00 a.m. to 5 p.m.

ADDRESS: NASA Ames Research Center, Room 213, Building 200, Moffett Field, California 94035.

FOR FURTHER INFORMATION CONTACT: Mr. Carl R. Praktish, Code LB-4, National Aeronautics and Space Administration, Washington, DC 20546 (202/755-8380).

SUPPLEMENTARY INFORMATION: The NASA Advisory Council Informal Task Force for Effective Shuttle Utilization was established under the NASA Advisory Council to conduct a study of the directions NASA should take to ensure the most effective use of the Shuttle capability and to report its findings and recommendations to the Council. The Task Force is chaired by Edgar M. Cortright, and has a total of 10 members.

At this meeting the members will discuss their work plan and what remains to be done. Visitors will be admitted to the meeting room up to its capacity, which is approximately 45 persons including Task Force members and other participants. Visitors will be requested to sign a visitor's register.

Type of meeting: Open.

Richard L. Daniels,

Director, Management Support Office, Office of Management.

June 6, 1983.

BILLING CODE 7510-01-M

NATIONAL CAPITAL PLANNING COMMISSION

Intergovernmental Cooperation in Federal Planning in the National Capital Region; Procedures; Inquiry

AGENCY: National Capital Planning Commission (NCPC).

ACTION: Notice of Proposed Procedures.

SUMMARY: These proposed procedures would implement applicable provisions of the National Capital Planning Act of 1952, as amended, and the Intergovernmental Cooperation Act.

DATE: Comments must be received on or before August 9, 1983.

ADDRESS: Interested persons should submit comments to Daniel H. Shear, Secretary to the Commission, National Capital Planning Commission, 1325 G Street, NW., Washington, D.C. 20576. Comments received will be available for inspection at the above address from 8:00 a.m. to 5:30 p.m., Monday through Friday.

FOR FURTHER INFORMATION CONTACT: Donald F. Boxarth, Associate Executive Director for Regional Affairs, (202) 724–0185.

SUPPLEMENTARY INFORMATION:

Background

The Commission is the central planning agency for the Federal government in the National Capital Region. It reviews and comments upon or approves development policies, plans and programs submitted by Federal agencies and the District of Columbia government. It also reviews and comments on policies, plans and programs prepared by local, state, sub-regional and regional agencies (hereinafter called non-Federal agencies) in the Washington metropolitan area. It also acts on policies, plans and programs prepared by its staff. For the sake of simplicity, these procedures use the word "plan" to cover all matters reviewed and acted upon by the Commission.

Rescission of Existing Procedures

In connection with these proposed Procedures, the Commission is proposing to rescind its existing procedures implementing Part I and Part II of the former OMB Circular A–95. Executive Order 12372 directed OMB to revoke the Circular itself, and directed Federal agencies to leave their A–95 regulations in place only until September 30, 1983.

Consistency With Acts, Executive Orders, Agreements or Understandings

The proposed procedures are in accord with the National Capital Planning Act of 1952, as amended by the District of Columbia Self-Government and Governmental Reorganization Act, and the Intergovernmental Cooperation Act of 1968, including the policy in Title V of that Act that Federal plans for the Region, to the maximum extent practicable, should be consistent with official local, state and regional plans.

The proposed procedures are also consistent with the "Principles and Process for Identifying Federal Interests in the National Capital Region" adopted by the Board of Directors of the Metropolitan Washington Council of Governments and the Commission on September 8 and 16, 1982, respectively.

The Commission has been advised by the Office of Management and Budget that the Commission need not issue implementing regulations under Executive Order 12372, Intergovernmental Review of Federal Programs, since its provisions apply to Federal agencies which provide financial assistance programs or undertake direct development activities.

Intergovernmental Cooperation in Federal Planning in the National Capital Region

Sec.
1. Purpose of these procedures.
2. Definitions that apply to these procedures.
3. Referrals by the Commission.
4. The Consultation Process.
5. Steps in the Consultation Process.

* * * * *

Sec. 1. *Purpose of these procedures.*

The purpose of these procedures is to implement the National Capital Planning Act and the Intergovernmental Cooperation Act and to foster intergovernmental cooperation in the National Capital Region by indentifying the types of plans reviewed by the Commission, the Federal and non-Federal agencies to whom plans will be circulated, and the process by which the Commission consults with these agencies.

Sec. 2. *Definitions that apply to these procedures.*

The following terms are used frequently in these procedures: "Commission" means the National Capital Planning Commission. "National Capital Region" or "Region" means the District of Columbia; Montgomery and Prince Georges Counties in Maryland; Arlington, Fairfax, Loudoun and Prince William Counties in Virginia; and all cities now or hereafter existing in Maryland or Virginia within the geographic area bounded by the outer boundaries of the combined area of said counties. "National Capital" means the District of Columbia and territory owned by the United States within the National Capital Region outside the District of Columbia. "COG" means the Metropolitan Washington Council of Governments. "Non-Federal Agencies" means COG, state and local governments, and sub-regional and regional agencies that prepare or review plans for all or a portion of the National Capital Region. "Comprehensive Plan" means the Comprehensive Plan for the National Capital. "Plans" means proposed policies, plans and programs initiated by the Commission and other Federal agencies and departments and non-Federal agencies for the Region as a whole or for portions of the region. "Coordinating Committee" means the committee of representatives of agencies of the Federal and District of Columbia Governments and of planning and developmental agencies of the environs established by the Commission pursuant to Section 2(d) of the National Capital Planning Act.

Sec. 3. *Referrals by the Commission.*

(a) *Plans of the Commission.*—(1) *Federal elements of the Comprehensive Plan for the National Capital.* The Comprehensive Plan for the National Capital consists of "Federal elements" prepared and adopted by the Commission, and "District elements" prepared by the Mayor, adopted by the Council of the District of Columbia, and reviewed by the Commission.

Federal elements deal with Federal activities and interests in the planning and development of the National Capital Region. The process of preparing a Federal element, or an amendment to an adopted Federal element, begins with the preparation of preliminary staff reports and background staff studies for the Commission.

When a draft of a proposed element or a proposed amendment to an adopted element is completed, the Commission authorizes its circulation to Federal, District of Columbia and other non-Federal agencies and interested organizations and citizens for review and comment. Depending on the scope and content of a particular element and its potential impact, if any, on the National Capital Region, the Commission may circulate a draft prior to circulating the proposed element.

(2) *Federal Capital Improvements Program for the National Capital Region.* Each year the Commission prepares and adopts a Federal Capital Improvements Program (FCIP) which contains the Commission's recommended capital program for the National Capital Region for the next five years. The FCIP includes proposed land acquisitions, planning and design activities and construction projects.

The Commission circulates the proposed FCIP to affected Federal and non-Federal agencies for review and comment prior to its adoption and transmittal to the Office of Management and Budget and the affected implementing Federal agencies.

(b) *Plans of Other Federal Agencies.* Federal agencies and departments

prepare long-range regional plans for their facilities in the Region, master plans for their major installations, five-year capital improvement programs, and site and building plans for individual construction projects on Federal land in the Region.

These proposed plans are submitted by the sponsoring Federal agency to the Commission pursuant to the National Capital Planning Act and, where appropriate, are referred to the affected non-Federal agencies for review and comment prior to Commission action thereon.

(c) *Plans of the District of Columbia.*—(1) *District Elements of the Comprehensive Plan and Amendments Thereto.* District elements of the Comprehensive Plan deal with land use, transportation, public works, and other issues related to the development of the District of Columbia. District elements, and amendments thereto, are prepared by the Mayor, adopted by the Council of the District of Columbia, and reviewed by the Commission to determine their effect on the Federal activities and interests in the National Capital Region. The Commission circulates District elements and amendments thereto to affected Federal agencies for comments only on the impact on Federal interests or functions. Comments on other aspects of such elements or amendments should be presented to the Mayor and/or the Council during the District's preparation and adoption of such elements or amendments.

(2) *Other Plans.* Various plans, including site and building plans for individual construction projects, are submitted by the District to the Commission for either recommendation or approval. The Commission refers such plans to affected Federal agencies and to the Coordinating Committee. Consistent with the objectives of the District of Columbia Self-Government and Governmental Reorganization Act (the "Home Rule" Act), the Commission limits its review of most District plans to a "Federal interest" review.

(3) *Zoning.* The Commission reviews proposed actions of the Zoning Commission of the District of Columbia. Prior to this review, the Commission may participate in the public hearing before the Zoning Commission. The Commission may also participate in cases before the Board of Zoning Adjustment. Commission review of District zoning matters is limited to the effect of the proposed zoning on the Federal activities and interests in the National Capital and the consistency of the proposed zoniong with the Comprehensive Plan.

(d) *Plans of Other Non-Federal Agencies in the National Capital Region.* The Commission reviews proposed plans and rezonings in the Region initiated or under consideration by now-Federal agencies. These include plans initiated by local governments or by the states of Maryland or Virginia, plans initiated by the Metropolitan Council of Governments (COG), and plans for rapid rail transit facilities prepared by the Washington Metropolitan Area Transit Authority (WMATA) submitted for Commission review and comment in accord with Article VI, Section 15 at the interstate compact that established the authority. The Commission's role is to make recommendations to the sponsoring agency on the impact, if any, on Federal activitites or interests in the National Capital Region. The Commission circulates such plans to affected Federal agencies for review and comment.

(e) *Capper-Cramton Lands.* The Commisson adminsters a grant-in-aid program under sections 1(b) and 1(c) of the Capper-Cramton Act (Act of May 29, 1930, 46 stat. 482, as amended) for the acquisition as parkland of lands in stream valleys in Maryland and Virginia tributory to the Potomac and Anacostia Rivers. The taking lines and general development plans for such stream valley parks proposed by local park authorities are subject to approval by the Commission. The Commission circulates such plans to affected Federal agencies for review and comment.

Sec. 4. *The Consultation Process.*

(a) *Consultation With COG.* The National Capital Region includes the District of Columbia, two counties and six cities in the State of Maryland and four counties and three cities in the Commonwealth of Virginia. It is an interstate metropolitan region. Sixteen local governments formed COG in 1957 as the metropolitan-wide governmental organization concerned with all aspects of metropolitan development. The Commission, on September 16, 1982, and the COG Board of Directors, on September 8, 1982, adopted "Principles and Process for Identifying Federal Interests in the National Capital Region." Pursuant to this agreement, the Commission consults with COG on the potential impact, if any, of proposed Federal plans on the Region and on COG's officials policies, plans and programs.

(b) *Consultation With Local Jurisdictions.* The Commission refers proposed Federal plans for review of potential local impact to the local planning agencies of affected jurisdictions and sends a copy of the transmittal letter to the chief administrative officers and heads of the local elected governing bodies of those jurisdictions. The Commission also refers Federal plans through COG to the intergovernmental review officers of affected jurisdictions.

(c) *Consultation With State Agencies in Maryland and Virginia.* Proposed Federal plans are sent to the Maryland Department of State Planning and to the Virginia Department of Planning and Budget by the Commission for review and comment by affected state agencies and departments prior to Commission action thereon. Such proposed Federal plans in the Virginia portion of the Region are also sent to the Northern Virginia Planning District Commission, which, as the sub-regional planning agency, is recognized by the State as a sub-state clearinghouse.

The Commission refers proposed Federal elements of the Comprehensive Plan and proposed Federal Capital Improvement Programs to WMATA for review and comment on their impact on the region's metrorail and metro bus systems.

Sec. 5 *Steps in the Consultation Process.*

There are two major steps in the Commission's consultation process. The first step is called "early consultation" and refers to consultation by Federal agencies and the Commission with affected non-Federal agencies prior to any formal submission by the initiating Federal agency to the Commission. The second step starts after the formal submission to the Commission with the referral of applicable submissions for review and comment by the affected non-Federal agencies.

(a) *Early Consultation.* The Commission conducts an "early consultation" process as part of its regional referral activities. The purpose of this process is to give non-Federal agencies an opportunity to learn as early as practicable about proposed Federal plans being developed in the Region by Federal agencies and departments. This also permits an early identification of possible questions and issues of concern to non-Federal agencies.

The Commission requests all affected Federal agencies and departments to contact it as early as possible in their initiation of planning in the Region. The Commission, in turn, contacts the affected local planning agency, and the designated intergovernmental review official, the chief administrative officer, and the responsible elected official in the affected local government and the area and state clearinghouses about the

work involved and the anticipated schedule for completion of the planning work and submission to the Commission. Where appropriate, the Commission will also arrange a joint meeting of all concerned with the sponsoring Federal agency or department for a briefing and an opportunity to discuss the planning work underway prior to any submission to the Commission.

(b) *Formal Referral and Consultation.*—(1) *Timing of Referral.* Proposed Commission policies, plans and programs are circulated for intergovernmental review as soon as they are completed and prior to any action thereon by the Commission.

Proposed policies, plans and programs initiated by other Federal agencies and departments are circulated to affected non-Federal agencies as soon as they have been submitted to the Commission pursuant to the National Capital Planning Act.

(2) *Time Period for Review.* Federal elements of the Comprehensive Plan are circulated to the District of Columbia Government for a period of 60 days for review and comment. Other Federal plans affecting the District of Columbia and District properties in the Maryland and Virginia portions of the Region are circulated to the District of Columbia Government for a period of 30 days for review and comment. All such proposals are scheduled for review by the Commission's Coordinating Committee.

Proposed Federal plans affecting the Maryland or Virginia portion of the Region and/or the Region as a whole are circulated to affected non-Federal agencies for a period of 60 days whenever possible for review and comment. However, no referral will be made of other Federal agency plans if as a result of the early consultation process, the affected non-Federal agencies advise the Commission in writing that no additional referral is required.

(3) *Response to Formal Referral.*—(A) *Written Responses.* The formal referral letter contains a date by which a written response from the non-Federal agencies should be received by the Commission. Approximately two weeks prior to a Commission meeting the Executive Director's Recommendation (EDR) is prepared for each item scheduled for action at the next Commission meeting. All written responses received by the date in the referral letter are considered in the preparation of the EDR. Copies of the written responses are attached to the EDR. Copies of the EDR may be obtained from the Commission's Public Affairs Officer on the Monday before the Commission meeting.

(B) *Oral Presentations At A Commission Meeting.*—(i) *Registration for A Commission Meeting.* If in addition to submitting a written response, representatives of non-Federal agencies wish to express their views at a Commission meeting, they should notify the Public Affairs Officer by the date indicated for such notice in the formal referral letter. Ordinarily, registering to speak prior to the deadline in the referral letter ensures that the Commission will hear oral presentations and that registrants will be notified if an item has been removed from the agenda for a particular meeting.

(ii) *Written Statements.* If a representative of a non-Federal agency wishes to present a written copy of the oral presentation, a copy should be submitted to the Secretary of the Commission by noon of the day preceding the meeting. Copies will be reproduced by the Secretary and distributed to each member of the Commission prior to the meeting. Otherwise, materials should be delivered in twenty-five copies to the Public Affairs Officer prior to the beginning of the meeting.

(iii) *Audio Visual Materials.* Speakers who wish to make slide or film presentations or other audio-visual presentations must make arrangements with the Public Affairs Officer prior to the Commission meeting.

Daniel H. Sheer,

Secretary.

BILLING CODE 7535-01-M

NATIONAL SCIENCE FOUNDATION

Subcommittee on Chemical and Process Engineering; Meeting

In accordance with the Federal Advisory Committee Act, Pub. L. 92–463 as amended, the National Science Foundation announces the following meeting:

Name: Subcommittee on Chemical and Process Engineering of the Advisory Committee for Engineering.

Type of meeting:

June 27—9:00 a.m. to 12:00 noon. Open.

June 27—1:30 p.m. to 5:00 p.m. Partially Closed. (See agenda).

June 28—8:30 a.m. to 4:00 p.m. Open.

Date: June 27 and 28, 1983.

Place: Room 543, 1800 G Street, NW., Washington, D.C. 20550.

Contact person: Dr. Marshall M. Lih, Division Director, Chemical and Process Engineering, Room 1126, National Science Foundation, Washington, D.C. 20550. Telephone (202) 357–9806.

Summary minutes: May be obtained from Dr. Marshall M. Lih, Director, Division of Chemical and Process Engineering, Room 1126, National Science Foundation, Washington, D.C. 20550. Telephone (202) 357–0606.

Purpose of subcommittee: To provide directions to Chemical and Process Engineering research.

Agenda:

Monday, June 27—Open—9:00 a.m. to 12:00 noon.

9:00 a.m.—Introduction by Division Director and Status Report by NSF Management.

10:00 a.m.—Questions and Answers.

10:15 a.m.—Briefing by Division Programs.

11:45 a.m.—Questions and answers.

12:00 p.m.—Recess.

Monday, June 27—1:30 p.m. to 5:00 p.m.

1:30 p.m. (Closed)—Review and comparison of declined proposals (and supporting documentation) with successful awards under the Chemical and Process Engineering division, including review of peer review materials and other privileged materials.

1:30 p.m. (Open) Task Group Meetings.

Tuesday, June 28—Open—8:30 a.m. to 4:00 p.m.

8:30 a.m.—Oral Reports from the Program auditing teams and task groups.

9:30 a.m.—Discussion of Issues.

11:45 a.m.—Recess.

1:15 p.m.—Continued discussion of issues.

4:00 p.m.—Adjourn.

Reason for closing The Oversight Review Team will be reviewing grant and declination jackets which contain the names of applicant institutions and principal investigators and privileged information contained in declination proposals. This session will also include a review of the peer review documentation pertaining to applicants. These matters are within exemptions (4) and (6) of 5 U.S.C. 552b(c), Government Sunshine Act.

Authority to close meeting: This determination was made by the Committee Management Officer pursuant to provisions of Section 10(d) of P.S. 92–463. The Committee Management Officer was delegated the authority to make such determinations by the Acting Director, NSF, July 6, 1979.

June 7, 1983.

M. Rebecca Winkler,

Committee Management Coordinator.

BILLING CODE 7555-01-M

NUCLEAR REGULATORY COMMISSION

Monthly Notice; Amendments to Operating Licenses Involving No Significant Hazards Considerations

I. Background

Pursuant to Public Law (Pub. L.) 97–415, the Nuclear Regulatory Commission (the Commission) is publishing its

regular monthly notice. Pub. L. 97–415 revised section 189 of the Atomic Energy Act of 1954, as amended (the Act), to require the Commission to publish notice of any amendments issued, or proposed to be issued, under a new provision of section 189 of the Act. This provision grants the Commission the authority to issue and make immediately effective any amendment to an operating license upon a determination by the Commission that such amendment involves no significant hazards consideration, notwithstanding the pendency before the Commission of a request for hearing from any person.

This monthly notice includes all amendments issued, or proposed to be issued, since the effect date of the Commission's rules implementing Pub. L. 97–415 (May 6, 1983), through May 23, 1983.

Consideration of Issuance of Amendment to Facility Operating License and Proposed No Significant Hazards Consideration Determination and Opportunity for Hearing

The Commission has made a proposed determination that the following amendment requests involve no significant hazards consideration. Under the Commission's regulations in 10 CFR 50.92, this means that operation of the facility in accordance with the proposed amendments would not (1) involve a significant increase in the probability or consequences of an accident previously evaluated; (2) create the possibility of a new or different kind of accident from any accident previously evaluated; or (3) involve a significant reduction in a margin of safety. The basis for this proposed determination for each amendment request is shown below.

The Commission is seeking public comments on this proposed determination. Any comments received within 30 days after the date of publication of this notice will be considered in making any final determination. The Commission will not normally make a final determination unless it receives a request for a hearing.

Comments should be addressed to the Secretary of the Commission, U.S. Nuclear Regulatory Commission, Washington, D.C. 20555, Attn: Docketing and Service Branch.

By July 11, 1983, the licensee or a petitioner may file a request for a hearing with respect to issuance of the amendment to the subject facility operating license and any person whose interest may be affected by this proceeding and who wishes to participate as a party in the proceeding must file a written petition for leave to intervene. Requests for a hearing and petitions for leave to intervene shall be filed in accordance with the Commission's "Rules of Practice for Domestic Licensing Proceedings" in 10 CFR Part 2. If a request for a hearing or petition for leave to intervene is filed by the above date, the Commission or an Atomic Safety and Licensing Board, designated by the Commission or by the Chairman of the Atomic Safety and Licensing Board Panel, will rule on the request and/or petition and the Secretary or the designated Atomic Safety and Licensing Board will issue a notice of hearing or an appropriate order.

As required by 10 CFR 2.714, a petition for leave to intervene shall set forth with particularity the interest of the petitioner in the proceeding, and how that interest may be affected by the results of the proceeding. The petition should specifically explain the reasons why intervention should be permitted with particular reference to the following factors: (1) The nature of the petitioner's right under the Act to be made a party to the proceeding; (2) the nature and extent of the petitioner's property, financial, or other interest in the proceeding; and (3) the possible effect of any order which may be entered in the proceeding on the petitioner's interest. The petition should also identify the specific aspect(s) of the subject matter of the proceeding as to which petitioner wishes to intervene. Any person who has filed a petition for leave to intervene or who has been admitted as a party may amend the petition without requesting leave of the Board up to fifteen (15) days prior to the first prehearing conference scheduled in the proceeding, but such an amended petition must satisfy the specificity requirements described above.

Not later than fifteen (15) days prior to the first prehearing conference scheduled in the proceeding, a petitioner shall file a supplement to the petition to intervene which must include a list of the contentions which are sought to be litigated in the matter, and the bases for each contention set forth with reasonable specificity. Contentions shall be limited to matters within the scope of the amendment under consideration. A petitioner who fails to file such a supplement which satisfies these requirements with respect to at least one contention will not be permitted to participate as a party.

Those permitted to intervene become parties to the proceeding, subject to any limitations in the order granting leave to intervene, and have the opportunity to participate fully in the conduct of the hearing, including the opportunity to present evidence and cross-examine witnesses.

If a hearing is requested, the Commission will make a final determination on the issue of no significant hazards consideration. The final Determination will serve to decide when the hearing is held.

If the final determination is that the amendment request involves no significant hazards consideration, the Commission may issue the amendment and make it immediately effective, notwithsanding the request for a hearing. Any hearing held would take place after issuance of the amendment.

If the final determination is that the amendment involves a significant hazards consideration, any hearing held would take place before the issuance of any amendment.

Normally, the Commission will not issue the amendment until the expiration of the 30-day notice period. However, should circumstances change during the notice period such that failure to act in a timely way would result, for example, in derating or shutdown of the facility, the Commission may issue the license amendment before the expiration of the 30-day notice period, provided that its final determination is that the amendment involves no significant hazards consideration. The final determination will consider all public and State comments received before action is taken. Should the Commission take this action, it will publish a notice of issuance and provide for opportunity for a hearing after issuance. The Commission expects that the need to take this action will occur very infrequently.

A request for a hearing or a petition for leave to intervene must be filed with the Secretary of the Commission, U.S. Nuclear Regulatory Commission, Washington, D.C. 20555, Attention: Docketing and Service Branch, or may be delivered to the Commission's Public Document Room, 1717 H Street, NW., Washington, D.C., by the above date. Where petitions are filed during the last ten (10) days of the notice period, it is requested that the petitioner promptly so inform the Commission by a toll-free telephone call to Western Union at (800) 325–6000 (in Missouri (800) 342–6700). The Western Union operator should be given Datagram Identification Number 3737 and the following message addressed to *(Branch Chief:)* petitioner's name and telephone number; date petition was mailed; plant name; and publication date and page number of this **Federal Register** notice. A copy of the petition should also be sent to the Executive Legal Director, U.S. Nuclear

Regulatory Commission, Washington, D.C. 20555, and to the attorney for the licensee.

Nontimely filings of petitions for leave to intervene, amended petitions, supplemental petitions and/or requests for hearing will not be entertained absent a determination by the Commission, the presiding officer or the Atomic Safety and Licensing Board designated to rule on the petition and/or request, that the petitioner has made a substantial showing of good cause for the granting of a late petition and/or request. That determination will be based upon a balancing of the factors specified in 10 CFR 2.714(a)(1) (i)–(v) and 2.714(d).

For further details with respect to this action, see the application for amendment which is available for public inspection at the Commission's Public Document Room, 1717 H Street, NW., Washington, D.C., and at the local public document room for the particular facility involved.

Public Service Company of Colorado, Docket No. 50–267, Fort St. Vrain Nuclear Generating Station, Platteville, Colorado

Date of amendment request: April 7, 1983.

Description of amendment request: The amendment would incorporate provisions on minmum shift crew size, guidelines for working hours, qualifications of technical advisors and revise the membership of the onsite safety review committee. These proposed changes were made in response to NRC requests and revise the Administrative Controls provisions to achieve consistency with present NRC staff positions on these subjects.

Basis for proposed no significant hazards consideration determination: The commission has provided guidance concerning the application of these standards by providing certain examples (48 FR 14870). The examples of actions involving no significant hazards include actions which are purely administrative changes to the Technical specifications, are changes to make the licensee conform to changes in the regulations, or additional limitations or restrictions. The changes proposed in the application are encompassed by these examples as follows: (1) Format and editorial changes are purely adminstrative changes, (2) incorporation of provisions on a minimum shift crew size are additional limitations and are in accordance with the guidance provided in NUREG–0737, "Clarification of TMI Action Plan Requirements". Item I.A.1.3, (3) incorporation of guidelines on working hours and qualifications of technical advisors are additional limitations providing conformance to staff positions, and (4) revisions to the onsite review committee membership incorporate more restrictive qualifications necessary for committee membership. Since the application for amendment to the Administrative Controls Technical Specifications involves changes to incorporate present NRC regulations and staff positions, the staff proposes to determine that the application does not involve a significant hazards consideration.

Local Public Document Room location: Greeley Public Library, City Complex Building, Greeley, Colorado.

Attorney for the Licensee: Bryant O'Donnell, Public Service Company of Colorado, P.O. Box 840, Denver, Colorado 80201.

NRC Branch Chief: G. L. Madsen.

Public Servcice Company of Colorado, Docket No. 50–267, Fort St. Vrain Nuclear Generating Station, Platteville, Colorado

Date of amendment request: April 19, 1983.

Description of amendment request: The amendment would revise those Technical Specifications dealing with the actions to be taken when instrumentation is inoperable and specifying acceptable moisture monitoring instrumentation during less than 5% power operation. The proposed changes were submitted in response to licensee commitments for clarification that required plant shutdowns cannot be delayed when instruments are inoperable and to clarify the requirements for allowable moisture monitoring instrumentation at low power by allowing the use of an additional analytical monitor or the protective system dewpoint monitors.

Basis for proposed no significant hazards consideration determination: The Commission has provided guidance concerning the application of these standards by providing certain examples (48 FR 14870). The examples of actions involving no significant hazards include actions which involve a change that constitutes an additional limitation, restriction or control not presently included in the Technical Specifications. The changes included in this application add limitations to clarify the intent of the specification. The change to the allowable moisture monitoring instrumentation during low power operation clarifies the requirement but allows more flexibility through the use of comparable instruments. Since the proposed changes clarify existing requirements, the staff proposes to determine that the application does not involve a significant hazards consideration.

Local Public Document Room location: Greeley Public Library, City Complex Building, Greeley, Colorado.

Attorney for Licensee: Bryant O'Donnell, Public Service Company of Colorado, P.O. Box 840, Denver, Colorado 80201.

NRC Branch Chief: G. L. Madsen.

Florida Power & Light Company, Docket No. 50–389, St. Lucie Unit 2, St. Lucie County, Florida

Date of amendment request: April 20, 1983.

Description of amendment request: Revise the Technical Specification (4.4.3.3.b) to require that the pressurizer heaters be manually connected to the emergency power source and that the Safety Injection Actuation System be reset to permit operation of the heaters.

Basis for proposed no significant hazards consideration determination: The existing Technical Specification requires pressurizer heaters to be reconnected to their respective buses normally from the control room. In order to be able to do this, the operator must reset the Engineered Safety Feature Actuation System test signal. The Technical Specifications do not mention "resetting"; the licensee believes it should. The staff concurs that this administrative change to clarify the Technical Specification is justified.

Local Public Document Room location: Indian River Community College Library, 3209 Virginia Avenue, Ft. Pierce, Florida 33450.

Attorney for Licensee: Harold F. Reis, Esq., Lowenstein, Newman, Reis, Axelrad & Toll, 1025 Connecticut Avenue, NW., Washington, D.C. 20036.

NRC Branch Chief: George W. Knighton.

Baltimore Gas and Electric Company, Docket Nos. 50–317 and 50–318, Calvert Cliffs Nuclear Power Plant Unit Nos. 1 and 2, Lusby (Calvert County), Maryland

Date of amendment request: April 27, 1983.

Description of amendment request: The April 27, 1983 application requests the following changes to the Unit 1 and Unit 2 Technical Specifictions: (1) Revision to the on-site organization, (2) Revised surveillance for sealed sources, and (3) Deletion of a snubber from the surveillance list (Unit 1 only).

Basis for proposed no significant hazards consideration determination: The Commission has provided guidance concerning the application of three standards for conclusions regarding "no

significant hazards considerations" by providing examples (48 FR 14870). These examples are not applicable to the issues addressed in the April 27 application. Our basis for concluding that the standards are met with respect to the no significant hazards considerations determination is presented.

Organizational changes will occur at Calvert Cliffs Nuclear Power Plant affecting Section 6.0 of the Technical Specifications in two areas, namely Figure 6.2.2—Organization Chart, and change the title of two members of the Plant Operations and Safety Review Committee membership as noted in Section 6.5.1.2. These changes are administrative in nature in that they do not affect the technical or administrative competence of the onsite organization at Calvert Cliffs.

A proposed change to the Technical Specifications would provide a wording clarification to the surveillance requirements for sealed sources. The Combustion Engineering Standard Technical Specifications in NUREG-0212 were revised on November 5, 1980 to reflect this new wording. The wording in the current Technical Specifications could lead to misinterpretation of Surveillance Requirement 4.7.9.1.2.c as requiring a test for sealed source leakage each time a reactor startup occurs. This is clearly not the intent, since these sources are located in the reactor vessel and would require removal of the reactor vessel head and the detectors for testing. This is not a requirement of the current CE Standard Technical Specifications and was never intended to be a requirement of Calvert Cliffs. With the revised wording, it is clear that this test is not required if the detectors have been previously subjected to core flux. Thus, it is proposed to determine that this change involves no significant hazards consideration because the change is merely to clarify the intent and avoid misinterpretation of the surveillance requirement and does not reduce or change the intended surveillance.

In addition, the proposed change corrects an inadvertent deletion of the words "or installation in the core," making the working consistent with the Standard Technical Specifications.

A proposed change to the Unit 1 Technical Specifications would delete snubber 1–38–4 from the list of snubbers requiring routine surveillance. This snubber was removed under an earlier modification which installed the Reactor Coolant System head vent and Pressurizer vent piping. Reclassification of the system upstream of and including the main solenoid valves as Seismic Class 1 allowed removal of the snubber, since it was no longer required.

Since this change is being made to correct the Technical Specifications to reflect current system configuration, it will not result in any significant effect on any analyzed accident or postulated accident in the Updated Final Safety Analysis Report. Additionally, since the snubber is no longer needed or installed, no reduction in the bases for any Technical Specifications would result from this change.

Local Public Document Room location: Calvert County Library, Prince Frederick, Maryland.

Attorney for lecensee: George F. Trowbridge, Esq., Shaw, Pittman, Potts and Trowbridge, 1800 M Street, N.W., Washington, D.C. 20036.

NRC Branch Chief: Robert A. Clark.

Previously Published Notices of Consideration of Issuance of Amendment to Facility Operating License and Proposed no Significant Hazards Consideration Determination and Opportunity for Hearing

The following notices were previously published as separate individual notices. The notice content was the same as above. They were published as individual notices because time did not allow the Commission to wait for this regular monthly notice. They are repeated here because the monthly notice lists all amendments proposed to be issued involving no significant hazards consideration.

For details, see the individual notice in the **Federal Register** on the day and page cited. This notice does not extend the notice period of the original notice.

The Toledo Edison Company and The Cleveland Electric Illuminating Company, Docket No. 50–346, Davis-Besse Nuclear Power Station, Unit No. 1, Ottawa County, Ohio

Date of amendment request: May 2, 1983.

Brief description of amendment: This amendment would extend the surveillance test due date from May 17, 1983 to September 17, 1983 for the steam generator outlet steam pressure channels in the Remote Shutdown Instrumentation and Post Accident Monitoring Instrumentation.

Date of publication of individual notice in Federal Register: May 16, 1983 (48 FR 22036).

Expiration date of individual notice: June 15, 1983.

Local Public Document Room location: University of Toledo Library, Documents Department, 2801 Bancroft Avenue, Toledo, Ohio.

Georgia Power Company, Oglethorpe Power Corporation, Municipal Electric Authority of Georgia, City of Dalton, Georgia, Docket No. 50–366, Edwin I. Hatch Nuclear Plant, Unit No. 2, Appling County, Georgia

Dates of amendment request: February 23, 1983, as supplemented April 19, 1983 and March 30, 1983.

Brief description of amendment: The amendment would modify the Technical Specifications to provide additional and revised trip setpoints that reflect design modifications to reduce containment loads from plant transients. The Technical Specification changes would (1) lower the opening and closing set points for subsequent actuation of selected safety relief valves, and (2) lower the main steam isolation valve water level trip setpoint. It would also modify the Technical Specifications to reflect changes to the core design for the third fuel reload of Unit No. 2.

Date of publication of individual notice in Federal Register: May 18, 1983 (48 FR 22389).

Expiration date of individual notice: June 17, 1983.

Omaha Public Power District, Docket No. 50–285, Fort Calhoun Station, Unit 1, Washington County, Nebraska

Date of amendment request: March 7, 1983.

Brief description of amendment: The Reactor Coolant System Heatup and Cool-down Curves must be revised to make them more restrictive in order to maintain the current margins of safety. The curves will be valid to 7.0 effective full power years.

Date of publication of individual notice in Federal Register: May 18, 1983 (48 FR 22390).

Expiration date of individual notice: June 17, 1983.

Local Public Document Room location: W. Dale Clark Library, 215 South 15th Street, Omaha, Nebraska.

Carolina Power & Light Company, Docket No. 50–325, Brunswick Steam Electric Plant, Unit 1, Brunswick County, North Carolina

Date of amendment request: May 2, 1983.

Brief description of amendment: The amendment would revise the technical specifications to incorporate appropriate limiting conditions for operation of the facility during the fourth fuel cycle.

Date of publication of individual notice in Federal Register: May 19, 1983 (48 FR 22658).

Expiration date of individual notice: June 12, 1983.

Local Public Document Room location: Southport-Brunswick County Library, 109 W. Moore Street, Southport, North Carolina 28461.

BILLING CODE 7590-01-M

OFFICE OF PERSONNEL MANAGEMENT

Federal Prevailing Rate Advisory Committee; Open Committee Meetings

Pursuant to the provisions of section 10 of the Federal Advisory Committee Act (Pub. L. 92-463), notice is hereby given that meetings of the Federal Prevailing Rate Advisory Committee will be held on: Thurday, July 7, 1983; Thursday, July 14, 1983; Thursday, July 21, 1983; Thursday, July 28, 1983.

These meetings will convene at 10 a.m. and will be held in Room 5A06A, Office of Personnel Management Building, 1900 E Street NW., Washington, D.C.

The Federal Prevailing Rate Advisory Committee is composed of a Chairman, representatives of five labor unions holding exclusive bargaining rights for Federal blue-collar employees, and representatives of five Federal agencies. Entitlement to membership of the Committee is provided for in 5 U.S.C. 5347.

The Committee's primary responsibility is to review the prevailing rate system and other matters pertinent to the establishment of prevailing rates under subchapter IV, chapter 53, 5 U.S.C., as amended, and from time to time advise the Office of Personnel Management thereon.

These scheduled meetings will convene in open session with both labor and management representatives attending. During the meeting either the labor members or the management members may caucus separately with the Chairman to devise strategy and formulate positions. Premature disclosure of the matters discussed in these caucuses would impair to an unacceptable degree the ability of the Committee to reach a consensus on the matters being considered and disrupt substantially the disposition of its business. Therefore, these caucuses will be closed to the public on the basis of a determination made by the Director of the Office of Personnel Management under the provisions of Section 10(d) of the Federal Advisory Committee Act (Pub. L. 92-463) and 5 U.S.C. 552b(c)(9)(B). These caucuses may, depending on the issues involved, constitute a substantial portion of the meeting.

Annually, the Committee Publishes for the Office of Personnel Management, the President, and Congress a comprehensive report of pay issues discussed, concluded recommendations thereon, and related activities. These reports are also available to the public, upon written request to the Committee Secretary.

Members of the public are invited to submit marterial in writing to the Chairman concerning Federal Wage System pay matters felt to be deserving of the Committee's attention. Additional information concerning these meetings may be obtained by contacting the Committee Secretary, Federal Prevailing Rate Advisory Committee, Room 1340, 1900 E Street, NW., Washington, D.C. 20415 (202-632-9710).

William B. Davidson, Jr.,

Chairman Federal Prevailing Rate Advisory Committee.

June 3, 1983.

BILLING CODE 6325-01-M

OFFICE OF THE UNITED STATES TRADE REPRESENTATIVE

[Docket Nos. 301-40, 41, 42]

The National Soybean Processor Association; Rescheduling of Public Hearing

On May 23, 1983 the United States Trade Representative decided to initiate an investigation pursuant to Section 302(b)(2) of the Trade Act of 1974 (19 U.S.C. 2411(b)(2)) with respect to a petition filed by the National Soybean Processors Association. A public hearing was scheduled pursuant to Section 302(b)(2)(A) for June 24, 1983 (48 FR 23947). This hearing has been rescheduled for June 29 and 30 beginning at 9:30 a.m. The location for the hearing will be published in the **Federal Register** at a later date.

Requests to present oral testimony must be submitted by June 17, 1983 and briefs accompanying oral testimony must be received no later than June 23, 1983. Written briefs from persons not wishing to present oral testimony should be received on or before June 30, 1983. Rebuttal briefs may be filed by any interested party by July 14, 1983.

Requests to testify as well as written submissions should be sent to the Chairman, Section 301 Committee, Room 223, 600 17th Street, NW., Washington, D.C. 20506 and should conform to the requirements set forth in 15 CFR 2006.8 and 2006.9.

Jeanne S. Archibald,

Chairman, Section 301 Committee.

[FR Doc. 83-15830 Filed 6-10-83; 10:43 am]

BILLING CODE 3190-01-M

POSTAL RATE COMMISSION

[Docket No. R83-1]

E-COM Rate and Classification Changes, 1983; Prehearing Conference

June 6, 1983.

On April 28, 1983, the Commission issued a Notice that the United States Postal Service had filed a Request for a Recommended Decision on changes in rates of postage and certain classification provisions for Electronic Computer Originated Mail (E-COM) which was published in the **Federal Register** on May 4, 1983 (48 FR 20178).[1] It directed those desiring to participate in the proceeding to file notices of intervention on or before May 31, 1983. In response, this Commission has received notices of intervention. These parties are listed in Attachment A.

Concurrent with the issuance of this Notice, the Secretary is transmitting a service list to be employed by all parties, whether full or limited participants, in making filings in the proceeding. The Postal Service, pursuant to section 65 of our rules of practice (39 CFR 3001.65) will serve copies of its Request and its prepared direct evidence upon the parties identified in Attachment A.

Attachment B is a tentative schedule designed to balance the time necessary for adequate consideration of this significant proposal with the need for expedition, 39 U.S.C. 3624(c). Anyone who wishes to comment on the tentative schedule and/or the special rules of practice described in the following paragraph may either file written comments by June 17, 1983, or address the subject at the prehearing conference, which will be held June 21, 1983, at 10:00 a.m. in the Commission's hearing room at 2000 L Street NW., Suite 500, Washington, D.C.

Attachment C to this Notice is a copy of proposed special rules of practice for use in this case. These rules have streamlined procedures in past Commission cases. Included in the special rules is a new procedure which should assist parties in introducing

[1] The Notice referred to the service by the acronym ECOM rather than its trademark name E-COM. All subsequent documents will use the trademarked name.

interrogatories and answers into the record. The Secretary of the Commission will compile the interrogatories which the parties designate for inclusion in the record as described in special rule 6A. This procedure has facilitated cross-examination in Docket MC83–2.

By the Commission.

Cyril J. Pittack,

Acting Secretary.

Attachment B—Hearing Schedule for Proceedings E–COM Rates and Classifications

Docket No. R83–1

June 21 1983—Prehearing Conference (10:00 a.m. in the Commission hearing rooms)
July 1, 1983—Completion of all discovery directed to the Postal Service
July 26, 1983—Beginning of hearings, *i.e.*, cross-examination of the Postal Service's case-in-chief. (9:30 a.m. in the Commission hearing room)
August 18, 1983—Filing of the case-in-chief of each participant (including that of OOC)
September 16, 1983—Completion of all discovery directed to the intervenors
October 12, 1983—Beginning of evidentiary hearings as to the case-in-chief of other participants. (9:30 a.m. in the Commission hearing room)
November 4, 1983—Rebuttal evidence of the Postal Service and each participant. (No discovery to be permitted on this rebuttal evidence; only oral cross-examination)
November 15, 1983—Beginning of evidentiary hearings on rebuttal evidence. (9:30 a.m. in the Commission hearing room)
December 5, 1983—Initial briefs filed
December 15, 1983—Reply briefs filed
December 22, 1983—Oral Argument (if scheduled)

Attachment C.—Proposed Special Rules of Practice

1. Discovery

A. General. The discovery procedures set forth herein are not exclusive. The parties are encouraged to engage in informal discovery wherever possible to clarify exhibits and testimony. The results of such efforts may be introduced into the record by stipulation, by supplementary testimony or exhibit, by presenting selected written interrogatories and answers for adoption by a witness at the hearing, or by other appropriate means.

B. Objections to Discovery. In the interest of expedition, the bases for objecting to (1) interrogatories, (2) requests for production of documents or things for the purpose of discovery, and (3) requests for admissions for purposes of discovery shall be clearly and fully stated. A participant claiming privilege shall identify the specific evidentiary privilege asserted and state the reasons for applicability. A participant claiming undue burden shall state with particularity the effort which would be required to answer the interrogatories or requests, providing estimates of costs and workhours required to the extent possible. The party objecting to interrogatories or requests for production of documents or things shall within 10 days serve its objections on the party who served the interrogatories or requested production of documents or things. Copies of objections to interrogatories and/or requests shall be filed with the Secretary and served as provided in special rule 1.F., below.

C. Compelled Answers or Production of Documents or Things. Parties who have objected to interrogatories or requests for production of documents or things which are the subject of a motion to compel shall have seven days to answer such a motion. Answers will be considered supplements to the arguments presented in the initial objection.

Upon motion of any participant to the proceeding, the Commission or the presiding officer may compel production of documents or things, or compel an answer to an interrogatory or request for admissions if the objection is found not to be valid.

Compelled answers, documents or things shall be made available to the party making the motion within 10 days of the grant of a motion to compel or such other period designated by the presiding officer or the Commission. Copies of the answers or documents or things ordered to be produced shall also be made available to the Secretary pursuant to § 3001.9 and the other participants who request them.

D. Supplemental Answers to Interrogatories. Participants are expected to serve supplemental answers whenever appropriate. Participants filing supplemental answers shall indicate whether the answer merely supplements the previous answer to make it current, or whether it is intended as a complete replacement for the answer previously given.

E. Follow-Up Interrogatories. Follow-up interrogatories should be served within five days of receipt of the answer to the prior interrogatory unless extraordinary circumstances are shown.

F. Service. Interrogatories, objections, and answers thereto should be served in conformance with § 3001.12, on the Commission, the Officer of the Commission (three copies), on the complementary party, and on any other participant so requesting. Participants will be deemed to have requested service for purposes of these special rules unless they file a document to the contrary with the Commission.

Participants filing notice of intervention are responsible for ascertaining from the Commission docket section what discovery requests, motions, or other documents have been previously filed, and obtaining copies thereof from counsel.

2. Case-in-Chief

The case-in-chief of all participants shall be in writing and shall include the participant's direct case and its rebuttal, if any, to the United States Postal Service's case-in-chief. It may be accompanied by legal memoranda, where appropriate.

3. Exhibits

Exhibits should be self-explanatory. They should contain appropriate footnotes or narrative explaining the source of each item of information used and the methods employed in statistical compilations. The principal title of each exhibit should state what it contains and may also contain a statement of the purpose for which the exhibit is offered; however, such a statement will not be considered part of the evidentiary record. Where one part of a multi-page exhibit is based on another part, as on another exhibit, appropriate cross references should be made. Relevant exposition should be included in the exhibits or given in the accompanying testimony.

4. Motions to Strike

Motions to strike are requests for extraordinary relief and are not substitutes for briefs or rebuttal evidence. All motions to strike testimony or exhibit materials are to be submitted in writing at an early date, and at least 10 days before the scheduled appearance of the witness. Responses to such motions shall be made five days after the filing of the motion.

5. Official Notice

Parties requesting offical notice should refer to the page and paragraph of such material and should furnish copies of the designated item for the record and for other parties.

6. Cross-examination

A. Written cross-examination. Written cross-examination will be utilized as a substitute for oral cross-examination whenever possible, particularly to introduce factual or statistical evidence. The scope of oral cross-examination is set forth in special rule 6.B., below.

Designations of written cross-examination should be served three working days before the announced appearance of a witness, on the Commission, on the Officer of the Commission (three copies), on the witness' counsel, and on any participant so requesting. Designations shall identify every item to be offered as evidence, listing the participant which initially posed the request, the witness or party to whom the question was addressed (if different from the witness answering) and, if more than one answer was provided, the dates of all answers to be included in the record. When a participant designates

written cross-examination, it shall simultaneously file with the Secretary of the Commission only, two copies of the designated written cross-examination.

The Secretary of the Commission shall prepare for the record a packet containing all materials designated for written cross-examination, alphabetically, by participant which initially posed the question. The witness will verify the answers and materials in the packet, and they will be entered into the transcript by the presiding officer. Counsel for a witness may object to written cross-examination at that time, and any designated answers or materials found objectionable will be stricken from the record.

B. Oral cross-examination. Oral cross-examination will be permitted for testing assumptions, conclusions, or other opinion evidence. Requests for permission to conduct oral cross-examination should be served three days before the announced appearance of a witness accompanied by (1) specific references to the subject matter to be examined, and (2) page references to the relevant direct testimony.

7. General

Argument will not be received in evidence. It is the province of the lawyer, not the witness. It should be presented in brief or memoranda.

New affirmative matter (not in reply to another party's direct case) should not be included in rebuttal testimony or exhibits.

Cross-examination will be limited to testimony which is adverse to the participant wishing to cross-examine.

Legal memoranda, where appropriate, will be welcome at any stage of the proceeding.

BILLING CODE 7715-01-M

SECURITIES AND EXCHANGE COMMISSION

[Release No. 19851; File No. SR-SCCP-83-4]

Filing and Immediate Effectiveness of a Proposed Rule Change by the Stock Clearing Corporation of Philadelphia

June 6, 1983.

Pursuant to Section 19(b)(1) of the Securities Exchange Act of 1934 (the "Act"), 15 U.S.C. 78s(b)(1), notice is hereby given that on May 19, 1983, the Stock Clearing Corporation of Philadelphia ("SCCP") filed with the Securities and Exchange Commission the proposed rule change as described herein. The Commission is publishing this notice to solicit comments on the proposed rule change from interested persons.

The proposed rule change amends SCCP's day trading margin procedures for SCCP participants that are specialists on the Philadelphia Stock Exchange, INC. ("PHLX") and that maintain SCCP margin accounts. The proposal amends SCCP's "Proprietary or Specialist Margin Account Agreement" to enable SCCP, in its discretion, to transfer excess equity, *i.e.*, cash and securities, between each participant's Specialist and Proprietary Margin Accounts. Previously, a participant had to have the required minimum equity in its proprietary account before it could execute an opening day-trade. To meet those equity requirements, the member could instruct SCCP to transfer physically from its specialist to its proprietary account excess equity to meet the equity requirement for day trading. SCCP explains that the more efficient application of excess equity assets in SCCP margin accounts will support increased trading activity by the PHLX specialist community without reducing the financial safeguards in SCCP's specialist financing program.

SCCP states that the proposed rule change is consistent with Section 17A(b)(3)(F) of the Act because it will promote the prompt and accurate clearance and settlement of securities transactions and will not adversely affect the safeguarding of securities and funds which are in SCCP's control or for which it is responsible.

The foregoing change has become effective, pursuant to Section 19(b)(3)(A) of the Act and subparagraph (e) of Securities Exchange Act Rule 19b-4. At any time within 60 days of the filing of proposed rule change, the Commission may summarily abrogate such rule change if it appears to the Commission that such action is necessary or appropriate in the public interest, for the protection of investors, or otherwise in furtherance of the purposes of the Act.

Interested persons are invited to submit written data, views and arguments concerning the submission within 21 days after the date of publication in the Federal Register. Persons desiring to make written comments should file six copies thereof with the Secretary of the Commission, Securities and Exchange Commission, 450 Fifth Street, NW., Washington, D.C. 20549. Reference should be made to File No. SR-SCCP-83-4.

Copies of the submission, all subsequent amendments, all written statements with respect to the proposed rule change which are filed with the Commission, and all written communications relating to the proposed rule change between the Commission and any person, other than those which may be withheld from the public in accordance with the provisions of 5 U.S.C. 552, will be available for inspection and copying at the Commission's Public Reference Room, 450 Fifth Street, NW., Washington, D.C. Copies of the filing and of any subsequent admendments also will be available for inspection and copying at the principal office of the above-mentioned self-regulatory organization.

For the Commission, by the Division of Market Regulation pursuant to delegated authority.

George A. Fitzsimmons,

Secretary.

BILLING CODE 8010-01-M

[Release No. 13303; 812-5506]

NAFE Money Market Fund, Inc.; Filing of Application for an Order Granting Exemptions

June 3, 1983.

Notice is hereby given that NAFE Money Market Fund, Inc. ("Applicant"), 52 Vanderbilt Avenue, New York, NY 10017, registered under the Investment Company Act of 1940 ("Act") as an open end, diversified, management investment company, filed an application on March 25, 1983, and amendments thereto on May 20, 1983 and May 24, 1983, requesting an order of the Commission, pursuant to Section 6(c) of the Act, exempting Applicant from the provisions of Section 2(a)(41) of the Act and Rules 2a-4 and 22c-1 thereunder, to the extent necessary to permit Applicant to compute its net asset value per share using the amortized cost method of valuation. All interested persons are referred to the application on file with Commission for a statement of the representations contained therein, which are summarized below, and to the Act and rules thereunder for the text of the provisions from which Applicant seeks to be exempted.

Applicant states that its investment objective is to provide investors with the highest level of current income consistent with the preservation of capital and liquidity. Applicant states that it will invest exclusively in the following types of money market instruments: (1) obligations issued, or guaranteed as to interest and principal, by the United States Government or its agencies or instrumentalities; (2) obligations (including certificates of deposit and bankers' acceptances) of banks having total assets in excess of $500,000,000 and regulated by the United States Government; (3) commercial paper that is rated A1 or A2 by Standard & Poor's Corporation or P1 or P2 by Moody's Investors Service, Inc., or, if not rated, then of comparable quality as determined by the Board of Directors; and (4) repurchase

agreements. Applicant represents that it will not enter into repurchase agreements maturing in more than 7 days.

Section 6(c) of the Act provides, in pertinent part, that the Commission, by order upon application, may conditionally or unconditionally exempt any person, security or transaction, or any class or classes of persons, securities or transactions, from any provision or provisions of the Act or of any rule or regulation thereunder, if and to the extent that such exemption is necessary or appropriate in the public interest and consistent with the protection of investors and the purposes fairly intended by the policy and provisions of the Act.

In support of the relief requested, Applicant states that industry experience indicates that in order to attract and retain investors it must maintain stability of principal and provide a steady flow of investment income. Applicant believes that it can provide these features by valuing its assets on the basis of amortized cost. Applicant states that, given the nature of its policies and operations, there will normally be a negligible discrepancy between the market value and the amortized cost value of its portfolio securities. Applicant represents that its Board of Directors has determined in good faith that the amortized cost method of valuing portfolio securities is appropriate and preferable for Applicant and reflects fair value of its portfolio securities.

Applicant has agreed that the following conditions may be imposed in any order of the Commission granting the exemptive relief requested:

1. In supervising Applicant's operations and delegating special responsibilities involving portfolio management to Applicant's investment adviser, Applicant's Board of Directors undertakes—as a particular responsibility within the overall duty of care owed to its shareholders—to establish procedures reasonably designed, taking into account current market conditions and Applicant's investment objectives, to stabilize Applicant's net asset value per share, as computed for the purpose of distribution, redemption and repurchase at $1.00 per share.

2. Included within the procedures to be adopted by the Board of Directors shall be the following:

(a) Review by Applicant's Board of Directors, as it deems appropriate and at such intervals as are reasonable in light of current market conditions, to determine the extent of deviation, if any, of the net asset value per share as determined by using available market quotations from Applicant's $1.00 amortized cost price per share, and maintenance of records of such review.[1]

(b) In the event such deviation from the $1.00 amortized cost price per share exceed ½ of 1 percent, Applicant's Board of Directors will promptly consider what action, if any, should be initiated.

(c) Where Applicant's Board of Directors believes the extent of any deviation from the Applicant's $1.00 amortized cost price per share may result in material dilution or other unfair results to investors or existing shareholders, it shall take such action as it deems appropriate to eliminate or to reduce to the extent reasonably practicable such dilution or unfair results, which action may include: redemption of shares in kind, the sale of portfolio securities prior to maturity to realize capital gains or losses, or to shorten Applicant's average portfolio maturity; withholding dividends; or utilizing a net asset value per share as determined by using available market quotations.

3. Applicant will maintain a dollar-weighted average portfolio maturity appropriate to its objective of maintaining a stable net asset value per share; provided, however, that Applicant will not (a) purchase any instrument with a remaining maturity of greater than one year or (b) maintain a dollar-weighted average portfolio maturity in excess of 120 days.[2]

4. Applicant will record, maintain and preserve permanently in an easily accessible place a written copy of the procedures (and any modifications thereto) described in condition 1 above, and Applicant will record, maintain and preserve for a period of not less than six years (the first two years in an easily accessible place) a written record of Applicant's Board of Directors' considerations and actions taken in connection with the discharge of its responsibilities, as set forth above, to be included in the minutes of the Board of Directors' meetings. The documents preserved pursuant to this condition shall be subject to inspection by the Commission in accordance with Section 31(b) of the Act as though such documents were records required to be maintained pursuant to rules adopted under Section 31(a) of the Act.

5. Applicant will limit its portfolio investments, including repurchase agreements, if any, to those United States dollar-denominated instruments which Applicant's Board of Directors determines present minimal credit risks, and which are of "high quality" as determined by any major rating service or, in the case of any instrument that is not rated, of comparable quality as determined by Applicant's Board of Directors.

6. Applicant will include in each quarterly report, as an attachment to Form N–1Q, a statement indicating whether any action pursuant to condition 2(c) above was taken during the preceding fiscal quarter, and, if any action was taken, will describe the nature and circumstances of such action.

Notice is further given that any interested person wishing to request a hearing on the application may, not later than June 23, 1983, at 5:30 p.m., do so by submitting written request setting forth the nature of his interest, the reasons for his request, and the specific issues, if any, of fact or law that are disputed, to the Secretary, Securities and Exchange Commission, Washington, D.C. 20549. A copy of the request should be served personally or by mail upon Applicant at the address stated above. Proof of service (by affidavit or, in the case of an attorney-at-law, by certificate) shall be filed with the request. Persons who request a hearing will receive any notices and orders issued in this matter. After said date, an order disposing of the application will be issued unless the Commission orders a hearing upon request or upon its own motion.

For the Commission, by the Division of Investment Management, pursuant to delegated authority.

George A. Fitzsimmons,

Secretary.

[FR Doc. 83–15549 Filed 6–9–83; 8:45 am]

BILLING CODE 8010–01–M

[1] To fulfill this condition, Applicant states that it will use actual quotations or estimates of market value reflecting current market conditions selected by its Board of Directors in the exercise of its discretion to be appropriate indicators of value, which may include, *inter alia*, (i) quotations or estimates of market value for individual portfolio instruments, or (ii) values obtained from yield data relating to classes of money market instruments furnished by reputable sources.

[2] In fulfilling this condition, if the disposition of a portfolio instrument results in a dollar-weighted average portfolio maturity in excess of 120 days, Applicant will invest its available cash in such a manner as to reduce its dollar-weighted average portfolio maturity to 120 days or less as soon as reasonably practicable.

[Release No. 22963; 70–5862, 70–6322]

Ohio Power Company; Supplemental Notice of Proposed Provision of Services by Electric Utility Subsidiary to Associated Companies

June 6, 1983.

Ohio Power Company ("OPCo"), 301 Cleveland Avenue, S.W., Canton, Ohio 44702, an electric utility subsidiary of

American Electric Power Company, Inc. ("AEP"), a registered holding company, has filed with this Commission post-effective amendments to applications-declarations previously filed and amended pursuant to Section 13 of the Public Utility Holding Company Act of 1935 ("Act") and Rules 86, 87, 90 and 91 promulgated thereunder.

By prior order dated June 25, 1976 (HCAR No. 19594), OPCo was authorized to acquire under long-term lease and to operate a rail-to-river coal transfer facility, known as the Cook Coal Terminal ("Terminal"), located near Metropolis, Illinois. OPCo uses the Terminal to transfer low-sulfur coal arriving by unit train to river barges for delivery to its stream electric generating plants along the Ohio River. OPCo has also been authorized to acquire and operate railroad car maintenance facilities at the Terminal (HCAR No. 21173, August 3, 1979 and HCAR No. 21886, January 16, 1981). This would permit OPCo to provide maintenance and repair services to the fleet of railroad hopper cars acquired by it and other operating companies in the AEP System for the transport of coal to the Terminal.

By post-effective amendments, OPCo now seeks authority to provide the following services at the Terminal: (1) A coal transloading service to associated companies within the AEP System (with respect to which jurisdiction was expressly reserved in the aforementioned order of June 25, 1976), and, (2) a railroad car maintenance and repair service to associated companies within the AEP System. The Commission's prior notice to the public of these proposed transactions (HCAR No. 22948, May 19, 1983) incorrectly stated that OPCo also sought authority to provide the coal transloading service to nonaffiliated companies. OPCo intends to provide such services to nonaffiliates and seeks Commission authorization only with respect to the proposed accounting treatment of the revenues derived from such services, as previously set forth in said notice of May 19, 1983. In all other respects, the proposed transactions are as detailed in the aforementioned notice.

The applications-declarations, as amended by said post-effective amendments and any amendments thereto, are available for public inspection through the Commission's Office of Public Reference. Interested persons wishing to comment or request a hearing should submit their views in writing by June 15, 1983, to the Secretary, Securities and Exchange Commission, Washington, D.C. 20549, and serve a copy on the applicant-declarant at the address specified above. Proof of service (by affidavit or, in the case of an attorney at law, by certificate) should be filed with the request. Any request for a hearing shall identify specifically the issues of fact or law that are disputed. A person who so requests will be notified of any hearing, if ordered, and will receive a copy of any notice or order issued in this matter. After said date, the applications-declarations, as amended or as they may be further amended, may be granted and permitted to become effective.

For the Commission, by the Division of Corporate Regulation, pursuant to delegated authority.

George A. Fitzsimmons,

Secretary.

BILLING CODE 8010-01-M

[Release No. 19848; SR-MSE-83-5]

Order Approving Proposed Rule Change; Midwest Stock Exchange, Inc.

June 3, 1983.

The Midwest Stock Exchange, Inc. ("MSE"), 120 South LaSalle Street, Chicago, Illinois 60603, submitted on April 22, 1983, copies of a proposed rule change pursuant to Section 19(b)(1) of the "Securities Exchange Act of 1934 (the "Act") and Rule 19b-4 thereunder, to amend Article III, Section 2 and Article IV, Section 4 of the MSE Constitution. The proposed amendment will increase the number of governors on the MSE Board of Governors from 26 to 27 by adding a new position for a Chicago area member governor. The amendment also increases the minimum number of floor representatives on the Board from the Chicago area from two to three.

Notice of the proposed rule change together with the terms of substance of the proposed rule change was given by the issuance of a Commission Release (Securities Exchange Act Release No. 19717, April 29, 1983) and by publication in the **Federal Register** (48 FR 20322, May 11, 1983). No comments were received with respect to the proposed rule filing.

The Commission finds that the proposed rule change is consistent with the requirements of the Act and the rules and regulations thereunder applicable to a national securities exchange and, in particular, the requirements of Section 6 and the rules and regulations thereunder.

It is therefore ordered, pursuant to Section 19(b)(2) of the Act, that the above-mentioned proposed rule change be, and hereby is, approved.

For the Commission, by the Division of Market Regulation pursuant to delegated authority.

George A. Fitzsimmons,

Secretary.

[FR Doc. 83-15560 Filed 6-9-83; 8:45 am]

BILLING CODE 8010-01-M

[Release No. 19849; File No. SR-MSRB-82-16]

Order Approving Proposed Rule Change; Municipal Securities Rulemaking Board

June 6, 1983.

The Municipal Securities Rulemaking Board ("MSRB"), 1150 Connecticut Avenue, NW., Washington, D.C. 20036, submitted a proposed rule change pursuant to Section 19(b)(1) of the Securities Exchange Act of 1934 ("Act") and Rule 19b-4 thereunder on December 22, 1982, and an amendment thereto on March 7, 1983, which amends MSRB Rule G-12(h) by revising the procedures to be used by municipal securities brokers and dealers seeking to effect close-outs of uncompleted transactions in municipal securities. The proposed rule change deletes the requirement that the dealer attach a copy of the *contra* dealer's confirmation to close-out notices. In addition, the proposed rule change permits the initiation of close-out procedures on certain transactions reclaimed after ninety days following the original settlement date to provide a more expeditious resolution of such reclaimed transactions. It also permits a selling dealer receiving an initial close-out notice, which has not been retransmitted, to extend the close-out period for ten business days if the securities demanded are already in transfer and the initial notice of close-out is given before January 1, 1985. The MSRB believes that these changes will facilitate the settlement of reclaimed transactions, permit more efficient use of the close-out procedure, and still provide an appropriate period of time to complete transfer processes.

Notice of the proposed rule change, as amended, together with the terms of substance was given by the issuance of a Commission release (Securities Exchange Act Release No. 19701, April 25, 1983) and by publication in the **Federal Register** (48 FR 19960, May 3, 1983). No comments were received with respect to the proposed rule filing.

The Commission finds that the proposed rule change is consistent with the requirements of the Act and the rules and regulations thereunder

applicable to the MSRB and, in particular, the requirements of Section 15B and the rules and regulations thereunder.

It is therefore ordered, pursuant to Section 19(b)(2) of the Act, that the above-mentioned proposed rule change be, and hereby is, approved.

For the Commission, by the Division of Market Regulation, pursuant to delegated authority, 17 CFR 200.30–3(a)(12).

George A. Fitzsimmons,

Secretary.

BILLING CODE 8010–01–M

[Release No. 34–19844; File No. SR–CBOE–83–04]

Self-Regulatory Organizations; Proposed Rule Change by Chicago Board Options Exchange, Incorporated; Relating to Facilitation

Pursuant to Section 19(b)(1) of the Securities Exchange Act of 1934, 15 U.S.C. 78s(b)(1), notice is hereby given that on May 16, 1983, the Chicago Board Options Exchange, Incorporated filed with the Securities and Exchange Commission the proposed rule change as described in Items I, II and III below, which Items have been prepared by the self-regulatory organization. The Commission is publishing this notice to solicit comments on the proposed rule change from interested persons.

I. Text of Proposed Rule Change

Additions are italicized; deletions are bracketed.

Priority of Bids and Offers

Rule 6.45.(d) Notwithstanding anything in paragraphs (a) and (b) to the contrary, [when] a member *who* hold[ing]*s* a spread [order], [a] straddle [order], or [a] combination order *which is being* [and] bid[ding] or offer[ing]*ed* on the basis of a total credit or debit [for the order has determined that the order may not be executed by a combination of transactions with or within the bids and offers displayed by the Board Broker or Order Book Official, then the order] may [be] execute[d as a spread, straddle, or combination] *such order* at the total credit or debit with one *or more* other members without giving priority to bids or offers [of] *for individual option series by* the Board Broker or Order Book Official *or by members in the trading crowd* that are no better than the [bids or offers] *premiums* comprising such total credit or debit.

Certain Types of Orders Defined

Rule 6.53. No change except to add to paragraph (d) as follows. (d) Spread Order. A spread order is (*i*) an order to buy a stated number of option contracts and to sell [the same number of] option contracts [, or contracts representing the same number of shares at option, of the same class of options.] *of the same class representing the same number of units of the underlying security or (ii) an order to buy or sell a stated number of units of an underlying or a related security coupled with either (a) the purchase or sale of option contract(s) of the same series on the opposite side of the market representing the same number of units of the underlying or related security or (b) the purchase and sale of an equal number of put and call option contracts, each having the same exercise price, expiration date and number of units of the underlying or related security, on the opposite side of the market representing in aggregate twice the number of units of the underlying or related security.*

"Crosings" Orders

Rule 6.74.(a)(i) No change

(ii) After providing an opportunity for such bids and offers to be made, he must (*A*) bid above the highest bid in the market *and give a corresponding offer at the same price or at prices differing by the minimum fraction* or (*B*) offer below the lowest offer in the market *and give a corresponding bid* at the same price or at prices differing by the minimum fraction.

(b) A Floor Broker who holds an order for a public customer of a member organization and a facilitation order may cross such orders provided that he proceeds in the following manner.

(i) The member organization must disclose on its option order ticket all of the terms of the public-customer order, including any contingency involving, *and all related transactions in,* either [other] options or underlying or related securities.

(ii) In accordance with his responsibilities for due diligence, the Floor Broker shall disclose [any contingency respecting] *all securities which are components of* the public customer order[, shall identify the order as being subject to facilitation,] and then shall request bids and offers for the [option series] *execution of all components of the order.*

(iii) After providing an opportunity for such bids and offers to be made, the Floor Broker must, on behalf of the public customer, either bid above the highest bid in the market or offer below the lowest offer in the market, *identify the order as being subject to facilitation, and disclose all terms and conditions of the public customer order.* After all other market participants are given an opportunity to accept the bid or offer made on behalf of the public customer, the Floor Broker may cross all or any remaining part of the public customer order and the facilitation order at the public customer's bid or offer by announcing in public outcry that he is crossing and by stating the quantity and price(s). Once such bid or offer has been made, the public customer order has precedence over any other bid or offer in the crown at the same price, to trade immediately with the facilitation order.

(c) No change

. . . Interpretations and Policies:

.01 and .02 No change

.03 *Spread, straddle or combination orders on opposite sides of the market may be crossed, provided that the Floor Broker holding such orders proceeds in the manner described in paragraphs (a) or (b) above as appropriate. Members may not prevent a spread, straddle, or combination cross from being completed by giving a competing bid or offer for one component of such order.*

.04 *Where a related transaction must be effected in another market, that transaction must be effected prior to effecting the options transaction.*

II. (A) Self-Regulatory Organization's Statement of the Purpose of, and the Statutory Basis for, the Proposed Rule Change

The overall purpose of this rule change is to expedite the filling of public-customer option orders which come to the Exchange's trading floor with a facilitation order. A facilitation order is a firm proprietary order sent to the Exchange floor at the same time as customer order that is on the other side of the market. The firm's order can be crossed with the customer's order to facilitate its execution on the Exchange only if no equal or better execution of the customer order can be obtained from another member.

The proposed changes to Rule 6.74(b)(ii) and (iii) provide that a floor broker must disclose the existence of a related transaction, but not the specific terms of the order, before rather than after requesting bids and offers. The purpose of this is to advise market participants of the entire package of securities involved, but not require that the exact details of an order be disclosed before markets are requested. It is thought that quotes more favorable to the customer may be obtained if quotes are requested prior to disclosure of the particulars of the order.

The purpose of the draft change to Rule 6.45(d) is to make clear that all spread, straddle or combination orders bid or offered on the basis of a total debit or credit enjoy a priority over orders in the trading crowd analogous to the exception afforded by the current rule to orders held by a Board Broker or Order Book Official.

The draft changes to Rules 6.53 and 6.74.03 provide that a stock-option hedge is to be treated as a single spread order. The purpose of treating a stock-option hedge as a single spread order is to accord it the same exception to the priority rules as other combination orders involving only options, thereby permitting facilitation crosses to occur when markets are "locked.".

The following example illustrates how a "locked" market would prevent one component of a public customer spread order from being filled on the Exchange. Assume that a spread order, bid or offered on the basis of a total debit or credit for both components can be executed at the agreed total premium only if an option component can be executed at a premium of 3½. The screen shows a bid of 3⅜ and an offer of 3⅝ for that option. A Floor Broker discloses a public customer buy order at 3½ that is subject to facilitation and asked for a market.

The market becomes 3⅜ bid and 3½ offered, which market prevents that component of the customer order from being filled because Rule 6.74(a)(ii) requires that to cross orders, a Floor Broker must bid above the highest bid and must offer below the lowest offer in the market. By permitting an option transaction for one component of a spread order to be effected at a premium equal to but not better than the current market for that component, the spread order can be facilitated notwithstanding the locked market in one component.

Proposed Interpretation 6.74.04 provides that a related stock transaction must be effected before the option transaction. The purpose of this addition is to insure that the stock price involved in stock leg of a facilitation cross in not fixed on the Exchange's trading floor.

The statutory basis for this proposed rule change is section 6(b)(5) of the Securities Exchange Act of 1934, in that the change will protect investors and the public interest.

(B) Self-Regulatory Organization's Statement on Burden on Competition

The Exchange does not believe that the proposed rule change will impose any burden on competition.

(C) Self-Regulatory Organization's Statement on Comments on the Proposed Rule Change Received from Members, Participants or Others

Comments were neither solicited nor received. It should be noted that the proposed change originated with the Exchange's Floor Procedure Committee, which is composed of members.

III. Date of Effectiveness of the Proposed Rule Change and Timing for Commission Action

Within 35 days of the date of publication of this notice in the Federal Register or within such longer period (i) as the Commission may designate up to 90 days of such date if it finds such longer period to be appropriate and publishes its reasons for so finding or (ii) as to which the self-regulatory organization consents, the Commission will:

(A) By order approve such proposed rule change, or

(B) Institute proceedings to determine whether the proposed rule change should be disapproved.

IV. Solicitation of Comments

Interested persons are invited to submit written data, views and arguments concerning the foregoing. Persons making written submissions should file six copies thereof with the Secretary, Securities and Exchange Commission, 450 Fifth Street, NW., Washington, D.C. 20549. Copies of the submission, all subsequent amendments, all written statements with respect to the proposed rule change that are filed with the Commission, and all written communications relating to the proposed rule change between the Commission and any person, other than those that may be withheld from the public in accordance with the provisions of 5 U.S.C. 552, will be available for inspection and copying at the Commission's Public Reference Section, 450 Fifth Street, NW., Washington D.C. Copies of such filing will also be available for inspection and copying at the principal office of the above-mentioned self-regulatory organization. All submissions should refer to the file number in the caption above and should be submitted within 21 days after the date of this publication.

For the Commission by the Division of Market Regulation, pursuant to delegated authority.

Dated: June 3, 1983.

George A. Fitzsimmons

Secretary.

Equitable Tax-Free Account, Inc.; Filing of Application

Notice is hereby given that Equitable Tax-Free Account, Inc. (the "Fund") 100 West 52nd St., New York, N.Y. 10019, registered under the Investment Company Act of 1940 ("Act") as an open-end, diversified management investment company, filed an application on March 10, 1983, and amendments thereto on April 27, and May 25, 1983, requesting an order of the Commission, pursuant to Section 6(c) of the Act, exempting the Fund and any additional separate investment portfolios which may be established by the Fund in the future (the "Portfolios") (1) from the provisions of Section 2(a)(41) of the Act and Rules 2a–4 and 22c–1 thereunder to the extent necessary to permit the net asset value of the Fund and each Portfolio to be computed using the amortized cost method of valuation; and (2) from the provisions of Section 12(d)(3) of the Act to the extent necessary to permit the Fund and each Portfolio to acquire rights to sell portfolio securities to broker-dealers. All interested persons are referred to the application on file with the Commission for a statement of the representations contained therein, which are summarized below, and to the Act for the complete text of the provisions from which an exemption is being sought.

The Fund states that it will operate as a "money market fund", designed for use by individual investors or by organizations such as corporations, partnerships, trusts and others. The Fund's investment objective is the maximization of current income exempt from federal income taxation to the extent consistent with the preservation of capital and the maintenance of liquidity. According to the application, the Fund will pursue its investment objective by investing in a diversified portfolio of high-grade short-term municipal securities. Applicant maintains that the term "municipal securities" means obligations issued by or on behalf of states, territories, and possessions of the United States and its political subdivisions, agencies and instrumentalities, the interest from which is exempt from federal income taxation. The municipal securities in which the Fund will invest are limited to those obligations which at the time of purchase are:

(1) Guaranteed by the United States Government or its agencies or instrumentalities, (2) municipal notes rated at least MIG–2 by Moody's Investors Service, Inc. ("Moody's"), or, if

not rated, are of equivalent investment quality as determined by the Board of Directors, (3) municipal bonds rated at least Aa by Moody's, at least AA by Standard & Poor's Corporation ("S&P") or, if not rated, are of equivalent investment quality as determined by the Board of Directors, or (4) other types of municipal securities provided that such obligations are rated at least Prime-2 by Moody's, at least A–2 by S&P, or, if not rated, are of equivalent investment qualify as detemined by the Board of Directors.

The Fund represents that it may at times invest up to 20% of its total assets in taxable money market securities consisting of securities issued, or guaranteed by the United States government or its agencies or instrumentalities, negotiable certificates of deposit ("CDs") and bank time deposits issued by domestic banks, including Eurodollar CDs and bank time deposits issued by London branches of domestic banks, bankers' acceptances, and high grade commercial paper, including master demand notes. Applicant submits that investments in CDs and bankers' acceptances are limited to domestic banks which are considered by the management of the Fund to be of high quality and to present minimal credit risks. According to the application, the commercial paper purchased by the Fund consists only of direct obligations which, at the time of their purchase, are (a) rated at least Prime-1 by Moody's or at least A–1 by S&P or (b) if not rated, issued by companies having an outstanding debt issue currently rated at least Aa by Moody's or at least AA by S&P.

The Fund states that it may also enter into repurchase agreements pertaining to the types of securities in which it may invest. The Fund states that it will require continual maintenance of collateral in an amount equal to, or in excess of, the market value of the securities which are subject to the agreement. The Fund represents that it may also invest in commitments to purchase municipal securities on a "when-issued" basis. The Fund represents further that, at the time the Fund makes a commitment to purchase a municipal security on a "when-issued" basis, it will record the transaction and reflect the value of the obligation in determining its net asset value. The Fund states that its custodian bank will maintain, in a separate account of the Fund, portfolio securities having a value equal to, or greater than, the amount of the Fund's commitments to purchase when-issued securities.

The Fund states that variable rate demand instruments are within the categories of municipal and taxable securities in which the Fund may invest. The Fund maintains that its variable rate demand instruments will be payable on not more than seven days' notice either by the issuer or by drawing on a bank letter of credit or guarantee issued with respect to such instrument either at the time of original issuance of the instrument or at the time the Fund purchases the instrument. The Fund indicates that the interest rates of the instruments will be adjustable at intervals of up to one year.

The Fund states that it may purchase from banks participation interests in variable rate instruments to produce a negotiated, variable rate yield to the Fund based on the applicable interest rate adjustment index for the security. The Fund submits that the bank will retain any excess of interest income on the instrument above the negotiated yield to the Fund for servicing the underlying loan and issuing the letter of credit. The Fund represents that each instrument purchased will meet the quality criteria applicable to the Fund's portfolio securities. Applicant asserts that the maturities of variable rate demand instruments will be determined in accordance with the procedures set forth in proposed Rule 2a-7 under the Act (Investment Company Act Release No. 12206, February 1, 1982) as proposed or adopted.

The Fund believes that use of the amortized cost valuation method will benefit its shareholders by enabling the Fund to maintain a constant net asset value of $1.00 per share while providing shareholders with the opportunity to receive a relatively steady flow of investment income. The Fund believes that there will normally be a negligible discrepancy between the market value and the amortized cost value of the Fund's portfolio securities because the Fund will invest only in high-grade securities with a remaining maturity of one year or less. Applicant states that it has determined that the amortized cost method of valuing the Fund's portfolio securities will reflect the fair value of such securities, absent unusual or extraordinary circumstances, and is appropriate and in the best interest of its shareholders.

The Fund states further that it intends to improve its portfolio liquidity through the acquisition of "standby commitments". A standby commitment is a right acquired by the Fund, when it purchases a municipal security for its portfolio from a broker-dealer or a bank, to sell the same principal amount of the securities purchased back to the seller, at the Fund's option, at a specified price. The Fund's investment policies permit the acquisition of standby commitments solely to facilitate portfolio liquidity. The acquisition or exercisability of a standby commitment will not affect the valuation or maturity of the underlying portfolio security which will be valued in accordance with the amortized cost method.

The Fund represents that standby commitments acquired by the Fund will have the following features: (1) standby commitments will be in writing and will be physically held by the Fund's custodian; (2) standby commitments may be exercisable by the Fund at any time prior to the maturity of the underlying security; (3) the Funds right to exercise standby commitments will be unconditional and unquoilfied; (4) the Fund will enter into standby commitments only with broker-dealers or banks which, in the investment adviser's opinion, present a minimal risk of default; (5) although standby commitments will not be transferable, municipal securities purchased subject to standby commitments could be sold to a third party at any time, even though the standby commitments remain outstanding; and (6) the exercise price of each standby commitment will be (a) the cost of the municipal securities which are subject to the standby commitment (excluding any accrued interest which the Fund paid on their purchase), less any amortized market premium or plus any amortized market or original issue discount during the period the Fund owned the securities, plus (b) all interest accrued on the underlying municipal securities since the most recent interest payment date during the period the securities were held by the Fund.

The Fund represents that the amount payable under a standby commitment will be substantially the same as the value assigned by the Fund to the underlying municipal securities because the Fund will value its municipal securities on an amortized cost basis. According to the application, there is little risk of an event occurring which would make the amortized cost valuation of the Fund's portfolio securities inappropriate. In the unlikely event that the market or fair values of municipal securities in its portfolio were not substantially equivalent to their amortized cost value, however, the Fund states that it would value the municipal securities on the basis of available market information and would hold them to maturity. The Fund expects that it would refrain from exercising the standby commitments in such a

situation to avoid imposing a loss on a broker-dealer or bank, which could jeopardize the Fund's business relationship with that entity. According to the application, standby commitments may be available without payment of any direct or indirect consideration. It is stated that, if deemed necessary or advisable, the Fund will pay for standby commitments, either separately in cash or by paying a higher price for the municipal securities that are acquired subject to the standby commitments. Applicant states that, as a matter of policy, the total amount "paid" in either manner or outstanding standby commitments held in the Fund's portfolio will not exceed ½ of 1% of the value of the Fund's total assets calculated immediately after the acquisition of any such commitments.

The Fund represents that it is difficult to evaluate the likelihood of the use or the potential benefit of a standby commitment. Accordingly, the Fund's Board of Directors intends to determine that standby commitments have a "fair value" of zero, regardless of whether any direct or indirect consideration was paid. The Fund maintains that where it has paid for a standby commitment, its cost will be reflected as unrealized depreciation for the period during which the commitment is held. The Fund further maintains that for purposes of computing the dollar-weighted average maturity of the Fund's portfolio, the maturity of a portfolio security shall not be considered shortened or otherwise affected by any standby commitment to which such security is subject.

According to the application, counsel to the Fund has indicated that the Internal Revenue Service has published a ruling to the effect that a registered investment company will be the owner of municipal securities acquired subject to a commitment comparable to a standby commitment and that interest on those securities will be tax-exempt to the investment company. The Fund submits that the proposed acquisition of standby commitments will not affect the calculation of its net asset value per share and will not pose new investment risks, but rather will improve the Fund's liquidity. The Fund further represents that reliance upon the credit of broker-dealers and banks from which the Fund purchases standby commitments will be secured to the extent of the value of the municipal securities which are subject to the commitments. The Fund believes, therefore, that a standby commitment will present substantially less risk than a bank certificate of deposit and will be qualitatively no greater a risk than the risk of loss faced by any investment company which is holding securities pending settlement after having agreed to sell the securities to a broker-dealer in the ordinary course of business. The Fund states that its investment adviser intends to evaluate periodically the credit of institutions issuing standby commitments. The Fund states that, for that reason, and in light of the fact that standby commitments will not be ascribed value for purposes of determining the Fund's net asset value, the acquisition of standby commitments will not meaningfully expose its assets to the entrepreneurial risks of the investment banking business, nor require the Fund to evaluate the credit of broker-dealers in determining its net asset value. The Fund represents that it will not acquire standby commitments to promote reciprocal practices, to encourage the sale of its shares, or to obtain research services.

The Fund and each of the Portfolios, as a condition to the granting of the requested exemption, will adhere to the following conditions:

1. In supervising the Fund's operations and delegating special responsibilities involving portfolio management to the Fund's investment adviser, the Fund's Board of Directors undertakes—as a particular responsibility within the overall duty of care owed to its shareholders—to establish procedures reasonably designed, taking into account current market conditions and the Fund's investment objectives, to stabilize the net asset value per share of the Fund and each Portfolio, as computed for the purpose of distribution, redemption and repurchase, at $1.00 per share.

2. Included within the procedures to be adopted by the Board of Directors of the Fund shall be the following:

(a) Review by the Board of Directors, as it deems appropriate and at such intervals as are reasonable in light of current market conditions, to determine the extent of deviation, if any, of the net asset value per share of the Fund and each Portfolio, as determined by using available market quotations from the $1.00 amortized cost price per share of the Fund and each Portfolio and the maintenance of records of such review. To fulfill this condition, the Fund intends to use actual quotations or estimates of market value reflecting current market conditions chosen by the Board of Directors in the exercise of its descretion to be appropriate indicators of value which may include, among other things: (1) quotations or estimates of market value for individual portfolio instruments, or (2) values obtained from yield data relating to classes of money market instruments published by reputable sources.

(b) In the event such deviation from the Fund's or any Portfolio's $1.00 amortized cost price per share should exceed ½ of 1%, a requirement that the Board of Directors will promptly consider what action, if any, should be initiated.

(c) Where the Board of Directors believes the extent of any deviation from the Fund's or any Portfolio's $1.00 amortized cost price per share may result in material dilution or other unfair results to investors or existing shareholders, it shall take such action as it deems appropriate to eliminate or reduce, to the extent reasonably practicable, such dilution or unfair results which may include: redeeming shares in kind; selling portfolio instruments prior to maturity to realize capital gains or losses or to shorten the average portfolio maturity of the Fund or any Portfolio; withholding dividends; or utilizing a net asset value per share as determined by using available market quotations.

3. The Fund and each Portfolio will maintain a dollar-weighted average portfolio maturity appropriate to its objective of maintaining a stable net asset value per share; provided, however, that the Fund and the Portfolios will not (a) purchase any instrument with a remaining maturity of greater than one year, or (b) maintain a dollar-weighted average portfolio maturity in excess of 120 days. Should the dispositon of a portfolio instrument result in a dollar-weighted average portfolio maturity in excess of 120 days, the Fund and each Portfolio, in fulfilling this condition, will invest its available cash in such a manner as to reduce its dollar-weighted average portfolio maturity to 120 days or less as soon as reasonably practicable.

4. The Fund will record, maintain, and preserve permanently in an easily accessible place a written copy of the procedures (and any modifications thereto) described in condition 1 above. The Fund will also record, maintain, and preserve for a period of not less than six years (the first two years in an easily accessible place) a written record of the Board of Directors' considerations and actions taken in connection with the discharge of its responsibilities as set forth above, to be included in the minutes of the Board of Directors meetings. The documents preserved pursuant to this condition shall be subject to inspection by the Commission in accordance with Section 31(b) of the Act, as if such documents were records required to be maintained pursuant to

rules adopted under Seciton 31(a) of the Act.

5. The Fund and each Portfolio will limit its portfolio investments, including repurchase agreements, to those U..$ dollar/denominated instruments which the Board of Directors determines present minimal credit risks and which are of "high quality" as determined by any major rating service, or, in the case of any instrument that is not rated, of comparable quality as determined by the Board of Directors.

6. The Fund will include in each of its quarterly reports, as an attachment to Form N–1Q, a statement as to whether any action pursuant to condition 2(c) above was taken during the preceding fiscal quarter, and, if any such action was taken, will describe the nature and circumstances of such action.

Notice is further given that any interested person wishing to request a hearing on the application may, not later than July 1, 1983, at 5:30 p.m., do so by submitting a written request setting forth the nature of his/her interest, the reasons for his/her request, and the specific issues, if any, of fact or law that are disputed, to the Secretary, Securities and Exchange Commission, Washington, D.C. 20549. A copy of the request should be served personally or by mail upon the Fund at the address stated above. Proof of service (by affidavit or, in the case of an attorney-at-law, by certificate) shall be filed with the request. Persons who request a hearing will receive any notices and orders issued in this matter. After said date, an order disposing of the application will be issued unless the Commission orders a hearing upon request or upon its own motion.

For the Commission, by the Division of Investment Management, pursuant to delegated authority.

George A. Fitzsimmons,

Secretary.

VETERANS ADMINISTRATION

Veterans' Administration Cooperative Studies Evaluation Committee; Availability of Annual Report

Under section 10(d) of Pub. L. 92–463 (Federal Advisory Committee Act) notice is hereby given that the Annual Report for calendar year 1982 has been issued for the Veterans' Administration Cooperative Studies Evaluation Committee.

The report summarizes activities of the Committee on matters related to the review and evaluation of new and ongoing cooperative studies. It is available for public inspection at two locations:

Library of Congress, Serial and Government Publications Reading Room LM 133, Madison Building, Washington, DC 20540

and

Veterans' Administration, Medical Research Service, Cooperative Studies Program, Room 748, 810 Vermont Avenue, NW., Washington, DC 20420.

Dated: June 2, 1983.

By Direction of the Administrator.

Rosa Maria Fontanez,

Committee Management Officer.

FEDERAL RESERVE SYSTEM

(Board of Governors)

TIME AND DATE: 10 a.m., Wednesday, June 15, 1983.

PLACE: Board Building, C Street entrance between 20th and 21st Streets NW., Washington, D.C. 20551.

STATUS: Open.

MATTERS TO BE CONSIDERED: *Summary Agenda:* Because of their routine nature, no substantive discussion of the following items is anticipated. These matters will be voted on without discussion unless a member of the Board requests that an item be moved to the discussion agenda.

1. Proposals (A) to establish a weekly report of foreign branch liabilities to, and custody holdings for, U.S. residents, and (B) to modify the Weekly Report of Assets for Selected Money Market Mutual Funds (FR 2051c).

2. Proposed extension of Weekly Report of International Banking Facility Accounts (FR 2072) and discontinuance of Cumulative Report of International Banking Facility Assets and Liabilities Shifted from the U.S. Offices of the Establishing Entity (FR 2076).

Discussion Agenda:

3. Issues regarding bankers' acceptances.

4. Any items carried forward from a previously announced meeting.

Note.—This meeting will be recorded for the benefit of those unable to attend. Cassettes will be available for listening in the Board's Freedom of Information Office, and copies may be ordered for $5 per cassette by calling (202) 452–3684 or by writing to: Freedom of Information Office, Board of Governors of the Federal Reserve System, Washington, D.C. 20551.

CONTACT PERSON FOR MORE INFORMATION: Mr. Joseph R. Coyne, Assistant to the Board (202) 452–3204.

Dated: June 8, 1983.

James McAfee,

Associate Secretary of the Board.

FEDERAL RESERVE SYSTEM

(Board of Governors)

TIME AND DATE: Approximately 11 a.m., Wednesday, June 15, 1983, following a recess at the conclusion of the open meeting.

PLACE: 20th Street and Constitution Avenue NW., Washington, D.C. 20551.

STATUS: Closed.

MATTERS TO BE CONSIDERED:

1. Personnel actions (appointments, promotions, assignments, reassignments, and salary actions) involving individual Federal Reserve System employees.

2. Any items carried forward from a previously announced meeting.

CONTACT PERSON FOR MORE INFORMATION: Mr. Joseph R. Coyne, Assistant to the Board, (202) 452–3204.

Dated: June 8, 1983.

James McAfee,

Associate Secretary of the Board.

Part II

Department of Labor

Occupational Safety and Health Administration

Occupational Exposure to Cotton Dust

DEPARTMENT OF LABOR

Occupational Safety and Health Administration

29 CFR Part 1910

[Docket No. H–052E]

Occupational Exposure to Cotton Dust

AGENCY: Occupational Safety and Health Administration (SHA), Labor.

ACTION: Proposed rule.

SUMMARY: OSHA proposes to revise its occupational health standard for exposure to cotton dust. The proposed revision for the textile industry include the addition of an action level, modifications of exposure monitoring requirements, an extension of compliance dates in limited operations with feasibility problems, and modification of some definitions. No changes are proposed to the exposure limits or method of compliance for the textile industry. OSHA is proposing to eliminate from coverage from 29 CFR 1910.1043 and 29 CFR 1910.1000 several segments of the nontextile industry where there is no evidence of significant risk and where such action will better effectuate the purposes of the Act. This review of the standard is necessary in order to resolve several judicial and administrative stays, to consider the significance of risk in the nontextile and knitting segments, to resolve some technical issues, to clarify some provisions of the standard and to reconsider some provisions of the standard for cost effectiveness.

DATES: Comments must be submitted by August 9, 1983. An informal public hearing will commence on September 19, 1983 at 10 a.m. in Washington, D.C.; on September 27, 1983 at 10:00 a.m. in Dallas, Texas; and October 4, 1983 at 10 a.m. in Columbia, South Carolina, and each hearing will continue for the balance of the week if necessary. Notices of intention to appear must be submitted by August 26, 1983. Evidence and testimony to be introduced at the hearing must be submitted by September 9, 1983.

ADDRESSES: Written comments should be submitted in quadruplicate to the Docket Officer, Occupational Safety and Health Administration, Docket H–052E, Room S–6212, U.S. Department of Labor, 200 Constitution Ave., NW., Washington, D.C. 20210, Telephone (202) 523–7894. Notices of intention to appear at the hearing, testimony and evidence should be sent in quadruplicate to Mr. Tom Hall, OSHA Division of Consumer Affairs, Room N3635, U.S. Department of Labor, 200 Constitution Ave. NW., Washington, D.C. 20210, Telephone (202) 523–8024.

The Washington, D.C. hearing will be held at the Auditorium, Frances Perkins Department of Labor Building, 200 Constitution Avenue, Washington, D.C. The Dallas, Texas hearing will be held at the Grenelefe Hotel, Seasons Ballroom, 1011 South Akard St., Dallas, Texas. The Columbia, South Carolina hearing will be held at the Town House, Deauville Room, 1615 Jervais St., Columbia, South Carolina.

FOR FURTHER INFORMATION CONTACT: James F. Foster, Director, Office of Information and Consumer Affairs, OSHA, Room 3637, U.S. Department of Labor, 200 Constitution Ave NW., Washington, D.C. 20210, Telephone (202) 523–8151.

SUPPLEMENTARY INFORMATION:

Introduction. Pursuant to sections 6(b) and 8(c) of the Occupational Safety and Health Act of 1970 (the Act) (84 Stat. 1593, 1599; 29 U.S.C. 655, 657), Secretary of Labor's Order No. 8–76 (41 FR 250659) and 29 CFR Part 1911, it is proposed to amend some paragraphs of 29 CFR 1910.1043 (the cotton dust standard) to make it clearer, more effective and less burdensome. It is also proposed to amend 29 CFR 1910.1043 and 29 CFR 1910.1000 to eliminate from coverage several nontextile segments where, based on the evidence currently before it, OSHA believes there is no significant risk and it would better effectuate the purposes of the Act.

The Occupational Safety and Health Administration (OSHA or the Agency) requests the submission of written comments, data, and arguments from interested persons on the various amendments specifically proposed as well as all other issues related to the proposal. In addition, pursuant to section 6(b)(3) of the Act there will be informal rulemaking hearings to provide further opportunity for presentation of evidence and discussion of the issues. After the hearing, the Agency will issue amendments to the standard as appropriate based upon the full record.

Some issues raised in the proposal on which comment is requested include the following:

1. The significance of cotton dust-related adverse health effects in workers in nontextile industries.

2. The feasibility of compliance with the standard in the textile industry.

3. The feasibility of compliance with the standard on or before the effective dates.

4. The definition of cotton dust as the total particulate collected by the vertical elutriator sampling device.

5. The appropriateness and usefulness of the "action level" concept in control of cotton dust.

6. The use of measuring devices which are equivalent to the vertical elutriator.

7. Whether the nontextile industries should be deleted from coverage by 1910.100 Table Z–1.

8. The appropriateness of the monitoring schedules to prevent overexposures of a duration which will result in significant adverse health effects.

9. The existence of cotton washing techniques which will prevent adverse health effects from exposure to cotton dust.

10. The appropriateness of and suggestion for modification of language in the standard defining the term "area" as it is used in environmental monitoring.

11. Suggestions for modification of the language in order to clarify the standard and to ease compliance.

12. Whether a wage retention provision should be incorporated.

In some cases, OSHA is proposing specific amendments reponsive to these issues. In other cases, OSHA is raising the issue, but is not proposing specific amendments. It will analyze evidence, comments, and recommendations before deciding whether changes are appropriate

I. Background

A. General

In june 1978, OSHA published a new standard for occupational exposure to cotton dust, 29 CFR 1910.1043, 43 FR 27350. The supplementary information published with the 1978 standard (June 23, 1978) discussed in some detail the agricultural and industrial processes involved in the processing of cotton. New production equipment has increased the productivity of various segments of the industry, particularly yarn manufacturing and fabric manufacturing. The basic processes, however, remain unchanged. The majority of production of woven fabrics continues to take place in integrated mills which purchase raw fibers and produce unfinished fabric.

Cotton has certain desirable properties which make it unlikely that complete substitution by synthetic fibers will occur. Among these are its properties of moisture absorbency, coolness, softness, ready adaptability into leisure fabrics such as denim and corduroy, and economy of use. In addition, substitution of synthetic fibers results in increased use of petroleum products and other forms of energy.

B. History of the Regulation

Significant regulatory steps to address health problems in the cotton textile industry did not occur until well into the twentieth century, when Great Britain legislated requirements for medical inspection of workplaces, compulsory reporting of industrial diseases, and compensation for disabled and diseased workers. By 1942, British law recognized byssinosis as an occupational disease.

Government action came later in the United States. In 1964, the American Conference of Government Industrial Hygienists (ACGIH) placed cotton dust on its tentative list of Threshold Limit Values (TLVs). In 1966 ACGIH adopted 1000 $\mu g/m^3$ of total cotton dust as a recommended upper limit for exposure. This TLV was based upon the work of Roach and Schilling in the Lancashire cotton mills (Ex. 6–1). Exposure to cotton dust was not regulated in the United States until 1968, when the Secretary of Labor, acting under the authority of the Walsh-Healey Act (41 U.S.C. 35 *et seq.*), promulgated the 1968 ACGIH list of Threshold Limit Values which included 1000 $\mu g/m^3$ for "Cotton dust (raw)." This Threshold Limit Value was subsequently adopted as an established Federal standard under section 6(a) of the Occupational Safety and Health Act of 1970. On September 28, 1974, pursuant to section 20(a)(3) of the Act, the Director of the National Institute for Occupational Safety and Health (NIOSH) submitted to the Secretary of Labor a criteria document which contained NIOSH's recommendations for a new cotton dust standard.

On December 28, 1976, at 41 FR 56498, OSHA proposed a revised cotton dust standard setting a permissible exposure level of 200 $\mu g/m^3$ averaged over an eight hour period. An expensive record of documentary and testimonial evidence was compiled over a period of more than nine months. Among the witnesses were large corporate and small business employers, manufacturers, representatives from the affected workforce, experts in every relevant field including physicians, scientists, statisticians, economists, industrial hygienists, representatives from agriculture, and other interested parties. Public participation was representative of virtually the entire "cotton community."

On June 23, 1978, at 43 FR 27350, OSHA promulgated 29 CFR 1910.1043 and set permissible exposure limits of 200 $\mu g/m^3$ of lint-free respirable cotton dust, averaged over eight hours, for yarn manufacturing; 750 $\mu g/m^3$ for slashing and weaving operations; and 500 $\mu g/m^3$ for knitting and nontextile industries which used cotton. Petitions for review were promptly filed by interested parties with United States Circuit Courts of Appeals. On October 20, 1978, the United States Court of Appeals for the District of Columbia circuit stayed enforcement of the standard pending judicial review. In *AFL–CIO* v. *Marshall*, 617 F.2d 636 (D.C. Cir. 1979), the District of Columbia Circuit upheld the standard for the textile industry (yarn manufacturing, slashing and weaving) and the nontextile processes of warehousing and classing. The court vacated the standard for the cottonseed oil industry, finding that OSHA had failed to demonstrate economic feasibility, but it upheld OSHA's determinations of health risk and technological feasibility. The court then remanded the record on the cottonseed oil industry to the Agency for reconsideration. The court did not consider the validity of the standard for waste processing and waste utilization, having severed the industry representatives' petitions for review because of an administrative stay issued by OSHA for those segments of the industry. 43 FR 39087 (September 1, 1978). Although OSHA later lifted the administrative stay, the judicial stay remains in effect. 44 FR 5436 (January 26, 1979).

Representatives of the textile industry and warehousing and classing industries sought review of the court of appeals decision in the Supreme Court. Except for the wage retention provision, the Supreme Court upheld the standard for the textile industry (yarn manufacturing, slashing and weaving). *American Textile Manufacturers Institute, Inc.* v. *Donovan*, 452 U.S. 490 (1981). Earlier, on October 6, 1980, the Court had granted a petition for writ of certiorari and vacated the decision of the court of appeals with respect to the warehousing and classing segments of the industry. *Cotton Warehouse Association* v. *Marshall*, 449 U.S. 809 (1980). The Supreme Court instructed the court of appeals to reconsider the standard for these industries in light of the Supreme Court's decision in *Industrial Union Department, AFL–CIO* v. *American Petroleum Institute*, 448 U.S. 607 (1980), the benzene decision. On joint motion of the parties, the court of appeals then remanded the record to OSHA for the warehousing and classing segments of the industry. Order of February 3, 1981, in No. 78–1562. On July 29, 1980, OSHA issued an administrative stay of the standard to re-evaluate its applicability to warehousing and classing industries in view of *IUD* v. *API*, *supra*.

In its most recent action, the D.C. Circuit, at the request of OSHA, ordered that the records in the cases brought by the waste processing and utilization industries, which it had previously stayed, be remanded to the agency for further consideration. Order of March 30, 1982, in No. 78–1784 and consolidated cases Nos. 78–1798, 78–1985, 78–2015, and 78–2017. In addition, the court noted that its prior remand orders for the cottonseed oil, warehousing, and classing industries remain in effect. Finally, the Agency was ordered to provide the court with status reports of proceedings on reconsideration at 120 day intervals. It should be noted that the court retained jurisdiction of the cases and remanded only the record.

A separate standard for the cotton ginning industry (43 FR 27418 (June 23, 1978); 29 CFR 1910.1046) was vacated by the United States Court of Appeals for the Fifth Circuit. *Texas Independent Ginners Association* v. *Marshall*, 630 F.2d 398 (5th Cir. 1980). The court found that the record did not demonstrate a significant risk of adverse health effects as required by the benzene decision. In response to the court's decision, OSHA deleted the cotton ginning standard from the CFR and no further action in this area is required.

The knitting industry never challenged the standard in court. Based on available data, however, OSHA has temporarily stayed the standard for the knitting industry until the current review of the standard and subsequent rulemaking proceedings have been completed. 48 FR 5267 (February 4, 1983).

In view of these court and agency actions, the 1978 cotton dust standard is currently in effect only for the textile industry (except knitting). For all segments of the nontextile industry (except cotton ginning), the 1978 standard has been stayed and the record is before OSHA for reconsideration in light of the benzene decision or for other relevant factors. All the nontextile industry court challenges to the standard have been placed in abeyance pending OSHA's reconsideration. Therefore, OSHA needs to take some action for the nontextile segments of the industry.

In light of these judicial and administrative actions, OSHA published an Advance Notice of Proposed Rulemaking (ANPR) on February 9, 1982 (47 FR 5906). Extensive comments were received in response to the ANPR and will be referenced throughout this discussion. In addition, OSHA contracted with Centaur Associates to

survey the existing published data as well as to conduct a sample survey of textile manufacturing establishments, and to determine, among other things, the feasibility and cost-effectiveness of alternative regulatory approaches. References to this study will also be made throughout this discussion.

The proposed amendments and this discussion build upon the factual and legal base of the standard which was promulgated in 1978. The proposal recognizes certain gaps in the available data and attempts to assimilate current knowledge about industry practices. Much of the newer evidence concerning the health effects of cotton dust exposure and the feasibility of its control is available in large part because of the monitoring and medical surveillance requirements of that standard. This evidence, combined with OSHA's growing experience in enforcing health standards, suggests the need for revisions which will clarify the mandatory requirements of the standard and will provide incentives to take advantage of newer technology as it becomes available.

Permitting companies to use personal protective equipment combined with medical surveillance as an alternative to engineering controls would, in cases where equivalent protection is afforded, comply with OSHA's general preference to issue performance rather than design standards. It is important to emphasize that OSHA's decision to continue to require the textile industry to install feasible engineering controls to reduce exposures to cotton dust in no way represents an alteration of the agency's strong general commitment to performance standards. However, OSHA does not believe that the data compiled in the ATMI and other studies discussed below could in the final analysis support such a performance standard *in this instance*. First, no significant new evidence has been submitted to justify a reversal of the 1978 agency decision to require engineering controls as the primary method of compliance. In addition, the ATMI study was not designed to test the efficacy of a performance standard. Further, the industry itself has shown little interest in a performance standard at this late stage in the process. Moreover, in view of the number of years that have passed since issuance of the 1978 rule and OSHA's estimates that more than three-quarters of the engineering control expenditures have already been incurred, OSHA questions whether it would make any sense to try to develop the record further on this issue. Nevertheless, OSHA believes that performance standards generally are decidedly preferable to design standards and wishes to make it clear that this proposal is a result of the narrow record before its, not reversal of this principle.

II. Occupational Health Implications of Exposure to Cotton Dust

The preamble to the December 28, 1976, proposed standard for exposure to cotton dust (41 FR 56498) presented detailed scientific evidence pertaining to respiratory diseases associated with exposure to cotton dust. A definition of byssinosis and an explanation of the Schilling grading system were presented. Other health effects such as chronic bronchitis, mill fever, weavers' cough and mattress-makers' fever, were also noted. The preamble discussed the importance of the use of standardized medical questionnaires and pulmonary function testing to detect the early stages of respiratory disease. The contribution of smoking to an increased prevalence of byssinosis was also discussed.

The preamble to the 1978 final standard for cotton dust discussed both chronic and acute health effects in light of testimony and evidence presented by the public during the rulemaking process. OSHA concluded that the scientific evidence in the record supports the finding that exposure to cotton dust produces adverse health effects.

Byssinosis is the respiratory disease most commonly associated with exposure to cotton dust. The hallmark of byssinosis is the Monday phenomenon, the cyclic disorder characterized by cough, breathlessness or tightness of the chest experienced on the first day of the work week. The Schilling grading scheme for byssinosis, which is discussed in the 1976 proposal (41 FR 56500), reflects the differences in duration and degree of Monday morning symptoms.

The acute stages of byssinosis are Grades ½ to 2. In the early stages, the most commonly reported symptom is occasional breathlessness or chest tightness on the first day back to work after a period of time away, such as the weekend. This corresponds to Grade ½ in the Schilling classification system. With Grade 1 byssinosis, these symptoms appear every Monday. When these symptoms extend to other days of the week, the worker is classified as having Grade 2 byssinosis. These symptoms may be accompanied by a loss of ventilatory capacity over the work shift as measured by a change in the Forced Expiratory Volume in one second (FEV_1). Some otherwise asymptomatic workers also exhibit a decline in the FEV_1 on their first day back at work. Other changes in pulmonary function such as the Forced Vital Capacity (FVC), the ratio of FEV_1 to the predicted FEV_1, and the ratio of FVC to FEV_1 may also be noted. The chronic, irreversible stage of byssinosis is classified as Grade 3 and is defined as Grade 2 symptoms with evidence of permanent incapacity (loss of lung function).

Although there is general agreement as to the acute health effects associated with exposure to cotton dust, a recent report by the National Research Council (NRC) on byssinosis research has raised the issue of whether chronic pulmonary disease seen in exposed workers is due to exposure to cotton dust or to other factors, such as smoking. (Ex. 177). In 1978, OSHA reviewed most of the studies available to the NRC committee and heard the testimony of experts. The conclusion reached by OSHA was that chronic pulmonary disease is directly related to exposure to cotton dust. The 1978 standard (43 FR 27352) states:

> It was the overwhelming opinion of the medical experts testifying at the hearings that byssinosis can develop into chronic obstructive pulmonary disease which is, in most cases, irreversible and disabling (Ex. 38d, Ex. 11, Ex. 41, Ex. 46).

A similar statement was made in a draft report from the World Health Organization study group on vegetable dust (Ex. 172–42) received by OSHA in April of 1981. In their discussion of byssinosis, they state:

> In its final stages, the disease [byssinosis] cannot be distinguished from chronic obstructive pulmonary disease due to nonoccupational causes, except for the past history of chest tightness characteristically worse at the beginning of the week.

OSHA has reviewed the concerns expressed by the NRC committee and concludes that there is no basis for changing its original conclusion that exposure to cotton dust can result in chronic obstructive pulmonary disease. Indeed, additional evidence not available during the 1978 rulemaking such as the 1981 follow-up study of active and retired textile workers by Beck and his colleagues (Ex. 170–9) supports this conclusion.

III. The Proposed Amendments

A. Scope and Application

OSHA is proposing to amend 29 CFR 1910.1043, to apply to yarn manufacturing and to weaving and slashing operations which process cotton and cotton-synthetic blends. The Agency is proposing to amend 29 CFR

1910.1043 so that it will not apply to dust generated from classing, warehousing, cottonseed processing, knitting operations and waste processing which includes waste recycling (sorting, cleaning, blending and willowing), garnetting, waste spinning, bedding assembly, and upholstered furniture manufacturing. The section 6(a) standard, for cotton dust adopted by OSHA in 1971 (29 CFR 1910.1000 Table Z–1) will still apply, however, to cotton waste processing. The § 1910.1043 standard does not apply to dust generated during the handling of woven materials, nor does it apply to the processing of washed cotton. Maritime, harvesting, and ginning operations are also not covered by this standard. OSHA is proposing to exclude the construction industry sectors from coverage by this standard because OSHA is unaware of any exposure to cotton dust in this industry. Accordingly, OSHA is proposing to repeal § 1910.19(f) of the general industry standards.

In the preamble to the 1976 proposed standard and the preamble to the 1978 final standard, OSHA discussed evidence of adverse health effects in workers exposed to cotton dust. OSHA's finding of risk of adverse health effects in textile workers exposed to cotton dust was based on a substantial body of evidence both quantitative and qualitative in nature. This evidence was discussed at length in the preambles to both the proposed and final standards and will not be repeated here. The work by Merchant and his colleagues (Ex. 6–51) was considerd by OSHA to provide the most reliable basis for the dose-response curve from which the 200 $\mu g/m^3$ PEL for yarn manufacturing and the 750 $\mu g/m^3$ PEL for slashing and weaving were developed. In its decision in *ATMI* v. *Donovan, supra,* the Supreme Court upheld the lower court's finding that the standard, as it applies to yarn manufacturing and slashing and weaving, was "reasonably necessary and appropriate" within the meaning of Section 3(8) of the Act and that OSHA had demonstrated a materially significant health risk.

In 1979, after the standard was promulgated, Beck and his colleagues conducted a follow-up study of 383 individuals who were participants in a 1973 cross-sectional study of 646 active and retired cotton textile workers. (Ex. 170–9). No cotton dust exposure level information was given. The authors reported that there was a significantly higher prevalence of respiratory symptoms and disability in cotton textile workers as compared to controls. There was a significantly lower lung function in both symptomatic and asymptomatic cotton textile workers as compared to controls. Beck also found that there was a signficantly higher prevalence of respiratory symptoms and lower lung function of retired as compared to active cotton textile workers, and there was an additive effect of smoking and cotton dust exposure on lung function.

In a review of this study (Ex. 175–60) prepared for and submitted by the ATMI, Dr. Kenneth Rothman and his co-workers are critical of the Beck study. They question the method of recruitment of workers for the study, the appropriateness of the comparison population, the use of two different questionnaires for the exposed and unexposed populations, and a number of other aspects of the study.

Despite some shortcomings, OSHA believes that this study is important because it included a follow-up of cotton textile workers and controls subsequent to a cross-sectional survey. Most studies of workers exposed to cotton dust have not followed the workers over time, leaving many unanswered questions about the magnitude and progression of lung disease in exposed workers. Also, most studies have included only active workers rather than workers who have changed jobs or retired. Restricting a study cohort to active workers limits the extent to which the findings can be generalized because of the potential role of workers leaving their jobs as a result of health problems. This selective out-migration has been postulated to result in a cotton textile workforce composed of relatively healthy survivors. This study determined the health status of persons who changed jobs or retired from the cotton mills, enabling better estimation of the health effects of mill work. Also, chronic effects, including disability, rather than acute effects could be surveyed in this group of older persons with long-term exposures to dust.

Another new study, an analysis of the medical surveillance results for over 40,000 cotton textile workers, was prepared after the publication of the 1978 standard (Ex. 175–60). The report written by Dr. Harold Imbus, was prepared for and submitted to OSHA by ATMI. Seven ATMI member companies provided the data from their medical surveillance programs conducted during the period of 1979 to 1981. Imbus reported prevalences of 0.68% for byssinosis and 5.8% for bronchitis. He also indicated that the prevalence of a 10% decline in FEV_1 over the work shift for cotton textile workers was similar to the prevalence in a control group of workers.

In its review of the ATMI report, NIOSH stated: "the basic problem is that this survey is compiled from data gathered for compliance purposes, and is not based on a statistically sound strategy which would be essential for making inferences from the study group to the universe from which the study group came." NIOSH further stated: "this second submission by ATMI, despite its volume, sheds no more light upon the health effects of exposure to cotton dust in the textile industry than did the first submission, and should be disregarded by OSHA in its rulemaking effort." (Ex. 175–56).

Imbus replied to both the specific and general criticisms outlined by NIOSH. (Ex. 175–83). He conceded that the data were not collected in a manner intended for an epidemiological study but rather for compliance purposes, but he pointed out that the information in the report is important because it represents the results of the medical surveillance of a very large number of cotton textile workers.

OSHA agrees that this study makes an important contribution to understanding the current health status of a large number of textile workers. We find the results encouraging with respect to the low prevalence of respiratory symptoms generally associated with exposure to cotton dust. The report supports the conclusion that compliance with the standard, with the present PEL, medical surveillance, and work practice requirements is effective in reducing respiratory symptoms in workers exposed to cotton dust in the textile industry.

While the evidence of significant risk of material health impairment to workers in the textile industries is clear, the evidence in the nontextile industries (cottonseed mills, classing, warehousing, waste processing and knitting) is less clear. OSHA acknowledged this in the section on the scope of the 1978 standard but made a policy decision to include these operations in the cotton dust standard (43 FR 27382). The basis for this decision was that the large body of risk evidence in the textile industry could be used to support the less conclusive evidence in nontextile operations.

In the benzene decision, the Supreme Court stated: "before he can promulgate *any* permanent health or safety standard, the Secretary is required to make a threshold finding that a place of employment is unsafe—in the sense that significant risks are present and can be eliminated or lessened by a change in

practices." 448 U.S. at 642 (emphasis in the original). The Court also stated that the lower court's refusal to uphold the new benzene standard was correct because the new standard was not supported by appropriate findings. In light of the Court's decision and subsequent orders by the D.C. Circuit, OSHA decided to review the existing scientific evidence to determine whether or not a significant risk of adverse health effects exists for workers in the knitting industry and in each of the nontextile industries covered by the 1978 standard. OSHA has also determined that the decision to include any of these industries under the standard will be based on evidence of risk in the particular industry being regulated. The reason for this decision is that the composition of cotton dust varies from one operation to another and, therefore, the presence of the etiological agent, the exact nature of which is unknown, may also vary.

The operations for which health data were reviewed include: warehousing, classing, cottonseed processing, knitting, and waste processing.

A report by Barman (Ex. 56) addressed the possibility of cotton dust associated health hazards in the warehousing industry. Barman studied 70 workers in a single California compress-warehouse operation. None of the workers had byssinosis, and although sixteen workers questioned had respiratory symptoms, the symptoms were not particularly associated with Mondays. There were a number of shortcomings in this study including the failure to use a standardized questionnaire and the lack of dust measurements.

In their comments in response to the February 1982 ANPR, both the National Cotton Council (NCC) (Ex. 175–47) and the Cotton Warehouse Association of America (CWA) (Ex. 175–37) discussed Barman's study, pointing out its shortcomings and arguing that this study does not provide evidence of cotton dust associated respiratory disease. In her discussion of this study, Braver also mentions the shortcomings of the study and concludes: "this study should be considered inconclusive" (Ex. 175–1). The CWA also pointed out that the work is seasonal in nature and that there are no pulverizing, mechanical operations. These are factors which reduce the likelihood of adverse health effects in the operation.

In 1978, NIOSH began a series of industry-wide medical and industrial hygiene studies in an effort to "describe the health and environmental conditions of the 'non-textile' or 'secondary' cotton industry." (Ex. 175–56). Four of the industries presently under the standard (classing, warehousing, cottonseed mills and waste utilization) were included in this study. The report on cotton warehouse workers, "Respiratory Disorders and Dust Exposure in Sectors of the Cotton Industry of the United States, Part 2: Cotton Compress Warehouses," examines the respiratory disease prevalence and cotton dust exposure levels for 512 workers in 18 compress/warehouses. A group of 1218 workers in non-dusty occupations served as the comparison group. The geometric mean dust levels ranged from 0.04 mg/m³ to 0.690 mg/m³ with 92% falling below 0.500 mg/m³.

Matched pair analysis revealed a significant excess of bronchitis in the compress/warehouse workers. For no other symptoms were there significant differences from the comparison group. When changes in pulmonary function (FVC, FEV_1, FEF_{50}%, FEF_{75}%, and peak flow) over the shift were compared to level of cotton dust exposure, the greatest decrements in pulmonary function were seen in workers with the lowest exposures to cotton dust.

There were two factors that make analysis and interpretation of this data difficult. One factor is the differences between the study group and the comparison group, specifically with regard to racial and geographic differences and age. A second factor is the inclusion of workers in the study group who had previously been employed in other cotton operations, most commonly ginning. Removal of these workers would have severely limited the number of compress/warehouse workers available for analysis.

NIOSH stated: "We could not demonstrate in this study a clear relationship of adverse health effects with exposure to cotton dust in this industry." (Ex.175–56). They suggested that overshift decrements in pulmonary functions seen in individuals working in areas where the levels of cotton dust are relatively low, shipping and receiving areas, may be due to exposure to exhaust emissions from idling transport vehicles. NIOSH, therefore, did not recommend an environmental standard for cotton dust in the warehousing segment.

The 1978 rulemaking record contained no direct evidence of risk of adverse health effects in classing operations. This lack of evidence was pointed out by both the American Cotton Shipper's Association and the NCC (Ex. 175–47 and Ex. 175–30). In 1980, OSHA recognized the inadequacy of the evidence of health risk related to cotton dust in the classing and warehousing industries. The Agency requested that the Supreme Court remand the case for classing (and warehousing) operations for reconsideration. OSHA then published a notice in the **Federal Register** suspending enforcement of the standard for classing and warehousing pending "a more extensive review and analysis of the * * * record" (45 FR 50329, July 24, 1980).

OSHA has recently received the NIOSH epidemiological report on classing operations, "Respiratory Disorders and Dust Exposure in Sectors of the Cotton Industry of the United States, Part 4: Cotton Classing Offices." (Ex. 175–56). The study included 609 workers in 13 cotton classification offices operated by the United States Department of Agriculture. The geometric mean dust level was generally below 200 $\mu g/m^3$.

The study revealed no excess prevalence of byssinosis, bronchitis, or lung function decrement in classing workers. NIOSH concluded: "there is no evidence of adverse health effects in cotton classing office workers." They recommend a future study of this group with a more appropriate control group. Because the cotton found in classing offices is similar to that in textile mills and the manipulation of the cotton is done near the workers' breathing zone, NIOSH recommends the continuation of current dust control programs that have reduced the geometric mean dust levels.

Studies of cottonseed oil workers have been conducted in the United States, Australia and Egypt. Between 1978 and 1980, NIOSH conducted a study of 723 cottonseed oil mill workers, "Respiratory Disorders and Dust Exposure in Sectors of the Cotton Industry of the United States, Part 3: Cottonseed Oil Mills." (Ex. 175–56). Workers in non-dusty occupations provided a control population. In NIOSH's report of this study, matched pair analysis revealed no significant excess prevalence of byssinosis, bronchitis or dysponea in cottonseed oil mill workers when compared to controls. The only significant differences (cough, mean FEV^1 and overshift decrements in FEV^1) were seen in cottonseed workers who were current smokers. No dose-response relationships were demonstrated. The geometric mean dust levels in the plants surveyed ranged fromn 0.22 mg/m³ to 1.46 mg/m³.

In a series of cross-sectional studies of workers in several cottonseed oil mills in the southern United States (Ex. 175–12), Jones and colleagues found a very low prevalence of byssinosis (2.3%) and chronic bronchitis (4.0%). Their

studies indicate that a portion of these workers experienced an acute reaction to exposure to cotton dust, but there was no correlation between these acute effects with dust levels. In Australia, Simpson and Barnes (Ex. 6–70) compared 16 cottonseed delinting workers to 11 unexposed controls. Half of the cottonseed workers experienced lung function declines of 200 ml or more. Dust concentrations were extremely high, ranging from 15 to 37 mg/m³. In Egypt, Noweir and colleagues (Ex. 128K) reported byssinosis prevalences of 19% in cottonseed delinting and 30% in cottonseed handling. In a follow-up study conducted in 1978, the prevalence of byssinosis among 71 workers was zero, but the authors stated that workers with complaints were transferred to other operations.

Both the NCC (Ex. 175–47) and the National Cottonseed Products Association (Ex. 175–38) argued that it was inappropriate to compare cottonseed processing operations in the United States with those in Egypt or Australia. They stated that the foreign operations involved more manual labor, different job functions, and much higher dust levels than those in the U.S.

Some of the commenters to the February 1982 ANPR acknowledged a need for dust control (175–48) or medical surveillance (175–12) in cottonseed operations. The draft report by the World Health Organization (WHO), submitted by two commenters (175–7 and 175–16), tentatively recommends an exposure limit of 1.0 mg/m³ (1000 μg/m³) of respirable dust. NIOSH also recommended a PEL of 1.0 mg/m³ (1000 μg/m³) respirable dust as well as dust control strategies and medical monitoring.

It has been noted by several commenters that none of the available studies provided evidence of significant, long-term adverse health effects in individual workers in cottonseed processing operations that are equivalent to those currently existing in the United States. In addition, Proctor & Gamble (Ex. 175–48) also presented evidence that cottonseed linter dust contains a much smaller concentration of bract, leaf and other trash materials (which presumably contain the etiological agent) than raw cottonseed utilized by the textile industry.

As was the case with classing operations, OSHA had no direct evidence of adverse health effects associated with exposure to cotton dust in the knitting industry when the 1978 standard was promulgated. In November 1980, representatives of the knitting industry submitted a petition to OSHA asking for a stay of enforcement and a review of the standard as it applied to their industry. A stay of enforcement was granted and subsequently the petitioners supplied OSHA with a report which relates to the health of workers in the knitting industry (Ex. 183). This report by Boehlecke and Battigelli of the University of North Carolina was an analysis of pulmonary function data of 2287 workers employed by 6 knitwear and 6 hosiery manufacturers. The authors reported no evidence of any chronic effect on pulmonary function associated with exposure to cotton dust in the knitting operation. Reported cotton dust levels were less than 500 μg/m³.

At OSHA's request, NIOSH reviewd this study. Although NIOSH cautions that there may have been a "strong selection bias in the selection of workers in the study population" they did not disagree with the basic finding of this study, i.e., that there was "no clear and convincing evidence that * * * [these] workers * * * were subject to adverse health effects due to occupational exposure. "(Ex. 182–20).

Following OSHA's review of both the results of the study of knitting workers and NIOSH's comments on the study, the Agency published a notice in the **Federal Register** extending the stay of enforcement of the standard for the knitting industry until the current review of the standard has been completed and a new final standard has been published. (48 FR 5267).

OSHA also has information relating to the health of workers in the cotton waste recycling industry (called waste utilization by NIOSH). This industry includes the initial operations required to prepare cotton waste for other manufacturing processes. The operations include: blending, cleaning, willowing, and sorting. Some of the health information was available during the earlier rulemaking proceding. A new study from NIOSH, however, has become available since the close of that rulemaking. "Characterization of Byssinosis and Other Pulmonary Abnormalities in the Cotton Waste Utilization Industry." (Ex. 175–56). In 1978 and 1979, NIOSH examined 260 workers in 13 cotton waste utilization plants in the Southeastern United States. A group of 292 blue collar workers employed in non-dusty occupations served as the control group. NIOSH found no significant increase in the prevalence of byssinosis in the cotton waste workers when they were compared to the control group. They did find a significant increase in the prevalence of bronchitis in exposed workers employed in the waste industry for less than two years. This increase was most striking in nonsmoking workers who had been employed for less than two years. In addition, they found that decreases in pulmonary function in some exposed workers appeared to be related to the particular plant in which the individual was employed. No dose-response relationship was demonstrated by this study. The geometric mean dust concentrations for many of the plants were around 0.5 mg/m³.

In her review of the study, Braver (Ex. 175–1) indicated that, in her opinion, "the most important finding was the significantly increased risk of bronchitis in cotton waste workers compared to the controls."

The National Cotton Council (Ex. 175–47) submitted two critical reviews of the NIOSH study as an attachment to its earlier comments. These reviews note that no evidence of excess prevalence of byssinosis was seen in the workers. The NCC also said that an association between cotton dust exposure and chronic bronchitis in workers with less than two years of experience could not be made because "chronic bronchitis' is universally defined as chronic only when persisting for at least two years, so it must have pre-existed the work with cotton-related materials."

Following the submission of their report to OSHA, NIOSH reanalyzed its data using a modified comparison group which included only workers from the same geographical area (North and South Carolina, Georgia, Florida, and Alabama) as the waste cotton workers. An addendum was added to the original study which reports the results of the reanalysis of the data with the modified control group. (Exhibit 175–56). NIOSH reported a significant increase in the prevalence of bronchitis in workers (both smokers and nonsmokers) who had worked in the waste cotton industry for more than two years and in nonsmokers with less than two years in the industry. In addition, workers with less than two years in the waste cotton industry had a significantly greater prevalence of bronchitis than workers with more than two years. There was significant increase in the prevalence of overshift decrements of FEV_1 greater than 10% in workers with greater than two years service, and there was also a significant increase in the prevalence of overshift decrements of FEV_1 greater than 5% in waste cotton workers compared to controls matched in age and smoking. NIOSH found no significant increase in the prevalence of byssinosis or workers with an FEV_1 of less than 80% of the predicted value.

In an earlier study, Chinn and co-workers (Ex. 99f) studied willowing mills in the United Kingdom. They found a 53% prevalence of bronchitis, and a 5% prevalence of byssinosis, all with Grade 1/2. Symptom prevalence in controls was not reported. It should be noted that willowing operations are often extremely dusty, and in this study average dust levels in the workers breathing zone were 108 mg/m³.

Dingwall-Fordyce and O'Sullivan (Ex. 6–72) reported the result of a 1950 study of older workers in the waste recycling industry in the United Kingdom. These workers were processing both hard and soft cotton wastes for spinning waste cotton yarn. The study population consisted of 140 men over the age of 35 who worked with hard and soft cotton waste which were mixed with raw cotton. The investigators reported a 30% prevalence of byssinosis, including a 5% prevalence of disabling byssinosis. The authors gave no control values and there were no dust measurements reported. In commenting on this study the NCC (Ex. 175–47) indicated that "the preponderance of manual operations * * *, the use of 'raw cotton' * * *, and the high proportion of plant trash (since the cotton had not been cleaned at the gin)" made the study's findings "not surprising."

Cleaned cotton waste is further processed for use in manufactured products including yarn for mops, and batting for mattresses and upholstered furniture. The evidence concerning the health risks to workers in these industries is confined to garnetting (the manufacture of batting) and mattress-making.

Information in the record includes a study of six Australian garnetting plants (Ex. 6–71). In this study, Simpson obtained pre-shift and post-shift FEV_1 values for 26 workers. Eight workers were found to have post-shift FEV_1 declines greater than 200 ml. Dust levels were fairly high and ranged from 6 mg/m³ to 21 mg/m³ depending on the plant and job category.

Following publication of the final standard, NIOSH completed a health hazard evaluation of a garnetting and mattress-making operation. OSHA received a request for an administrative stay of the standard from the National Cotton Batting Institute and the Textile Fibers and By-products Association based on the findings in this report. The stay was granted pending review of the study, and a notice was published in the **Federal Register** (43 FR 39088).

In this health hazard evaluation, NIOSH investigators examined a garnetting and mattress making company in 1973 (Ex. 38f) and again in 1977 (Ex. 188–X). No comparison group was included in the studies. In 1973, the bronchitis prevalence was 59%, and the byssinosis prevalence was 11.8%. The percentage of workers with a post-shift decline in FEV, of 5% or more was 20.6%. In 1977, the bronchitis prevalence was still somewhat high at 34%, but the byssinosis prevalence had dropped to 1.9%. Because of several limitations in the study, including the small sample size, the lack of controls and the use of respirators, NIOSH stated that "no firm conclusions can be drawn from this study and no generalizations to this segment of the cotton industry should be attempted," In its review of the health hazard evaluations, OSHA took the position that the data in the record had been adequate to demonstrate that a health risk to workers existed in the waste industry, and its review asked the question whether the NIOSH report was adequate to reverse those earlier decisions on risk. (43 FR 39088).

When the administrative stay for the waste cotton industry was terminated (the judicial stay has remained in effect), OSHA stated that the evidence in this survey is "compatible with other non-textile studies which indicate the presence of adverse health effects upon exposure to cotton dust * * *" and that the report "* * * and the comments submitted provide no basis for permanently suspending the standard with respect to the waste industries * * *" (44 FR 5440).

As stated earlier, OSHA's previous decision to include knitting and the nontextile industries under the cotton dust standard (1910.1043) was based primarily on a reliance upon the strong evidence of health risk to workers in the textile industry and was supported by additional health studies in the affected industries. In its current review, OSHA has chosen to re-examine the health risk data on an industry-by-industry basis and to determine whether the data meets the test of significant risk as defined in the benzene decision.

The Agency has thoroughly reviewed record evidence of adverse health effects for workers exposed to cotton dust in the nontextile industries for evidence of significant risk as discussed in the Supreme Court's benzene decision. Additions to the record were developed in response to a series of judicial and administrative reviews. In addition, OSHA has reviewed a report analyzing pulmonary function data for workers in the knitting industry and four extensive epidemiological studies of workers in the classing, warehousing, cottonseed and waste recycling (waste utilization) industries. OSHA concludes that workers in the knitting, classing, warehousing, cottonseed processing, and waste processing industries appear to have no significant risk of impaired health as a result of their exposure to cotton dust. Based upon this conclusion, OSHA proposes to exclude these industries from coverage by the § 1910.1043 standard.

OSHA is proposing to delete from the standard, paragraph (a)(3) which discusses the various provisions. The requirements specified by paragraph (a)(3) are also found in Section 6(d) of the Act, so it is unnecessary to include that language in the standard.

B. The 1910.1000 Standard for Cotton Dust

As discussed above, the 1978 cotton dust standard has never gone into effect for any of the nontextile industries. It has been OSHA's position, however, and the case law indicates, that the 1971 standard (29 CFR 1910.1000 Table Z–1) which adpoted pursuant to section 6(a) of the Act, covers the nontextile segments. The 1971 standard would, therefore, remain in effect for the nontextile segments unless OSHA revokes the standard for nontextile industries.

Based upon the present record, OSHA proposed to exclude the classing, warehousing, cottonseed processing and knitting industries from coverage by § 1910.1000 Table Z–1. OSHA believes that since there is evidence of safe working conditions in the classing, warehousing and knitting industries, it will better effectuate the purposes of the Act to exclude those industries from coverage. Resources spent protecting employees under the existing standard would be better spent on health and safety in other areas.

The health risk to workers in the cottonseed processing industry has been investigated. The most recent study by NIOSH, available after the issuance of the 1978 standard, indicates no excess risk of byssinosis, bronchitis or dyspnea. Moreover, in the foreign health studies, working conditions and dust exposures may not have been analogous to American working conditions and the risks not comparable. In addition, the industry is not in compliance with the 1 mg/m³ (1000 μg/m³) total dust standard. The D.C. Circuit vacated the 1978 standard (500 μg/m³ respirable dust) as it applied to cottonseed processing because OSHA failed to demonstrate that the standard was economically feasible. OSHA estimates that the 1 mg/m³ total dust standard will be more difficult to meet than the 500 μg/m³ respirable dust limit. Therefore, there is a serious question as to whether this 1

mg/m³ standard is economically feasible. Data evaluated by OSHA indicates that both the 1 mg/m³ (total) and the 500 μg/m³ (respirable) limits would cause severe economic disruption in these industries. It would better effectuate the purposes of the Act to eliminate very large expenditures to reduce exposure where there is only ambiguous evidence of health risk. OSHA requests, however, comments on alternative approaches to protecting worker health in the cottonseed processing industry which would be economically feasible.

Based on the available health data, OSHA proposes to continue coverage of waste processing industries under 1910.1000. Although there is insufficient evidence upon which to base a finding of significant risk, there is an indication that workers in these industries do suffer some adverse health effects. These adverse health effects have been reported waste recycling (Exhibits 175–56; 6–72; 99f), garnetting (Exhibits 6–71; 38f; and 188–x), and bedding assembly (Exhibits 387 and 188–x). Therefore, eliminating the 1910.1000 coverage for this nontextile sector cannot be justified.

C. Definitions

(1) *"Cotton Dust"*. In the ANPR (47 FR 5907), OSHA raised the issue of whether the term "cotton dust" could be more narrowly defined. Very few comments were received in response to this issue. Some of the comments received suggested exclusion of "non-cotton"materials such as oil mist and/or mineral dusts. The National Cotton Council (NCC) (Ex. 175–47) suggested that the definition exclude "non-cotton dust" materials such as oil mist, mineral dust from humidifier systems, and synthetic fiber dust.

In the 1978 standard, "cotton dust" is defined as dust present in the atmosphere during the handling or processing of cotton. It may contain a mixture of many substances, including ground up plant matter, fiber, bacteria, fungi, soil, pesticides, non-cotton plant matter, and other contaminants which may have accumulated with the cotton during the growing, harvesting, and subsequent processing or storage periods. The present definition does not exclude oil mist, mineral dust and other miscellaneous contaminants which are measured together, with raw cotton dust. However, as stated in OSHA's ANPR (47 FR 5907), this issue is complex because the health data used to set the permissible exposure limit are based on studies in which the "cotton dust" measurements contained these components.

OSHA has reviewed all comments and has concluded that additional information is needed to evaluate this issue. No specific change in the definition of cotton dust has been proposed. This issue is open for discussion and comment during the public hearing period, and OSHA solicits additional information concerning the potential health consequences of more narrowly defining the term "cotton dust," as well as the legal and compliance ramifications of changes in this definition.

(2) *"Washed Cotton"*. Merchant's "washed cotton" study (Ex. 38d) for respiratory disease among cotton textile workers published in 1973 focused attention upon the preprocessing of cotton through water washing, steaming, heat treatment or the use of solvents to remove or neutralize the components of cotton dust which cause byssionosis. The study presented evidence that cotton washed to medical specifications does not cause symptoms of byssinosis such as loss in FEV or chest tightness in breathing. Accordingly, the 1978 standard exempted such cotton from coverage. The 1978 standard also exempted cotton which had been dyed in a hot water process. At that time, research had not established that other treatments would yield harmless cotton.

Since 1978, continuing research indicates that other washing treatments may also yield cotton which produces no adverse health effects while maintaining processing qualities acceptable for textile manufacturing. The joint industry government and labor task force investigating cotton washing methods has not, however, completed its work at the time that this proposal is being made. It is, therefore, not possible to set down specifications for alternative washing processes in this proposal.

OSHA encourages the development of cost-effective washing alternatives and believes that it is in the interests of the Agency, cotton-using industries and exposed workers to make available such methods without delay. When evidence of one or more alternative washing processes has been presented to OSHA, the Agency will conduct an expedited rulemaking to include such specifications in the standard. Should such evidence be presented during the public comment period, it will be considered for inclusion in the final standard.

The Pre-existing terminology of "washed", "purified" and "dyed" cotton has proved to be vague and somewhat confusing. Accordingly, OSHA proposes to amend the language defining "washed cotton" and "purified and dyed" cotton. These amendments make explicit the understandings which were left unwritten in the 1978 standard, but which have been the basis for washed cotton research since that time.

The definition of "washed" is restated to include specifically one of the cleaning processes enumerated in Merchant's study. (Ex. 38(d) p. 271–300). Thus, "washed cotton" will refer primarily to fiber which has been processed in a certain way and which has been shown to elicit a specific, known range of respiratory responses.

Although the specifications of the washing process are strict and detailed and do not yield cotton which could be used in textile manufacturing, the definition is included so as to provide a reference point in the body of the standard for the use of researchers. It is the level of human respiratory response that is crucial in this definition, although other parameters such as chemical or microbiological characteristics of this type of washed cotton may be of use to those investigating alternative preprocessing methods. In either case, specifications for washing are intended to assist and to encourage research.

The term "purified or dyed" cotton appears in the 1978 standard, but it was not defined. There appears to be no commonly accepted definition and accordingly, the intention of the 1978 standard has been restated in clearer terms. OSHA proposes to consider cotton yarn or thread which has been scoured in a caustic bath and dyed in a hot, water-based solution to be the equivalent of washed cotton. The processes closely resemble the processes used in the production of washed cotton, and thus, they are expected to yield cotton which produces no adverse acute reactions.

D. Environmental Monitoring—"Area" Defined

The 1978 standard relies upon area sampling to determine individual dust exposure levels. It also refers to the term "area" for evacuation during blow down (§ 1910.1043(g)(1)). At the time the standard was proposed, available data had been generated almost exclusively for scientific studies. Several years experience with routine industrial hygiene dust monitoring under the 1978 standard indicates widespread divergence in both placement of vertical elutriators and reporting practices for area sampling. In their comments to the ANPR, both the North Caroline Department of Labor (Ex. 175–8) and the Brown Lung Association (Ex. 175–43) have questioned the validity of some

monitoring data. They observe that some employers are averaging all dust levels measured in a workroom without reference to significant variations among discrete portions of the room, even though this can produce very inaccurate representations of employee exposure. Other employers designate areas for monitoring in terms of air conditioning systems, supervisory zones, groups of machines tended by one worker, or square footage. OSHA and state compliance files confirm that the textile industry and its consultants have not developed a consensus concerning appropriate monitoring under the standard. OSHA itself has set no guidelines upon which employers may rely.

Proposed changes in the standard sharpen the focus upon reliable monitoring. Where the wearing of respirators for only a part of the workshift is required, relying on data gathered from an inappropriate monitoring area may result in the use of respirators for too short a period of time. Proposed use of action levels to reduce medical surveillance and training requirements heightens the need for reliable monitoring data. In addition, the use of more sophisticated engineering controls and monitoring devices may affect the size and character of appropriate monitoring units.

With these considerations in mind, although not proposing specific language changes, OSHA asks for comments concerning both the need to define or standardize the area monitoring requirement and the need to define an appropriate area for monitoring. Since the term "area" is also used to determine which employees must be evacuated during blow down operations (§ 1910.1043(g)(1)), comments may need to refer also to the extent to which a single dust source will affect the environment.

E. Action Levels

The Advance Notice (47 FR 5907) raised the issue of whether an action level should be incorporated into the cotton dust standard. An action level is an exposure level below the permissible exposure limit, above which some provisions of the standard begin to apply and below which few or no provisions of the standard apply.

The 1978 cotton dust standard does not include an action level. Additional engineering controls and respirators are required only if exposures exceed the permissible exposure limit, but in general, the other provisions of the standards are required if any cotton dust is present. One advantage of an action level is that it encourages employers, where it is feasible, to lower exposures below the PEL, thereby increasing health protection. In addition, as a result of an action level, the cost and burden of the industrial hygiene provisions of the standard may be substantially reduced. Those employers who can devise innovative ways to reduce exposures below the action level to increase employee protection will save costs by being relieved of many of the industrial hygiene provisions. An action level results, therefore, in increased flexibility, performance orientation and cost-effectiveness of the standard.

A potential disadvantage of an action level in a toxic substance regulation is that some industrial hygiene provisions, such as medical monitoring, may provide some additional protection to employees exposed under the action level. Neither the premable to the proposed cotton dust standard of 1976 nor the preamble to the final standard of 1978 specifically discuss the reasons for not recommending or including an action level. The potential advantages of the action level concept had not been widely noted, however, until after the time of the 1974 NIOSH Criteria Document. Subsequently, OSHA proposed and adopted the action level for a number of toxic substances including those for which scientific knowledge does not permit the determinations of safe levels. (See for example, inorganic arsentic, § 1910.1018(b); vinly chloride § 1910.1017(b); and acrylonitrile, § 1910.1045(b)).

A number of comments were received in response to the issue of an action level raised in the ANPR. The ATMI supported the incorporation of an action level on the basis that "it helps avoid imposition of regulatory requirements that do not respond to a legitimate health need, and it tends to make the requirements of the standards more cost-effective overall." (Ex. 175–41, p. 12). The ATMI indicated that even at exposures below the action level it would be appropriate to have medical surveillance at a reduced frequency, initial training, and a respirator requirement during blow down.

The North Carolina Department of Labor (NCDOL) stated that an action level may be appropriate and that it would be less burdensome to employers. The NCDOL indicated, however, that OSHA should examine whether exposures below an action level could result in material impairment to health. (Ex. 179 p. 9). The Northern Textile Association (NTA) also supported the creation of an action level. They stated it would improve worker health because it would provide financial incentives to employers to reduce exposures to substantially below the PEL. The NTA added that since the amount of cotton in many blended fabric operations is small, the action level would protect worker health while reducing the burden of regulation. (Ex. 175–34, p. 8). A number of other commenters supported the concept.

Several comments opposed incorporation of an action level. NIOSH stated that based on the Merchant data, there was still a quantifiable risk of byssinosis at 100 $\mu g/m^3$ in the yarn sector. Therefore, NIOSH believes no action level should be set. (Ex. 175–56, p. 6). The Amalgamated Clothing and Textile Workers Union (ACTWU) also opposed incorporation of an action level because it believed that there would be a remaining risk at 100 $\mu g/m^3$ in yarn and 375 $\mu g/m^3$ in slashing and weaving. They argued that an action level is grounded on the notion of setting a margin of safety below the threshold of hazardous exposures. They believe it would be improper to eliminate medical surveillance and monitoring at levels associated with byssinosis.

The OSHA Committee of the Brown Lung Association opposed an action level on the basis that they believe the data still showed that cotton dust was a non-threshold hazard and that exposures below 200 $\mu g/m^3$ have not existed long enough to conclude that health problems do not exist below that level. They also questioned whether monitoring had been carried out with enough care to have confidence in low measurements. They stated that "workers in areas of a plant where dust is not well or consistently controlled need the full protection of the cotton dust standard, whether or not dust levels in other areas of their plant are below an action level." (Ex. 175–43, p. 13).

OSHA has carefully reviewed the comments submitted in response to the Advance Notice and OSHA's prior experience with action levels. Based on this review OSHA is proposing to include an action level in the cotton dust standard. OSHA believes there are several major advantages for the concept. First, it will improve employee health by encouraging employers who can reasonably do so to lower exposure from the PEL to below the action level. These lower exposures are likely to improve employee health. In some cases, the action level increases the safety factor, while in other cases, it results in a lower adverse health response rate for workers exposed below the action level. This health

benefit of lower exposures is likely to outweigh any consequences resulting from the reduction of industrial hygiene provisions.

Second, OSHA believes the action level will substantially increase the cost-effectiveness of the standard. Employers who are in positions to devise ways to reduce exposures of their employees will be able to realize substantial cost savings from the elimination of some industrial hygiene provisions while improving the health of their employees. The action level improves the flexibility and performance orientation of the standard by giving the employer a greater choice in adjusting compliance responsibilities to the specific factors present in the workplace while still maintaining health protection. In addition, some employers have very low levels of cotton dust present in relation to the PEL. For a substance as ubiquitous as cotton dust, it does not appear appropriate to require of these employers as detailed an industrial hygiene program as is appropriate when more significant levels of cotton dust are present.

Third, OSHA has had successful experience with an action level provision for a number of other toxic substances, including non-threshold substances. In each case the provision was included based on full analysis of the record and the provision has proven successful in practice.

As discussed below, OSHA is proposing that employers below the action level be required to maintain medical surveillance at a reduced frequency and a few industrial hygiene provisions. This, OSHA believes, will respond to the concerns of those who have opposed the action level. The medical surveillance will detect those employees who show symptoms of byssinosis even at very low exposure levels and will permit action to be taken to eliminate those symptom before they become more serious.

In addition, the action level as proposed responds to the concern of the Brown Lung Association. The reduction of industrial hygiene responsibilities applies only to areas where dust exposures are under the action levels. If dust levels in a part of a plant are over the action level, the full standard will apply to workers whose TWA exposures are above the action level.

The exposure level proposed for the action level is one-half of the permissible exposure limit. This is 100 $\mu g/m^3$ for yarn production and 375 $\mu g/m^3$ for slashing and weaving. Some statistical analyses relevant to setting the relationship between the PEL and action level is discussed in the Proposed Standard for Trichlorethylene (40 FR 49032, Oct. 20, 1975) and in Leidel, *et al.*, "Exposure Measurement Action Level and Occupational Environmental Variability." (NIOSH, 1975). This analysis is based on the average exposure needed to give a high degree of confidence that a specified level will rarely be exceeded despite normal fluctuations in exposure. OSHA is proposing an action level at one-half the PEL, however, principally because of its prior experience. This is the level which OSHA has generally set for an action level, except for lead which was set at 60% of the PEL. This level appears to be a reasonable cut-off for reducing industrial hygiene requirements, encouraging lower exposures and improving cost-effectivness.

To incorporate the action level into the cotton dust standard, a number of specific amendments are proposed to 29 CFR 1910.1043. New paragraphs are added to paragraph (c) defining action level as 100 $\mu g/m^3$ for yarn production and 375 $\mu g/m^3$ for slashing and weaving for the reasons just explained.

It is proposed to amend paragraph (d) as discussed further below to eliminate periodical monitoring when exposures are below the action level. There must be two consecutive monitorings below the action level within a reasonable period to assure that exposures are, in fact, below the action level and that random variation would not create exposure approaching the PEL on a significant number of days. Monitoring for cotton dust with the vertical elutriator requires a major expenditure of time by trained industrial hygienists and technicians. When exposures are below the action level, industrial hygiene expertise can be better utilized in improving employee health and safety in other ways. In addition, monitoring with the vertical elutriator is expensive for employers, and eliminating the provision when not needed will improve the cost-effectivenss of the standard. The employer is required to remonitor when production or process changes may result in increased exposure. This will protect employees by requiring employers to institute appropriate industrial hygiene provisions if exposures increase.

Though not formally part of the action level provision, but coordinated with it, is a proposal to eliminate the provision of paragraph (e) requiring a compliance plan when exposures are under the PEL and to modify the provision in paragraph (e)(4) requiring inspections of mechanical ventilation. These provisions are discussed below. Along with the other action level provisions, they will increase the cost-effectiveness of the standard without compromising occupational health.

OSHA proposes to amend paragraph (g)(4) by eliminating the requirement to stack and handle cotton and cotton waste by mechanical means when exposures are below the action level. If employers have kept exposures to levels well under the PEL, it is inappropriate to require elaborate provisons for mechanical handling which are not necessary for keeping exposures low. The employer must monitor the area carefully to be assured that the employees engaged in manual handling are not exposed over the action level. OSHA is not proposing to eliminate the other provisions of paragraph (g) except paragraph (g)(5) when exposures are below the action level, because they are routine work practices which will prevent sporadic, high-peak exposures which might not be detected by a period 8 hour area sample. Paragraph (g)(5) is duplicative of (e)(4) and it is proposed to eliminate it as redundant.

It is proposed to amend paragraph (h), to reduce the frequency of periodic medical examinations for employees exposed below the action level to once every two years instead of annually. There will be a relatively low rate of adverse symptoms for employees exposed below the action level and biennial examination will be frequent enough to detect such symptoms in time to take action to reverse them and to prevent any chronic symptoms from developing. Such changes will also decrease costs for employers who reduce exposure below the action level, thereby increasing the cost effectiveness of the standard. The American Textile Manufacturers Institute specifically recommended the changes for this reason. By having biennial examinations for employees exposed below the action level, the concerns of the ACTWU, NIOSH and the Brown Lung Association should be greatly reduced. Developing symptoms which may occur even at low levels will be caught in time to be reversed .

OSHA proposes to eliminate annual training under paragraph (i) for employees exposed below the action level. An employer who succeeds in keeping exposures below the action level is likely to have a good control program which is providing protection for employees. After initial training to inform the employee of the hazards of cotton dust, it would not seem necessary to mandate detailed requirements in this area since the low levels are evidence that the employer's program is successful.

F. Exposure Monitoring and Measurement

(1) *Methods of exposure measurement.* The proposal, like the 1978 standard, relies heavily upon routine monitoring of the workplace in which cotton dust is present to identify those areas where exposure levels may require employer action. The Lumsden and Lynch vertical elutriator, which has a theoretical particle size cut-off of about 15 micrometers, is the standard sampling device. Although the vertical elutriator has been shown to capture larger particles, to have a rather high coefficient of variation, and to have the problems discussed in the 1976 proposal (42 FR 56505), it remains the reference instrument because it was the sampling device used by Merchant and others in the epidemiological studies which established the dose-response curve and which served as the basis of the 1978 standard. In addition, most employers have compiled a body of monitoring data using the vertical elutriator since the promulgation of 29 CFR 1910.1043 and this data serves as the base point for dust control planning within the textile industry.

Since Merchant's studies were completed in the early 1970's, new dust measurement devices have come onto the market and others may be developed. These devices incoroprate more sophisticated technologies such as light scattering, beta ray absorption, and quartz crystals frequency difference. While the 1978 standard accepts alternative measuring devices provided they are demonstrated to be equivalent to the vertical elutriator, the parameters for determining that equivalency are vague and may not meet accepted statistical principles. Having recognized the difficultues in demonstrating equivalency between the vertical elutriator and alternative instruments as required by the present standard, OSHA has contracted with statisticans affiliated with the Georgia Institute of Technology and the University of Pittsburgh to design equivalency testing protocols. The completion of this study is expected by August 1, 1983. Although this proposal makes no changes in the requirements for equivalent sampling devices at this time, OSHA does seek to remove barriers to technological advance and anticipates that the equivalency protocols developed by this study will reduce the burden upon employers while providing the same protection to employees. Upon the completion of the study, it will be placed in the OSHA cotton dust docket for public comment. OSHA is soliciting comments and evidence relevant to alternative measuring devices which may lead to improvements to the standard in this area.

(2) *Frequency of Exposure Monitoring.* The present cotton dust standard requires an initial determination of the representative exposure of all employees to airborne concentrations of lint-free respirable cotton dust over an eight-hour period. (29 CFR 1910.1043(d)). The monitoring sample must include at least one determination during each shift for each work area. In addition, these measurements must be repeated every six months regardless of exposure levels and whenever there is any change in production, process or control which might result in an increase in employee exposure. These requirements were derived from the comments to the 1976 proposal and the 1974 recommendations of NIOSH for a new cotton dust standard. The NIOSH criteria document recommended semiannual monitoring of all areas of potential exposure to cotton dust and monthly monitoring of areas where concentrations exceeded the environmental limit. In the February 9, 1982 ANPR, OSHA requested specific input concerning both the need for multishift monitoring and the necessary frequency of monitoring. A variety of comments were submitted by interested parties in response to the questions.

The North Carolina Department of Labor (Ex. 175–80) stated that in its compliance activities, substantial differences have been noticed in monitoring results for a single position on various work shifts. These differences were related to variations in production quantity, scheduling, and employee work-habits. Because of the observed differences, the NCDOL supports the requirement of sampling on all shifts.

In their comments, the ATMI stated: "For some operations, such multishifting monitoring is justifiable, since experience has shown that exposure measurements may vary somewhat from shift to shift." (Ex. 175–41 p. 21). However, the ATMI also believes that the exposure variations from shift to shift is negligible in many operations and that in those instances, multishift monitoring is unnecessary.

ATMI submitted supplemental comments to the ANPR including a statistical analysis by Dr. Suh of Burlington Industries of survey data gathered by ATMI. The purpose of this analysis was to provide a method which uses a known single shift average to predict, with a specified degree of confidence, the "true-day average" of all three shifts. The method proposed, however, would not identify all shifts where exposure in fact exceeded the PEL. Conceivably, an overall "true-day average" estimated to be below the PEL could mask a single shift average which is actually above it. The study leaves unanswered significant questions concerning the procedures used and the assumptions relied upon. The most important involves the representative characteristics of the fifty firms which supplied data. Potential differences in variability between plants is not addressed. In addition, there are serious questions concerning the pooling of variances across dust levels and work areas in cases where there are wide diffences in coefficient of variation values. This report must be considered as inconclusive until further explanations are available.

In view of the above uncertainties on shift-to-shift variability, OSHA is not proposing to amend provisions requiring monitoring of all shifts. OSHA is, however, opening the issue of whether monitoring on all shifts should continue and requests comments on this issue.

Several comments were submitted concerning the frequency of monitoring in workplaces with different exposure levels. ATMI, in its comments stated: "* * * requiring that monitoring be performed with the same frequency in workplaces that are far below the PEL as in workplaces that exceed the PEL is an unjustified burden." (Ex. 175–41). ATMI suggested that OSHA follow the approach adopted for other health standards: varing the frequency with which it monitors various work areas depending on the dust exposure in those particular areas. ATMI recommended annual monitoring for exposure above the action level but below the PEL. Where exposure exceeds the PEL, ATMI said that periodic monitoring (every six months) may be justifiable. Furthermore, ATMI commented that where exposures are below the action level in two successive measurements, no further monitoring should be required unless there is a change in the work process or control which would result in new or additional cotton dust exposure.

Spring Mills commented that presently dust level monitoring is required too frequently. It suggested eliminating monitoring for areas found to be consistently below the action level. (Ex. 175–35). Baxter/Kelly Corp. supports annual monitoring. (Ex. 175–24). Two other commenters supported the present monitoring interval of six months. (Ex. 175–31, Ex. 175–6).

NCDOL commented that all exposed workers should undergo an initial monitoring of exposure to cotton dust. Subsequent monitoring should be done

less frequently than annually if employee exposure is below the action level or PEL. On the other hand, NCDOL is in favor of monitoring every six months if employee exposure is above the action level or PEL. (Ex. 175–80).

OSHA has considered the comments received on the issue of monitoring frequency and proposes to amend 29 CFR 1910.1043(d) to change the monitoring requirements in several respects. First, if within one year, two monitoring tests reveal exposure levels at or below the action level, further testing need not be repeated unless there has been a production, process, or control change which may result in new or additional exposure, or the employer has reason to suspect an increase in employee exposure. Second, if monitoring tests reveal exposure levels above the action level but below the PEL, the employer shall repeat the monitoring for the exposed employees at least annually. Third, if monitoring reveals employee exposure above the PEL, the employer shall repeat the monitoring at least every six months as is currently the case. The initial monitoring provision and production change section of the standard remain virtually unchanged.

There are several reasons for the proposed changes. As discussed in the comments, it is an unnecessary burden to require employers regularly to monitor workplaces where dust exposure is below the action level. Use of the vertical elutriator is a cumbersome and time consuming procedure. It would be counterproductive from the standpoint of employee health and employer compliance to require an industrial hygienist to spend valuable time on this task which will reveal data, likely already known, that exposures are low. When exposures are below the action level, random variation is unlikely to raise exposures above the PEL even on individual days. The provision requiring remonitoring when processes change will assure that possible increases in exposure levels will be caught if they occur so that precaution can be taken.

For those areas where exposures are below the PEL but above the action level, changing to yearly monitoring is appropriate. Exposure below the PEL is being achieved so that employees are receiving required protection. Yearly remonitoring will catch possible increases from minor changes in operations. The reduction in frequency will increase cost effectiveness and permit industrial hygienists to spend more time on other important health and safety tasks.

OSHA is not proposing to change monitoring frequency when exposures are over the PEL. It is necessary to continue monitoring every 6 months to assure that an appropriate respirator program is in effect and that changes in controls to reduce exposure to required levels can be properly evaluated.

G. Use of Respirators

Respirators are used to protect employees when engineering and work practice controls cannot reduce exposures to below the PEL. They are a viable form of protection if properly selected, fitted, worn, and promptly replaced by employees.

Since the publication of the 1978 cotton-dust standard, some "single use" respirators have been retested by NIOSH and approved as respirators with "replaceable" filters. There is however, no significant changes in the construction and performance of these respirators. A quarter mask respirator does not necessarily provide lower protection factors than a half-mask respirator and they should be classified in the same category. The use of self-contained breathing apparatus (SCBA) in atmosphere where only an air-purifying respirator is needed is impractical and should be deleted. The use of combination supplied air respirators and escape SCBA is applicable only under atmosphere which is immediately dangerous to life or health; therefore, it is not appropriate for cotton dust. Accordingly, OSHA is proposing to rename "single use" respirators as "disposable" respirators. Other respirators such as SCBA and combination supplied air and escape SCBA have been deleted as *required* respirators. In addition, a footnote is added in the standard to clarify that respirators permitted at higher environmental concentrations can be used at lower concentrations.

H. Wage Retention

The job transfer and wage retention provision of the 1978 standard is found at 29 CFR 1910.1043(f)(2)(v). It provides that whenever a physician determines that an employee is unable to wear any type of respirator, the employee shall have the opportunity to transfer to another job, if one is available, which involves exposure to cotton dust levels below the permissible exposure limit. In addition, this regulation, as originally issued, required employers to assure that transferred employees would not suffer a loss of earnings, other employment rights or benefits. This latter part of the paragraph is referred to as the "wage retention provision".

The Supreme Court, in *ATMI* v. *Donovan, supra,* struck down the wage retention provision of the regulation as promulgated. (The job transfer provision remains in effect.) The Court held, *inter alia,* that OSHA failed to provide a sufficient rationale for the wage retention provision because it did not explain how the provision was related to the achievement of a safe and healthful work environment. *Id.,* at 537–538. The Court did not decide the issue of whether OSHA had the underlying authority to promulgate such a provision. The Court noted that there was some evidence on the subject in the record. *Id.,* at 539, footnote 73.

The United States Court of Appeals for the District of Columbia Circuit upheld the validity of OSHA's Medical Removal Protection ("MRP") program for the lead standard in *United Steelworkers of America, AFL–CIO* v. *Marshall,* 647 F.2d 1189 (D.C. Cir. 1980), *cert. denied, Lead Industries Ass'n. Inc.* v. *Donovan,* 101 S.Ct. 3148 (1981). Part of the MRP program for lead involved a wage retention provision for workers who transferred to other jobs or were laid off to avoid continued exposure to unacceptable levels of lead.

In response to the Supreme Court remand in *ATMI* v. *Donovan,* the Advance Notice of February 9, 1982 raised the issue of a wage retention provision (47 Fr 5406). Among the comments received, some were in favor of the provision and others were opposed.

West Point Pepperell opposed the provision, commenting that OSHA does not have a significant data base which shows that significant numbers of employees cannot wear respirators and therefore would benefit from the wage retention provision. (Ex. 175–50.)

Both ATMI and Collins & Aikman Corporation stated that workers' compensation laws already provide sufficient incentive for employers to transfer affected employees from areas of high exposure to areas of low or no exposure (Ex. 175–4, and Ex. 175–13.) Collins & Aikman also commented that setting wage rates is an area beyond the purview of OSHA and should be left to company personnel policy and practice.

Another commenter, Baxter/Kelly, urged that it should have the right to terminate employees who are sensitive to dust within their first year of employment. (Ex. 175–24, p.2.) Baxter/Kelly also objected to the wage retention provision because its employees may feel discriminated against on the basis that they are earning less while performing the same job as a transferred employee.

Several groups submitted comments in favor of the wage retention provision. The Amalgamated Clothing and Textile Workers Union said that the provision would contribute materially to the health of exposed workers by ensuring that they were not penalized for disclosing symptoms of illness during the medical surveillance program. In support of this position, ACTWU offered the testimony of Dr. Merchant. His testimony concerned workers' perceptions that participation in medical surveillance programs and subsequent release of information obtained may result in lay-offs or dismissals. (Ex. 175–36.)

The OSHA Committee of the Brown Lung Association commented as follows: "Employees who are not guaranteed the same wages if they change jobs are likely to continue wearing respirators or try to do without them, further aggravating their respiratory condition." (Ex. 175–43.) The Public Citizen Health Research Group concurred with this view. (Ex. 175–54.) The Brown Lung Association also commented that many union contracts have wage retention clauses and non-union workers should have the same protection. (Ex. 175–43.) The North Carolina Department of Labor commented that the wage retention provision may relate beneficially to employee health by encouraging honesty about a physical impairment which would preclude the safe use of a respirator. (Ex. 175–80.)

OSHA has carefully considered the comments submitted in response to the Advance Notice on the issue of wage retention. At this time, OSHA does not propose to include such a provision in the standard. First, OSHA is not convinced that there is a sufficient factual basis to propose a wage retention regulation. OSHA does not have evidence before it of any substantial number of employees who would be transferred because of inability to wear respirators and who might lose wages because of the transfer. These data would be needed before answering the second question of whether a significant number of employees would be discouraged from taking physical examinations without a wage retention provision. Although ACTWU cited the testimony of Dr. Merchant, standing alone it cannot provide a sufficient basis for finding that significant numbers of employees will receive health benefits from a wage retention provision.

Second, as a practical matter, OSHA does not view a wage retention provision, by the time it is implemented, as having a substantial impact on a significant population of employees. Current data indicates that 81% of the textile industry is already in compliance with mandated engineering controls (Ex. 185). By March of 1984, most segments of the industry will be virtually in total compliance with the applicable engineering requirements, leaving only a small proportion of workers who may need respirators. Of this group, an even smaller percentage will be unable to wear a respirator. Based on this practical assessment of compliance progress, it appears unnecessary, in the absence of compelling factual data, to include a wage retention provision in the proposed standard. The few areas where compliance may be extended past 1984 will not involve many employees.

Finally, OSHA considers it sound policy not to become involved in determining wages and terms of employment, an area traditionally reserved to employers' personnel practices and the collective bargaining process, unless there is a compelling occupational health reason. Absent a substantial factual basis, OSHA does not think its involvement in wage retention is warranted. The evidence as developed thus far does not present such a compelling set of circumstances which clearly establish a nexus between employee health and the wage retention provision. Therefore, at this time, OSHA proposes not to include a wage retention provision in the proposed revision of the standard.

I. Technical Changes

A number of technical changes to the cotton dust standard have been suggested in response to the Advance Notice. In addition, OSHA has had several years experience with the standard and a number of technical changes have come to its attention which will improve the standard.

OSHA prposes to amend paragraph (d)(4) to lenghten the time for written notification of monitoring results to employees from 5 days to 20 days. The five day period has proved to be an unrealistically short period for employers to process the raw results acquired from the laboratory and ascribe them to individual employees. In addition, more time may facilitate individual notice. Where a significant number of employees must be notified within five days of the employer's receipt of monitoring results, as is presently required, posting the monitor's report is often the only practical form of notice. A twenty day time period will allow other alternatives such as notices included with pay checks or passed out at regular safety meetings, and these means of notification may be more efficient and effective than previous practices. In addition, the employer will be better able to determine what corrective action, if any, should be taken.

OSHA proposes to amend paragraph (e)(4) (which specifies that ventilation equipment be checked every 6 months and within 5 days after production changes) to require that ventilation be checked at reasonable intervals. It is more appropriate here to use a performance standard and to leave to professional judgment the frequencies for checking.

OSHA also proposes here to use a performance standard and to delete paragraph (g)(5) which specifies that employers shall maintain ventilation and control equipment. This paragraph is generally duplicative of paragraph (e)(4). The requirement for periodic exposure monitoring when exposures are over the action level or when there are process changes will also indicate if equipment needs checking and is more directly related to assuring protection for employees.

In addition, OSHA proposes to amend paragraph (i)(1)(i) by adding a new paragraph (a) and re-lettering the existing paragraphs and by making minor clarifying changes. The purpose of the changes in the training provisions are to focus employee attention upon the health hazards in the workplace and the measures taken to alleviate risk. OSHA is proposing to delete paragraph (i)(2)(iii) which require the employers to obtain and distribute government publications to employees because individual workplace conditions vary and employers can best determine the information most applicable to their specific work site.

OSHA plans to clarify the work practices provisions by defining the term "blow off" immediately following the definition of "blow down" in paragraph (b)(2), and by discussing the respirator use requirements of "blow down" and "blow off" in paragraph (g)(1). These changes are needed to clear up the present confusion regarding the two procedures.

Finally, OSHA proposes minor modifications to the provisions for compliance plans in paragraph (e)(3). The current language had been interpreted by some to require a compliance plan even if the employer had achieved compliance. That was not OSHA's intention. Clearly, a compliance plan is not needed if the employer is in compliance. Thus, paragraph (e)(3)(i) has been amended to indicate that a

compliance plan is required only when the employer has employees exposed over the PEL. In addition, it is proposed to amend paragraph (e)(3)(ii) to indicate that compliance plans be updated when needed and not every six months as currently stated. Updating should occur when conditions change. It is unnecessary when no changes have occurred.

IV. Technological Feasibility and Economic Feasibility

A. Review of Technological Feasibility and Proposal To Extend Compliance Time for Certain Operations

In setting standards for toxic substances, Section 6(b)(5) of the Act mandates that OSHA set the standard which most adequately assures employee safety and health "to the extent feasible." Consequently, in its preamble to the 1978 standard, OSHA presented extensive documentation to demonstrate that it was technically feasible to reduce dust levels in the cotton textile industry to the PEL's within a 4-year compliance period. The various production processes were described and the dust control techniques applicable to each process were discussed in detail. Examples of successful, innovative control technologies, especially those which sharply increased plant productivity while reducing dust levels, were thoroughly examined. (43 FR 27361–27367). The courts have subsequently upheld OSHA's determination that the technology necessary to control dust exposures is generally available.

OSHA hired a consulting firm, Centaur Associates, to determine the current extent of compliance, to estimate the costs that have already been incurred, to review the technological feasibility of completing compliance programs, and to estimate the costs likely to be incurred in the near future. The Centaur report, which has been placed in the record, (Exhibit 185), estimates that the percentage of workers exposed below the PEL increased from 46.1% to 71.5% in yarn manufacturing processes between 1978 and 1982, confirming OSHA's earlier position that dust levels could be reduced significantly. Compliance in slashing and weaving which was already at 96% (essentially full compliance) has remained at that high level.

Representatives of the textile industry, however, have stated that it is not technically feasible to reduce dust levels to current PEL's in all processes by 1984. The industry's technical personnel and its equipment suppliers have acknowledged the effectiveness of dust control systems in lowering dust levels in the initial opening through drawing or "fiber preparation" processes, but state that these controls are not always adequate in the yarn manufacturing processes of spinning, winding, twisting, and spooling. Although maintaining that "technology forcing" was not required to achieve compliance, OSHA acknowledged this problem in the preamble to the 1978 standard:

> OSHA, however, does recognize that implementation of the standard in certain operations, such as spinning, where the application of ventilation controls may involve unusual difficulties, significant innovation or indeed necessitate more than improvement in existing technology to achieve compliance, may be difficult. OSHA notes, however, industry's ability to seek alternative solutions to technological problems beyond those inherent in the adaptation of general techniques. (43 FR 27363)

Addressing this issue in their response to OSHA's ANPR, ATMI agreed that for many companies, "from a strictly technological standpoint, the permissible exposure limits established under the standard could be achieved in most operations most of the time, if money is deemed to be no object." ATMI explained that although the magnitude of the dust control problem varies according to plant layout, fiber type, and other facility-specific factors, the most troublesome operations are those that emit dust over wide areas, such as spinning (particularly ring spinning) and winding where "the ability to achieve the limit through retrofitting an existing work area is much more doubtful." (Ex. 175–60). Burlington Industries, Inc. noted that the dust in many fiber preparation areas could be controlled by ventilation even without replacing the old machinery although this was not cost-effective. For downstream processes, however, they reported that, "[d]espite research efforts, the textile industry, its suppliers, contractors and consulting engineers have not been able to develop 'on-frame' capture plenums or systems capable of reducing dust levels to 200 $\mu g/m^3$ for coarse yarn manufacturing beyond drawing (i.e. roving, spinning)." (Ex. 170–14).

John Lumsden, a co-developer of the vertical elutriator used to monitor cotton dust levels, a participant in the byssinosis prevalence studies conducted by Merchant and co-workers, a former director for North Carolina Occupational Health Programs, and a vice president of a health and safety consulting firm for the textile industry, discussed control technology in his congressional testimony before the Byssinosis Hearing of the Investigations and Oversight Subcommittee, Committee on Science and Technology, U.S. House of Representatives, Washington, D.C., September 22, 1982 (Subcommittee Hearings (Exhibit 186–2)). Lumsden confirmed that exhaust ventilation and material handling equipment adequately control dust from the opening to roving. He stated, however, that "the machines, or frames, that accomplish spinning, twisting, spooling, or winding have not, to this time, been retrofitted with local exhaust ventilation systems. Because dust control in these areas must be achieved through general dilution ventilation where efficiency is variable, Lumsden found that some yarn manufacturing areas have dust levels over the OSHA standard. During these same House Subcommittee hearings, Percy Thackston, Executive Vice President of the American Textile Machinery Association, expressed essentially the same conclusion and summarized the problems in control technology by explaining that:

> Technology is presently available for controlling dust from opening through the card room by the use of modern machinery and equipment * * * From ring spinning through warping, it is a different story. There has not been a major, successful, predictable breakthrough in the dust control technology for these process areas. (Exhibit 162–3)

Finally, Enviro Control, in their 1980 study for NIOSH, "Control Technology Assessment of Raw Cotton Processing Operations," explained that in the early process of opening through drawing, local exhaust ventilation and machine enclosure design is being applied to reduce dust emission levels. For the downstream processes of yarn preparation, however, they stated:

> * * * engineering control technology is limited primarily to general ventilation and air cleaning equipment. Adequate applications of local exhaust ventilation equipment have not been developed for the processes. A major problem is the large number of individual emission points that must be controlled. Also, the physical configuration of these machines are not conducive to local exhaust ventilation. (Ex. 186–1 p. 15).

On the other hand, the North Carolina Department of Labor commented that it had found no problem areas (Ex. 175–80), and other studies indicated a high level of compliance. ATMI's survey of companies employing a total of about 72,500 workers reported that roughly 80% of cotton textile employees were exposed below the current PEL, with

78% below in twisting, 66% below in winding, and 73% below in spooling operations. (Ex. 175–60). These estimates were substantially confirmed in the Subcommittee Hearings testimony by Lumsden, whose data from 44 textile plants showed about 84% of the yarn manufacturing work areas in compliance; and by John Brooks, North Carolina Commissioner of Labor, who presented a survey of North Carolina textile mills which indicated that dust levels were below the PEL in 83% of the spinning operations, 77% of the winding operations and 81% of the twisting operations (Exhibit 187–4).

The apparent divergence between the statements indicating technical infeasibility in some areas and the exposure data indicating a generally high degree of compliance was directly addressed by Centaur Associates in their study for OSHA. After visiting 15 plants and interviewing numerous industrial engineers and manufacturers of dust control equipment, Centaur reported that textile experts generally consider the 1978 cotton dust standard to be technologically feasible. This view was supported by their finding that many equipment companies guarantee their dust control systems to maintain dust levels below the permissible limits under most circumstances. Centaur also found that about 86% of the workers in spinning operations were exposed below the PEL. Nevertheless, Centaur found that a feasibility problem does exist for specific processes in the manufacture of certain types of yarn.

The problem areas were concentrated in the ring spinning, winding and spooling of relatively coarse high-cotton-content yarns that generally are used in denim, duck, heavy terry cloth, and heavy industrial fabrics. Centaur found that the same air filtration and dust control companies that typically guaranteed compliance with the PEL in other production areas would not necessarily assure compliance for the spinning and winding of high-cotton-content coarse yarns.

The spindle speed in ring spinning is about the same for low count (coarse) yarns as for high count (fine) yarns, but since the amount of cotton per yard is inversely proportional to the yarn count, more cotton per hour is processed with the coarse yarns than with the fine yarns. Because the dust emission rate varies directly with the production rate, coarse yarn processing produces more dust. Based on technical information obtained from air filtration and dust control contractors, Centaur calculated that the dust release rate of certain coarse yarn with a high cotton content would be above the cleansing capability of the available air handling systems.

OSHA's preamble to the 1978 standard did not recommend specific measures that would control dust exposure in ring spinning operations. Instead, OSHA concluded that:

> * * * reducing dust levels in operations from opening to roving would aid in the reduction of dust levels in areas of final processing such as spinning. Futher, general practices such as ventilation installation, process isolation, and equipment modification are recommended as strategies * * * OSHA believes that a major effort to solve the dust control problem in spinning using the strategies enumerated and relying on experience gained in other textile operations will produce successful results. (43 FR 27367)

Regarding potential problems in winding, spooling, and twisting, OSHA assumed that, "levels in all these operations are currently very low and are not expected to present a compliance problem," and that "the vast majority of workplaces will be able to comply with little difficulty." (43 FR 27367).

Recent experience with ring spinning processes using high-cotton-content coarse yarns indicates that ventilation systems may not always be effective, and that this equipment cannot generally be isolated or modified. Although dust levels in winding, spooling and twisting are frequently below the PEL (ATMI's survey shows from 66.6 to 78% of the processes currently in compliance), public comments indicate that dust levels remain high where high-cotton-content coarse yarns are used, and its control remains a serious engineering problem.

Several alternative compliance approaches could be explored if increased ventilation fails to control dust adequately in these yarn production areas. Centaur noted that reducing production rates would lower dust levels, but could not estimate how significant that reduction would have to be to achieve a 200 $\mu g/m^3$ ambient dust level. It is clear, however, that the adverse competitive impact of this approach on those firms using high-cotton-content coarse yarns could be substantial if more than small changes were required. Washed cotton would eliminate the employer's compliance obligation but, until certain technical problems are overcome, washed cotton generally cannot be commercially processed.

The most promising solution to the problem appears to be the rapid advent of open-end spinning systems. This relatively new technology, which boosts spinning productivity and completely eliminates the roving process, sharply reduces dust levels because the fibers are spun within enclosed rotors and ventilation is designed into the machinery. Indeed, the proper operation of the equipment requires local ventilation and efficient dust control.

Although open-end systems are best suited for the production of coarse yarns, a number of serious problems remain. For example, yarn produced by open-end spinning is weaker (has lower tensile strength) than yarn that is ring spun. Also, there are some potential problems with broken ends in weaving and negative wear and appearance properties of finished fabrics. Equipment producers maintain that coarse yarns spun on open-end systems are about 80% as strong as similar yarns spun on ring spindles. The comparative weakness in the yarn, however, together with the different texture of the fabric woven from these yarns, have led some large garment manufacturers to insist that the denim and duck fabric for their apparel be made with ring spun yarns. This market element has significantly slowed the industry's conversion to open-end spinning systems despite its clear production efficiences. Moreover, even though all domestic yarn manufacturing firms would operate under the same regulatory restrictions, the potential for import substitution would not allow these market factors to be overcome easily.

OSHA, therefore, believes that it may not be feasible for employers to lower dust levels to the PEL by March 27, 1984, in the production processes of ring spinning, winding, twisting and spooling of those relatively coarse yarns that are composed of a high percentage of cotton fiber. Although it does not appear that the industry will overcome these feasibility problems quickly enough to comply with the current PEL deadline, the Agency concludes that the problem is not a permanent one. Open-end spinning is a rapidly developing technology, and as Centaur stated, "Equipment currently available from vendors is 'third generation,' and each 'generation' produces equipment improvements." Centaur did not know whether the texture problems of open-end spun yarn would endure or whether the current fashion preferences would persist, but noted the possibility that modified finishing processes may help to correct product deficiencies. At least two U.S. denim plant have already converted all of their spinning operations to open-end systems to take advantage of its production efficiencies and many more are evaluating the machines. One large denim plant, for

example, reportedly plans to reduce its spinning department workforce from 56 to 19 after installing open-end spinning equipment. (*Textile World*, Sept. 1982, p. 158. See also *American's Textiles*, Nov. 1981, pp. 14–16.) With the potential for such major cost savings, it is reasonable to assume that the economic pressures that inexorably follow future technical advances will ultimately compel most mills to undertake this conversion.

A major manufacture of dust monitoring and control equipment, PPM, Inc., indicated that the textile industry had made remarkable gains in reducing dust levels, but that several processes could not yet be brought into compliance using conventional engineering controls in a cost-effective manner. Stating that the orderly development of improved dust controls would be difficult if the textile industry had to meet the 1984 compliance date, PPM, Inc. recommended a minimum 2-year extension for the installation of engineering controls. (Ex. 175–31.) OSHA believes that this recommendation is appropriate for several production areas in light of industry's technical feasibility problems.

Therefore, OSHA is proposing a 2-year extension in the requirement to reduce cotton dust levels to 200 $\mu g/m^3$ with engineering controls in the textile processes of ring spinning, winding, twisting and spooling of coarse high-cotton content yarns. At this stage in the rulemaking process. OSHA has not yet gathered sufficient data to establish the precise levels of yarn coarseness and cotton content that give rise to present feasibility problems in these processes but believes that a yarn, equal to or coarser than 14 denier and a cotton content equal to or greater than 80%, may be appropriate thresholds for feasibility problems. OSHA request comments on whether these specific criteria are appropriate for inclusion within the extension. In addition, OSHA requests comments on whether a case-by-case determination of feasibility would be preferable to specific numerical criteria. Because Centaur estimated that only between 20 and 30 out of 443 cotton textile plants produce yarn of this size and composition, the latter approach may not be administratively burdensome.

Iu order to prevent health problems from developing in this interval, OSHA proposes that employees making use of the extension have a board certified industrial hygienist inspect that area every six months and state in writing that the respirator program is being successfully carried out or suggest in writing what additional requirements are needed to create a fully satisfactory respirator program. OSHA also proposes that the compliance plan of any employer making use of the extension be required to include a schedule indicating the equipment and operational changes that would be needed to achieve compliance. The deadline for inclusion of the schedule would be within three months of the effective date of these amendments, and the deadline for compliance with the standards would be March 27, 1986.

B. Economic Feasibility

OSHA must demonstrate the economic feasibility of the proposed standard. A regulation that seriously disrupts the economic viability of a given industry cannot be considered feasible under the Act. *ATMI* v. *Donovan, supra.* In this regard, OSHA believes that the standard, as applied to the cotton textile industry as a whole, is clearly affordable and therefore economically feasible. Both the Supreme Court and the D.C. Circuit Court of Appeals have upheld this determination based upon evidence available in 1978. It now appears that the control costs are even lower than the estimated costs that served as the basis for that decision. Nevertheless, there may be particular segments of the industry, or size classes within particular industry sectors, which could not raise all of the financial capital required to install effective engineering controls by 1984.

ATMI, in their response to OSHA's ANPR, did not assert that the industry as a whole would be significantly impaired, although they pointed out that, "* * * in a number of cases, the economics of the situation make it impossible to justify the expenditures that would be required to achieve the permissible exposure limit. For that reason several marginal facilities already have been closed, and one can expect that additional closings will occur in the future." (Ex. 175–60). The National Cotton Council of America emphasized that many plants complied with the standard by substituting synthetics for cotton, resulting in lost revenues to cotton farmers, handlers and processors. (Ex. 175–47). Neither association believed that "tiering" the requirements on the basis of company size was warranted to provide relief to smaller firms.

The cost of the cotton dust standard was one of the questions included in an ATMI survey, to which about 50 companies employing 72,500 workers responded. These firms reported that they had spent approximately $310 million for capital equipment to comply with the standard up to the end of 1981, and expected to incur approximately $150 million in additional capital expenditures to meet the 1984 requirements. ATMI speculated that the companies responding to this survey may have been the more progressive firms, and stated that, "Consequently, for the industry as a whole, it seems fair to assume that considerably more than one-third of the required capital expenditures remain to be made in the future." The responding companies also calculated that they would spend about $20 million in annual energy costs and $6 million in annual maintenance costs to comply with the engineering control requirement. (Ex. 175–60).

Centaur Associates, in their study for OSHA, estimated that the textile industry has already spent $143.3 million in capital costs that are attributable to the regulation, and still needs to spend an additional $102.2 million (Exhibit 185). Centaur estimated annual energy costs at $27 million, maintenance costs at $2 million, monitoring costs at $0.7 million and medical surveillance costs at $5.1 million. The ATMI and Centaur estimates are not strickly comparable because Centaur adjusted for productivity gains by assuming that all of the ventilation costs, but only 17.5 percent of the new production equipment costs, are attributable to the OSHA standard. Both surveys, however, support the view that about two-thirds of the required capital expenditures have already been made.

The Centaur projections indicate that total future capital outlays for dust control equipment for an average size plant would be approximately $300,000 per year over the next 2 years. Over 60 percent of these expenditures, however, would be offset by associated productivity gains. Those firms that have expended little on dust control equipment would face higher costs—up to approximately $600,000 per year over the 2-year period for the average size plant. The 1982 average revenue per plant was estimated by Centaur to be $9.6 million. Because cash flow as a percentage of sales in the textile industry has averaged 4.65% in recent years, an annual average cash flow of $479,000 could be predicted. For many firms, this amount would be adequate to cover the additional capital outlay without new borrowing. The textile industry, however, is affected by the condition of the national economy, and its profitability and cash flow are below levels of recent years. Thus, Centaur reported that capital requirements to comply with engineering controls by 1984 may be more than some plants could generate from internal cash sources. Moreover, problems associated

with borrowing for necessary engineering controls make these funds costly, especially for small firms, for which cash flow as a percent of sales is not as large, and problems of raising outside capital more difficult. Consequently, some textile companies would benefit from a delay in the required date for engineering controls because it would allow the firms to spread the capital requirements over an additional number of years, providing them with more time to raise the required capital.

Centaur concluded, however, that despite the textile industry's current financial position, it was improbable that conditions were such that the required capital expenditures could not be made (Exh. 185, p. 7–14). They noted that even where cash flow was not sufficient to cover capital expenditures, most firms would have sufficient access to financial markets because the greater part of the required capital outlays would be for new equipment which improved plant production rates as well as reducing exposures. In addition, recent tax legislation has substantially reduced the after-tax cost of new capital investment, and interest rates for business loans have begun to subside. Centaur, therefore, believed that the necessary capital could be raised for the required expenditures, and found it improbable that the capital expenditures required by OSHA would contribute significantly to plant closings. Public comments have not provided substantial documentation to refute Centaur's findings of economic feasibility for the textile sector. As a result, OSHA has not proposed significant modifications to the 1984 dust level requirements based on economic feasibility grounds. Nevertheless, OSHA solicits new information on this issue from those groups that expect to be severely impacted and OSHA will consider these views before issuing final amendments.

For nontextile industries, only waste processing facilities would need additional engineering controls to meet the 1 mg/m³ dust limit which has been in effect since 1971. Employers in these sectors, however, are under no obligation to install infeasible controls because the regulation applied to this sector states only that controls must be implemented "whenever feasible". Consequently, only feasible controls are required. Nevertheless, the Agency requests parties to submit additional data on the potential economic consequences of alternative regulations for nontextile industries, and these comments will be taken into consideration during the continuation of the rulemaking process.

V. Summary of Regulatory Impact and Regulatory Flexibility Analysis

OSHA has decided that the revised cotton dust proposal should be treated as a major rule under Executive Order 12291 because of the significant public interest in this rulemaking. Therefore, OSHA has prepared a preliminary regulatory impact analysis that outlines the need for regulation, the problems with the current standard, the alternative regulatory actions considered, and the issues of technological and economic feasibility. The report also includes a regulatory flexibility analysis that assesses the proposed rule's impact on small entities as required by the Regulatory Flexibility Act of 1980.

The analysis finds that the proposed changes would provide a more cost-effective means of assuring that workers do not experience an excess risk of respiratory disease due to cotton dust exposures. Indeed, by increasing compliance flexibility, additional health resources could be concentrated on areas of greatest hazard, effectively enhancing the degree of worker protection. While not all of the cost savings that would result from the proposed revisions can be quantified, OSHA believes that the actual savings would be substantial. For example, exempting nontextile sectors from the 1978 standard is projected to reduce the capital costs incurred by cotton-using industries by $94.4 million. In addition, less frequent medical surveillance and monitoring and reduced operating cost resulting from the exemptions and the new action level would save $30.7 million each year.

The analysis concludes that the regulation is both technologically and economically feasible for most small as well as large businesses. Although the proposed provisions do not explicitly grant concessions based on firm size, they would give significant relief to many small firms engaged in the processing of cotton. Most importantly, the provision for an action level would assist small firms in the textile industry, and the exemptions, based on significant risk considerations, would reduce regulatory burdens in the nontextile sectors.

For textile companies, it appears that costs are proportional to output levels, so that unit costs of compliance should not differ significantly by plant size for a given product type. Thus, OSHA's analysis concludes that most smaller firms (under $10 million in assets), while having lower profit margins and less access to borrowed capital, should still be able to comply with the standard.

In the nontextile sectors, there are numerous small firms that would benefit from the exemptions included in the proposed revisions. Some small waste processing companies that have not complied with the 1 mg/m³ dust standard could have some difficulty raising the required capital to come into compliance. The applicable standard, however, requires these expenditures only where they are determined to be feasible. OSHA, moreover, is continuing to study the regulatory impact on small business and requests interested parties to submit additional information on this issue at the public hearings to follow this proposal.

Copies of OSHA's Preliminary Regulatory Impact and Regulatory Flexibility Analysis can be obtained from the Docket Office, at the address listed in the "address" section at the beginning of this **Federal Register** Document.

VI. Environmental Assessment

The proposed rule for occupational exposure to cotton dust and its major alternatives have been reviewed in accordance with the requirements of the National Environmental Policy Act (NEPA) of 1969 (42 U.S.C. 432 *et seq.*), the Guidelines of the Council on Environmental Quality (40 CFR Part 1500), and OSHA's DOL NEPA Procedures (29 CFR Part 11). As a result of this review, the Assistant Secretary has determined that the proposed amendments will not have a significant impact on the external environment. Impacts on the workplace environment are discussed in other portions of this preamble and in other agency notices on cotton dust. (47 FR 5906–5910, February 9, 1982; 43 FR 27350–27394, June 23, 1978; 41 FR 56498–56527, December 26, 1976).

In December 1977, OSHA published a Final Environmental Impact Statement (FEIS) on the 1976 proposed cotton dust standard. This FEIS concluded that the reduction of exposures to cotton dust would result from improved housekeeping practices and from the collection and removal of cotton dust from the workplace. Further, it was determined that these actions would not result in any significant impact to the general quality of the human environment external to the workplace, particularly in terms of ambient air quality, water quality, or solid waste disposal (p. 25).

The June 1978 final rule established permissible exposure limits (PEL's) of 200 μg/m³ of respirable cottong dust for the yarn manufacturing proceses; 750

$\mu g/m^3$ for the slashing and weaving processes; and 500 $\mu g/m^3$ for all other industries (nontextiles and knitting). A similar range of PEL's was discussed in the FEIS (100 $\mu g/m^3$–1000 $\mu g/m^3$), and the conclusions drawn regarding potential environmental impacts remain valid—namely, that there would be an insignificant impact on the external environment. Some of the proposed provisions to be considered in terms of potential environmental impacts are briefly discussed in the following paragraphs.

This proposal to exempt all of the nontextile industries from the § 1910.1043 standard should not significantly impact on the external environment. The 1977 FEIS indicated that a standard in this area would not affect the external environment and similarly a determination that a new standard was not needed to improve employee health in some segments of the nontextile industry would have no impact on the external environment. Comments received in response to the ANPR (47 FR 5906–5910, February 9, 1982) have largely contended that the standard or a determination that a standard was not needed would have no environmental impacts in the nontextile sectors.

In terms of ambient air emissions and accumulation of solid waste, no significnt impact is expected to occur as a result of the proposed exemption for nontextiles. Particulates emitted to the ambient air would still have to comply with requirements of the Clean Air Act and controls would continue to be required to reduce emissions that exceeded compliance with the statute. In maintaining the status quo, an increase in the amount of solid waste is not anticipated.

Moreover, the implementation of an action level would not have any significant impact on the environment. An action level is a level below the PEL (e.g., one-half of the PEL) at which some provisions of the standard would go into effect. Action levels can be effective in reducing or eliminating the regulatory burden in situations where health risks are low. In these cases, there is an incentive for the employer to achieve compliance faster and at a lower PEL, thereby avoiding most or all regulatory provisions of the standard. This gives the employer some regulatory relief and provides the worker with a more healthful workplace.

Where extension of the period to install engineering controls is proposed because of feasibility problems, no change would be expected to the external environment since by and large the standard does not impact on the external environment.

The conclusions drawn in the FEIS remain valid, and consequently, no amended impact statement is required by this OSHA action. The preceding paragraphs and preamble to this NPRM serve as the environmental assessment and a finding of no significant impact.

OSHA reserves the right to perform additional environmental analyses based on the information and comments received in response to this NPRM.

VII. Clearance of Information Collection Requirements

The collection of information requirements, contained in the proposed rule have been submitted to the Office of Management and Budget (OMB) for review under section 3504(h) of the Paper Work Reduction Act of 1980. These collection requirements are not effective until OMB approval has been obtained and the public notified to that effect through a technical amendment to this regulation. Any comments on this matter should be directed to: Office of Information and Regulatory Affairs, Office of Management and Budget, Attention: Desk Officer for Labor, Room 3208, New Executive Office Building, Washington, D.C. 20503.

Public Participation

Written Comments

OSHA requests comments and supporting documentation on the issues raised in this notice. The comments must be received by August 9, 1983 and submitted in quadruplicate to the Docket Officer, Docket H–025E, Room S–6212, Occupational Safety and Health Administration, U.S. Department of Labor, 200 Constitution Avenue, NW., Washington, D.C. 20210.

The data, views, and arguments that are submitted will be available for public inspection and copying at the above address. All timely submissions received will be made part of the record of this proceeding.

Oral Hearing

In addition to the request for written information, which should be submitted to the Docket Office, OSHA is providing an opportunity under section 6(b)(3) of the Act and 29 CFR Part 1911, to submit oral testimony concerning the specified issues at an informal public hearing scheduled to begin at 10 a.m., on September 19, 1983 in the auditorium, Frances Perkins Department of Labor Building, 200 Constitution Ave., NW., Washington, D.C. 20210, at 10 a.m., on September 27, 1983 in Dallas, Texas at the Grenelefe Hotel, Seasons Ballroom, 1011 South Akard St., and at 10 a.m. on October 4, 1983 in Columbia, South Carolina at the Town House, Deauville Room, 1615 Jervais St.

Notice of Intention To Appear

Persons desiring to participate at the hearing must file in quadruplicate a notice of intention to appear by August 26, 1983, with Mr. Tom Hall, OSHA, Division of Consumer Affairs, Room N3635, U.S. Department of Labor, 200 Constitution Avenue, NW., Washington, D.C. 20210. Telephone (202) 523–80.24.

The notices of intention to appear, which will be available for inspection and copying at the OSHA Docket Office during business hours, must contain the following information:

1. The name, address and telephone number of each person to appear;
2. The capacity in which the person will appear;
3. The approximate amount of time required for the presentation and the hearing at which the party wishes to appear;
4. The specific issues that will be addressed;
5. A statement of the position that will be taken with respect to each issue addressed; and
6. Whether the party intends to submit documentary evidence, and if so, a summary of the evidence to be adduced in support of the position.

Filing of Testimony and Evidence Before Hearing

Any party requesting more than 15 minutes for presentation at the hearing or submitting documentary evidence, must provide, in quadruplicate, the complete text of its testimony, and all documentary evidence to be presented at the hearing, to the OSHA Divison of Consumer Affairs, where they will be available for inspection and copying. This material must be received by September 9, 1983. Each submission will be reviewed in light of the amount of time requested in the notice of intention to appear and in light of the time available for public hearing. In instances where the information contained in the submission does not justify the amount of time requested, a more appropriate amount of time will be allocated and the participant will be notified of that fact.

Conduct of Hearings

The hearings will commence at 10 a.m., with the resolution of any procedural matters relating to the proceeding. The hearing will be presided over by an Administrative Law Judge who will have all the powers necessary and appropriate to conduct a full and

fair informal hearing as provided in 29 CFR Part 1911, including the powers:

1. To regulate the course of the proceedings;

2. To dispose of procedural requests, objections, and comparable matters;

3. To confine the presentation to the matters pertinent to the issues raised;

4. To regulate the conduct of those present at the hearing by appropriate means; and

5. In the Judge's discretion, to keep the record open for a reasonable stated time to receive written information and additional data, views, and arguments from any person who has participated in the oral proceeding.

Following the close of the hearing, the presiding Administrative Law Judge will certify the record of the hearing to the Assistant Secretary of Labor for Occupational Safety and Health.

Authority and Signature

This document was prepared under the direction of Thorne G. Auchter, Assistant Secretary of Labor for Occupational Safety and Health, U.S. Department of Labor, 200 Constitution Avenue, NW., Washington, D.C. 20210. Pursuant to Sections 6(b), 8(c) and 8(g) of the Act, it is hereby proposed to amend 29 CFR Part 1910 to read as set forth below.

List of Subjects in 29 CFR Part 1910

Occupational safety and health, Health, Cotton dust.

(Secs. 6(b), 8(c) and 8(g). Pub. L. 91–596, 84 Stat. 1593, 1599, 1600; 29 U.S.C. 655, 657; 29 CFR Part 1911; Secretary of Labor's Order No. 8–76 (41 FR 25059)

Signed at Washington, D.C., this 2d day of June 1982.

Thorne G. Auchter,

Assistant Secretary of Labor.

PART 1910—[AMENDED]

It is proposed that Part 1910 of Title 29 of the Code of Federal Regulations be amended as follows:

§ 1910.19 [Removed]

1. Section 1910.19(f) will be repealed and removed.

§ 1910.1000 [Amended]

2. A footnote (e) to § 1910.1000, Table Z–1, "Cotton dust (raw)" is added to read as follows: This standard applies in cotton yarn manufacturing, weaving and slashing until the applicable compliance dates for installing fesible engineering controls required by § 1910.1043. (The applicable lower exposure limits of § 1910.1043 must be achieved with engineering controls and respirators, in the interim). This standard also applies to the cotton waste processing industries of waste recycling (sorting, blending, cleaning, and willowing), garnetting and bedding assembly.

3. Section 1910.1043 will be amended by revising paragraphs (a) through (m) to read as follows:

§ 1910.1043 Cotton Dust

(a) *Scope and application.*—(1) This section applies to the control of employee exposure to cotton dust in all workplaces where employees engage in yarn manufacturing and slashing and weaving operations.

(2) This section does not apply to the handling or processing or woven or knitted materials; to the knitting industry including hosiery manufacturing; to the handling or processing of washed cotton; or to maritime operations covered by 29 CFR Parts 1915 and 1918, to the harvesting or ginning of cotton; to the construction industry; or to the nontextile industries of classing, warehousing, and cottonseed processing.

(b) *Definitions.* For the purpose of this section:

"Assistant Secretary" means the Assistant Secretary of Labor for Occupational Safety and Health, U.S. Department of Labor, or designee:

"Blow down" means the general cleaning of all pieces of machinery in a processing area by the use of compressed air.

"Blow off" means the use of compressed air for cleaning of short duration and usually for a specific machine or portion of a machine.

"Cotton dust" means dust present in the air during the handling or processing of cotton, which may contain a mixture of many substances including ground up plant matter, fiber, bacteria, fungi, soil, pesticides, non-cotton plant matter and other contaminants which may have accumulated with the cotton during the growing, harvesting and subsequent processing or storage periods. Any dust present during the handling and processing of cotton through the weaving of fabrics is cotton dust coming within the scope of this standard.

"Director" means the Director of the National Institute for Occupational Safety and Health (NIOSH), U.S. Department of Health and Human Services, or designee.

"Lint-free respirable cotton dust" means particles of cotton dust of approximately 15 micrometers or less aerodynamic equivalent diameter;

"Vertical elutriator cotton dust sampler" means a dust sampler which has a particle size cut-off at approximately 15 micrometers aerodynamic equivalent diameter when operating at the flow rate of 7.4±0.2 liters of air per minute;

"Yarn manufacturing" means all textile mill operations from opening to, but not including, slashing and weaving;

"Washed cotton" means: (1) Cotton which has been commercially prepared for medical use (by heating to 270° F with 0.6% caustic solution, washed with soap and tetrasodium hydro- phosphate, bleached with a 0.1% solution of sodium hypochlorite, and scoured with sulfuric acid at a pH of less than 2.0, then washed to a pH of 6.0 to 7.0) or

(2) Cotton yarn or thread which has been scoured in a caustic bath and dyed in a hot, water-based solution.

(c) *Permissible exposure limits and action levels.*—(1) *Permissible exposure limits.* (i) The employer shall assure that no employee who is exposed to cotton dust in yarn manufacturing is exposed to airborne concentrations of lint-free respirable cotton dust greater than 200 $\mu g/m^3$ mean concentration, averaged over an eight-hour period, as measured by a vertical elutriator or a method of equivalent accuracy and precision.

(ii) The employer shall assure that no employee who is exposed to cotton dust in the textile processes known as slashing and weaving is exposed to airborne concentrations of lint-free respirable cotton dust greater than 750 $\mu g/m^3$ mean concentration, averaged over an eight hour period, as measured by a vertical elutriator or a method of equivalent accuracy and precision.

(2) *Action levels.* (i) The action level for yarn manufacturing is an airborne concentration of lint-free respirable cotton dust of 100 $\mu g/m^3$ mean concentration, averaged over an eight-hour period, as measured by a vertical elutriator or a method of equivalent accuracy and precision.

(ii) The action level for the textile processes known as weaving and slashing is an airborne concentration of lint-free respirable cotton dust of 375 $\mu g/m^3$ mean concentration, averaged over an eight-hour period, as measured by a vertical elutriator or a method of equivalent accuracy and precision.

(d) *Exposure monitoring and measurement.*—(1) *General.* (i) For the purposes of this section, employee exposure is that exposure which would occur if the employee were not using a respirator.

(ii) The sampling device to be used shall be either the vertical elutriator cotton dust sampler or a method of equivalent accuracy and precision.

(iii) If an alternative to the vertical elutriator cotton dust sampler is used, the employer shall establish equivalency

by demonstrating that the alternative sampling devices:

(A) Collect respirable particulates in the same range as the vertical elutriator (approximately 15 microns);

(B) Replicate exposure data in side-by-side field comparisons; and

(C) Are equivalent within an accuracy and precision range of plus or minus 25 percent for 95 percent of the samples over the range of 0.5 to 2 times the permissible exposure limit.

(2) *Initial monitoring.* Each employer who has a place of employment within the scope of this standard shall conduct monitoring by obtaining measurements which are representative of the exposure of all employees to airborne concentrations of lint-free respirable cotton dust over an eight-hour period. The sampling program shall include at least one determination during each shift for each work area.

(3) *Periodic monitoring.* (i) If the initial monitoring required by paragraph (d)(2) or any subsequent monitoring reveals employee exposure to be below the action level, and an additional monitoring at an interval no greater than one year confirms that the exposure level is below the action level, monitoring need not be repeated for those employees except as otherwise provided in paragraph (d)(3)(iv) of this section.

(ii) If the initial monitoring required by paragraph (d)(2) or any subsequent monitoring reveals employee exposure to be at or above the action level but at or below the permissible exposure limit, the employer shall repeat the monitoring for those employees at least annually.

(iii) If the initial monitoring required by paragraph (d)(2) or any subsequent monitoring reveals employee exposure to be above the PEL, the employee shall repeat the monitoring for those employees at least every six months.

(iv) Whenever there has been a production, process, or control change which may result in new or additional exposure to cotton dust, or whenever the employer has any other reason to suspect an increase in employee exposure, the employer shall repeat the monitoring and measurements for those employees affected by the change or increase.

(4) *Employee notification.* (i) Within twenty working days after the receipt of monitoring results, the employer shall notify each employee individually in writing of the exposure measurements which represent that employee's exposure.

(ii) Whenever the results indicate that the employee's exposure exceeds the applicable permissible exposure limit specified in paragraph (c), the employer shall include in the written notice a statement that the permissible exposure limit was exceeded and a description of the corrective action taken to reduce exposure below the permissible exposure limit.

(e) *Method of compliance.*—(1) *Engineering and work practice controls.* The employer shall institute engineering and work practice controls to reduce and maintain employee exposure to cotton dust at or below the permissible exposure limit specified in paragraph (c), except to the extent that the employer can establish that such controls are not feasible.

(2) Whenever feasible engineering and work practice controls are not sufficient to reduce employee exposure to or below the permissible exposure limit, the employer shall nonetheless institute these controls to reduce exposure to the lowest feasible level, and shall supplement these controls with the use of respirators which shall comply with the provisions of paragraph (f).

(3) *Compliance program.* (i) Where the most recent exposure monitoring data indicates that any employee is exposed to cotton dust levels greater than the permissible exposure limit, the employer shall establish and implement a written program sufficient to reduce exposure to or below the permissible exposure limit solely by means of engineering controls and work practices as required by paragraph (e)(1) of this section.

(ii) The written program shall include at least the following:

(A) A description of each operation or process resulting in employee exposure to cotton dust at levels greater than the PEL;

(B) Engineering plans and other studies used to determine the controls for each process;

(C) A report of the technology considered in meeting the permissible exposure limit;

(D) Monitoring data obtained in accordance with paragraph (d) of this section;

(E) A detailed schedule for development and implementation of engineering and work practice controls, including exposure levels projected to be achieved by such controls;

(F) Work practice program; and

(G) Other relevant information.

(iii) The employer's schedule as set forth in the compliance program, shall project completion of the compliance program no later than March 27, 1984, except as provided in paragraph (m)(2)(ii)(B).

(iv) The employer shall complete the steps set forth in his program by the dates in the schedule.

(v) Written programs shall be submitted, upon request, to the Assistant Secretary and the Director, and shall be available at the worksite for examination and copying by the Assistant Secretary, the Director, and any affected employee or their designated representatives.

(vi) The written program required under paragraph (e)(3) of this section shall be revised and updated to reflect the current status of the program and current exposure levels.

(4) *Mechanical ventilation.* When mechanical ventilation is used to control exposure, measurements which demonstrate the effectiveness of the system to control exposure, such as capture velocity, duct velocity, or static pressure shall be made at reasonable intervals.

(f) *Use of respirators.*—(1) *General.* Where the use of respirators is required under this section, the employer shall provide, at no cost to the employee, and assure the use of respirators which comply with the requirements of this paragraph (f). Respirators shall be used in the following circumstances:

(i) During the time periods necessary to install or implement feasible engineering controls and work practice controls;

(ii) During maintenance and repair activities in which engineering and work practice controls are not feasible;

(iii) In work situations where feasible engineering and work practice controls are not yet sufficient to reduce exposure to or below the permissible exposure limits; and

(iv) In operations specified under paragraph (g)(1); and

(v) Whenever an employee requests a respirator.

(2) *Respirator selection.* (i) Where respirators are required under this section, the employer shall select the appropriate respirator from Table 1 below and shall assure that the employee uses the respirator provided.

TABLE I

Cotton dust concentration	Required respirator
Not greater than:	
(a) 5 × the applicable permissible exposure limit (PEL).	1. A disposable particulate filter respirator
(b) 10 × the applicable PEL.	1. A quarter or half-mask respirator other than disposable equipped with particulate filters, or 2. A half-mask negative-pressure supplied air respirator.
(c) 100 × the applicable PEL.	1. A full facepiece respirator equipped with high-efficiency particulate filters, or

TABLE I—Continued

Cotton dust concentration	Required respirator
.....	2. A negative-pressure supplied air respirator equipped with a full face-piece.
(d) Greater than 100 × the applicable PEL.	1. A powered air-purifying respirator equipped with high-efficiency particulate filters, or 2. Any positive-pressure supplied air respirator, or 3. Any positive-pressure self-contained breathing apparatus.

NOTE.—1. A disposable respirator means the filter element is an inseparable part of the respirator.
2. Any respirators permitted at higher environmental concentrations can be used at lower concentrations.

(ii) The employer shall select respirators from those tested and approved for protection against dust by the National Institute for Occupational Safety and Health (NIOSH) under the provisions of 30 CFR Part 11.

(iii) Whenever respirators are required by this section for concentrations not greater than 100 × the applicable permissible exposure limit, the employer shall, upon the request of the employee, provide a powered air purifying respirator with a high efficiency particulate filter in lieu of the respirator specified in paragraphs (a), (b), or (c) of Table I.

(iv) Whenever a physician determines that an employee is unable to wear any form of respirator, including a power air purifying respirator, including a power air purifying respirator, the employee shall be given the opportunity to transfer to another position which is available or which later becomes available having a dust level at or below the PEL.

(3) *Respirator program.* The employer shall institute a respirator program in accordance with § 1910.134 of this part.

(4) *Respirator usage.* (i) The employer shall assure that the respirator used by each employee exhibits minimum facepiece leakage and that the respirator is fitted properly.

(ii) The employer shall allow each employee who uses a filter respirator, to change the filter elements whenever an increase in breathing resistance is detected by the employee. The employer shall maintain an adequate supply of filter elements for this purpose.

(iii) The employer shall allow employees who wear respirators to wash their faces and respirator face pieces to prevent skin irritation associated with respirator use.

(g) *Work practices.* Each employer shall, regardless of the level of employee exposure, immediately establish and implement a written program of work practices which shall minimize cotton dust exposure. The following shall be included where applicable.

(1) Compressed air "blow down" cleaning shall be prohibited where alternative means are feasible. Where compressed air is used for cleaning, the employees performing the "blow down" or "blow off" shall wear suitable respirators. Employees whose presence is not required to perform "blow down" shall be required to leave the area during this cleaning operation.

(2) Cleaning of clothing or floors with compressed air shall be prohibited.

(3) Floor sweeping shall be performed with a vacuum or with methods designed to minimize dispersal of dust.

(4) In areas where employees are exposed to concentrations of cotton dust greater than the action level, cotton and cotton waste shall be stacked, sorted, baled, dumped, removed or otherwise handled by mechanical means, except where the employer can show that it is infeasible to do so. Where infeasible, the method used for handling cotton and cotton waste shall be the method which reduces exposure to the lowest level feasible.

(h) *Medical surveillance*—(1) *General.* (i) Each employer covered by the standard shall institute a program of medical surveillance for all employees exposed to cotton dust.

(ii) The employer shall assure that all medical examinations and procedures are performed by or under the supervision of a licensed physician and are provided without cost to the employee.

(iii) Persons other than licensed physicians, who administer the pulmonary function testing required by this section shall complete a NIOSH-approved training course in spirometry.

(2) *Initial examinations.* The employer shall provide each employee who is or may be exposed to cotton dust with an opportunity for medical surveillance. For new, employees, this examination shall be provided prior to initial assignment. The medical surveillance shall include at least the following:

(i) A medical history;

(ii) The standardized questionnaire contained in Appendix B; and

(iii) A pulmonary function measurement, including a determination of forced vital capacity (FVC) and forced expiratory volume in 1 second (FEV_1), and the percentage that the measured values of FEV and FVC differ from the predicted values, using the standard tables in Appendix C. The predicted FEV_1 and FVC for blacks shall be multiplied by 0.85 to adjust for ethnic differences. These determinations shall be made for each employee before the employee enters the workplace on the first day of the work week, following at least 35 hours after previous exposure to cotton dust. The tests shall be repeated during the shift, no sooner than 4 and no more than 10 hours after the beginning of the work shift; and, in any event, no more than one hour after cessation of exposure.

(iv) Based upon the questionnaire results, each employee shall be graded according to Schilling's byssinosis classification system.

(3) *Periodic examinations.* (i) The employer shall provide annual medical surveillance for all employees exposed to cotton dust above the action level. The employer shall provide medical surveillance at least every two years for all employees exposed to cotton dust below the action level. Periodic medical surveillance shall include at least an update of the medical history and standardized questionnaire (App. B–III) and the pulmonary function measurements in paragraph (h)(2)(iii) of this section.

(ii) Medical surveillance as required in paragraph (h)(3)(i) of this section shall be provided every six months for all employees in the following categories:

(A) An FEV_1 of greater than 80 percent of the predicted value, but with an FEV_1 decrement of 5 percent or 200 ml. on a first working day;

(B) An FEV_1 of less than 80 percent of the predicted value; or

(C) Where, in the opinion of the physician, any significant change in questionnaire findings, pulmonary function results, or other diagnostic tests have occurred.

(iii) An employee whose FEV_1 is less than 60 percent of the predicted value shall be referred to a physician for a detailed pulmonary examination.

(iv) A comparison shall be made between the current examination results and those of previous examinations and a determination made by the physician as to whether there has been a significant change.

(4) *Information provided to the physician.* The employer shall provide the following information to the examining physician:

(i) A copy of this regulation and its Appendices;

(ii) A description of the affected employee's duties as they relate to the employee's exposure;

(iii) The employee's exposure level or anticipated exposure level;

(iv) A description of any personal protective equipment used or to be used; and

(v) Information from previous medical examinations of the affected employee which is not readily available to the examining physician.

(5) *Physician's written opinion.* (i) The employer shall obtain and furnish the employee with a copy of a written

opinion from the examining physician containing the following:

(A) The results of the medical examination and test;

(B) The physician's opinion as to whether the employee has any detected medical conditions which would place the employee at increased risk of material impairment of the employee's health from exposure to cotton dust;

(C) The physician's recommended limitations upon the employee's exposure to cotton dust or upon the employee's use of respirators including a determination of whether an employee can wear a negative pressure respirator, and where the employee cannot, a determination of the employee's ability to wear a powered air purifying respirator; and,

(D) A statement that the employee has been informed by the physician of the results of the medical examination and any medical conditions which require further examination or treatment.

(ii) The written opinion obtained by the employer shall not reveal specific findings or diagnoses unrelated to occupational exposure.

(i) *Employee education and training.*—(1) *Training program.* (i) The employer shall provide a training program for all employees in all workplaces where cotton dust is present, and shall assure that each employee is informed of the following:

(A) The acute and long term health hazards associated with exposure to cotton dust;

(B) The names and descriptions of jobs and processes which could result in exposure to cotton dust at or above the PEL.

(C) The measures, including work practices required by paragraph (g) of this section, necessary to protect the employee from exposures in excess of the permissible exposure limit;

(D) The purpose, proper use and limitations of respirators required by paragraph (f), of this section;

(E) The purpose for and a description of the medical surveillance program required by paragraph (h) of this section and other information which will aid exposed employees in understanding the hazards of cotton dust exposure; and

(F) The contents of this standard and its appendices.

(ii) The training program shall be provided prior to initial assignment and shall be repeated annually for each employee exposed at or above the action level and when job assignments or work processes change and when employee performance indicates a need for retraining.

(2) *Access to training materials.* (i) Each employer shall post a copy of this section with its appendices in a public location at the workplace, and shall, upon request, make copies available to employees.

(ii) The employer shall provide all materials relating to the employee training and information program to the Assistant Secretary and the Director upon request.

(j) *Signs.* The employer shall post the following warning sign in each work area where the permissible exposure limit for cotton dust is exceeded:

WARNING
COTTON DUST WORK AREA
MAY CAUSE ACUTE OR DELAYED
LUNG INJURY
(BYSSINOSIS)
RESPIRATORS
REQUIRED IN THIS AREA

(k) *Recordkeeping.*—(1) *Exposure measurements.* (i) The employer shall establish and maintain an accurate record of all measurements required by paragraph (d) of this section.

(ii) The record shall include:

(A) A log containing the items listed in paragraph IV (a) of Appendix A, and the dates, number, duration, and results of each of the samples taken, including a description of the procedure used to determine representative employee exposure;

(B) The type of protective devices worn, if any, and length of time worn; and

(C) The names, social security numbers, job classifications, and exposure levels of employees whose exposure the measurement is intended to represent.

(iii) The employer shall maintain this record for at least 20 years.

(2) *Medical surveillance.* (i) The employer shall establish and maintain an accurate medical record for each employee subject to medical surveillance required by paragraph (h) of this section.

(ii) The record shall include:

(A) The name and social security number and description of the duties of the employee;

(B) A copy of the medical examination results including the medical history, questionnaire response, results of all tests, and the physician's recommendation;

(C) A copy of the physician's written opinion;

(D) Any employee medical complaints related to exposure to cotton dust;

(E) A copy of this standard and its appendices, except that the employer may keep one copy of the standard and the appendices for all employees, provided that he references the standard and appendices in the medical surveillance record of each employee; and

(F) A copy of the information provided to the physician as required by paragraph (h)(4) of this section.

(iii) The employer shall maintain this record for at least 20 years.

(3) *Availability.* (i) The employer shall make all records required to be maintained by paragraph (k) of this section available to the Assistant Secretary and the Director for examination and copying.

(ii) Employee exposure measurement records and employee medical records required by this paragraph shall be provided upon request to employees, designated representatives, and the Assistant Secretary in accordance with 29 CFR 1910.20 (a)–(e) and (g)–(i).

(4) *Transfer of records.* (i) Whenever the employer ceases to do business, the successor employer shall receive and retain all records required to be maintained by paragraph (k) of this section.

(ii) Whenever the employer ceases to do business, and there is no successor employer to receive and retain the records for the prescribed period, these records shall be transmitted to the Director.

(iii) At the expiration of the retention period for the records required to be maintained by this section, the employer shall notify the Director at least 3 months prior to the disposal of such records and shall transmit those records to the Director if he requests them within that period.

(iv) The employer shall also comply with any additional requirements involving transfer of records set forth in 29 CFR 1910.20(h).

(l) *Observation of monitoring.* (1) The employer shall provide affected employees or their designated representatives an opportunity to observe any measuring or monitoring of employee exposure to cotton dust conducted pursuant to paragraph (d) of this section.

(2) Whenever observation of the measuring or monitoring of employee exposure to cotton dust requires entry into an area where the use of personal protective equipment is required, the employer shall provide the observer with and assure the use of such equipment and shall require the observer to comply with all other applicable safety and health procedures.

(3) Without interfering with the measurement, observers shall be entitled to:

(i) An explanation of the measurement procedures;

(ii) An opportunity to observe all steps related to the measurement of airborne concentrations of cotton dust performed at the place of exposure; and

(iii) an opportunity to record the results obtained.

(m) *Effective date.*—(1) *General.* This section is effective March 27, 1980, except as otherwise provided below.

(2) *Startup dates.*—(i) *Initial monitoring.* The initial monitoring required by paragraph (d)(2) of this section shall be completed as soon as possible but no later than March 27, 1980.

(ii) *Methods of compliance: engineering and work practice controls.*

(A) The engineering and work practice controls required by paragraph (e) of this section shall be implemented no later than March 27, 1984 except as set forth in the paragraph (m)(2)(ii)(B) of this section.

(B) For ring spinning operations (including only ring spinning and winding, twisting, and spooling operations following ring spinning but not including the preceding operations of opening through roving) for yarn equal to or coarser than 14 denier with more than 80 percent cotton, the engineering and work practices controls required by paragraph (e) of this section shall be implemented no later than March 27, 1986. Employers who have not brought these ring spinning operations into compliance by March 27, 1984 shall within three months of the effective date of these amendments, have a certified industrial hygienist review their respirator program each six months until compliance is achieved and submit a written report indicating the equipment and operational changes that would be needed to achieve compliance by March 27, 1986. This report will be part of the employer's compliance plan. The employer shall prepare an updated compliance plan within three (3) months of the effective date of these amendments indicating a schedule for completion of engineering changes to achieve compliance by March 27, 1986.

(iii) *Compliance program.* The compliance program required by paragraph (e)(3) of this section shall be established no later than March 27, 1981.

(iv) *Respirators.* The respirators required by paragraph (f) of this section shall be provided no later than April 27, 1980.

(v) *Work practices.* The work practices required by paragraph (g) of this section shall be implemented no later than June 27, 1980.

(vi) *Medical surveillance.* The medical surveillance required by paragraph (h) of this section shall be completed no later than March 27, 1981.

(vii) *Employee education and training.* The initial education and training required by paragraph (i) of this section shall be completed as soon as possible but no later than June 27, 1980.

Part III

Department of Health and Human Services

Food and Drug Administration

Over-the-Counter Oral Human Use; Insect Repellent Drug Products

DEPARTMENT OF HEALTH AND HUMAN SERVICES

Food and Drug Administration

21 CFR Part 310

[Docket No. 81N-0040]

Insect Repellent Drug Products for Over-the-Counter Oral Human Use;

AGENCY: Food and Drug Administration.

ACTION: Notice of proposed rulemaking.

SUMMARY: The Food and Drug Administration (FDA) is issuing a notice of proposed rulemaking that would establish that over-the-counter (OTC) insect repellent drug products for oral use are not generally recognized as safe and effective and are misbranded. FDA is issuing this notice of proposed rulemaking after considering the report and recommendations of the Advisory Review Panel on OTC Miscellaneous Internal Drug Products and the public comment on an advance notice of proposed rulemaking that was based on those recommendations. This proposal is part of the ongoing review of OTC drug products conducted by FDA.

DATES: Written comments, objections, or requests for oral hearing on the proposed regulation before the Commissioner of Food and Drugs by August 9, 1983. New data by June 11, 1984. Comments on the new data by August 10, 1984. These dates are consistent with the time periods specified in the agency's revised procedural regulations for reviewing and classifying OTC drugs (21 CFR 300.10).

ADDRESS: Written comments, objections, new data, or requests for oral hearing to the Dockets Management Branch (HFA-305), Food and Drug Administration, Rm. 4-62, 5600 Fishers Lane, Rockville, MD 20857.

FOR FURTHER INFORMATION CONTACT: William E. Gilbertson, National Center for Drugs and Biologics (HFN-510), Food and Drug Administration, 5600 Fishers Lane, Rockville, MD 20857, 301-443-4900.

SUPPLEMENTARY INFORMATION: In the **Federal Register** of January 5, 1982 (47 FR 424) FDA published, under § 330.10(a)(6) (21 CFR 330.10(a)(6)), an advance notice of proposed rulemaking that would classify OTC insect repellent drug products for oral use as not generally recognized as safe and effective and as being misbranded and would declare these products to be new drugs within the meaning of section 201(p) of the Federal Food, Drug, and Cosmetic Act (the act) (21 U.S.C. 321(p)). The notice was based on the recommendations of the Advisory Review Panel on OTC Miscellaneous Internal Drug Products, which was the advisory review panel responsible for evaluating data on the active ingredients in this drug class. Interested persons were invited to submit comments by April 5, 1982. Reply comments in response to comments filed in the initial comment period could be submitted by May 5, 1982.

In accordance with § 330.10(a)(10), the data and information considered by the Panel were put on public display in the Dockets Management Branch (HFA-305), Food and Drug Administration (address above). In response to the advance notice of proposed rulemaking, one consumer submitted a comment. A copy of the comment is on public display in the Dockets Management Branch.

In this proposed rule to amend Part 310 by adding to Subpart E new § 310.529 (21 CFR 310.529), FDA states for the first time its position on OTC insect repellent drug products for oral use. Final agency action on this matter will occur with the publication at a future date of a final rule relating to OTC insect repellent drug products for oral use.

This proposal constitutes FDA's tentative adoption of the Panel's conclusions and recommendations on OTC insect repellent drug products for oral use, based on the comment received and the agency's independent evaluation of the Panel's report. As discussed in the final rule revising the procedural regulations for reviewing and classifying OTC drug, FDA will no longer use the terms "Category I" (generally recognized as safe and effective, and not misbranded), "Category II" (not generally recognized as safe and effective or misbranded), and "Category III"' (available data are insufficient to classify as safe and effective and further testing is required) at the final rule stage, but will use instead the terms "monograph conditions" (old Category I) and "nonmonograph conditions" (old Categories II and III). (See the **Federal Register** of September 29, 1981; 46 FR 47730.) This document retains the concepts of Categories I, II, and III at the proposed rule stage.

In the advance notice of proposed rulemaking, the agency stated that if it proposed to adopt the Panel's recommendation it would propose that insect repellent drug products for oral use be eliminated from the OTC market effective 6 months after the date of publication of a final rule in the **Federal Register**, regardless of whether further testing was undertaken to justify their future use. Based on all information available to date, the agency is proposing that oral insect repellents as a class of drugs be found to be ineffective. If this proposed finding is adopted in the final rule, the agency advises that the conditions under which the drug products that are subject to this rule are not generally recognized as safe and effective and are misbranded (nonmonograph conditions) will be effective 6 months after the date of publication of the final rule in the **Federal Register.** On or after that date, no OTC drug products that are subject to the rule may be initially introduced or initially delivered for introduction into interstate commerce unless they are the subject of an approved NDA. Manufacturers are encouraged to comply voluntarily with the proposed rule at the earliest possible date.

I. The Agency Tentative Conclusion on the Comment

One comment objected to the Category II clasification of thiamine hydrochloride (vitamin B-1) as an oral insect repellent and claimed that the effectiveness of this ingredient aganist black flies and other biting flies has been demonstrated by sportsmen, conservationists, and other persons engaged in outdoor activities. Maintaining that the Panel's conclusions on thiamine hydrochloride are contradictory, the comment explained that the Panel classified thiamine hydrochloride as Category II, but stated at 47 FR 426 that this ingredient is generally recognized as safe in oral doses up to 40 milligrams (mg) daily and further stated that it did not believe that doses exceeding 40 mg are unsafe. The comment added that the Panel also stated at 47 FR 426 that "of the substances studied, only thiamine hydrochloride (vitamin B-1) has shown enough promise to have been evaluated to any significant degree." The comment claimed that thiamine hydrochloride as an oral insect repellent deserves the same opportunity as other OTC products "to be accepted or rejected by the American consumer" unless the agency proves the ingredient to be unsafe or dangerous.

The agency has reviewed the Panel's recommendations and notes that while the Panel did indicate at 47 FR 426 that thiamine hydrochloride "has shown enough promise to have been evaluated," the submitted studies were inadequate. The Panel concluded, and the agency concurs, that available data do not show that thiamine hydrochloride is an effective oral insect repellent, or that it is generally recognized as such.

Further, the comment did not submit adequate data to support the effectiveness of thiamine hydrochloride as as OTC oral insect repellent. In the absence of adequate data demonstrating that thiamine hydrochloride is generally recognized as effective for use as an oral insect repellent, the ingredient cannot be included as an allowable ingredient in an OTC drug monograph.

II. The Agency's Tentative Adoption of the Panel's Report

FDA has considered the comment and other data and information available at this time and concludes that it will tentatively adopt the Panel's report and recommendation that thiamine hydrochloride labeled for use as an insect repellent for oral use are classified Category II.

The agency is also revising § 310.529(b) to clarify that a product covered by the regulation is a new drug for which an approved NDA is required for marketing, and in the absence of an approved NDA the product would also be misbranded under section 502 of the Act.

The agency has examined the economic consequences of this proposed rulemaking in conjunction with other rules resulting from the OTC drug review. In a notice published in the **Federal Register** of February 8, 1983 (48 FR 5806), the agency announced the availability of an assessment of these economic impacts. The assessment determined that the combined impacts of all the rules resulting from the OTC drug review do not constitute a major rule according to the criteria established by Executive Order 12291. The agency therefore concludes that no one of these rules, including this proposed rule for OTC insect repellent drug products for oral use, is a major rule.

The economic assessment also concluded that the overall OTC drug review was not likely to have a significant economic impact on a substantial number of small entities as defined in the Regulatory Flexibility Act, Pub. L. 96–354. That assessment included a discretionary Regulatory Flexibility Analysis in the event that an individual rule might impose an unusual or disproportionate impact on small entities. However, this particular rulemaking for OTC insect repellent drug products for oral use is not expected to pose such an impact on small businesses. Therefore, the agency certifies that this proposed rule, if implemented, will not have a significant economic impact on a substantial number of small entities.

The agency invited public comment in the advance notice of proposed rulemaking regarding any impact that this rulemaking would have on OTC insect repellent drug products for oral use. No comments were received. Any comments on the agency's initial determination of the economic consequences of this proposed rulemaking should be submitted by August 9, 1983. The agency will evaluate any comments and supporting data that are received and will reassess the economic impact of this rulemaking in the preamble to the final rule.

The agency has determined that under 21 CFR 25.24(d)(9) (proposed in the **Federal Register** of December 11, 1979; 44 FR 71742) this proposal is of a type that does not individually or cumulatively have a significant impact on the human environment. Therefore, neither an environmental assessment nor an environmental impact statement is required.

List of Subjects in 21 CFR Part 310

New drugs.

PART 310—[AMENDED]

Therefore, under the Federal Food, Drug, and Cosmetic Act (secs. 201(p), 502, 505, 701, 52 Stat. 1041–1042 as amended, 1050–1053 as amended, 1055–1056 as amended by 70 Stat. 919 and 77 Stat. 948 (21 U.S.C. 321(p), 352 355, 371)), and the Administrative Procedure Act (secs. 4, 5, and 10, 60 Stat. 238 and 243 as amended (5 U.S.C. 553, 554, 702, 703, 704)), and under 21 CFR 5.11 as revised (see 47 FR 16010; April 14, 1982), it is proposed that Subchapter D of Chapter I of Title 21 of the Code of Federal Regulations be amended in Part 310 by adding to Subpart E new § 310.529, to read as follows:

§ 310.529 Drug products containing active ingredients offered over-the-counter (OTC) for oral use as insect repellents.

(a) Thiamine hydrochloride (vitamin B–1) has been marketed as an ingredient in over-the-counter (OTC) drug products for internal use as an insect repellent (an orally administered drug product intended to keep insects away). There is a lack of adequate data to establish the effectiveness of this, or any other, ingredient for OTC internal use as an insect repellent. Labeling claims for OTC orally administered insect repellent drug products are either false, misleading, or unsupported by scientific data. The following claims are examples of some that have been made for orally administered OTC insect repellent drug products: "Oral mosquito repellent," "mosquitos avoid you," "bugs stay away," "keep mosquitos away for 12 to 24 hours," and "the newest way to fight mosquitos." Therefore, any drug product containing ingredients offered for internal use as an insect repellent cannot be generally recongnized as safe and effective.

(b) Any OTC drug product that is labeled, represented, or promoted for internal use as an insect repellent is regarded as a new drug within the meaning of section 201(p) of the Federal Food, Drug, and Cosmetic Act, for which an approved new drug application under section 505 of the act and Part 314 of this chapter is required for marketing. In the absence of an approved new drug application, such product is also misbranded under section 502 of the act.

(c) A completed and signed "Notice of Claimed Investigational Exemption for a New Drug" (Form FD–1571) (OMB Approval No. 0910–0014), as set forth in § 312.1 of this chapter, is required to cover clinical investigations designed to obtain evidence that any drug product labeled, represented, or promoted OTC as an insect repellent for internal use is safe and effective for the purpose intended.

(d) After the effective date of the final regulation, any such OTC drug product initially introduced or initially delivered for introduction into interstate commerce that is not in compliance with this section is subject to regulatory action.

Interested persons may, on or before August 9, 1983, submit to the Dockets Management Branch (HFA–305), Food and Drug Administration, Rm. 4–62, 5600 Fishers Lane, Rockville, MD 20857, written comments, objections, or requests for oral hearing before the Commissioner. A request for an oral hearing must specify points to be covered and time requested. Three copies of all comments, objections, and requests are to be submitted, except that individuals may submit one copy. Comments, objections, and requests are to be identified with the docket number found in brackets in the heading of this document and may be accompanied by a supporting memorandum or brief.

Comments, objection, and requests may be seen in the office above between 9 a.m. and 4 p.m., Monday through Friday. Any scheduled oral hearing will be announced in the **Federal Register.**

Interested persons, on or before June 11, 1984, may also submit in writing new data demonstrating the safety and effectiveness of those conditions not classified in Category I. These dates are consistent with the time periods specified in the agency's final rule revising the procedural regulations for reviewing and classifying OTC drugs, published in the **Federal Register** of September 29, 1981 (46 FR 47730). Three

copies of all data and comments on the data are to be submitted, except that individuals may submit one copy, and all data and comments are to be identified with the docket number found in brackets in the heading of this document. Data and comments should be addressed to the Dockets Management Branch (HFA–305) (address above). Received data and comments may also be seen in the office above between 9 a.m. and 4 p.m., Monday through Friday.

In establishing a final rule, the agency will ordinarily consider only data submitted prior to the closing of the administrative record on August 10, 1984. Data submitted after the closing of the administrative record will be reviewed by the agency only after a final rule is published in the **Federal Register**, unless the Commissioner finds good cause has been shown that warrants earlier consideration.

Mark Novitch,

Acting Commissioner of Food and Durgs.

Margaret M. Heckler,

Secretary of Health and Human Services.

Dated: May 19, 1983.

federal register

Friday
June 10, 1983

Part IV

Department of Labor

Wage and Hour Division

Minimum Wages for Federal and Federally Assisted Construction; General Wage Determination Decisions

DEPARTMENT OF LABOR

Employment Standards Administration, Wage and Hour Division

Minimum Wages for Federal and Federally Assisted Construction; General Wage Determination Decisions

General wage determination decisions of the Secretary of Labor specify, in accordance with applicable law and on the basis of information available to the Department of Labor from its study of local wage conditions and from other sources, the basic hourly wage rates and fringe benefit payments which are determined to be prevailing for the described classes of laborers and mechanics employed on construction projects of the character and in the localities specified therein.

The determinations in these decisions of such prevailing rates and fringe benefits have been made by authority of the Secretary of Labor pursuant to the provisions of the Davis-Bacon Act of March 3, 1931, as amended (46 Stat. 1494, as amended, 40 U.S.C. 276a) and of other Federal statutes referred to in 29 CFR 1.1 (including the statutes listed at 36 FR 306 following Secretary of Labor's Order No. 24–70) containing provisions for the payment of wages which are dependent upon determination by the Secretary of Labor under the Davis-Bacon Act; and pursuant to the provisions of part 1 of subtitle A of title 29 of Code of Federal Regulations, Procedure for Predetermination of Wage Rates (37 FR 21138) and of Secretary of Labor's Orders 12–71 and 15–71 (36 FR 8755, 8756). The prevailing rates and fringe benefits determined in these decisions shall, in accordance with the provisions of the foregoing statutes, constitute the minimum wages payable on Federal and federally assisted construction projects to laborers and mechanics of the specified classes engaged on contract work of the character and in the localities described therein.

Good cause is hereby found for not utilizing notice and public procedure thereon prior to the issuance of these determinations as prescribed in 5 U.S.C. 553 and not providing for delay in effective date as prescribed in that section, because the necessity to issue construction industry wage determination frequently and in large volume causes procedures to be impractical and contrary to the public interest.

General wage determination decisions are effective from their date of publication in the **Federal Register** without limitation as to time and are to be used in accordance with the provisions of 29 CFR Parts 1 and 5. Accordingly, the applicable decision together with any modifications issued subsequent to its publication date shall be made a part of every contract for performance of the described work within the geographic area indicated as required by an applicable Federal prevailing wage law and 29 CFR, Part 5. The wage rates contained therein shall be the minimum paid under such contract by contractors and subcontractors on the work.

Modifications and Supersedeas Decisions to General Wage Determination Decisions

Modifications and supersedeas decisions to general wage determination decisions are based upon information obtained concerning changes in prevailing hourly wage rates and fringe benefit payments since the decisions were issued.

The determinations of prevailing rates and fringe benefits made in the modifications and supersedeas decisions have been made by authority of the Secretary of Labor pursuant to the provisions of the Davis-Bacon Act of March 3, 1931, as amended (46 Stat. 1494, as amended, 40 U.S.C. 276a) and of other Federal statutes referred to in 29 CFR 1.1 (including the statutes listed at 36 FR 306 following Secretary of Labor's Order No. 24–70) containing provisions for the payment of wages which are dependent upon determination by the Secretary of Labor under the Davis-Bacon Act; and pursuant to the provisions of part 1 of subtitle A of title 29 of Code of Federal Regulations, Procedure for Predetermination of Wage Rates (37 FR 21138) and of Secretary of Labor's Orders 13–71 and 15–71 (36 FR 8755, 8756). The prevailing rates and fringe benefits determined in foregoing general wage determination decisions, as hereby modified, and/or superseded shall, in accordance with the provisions of the foregoing statutes, constitute the minimum wages payable on Federal and federally assisted construction projects to laborers and mechanics of the specified classes engaged in contract work of the character and in the localities described therein.

Modifications and supersedeas decisions are effective from their date of publication in the **Federal Register** without limitation as to time and are to be used in accordance with the provisions of 29 CFR Parts 1 and 5.

Any person, organization, or governmental agency having an interest in the wages determined as prevailing is encouraged to submit wage rate information for consideration by the Department. Further information and self-explanatory forms for the purpose of submitting this data may be obtained by writing to the U.S. Department of Labor, Employment Standards Administration, Wage and Hour Division, Office of Government Contract Wage Standards, Division of Government Contract Wage Determinations, Washington, D.C. 20210. The cause for not utilizing the rulemaking procedures prescribed in 5 U.S.C. 553 has been set forth in the original General Determination Decision.
